HORTICULTURE.

GERANIUMS

You may call them our Hobby, our Specialty, our Leader, or whatever you like. We have on hand an immense stock ready for immediate shipment from 3-in. pots at \$3.00 per 100 in the best assortment of standard sorts in the country, or we will book your order for your next season's supply at \$18.50 per 1000 from 2-in. pots; rather better than bothering about carrying your stock and propagating them yourself, don't you think?

NOVELTIES: For \$5.00 we will send one each of 50 sorts our selection of 1910 novelties including the best from Bruants, Lemoines and Boucharlots, the acknowledged European leader among geranium originators.

We always have on hand a stock of Coleus, Alternantheras, Achryanthes, Heliotrope, etc., at \$2.00 per 100 for 2-in. and \$3.00 for 3-in.

We are booking orders for CANNAS and DAHLIA ROOTS for next season

R. VINCENT, JR., & SONS CO., White Marsh, Md.

One Great Aim of Horticulture

Is to help buyers to buy, and sellers to sell. This it does through its advertising pages, but in addition, during the last few months we have passed along to firms who advertise in our columns: 25 inquiries for greenhouse building material, 28 for boilers and heating apparatus, 22 for pipe and steam fitting, 31 for bulbs, 16 for rose plants, 7 for bedding plants, 31 for vegetable plants and seeds, 5 for paint and putty, 9 for pumps, 6 for wood preservatives, 26 for fertilizer, 19 for insecticides, 23 for paper boxes, 8 for engines, etc., etc.

These inquiries were referred to our advertisers where possible—firms who have shown their confidence in HORTICULTURE by giving us their patronage.

The advertising department of HORTICULTURE gives personal attention to such inquiries, aiding buyers and sellers in getting together, not considering its full duty done, as soon as the ad. is printed—as will be seen by the above partial list.

Are you getting this service? If not a regular ad. in HORTICULTURE will entitle you to it.

Better try this out at once. You lose business by delay. Ask our Advertising Department about it.

DAHLIAS Every Day in the Year

Seasonable Notes of Culture on Florists' Stock

CYCLAMEN

If you have not your cyclamens in frames you should lose no time in placing them there, as there can be no better place for these plants until the end of September. You can fix your sashes on a temporary framework about six inches above their right elevation. Avoid placing any heavy shade over the plants for it only causes them to make a soft and spindly growth. It is better to provide lath shading which can be placed over the sashes and allows an indirect solar influence which will keep them in good stocky state. Spray about once a week with some form of nicotine extract to keep down thrips which I think is better than fumigating. Give a light overhead spraying two or three times a day during these hot days. If possible have the soil sterilized for the last shifts for it will help to keep down attacks of the mite. Be careful that they do not become pot-bound. Also give very careful watering and occasional spreading out as the plants begin to crowd one another.

CARE OF ORCHIDS

Such species of cattleyas as *labiata*, *Trianae*, *Schrøderae* and many others will now be in active growth and should have a generous supply of water at the roots. Give them a light syringing overhead once or twice a day. While the warm nights continue leave a few inches of air on the top ventilators to prevent too much moisture in the atmosphere for the majority of cattleyas do not like too much humidity. As new growth begins to mature the quantity of water should be decreased gradually until only enough is given to keep the plants from shriveling. Syringing will in most cases almost accomplish this. Give *Cœlogyne cristata* a cool moist and lightly-shaded position. This is an air-loving subject so admit plenty of fresh air at all times now. They will need plenty of water at the roots during their growth. It will be found very beneficial to apply manure water in a weak form at first once a week so as to have good well-matured bulbs, which will mean a good lot of flowers next winter. In sunny weather syringe at least once a day for insect pests. Look over the plants often for scale. Never forget that cleanliness is one of the great points in the growing of orchids.

FERNS FOR DISHES

Where you have a lot of young ferns of good size in flats you should pot them up into 2-inch pots, using any good ordinary potting soil to which leaf mold and sand has been added to make it porous. Place them where a couple of inches of sand or coal ashes can be spread on a bench, so that they will not be continually drying out. Plunge the pots up to the rims and shade the house, but not too heavily as ferns require as much light as can be given to them, exclusive of the scorching sun's rays. Maintaining a free circulation of air, keeping the atmosphere as cool and as moist as possible as they like the air heavily charged with moisture. Examine the plants morning and afternoon, for if allowed to

suffer from drought at the roots great injury will be inflicted on your young stock. By giving them a little care during the summer months you will have stock far enough advanced by October and up to the last of December to meet the demand after the first real good killing frost which makes flowers scarce outside. A great variety of ferns can be used for small ferneries. A few good ones are *Aspidium tsussimense*, *Davallia stricta*, *Nephrodium hirtipes*, *Microlepia hispida*, *Onychium japonicum*, *Pteris cretica* Mayii, *P. cretica albo-lineata*, *P. Ouvardi*, *P. serrulata cristata*, *Cyrtomium falcatum*.

GERANIUMS FOR WINTER FLOWERING

Give these plants shifts until you have them in their flowering sizes, either 5 or 6-inch pots. Pinch the tops out so they will grow into compact shape. A good compost is three parts of good loam and one part of well-decayed manure. Grow them along in a light house, picking off all the flower trusses during the summer. Ventilation is one of the most important points in growing geraniums successfully and all the air possible should be allowed until the cool weather arrives when they should have a night temperature of about 55 degrees to make them flower freely.

MIGNONETTE

If this crop is wanted for early winter the seed should be sown now where it is expected to bloom. The beds should be from 8 to 10 inches deep. Mignonette likes a rich compost—say one load of cow manure to three of sod that was taken from a pasture lot last fall and heaped up. After the benches have been filled and the top surface made fine, draw crosswise and also lengthwise of the beds straight lines twelve inches apart each way, then sow the seeds where the lines cross, placing four or six seeds at each junction. After the seed is sown and covered water with a fine rose to settle the soil around the seeds. When the plants are up and showing their second pair of leaves, thin to the strongest plant. It is very important to keep them tied up and there are several ways of doing this. All the air should be left on the house until you think there is danger of frost. When the cool weather comes run your temperature anywhere from 45 to 48 degrees at night. Keep a watch out for the cabbage worm and when first seen dust with Slug Shot, for if not kept in check they will soon eat up your plants.

NEPHROLEPIS

These ferns should not be too heavily shaded; give only just enough to break the direct rays of the sun when it is powerful for it is of great importance that they have light in the fullest measure if you want stock of good substance. Plants will now advance very rapidly, and in all weathers these ferns must have every encouragement to promote a good stocky growth, by giving liberal supplies of water at the roots, and by keeping moisture in the air by damping down the paths and under the benches frequently. Give proper ventilation to secure a nice gentle circulation of fresh air through your house. Where these ferns were planted in the spring for stock they should now be making an abundance of nice runners that can be potted up and grown on.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Asparagus Sprengeri*; *Annuals for Late Cutting*; *Compost for Bulbs*; *Care of Young Roses*; *Freelias*; *Lilies for Fall*.

Will you
do it?

Horticulture, with this issue, enters upon a new regime. "Once a subscriber always a subscriber" is the almost invariable rule with the readers of this paper.

Of course there are occasional exceptions but these are so comparatively few that they need not be considered. This most gratifying condition we attribute to the ex-

cellence and permanent value of the reading matter we have been enabled to supply. So it is not the regular patrons of the paper that we here address but those who may chance to read these lines but are not yet subscribers. We would respectfully ask all such to glance over the index to the last volume of HORTICULTURE which appears herewith as a supplement and note what a vast amount of good and instructive material is there listed. And further consider that this covers only a period of six months for which subscribers pay just fifty cents! Can you get a better equivalent for the money? Consider further the contents of the advertising department—that great and unimpeachable barometer of the horticultural industries of the country and we believe that after a little reflection you will conclude to send your dollar for a year's subscription to HORTICULTURE. You will find yourself in the best sort of company and the man who has "no time to read the papers" will soon appear to you, as he does to us, as a hopeless "back number." Just one word to those who are subscribers—if each one should send in one new subscriber the circulation of HORTICULTURE would exceed that of any publication in its line in this country.

Watch out Some of the large dealers in forcing bulbs and similar material notice a lack of enthusiasm of late among the trade buyers and this they interpret as an indication that the high pressure methods of recent years, intensified by the increase of competition, have forced the smaller growers into an uncomfortable position, occasioning much disquietude as to the outlook. Unquestionably the small grower is bound to suffer in a disproportionate degree from the reduced wholesale values and more exacting market for his product which is the inevitable result of the advent of extensive operators and large capital into the business which he has heretofore been able to control to his own advantage. Overproduction, with unexpected fluctuations and congestion at certain times, is sure to derange and unbalance whatever semblance of system and stability has existed before and conditions more or less chaotic are bound to ensue. No one will question the assertion that the time has come for closer figuring in all lines of commercial floriculture and that the admonition to all to "watch out" is timely.

An ethical question A correspondent has sent in for our perusal a clipping from a Baltimore paper wherein it is stated that certain Holland firms have sent in bids in competition with American dealers, for supplying about a quarter million of bulbs for the parks. Our friend submits that such competition hurts the florists and seedsmen of America and is "an imposition on American trade that should not be tolerated." The principle involved is one that has been a subject of debate as long as we can remember. It might be suggested as a remedy against foreign bidding on public orders that the laws should specify that the buying be done at home, but this restriction would be easily overcome and its purpose defeated by transacting the business through Custom House brokers or direct agents for the foreign houses. If any of our readers have views on this subject which they would like to publicly express we shall be glad to give space in our reading columns to such. Just where to draw the line as to who is properly entitled to wholesale rates and what protection should be given by the producer to the intermediary dealer is a question of vital importance to all departments of the trade.

A HIVE OF INDUSTRY.

There are a few horticultural establishments where there seems to be no dull season and "slack times" is something unknown. The A. N. Pierson place at Cromwell, Conn., is one of them, as anybody who has taken a look over that vast hive of industry will agree.

Stopping off at Cromwell for a little while one afternoon recently we found the indefatigable Wallace R. and his army of employees hustling "like all possessed" as usual. It takes a big output of stock and big income of money to keep such an establishment going and neither of these requisites is lacking. New equipment and construction are constantly going on. The latest notable addition is two 100 H. P. boilers and a 70 x 382 ft. King house. This house has been planted with 12,300 Dark Pink Killarney roses, which shows what Mr. Pierson thinks of that promising newcomer. Among the other recently introduced roses held in high favor, Prince de Bulgarie stands well, and it requires but a look at its splendid style and vigor in the benches or at a jar of the cut blooms with their crisp, dainty pink buds and rich dark foliage to convince one that in this rose we have a stayer with a big future.

In yellows, Mrs. Aaron Ward is a veritable queen, and young stock has had a remarkable sale, but Lady Hillingdon stands out as an even greater acquisition. Another debutante is Budlong's Double White Killarney, which forms a big full bud and is pronounced by Mr. Pierson to be "the greatest rose ever introduced into this country" and bound to take the place so long monopolized by Kaiserin as a white rose for summer cutting. Red Killarney, fully described in former note, will be given dissemination during the coming year. The demand for young stock this season has been unprecedented, the call for grafted

Rose Prince de Bulgarie

being about two to one as compared with own-root stock. The output thus far has been close to a million and a quarter here.

Chrysanthemum rooted cuttings are also experiencing a very active season. Three hundred thousand are in the cutting beds now, with orders on file for the greater part of them as soon as they are sufficiently rooted

DAHLIA WOLFGANG VON GOETHE.

The picture herewith shown is of this splendid Cactus dahlia as grown last season at Mt. Desert Nurseries, Bar Harbor, Me. The photograph was taken August 20. Wolfgang von

Goethe is one of the newer German varieties. It is a splendid grower and free bloomer. The flowers are apricot with carmine shadings and are very desirable as cut flowers.

to send out. The output so far this year is about half a million. Among the most sensational varieties is Chadwick Supreme, a beautiful dark pink sport which originated here and of which 16,000 are to be planted; Doerner's triplets, Patty, pink, Merry Jane, yellow, and Dolly Dimple, light yellow, are highly prized by Mr. Pierson.

Syracuse, N. Y.—This city is experiencing the worst scourge of caterpillars and borers known for many years. In years past people were permitted to plant as many shade trees as they chose, and the result is that in many streets they have grown together, and it is only rarely one can find a really perfect tree. The consequence of close planting affords the caterpillars an undisputed field to work over. If they keep up their work of devastating the trees as they have the past two weeks there will be very little foliage left in a week. Quite a number of the people are placing sticky fly paper around the trunk of the trees in the hope of preventing the pests from crawling up, but with poor success. Why is it that some will pay fifty or one hundred dollars to have a little job done to their automobile, yet begrudge paying an experienced man a fair wage to do garden work?

June 27, 1911.

HORTICULTURE: Our advertisement of Peonies this last month paid us very well, and we are pleased with results.

T. C. THURLOW'S SONS, Inc.,
West Newbury, Mass.

H. T. ROSE KRONPRINZESSIN CECILIE.

One more in the series of illustrations of sterling new roses appears this week on our cover page. For this, as for the preceding pictures, we are indebted to H. A. Dreer, River-ton, N. J. This rose is Queen of the garden at this season of the year and festivals and exhibitions in her honor have been held all over the northern hemisphere during the past few weeks. In the H. T. section are centered the hopes of rose lovers in latitudes too severe for the Teas and each year sees the advent of something loudly proclaimed. The variety Kronprinzessin Cecilie was introduced by Schmidt in 1908 and has done well in the trial grounds at various places. The color is silvery pink and it is a very free bloomer. Its form and vigor are well shown in the picture.

A GENEROUS BEQUEST.

The will of the late Dr. C. G. Weld, a well-known patron of horticulture, and frequent exhibitor at the shows of the Massachusetts Horticultural Society has been filed, and among the bequests are his fine estates in Brookline and Boston, which go to Brookline and Boston respectively, for park purposes.

Boston, Mass.—P. J. Donohue, formerly Boston manager of the Waban Rose Co.'s salesrooms, has been appointed manager of the Boston Rose Co., taking the place of Martin Lally, who is now with Newman, the florist, on Tremont street.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

To Members:

Secretary Dorner is sending to each member of the Society a message calling for just a little effort on the part of each individual member, and it is earnestly hoped that every member will respond promptly. It is requested that each member send in one new name for membership in the Society. There is not one member that cannot easily do so, and this action, by increasing the membership, would mean a great deal for the welfare of the Society and the trade in general. As the secretary points out in his message, the florists are greatly indebted to the Society for its excellent work in the past, and a large membership roll will most certainly give it strength when there are wrongs, local or national, to be righted in the future.

The Society needs the support of all the trade, and each member should see that every commercial establishment in his locality is represented in this national organization. Open the campaign now by securing one new member. Take advantage of the local club meetings and summer outings to talk it up with those in attendance, pointing out that each name added to the list increases the usefulness of the Society and makes it stronger when it has a case to present before the courts, the legislatures, the express companies, the interstate commerce commission, the railroads, or any other body which has power to extend or withhold privileges.

In other lines of business grievances are quickly removed by close organization of the interests affected, and our difficulties in making new laws and amending old ones would be greatly reduced if we could present a more united front and batter down the opposition. Farmers and others get what they want in this way, and there is no reason why we should not get prompt consideration, if each member of the organization does his duty now. The work is light; secure one new name now, and this strengthened membership will just double the power of the organization in acquiring rights and privileges too long denied us.

I say again, we need added force, the strength of numbers. Business conditions grow more strenuous every year, and we need the assistance of everyone in every effort for the general good. The Society exists for the good of all, and every man in the trade should help.

GEORGE ASMUS, President.

Department of Plant Registration.

Public notice is hereby given that Hoerber Bros., of Chicago, Illinois, offer for registration the rose described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description. — Parentage unknown. Appears to be a cross of Killarney and Golden Gate. Has the habits of Kill-

arney, and flowers the shape of Golden Gate, but much larger. Growth very strong and free; height 4 1/2 to 5 feet; color bright pink, a shade darker than Killarney; an easy grower and free from disease; foliage strong and clean; a fine forcing rose, at its best from October to May. Name, "Wilhelmina."

H. B. DORNER, Secretary.

June 22, 1911.

FLORISTS' CLUB OF WASHINGTON.

Arrangements for the annual outing and basket picnic of the Florists' Club of Washington are now practically completed. The outing will be held at Huntville, Md., where exclusive use of the grounds has been arranged for on July 12. The Baltimore & Annapolis Electric Railroad has provided three special trains for the accommodation of the club members and their families. Most of the florists will close their places of business at noon on July 12, so that everyone may enjoy the outing. Members of the national society will be present, including Philip Breitmeyer, former mayor of Detroit. Plans have been made for the holding of all sorts of sports and games. There will be a ball game between the greenhouse men and the retailors. A tug of war is also scheduled. W. R. Smith, of the Botanic Garden, will give a talk on trees, illustrating his subject with specimens growing on the picnic grounds. The sale of tickets is in the hands of a committee composed of John Robertson, Jr., W. W. Kimmill, Otto Bauer, Edward Schmid, and W. A. Bolinger. The regular monthly meeting of the Florists' Club will be held July 6 at 1214 F street. At this meeting final action will be taken on all matters pertaining to the outing. The subject of attending the annual meeting of the S. A. F. & O. H. at Baltimore in August will also be discussed. On this occasion the place of meeting, Gude's floral store, will be converted into a grotto and rathskellar and the club will be treated to a crab feast by Edward Schmid.

DETROIT FLORIST CLUB.

This club had the rare opportunity at its last meeting to listen to H. B. Dorner of Urbana, Ill., who, in his scholarly way, explained the minutest detail of the work being done by the experiment station in Urbana for the benefit of the florist. Prof. Dorner described the slow but successful efforts to obtain money from the Illinois legislature to establish this experiment station. As Prof. Dorner promised to write his talk down for the benefit of the trade at large it would be superfluous to say much about it now. Still so much may be said that success was due in a great part to the activity of the Illinois florists.

It was a discussion of vital importance and it is most desirable that such florists in whose state the legislature meets next fall should at once take steps to bring before their legislature the necessity for establishing experiment stations and schools such as the Illinois florists and the farmers throughout the country enjoy.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

Today, June 29, as we go to press, the Sweet Pea Society is busy with its annual meeting and exhibition at Philadelphia. Full details will be given in our next week's issue. President W. Altee Burpee, governed by the original proposition to hold the meeting on the 23d, had engaged passage on the Olympic, sailing for Europe on Wednesday, 28th, and consequently is unable to be present on this occasion. In lieu of the usual address, therefore, he left in charge of Secretary Bunyard a letter, of which the following is a copy:

Harry A. Bunyard, Esq., Secretary.

Dear Mr. Bunyard: Will you kindly express to our fellow members of the National Sweet Pea Society of America my sincere regrets that instead of being present to deliver "The President's Address," for which I am scheduled on June 29th, I am compelled to offer "an apology and explanation."

The "apology" will surely be accepted when you offer the explanation that it was only after our March meeting in Boston, when the date of the Philadelphia Exhibition was fixed for June 23rd and 24th, that I engaged passage for myself, Mrs. Burpee and sons on the "Olympic" June 28th, so that we could attend the exhibition of the National Sweet Pea Society of England, which we were compelled to miss last year.

Kindly explain also how deeply I regretted the necessity for deciding with you and other fellow members, after conference two weeks ago with members of The Pennsylvania Horticultural Society, that, owing to the lateness of the season, it would be necessary to postpone our exhibition at least a week.

While "on the briny deep" I shall be with you all in spirit and shall look forward eagerly to receiving July 4th, upon arrival at Southampton, a cablegram telling of the success of this third annual exhibition. I feel quite sure that under your able management, and you are well entitled to be called "The Father of the National Sweet Pea Society," assisted by our vice-president and other officers, together with such willing helpers as Messrs. Craig, Pennock, Rust, Watson, Michell, Earl and Kerr, the exhibition will be a decided success.

Such work as you and your co-laborers have done so effectively at the two previous exhibitions of our infant society is of lasting value in bringing to the notice of the trade, and of growers generally, the importance of the sweet pea as deservedly the most popular of all flowers grown from seed.

But should I continue in this strain I might tire you with expressions of my love for the sweet pea, even more than if I could have been able to deliver in person "President Burpee's Address," for which your schedule has me booked.

Only two words more in closing. At our meetings we have never discussed politics. Your present president, therefore, does not know the political opinions of his fellow members. Whatever their politics may be, however, I think that most of our members will agree that the ex-President of the United States acted wisely in urging his successor President Taft, who certainly, despite all criticisms, will make good as an honest, intelligent executive.

Now would I be asking too much for me to suggest that upon reading this letter if you think it worth reading that some member put in nomination the name of William Sim of Cliftondale, Massachusetts, and that another member should then move that the nominations for president be closed. Mr. Sim needs no introduction: as vice-president he has been most earnest and effective in his work for the advancement of the interests of our Society, and I feel sure that this suggestion of your retiring president will meet with the hearty approval of all.

Any members who may remain over Friday are cordially invited to visit Fordhook upon the trains leaving Reading Terminal at 1:02 and 2:02 Friday. Will you kindly announce that railway tickets and full information will be gladly furnished by Mr. Earl or Mr. Kerr.

With renewed assurances of my deep re-

gret in not being with you all at Philadelphia and Fordhook, I remain,

Yours for Continued Progress in
SWEET PEAS

Just as our forms are closed a telegram from Secretary Bunyard states that the exhibition and opening session Thursday afternoon are a great success. In the absence of President Burpee, Vice-President Wm. Sim occupied the chair. An address of welcome was made by Robert Craig and J. K. M. L. Farquhar responded. The Morse Cup was won by Burpee with a magnificent exhibit.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual rose and strawberry exhibition came off last Saturday and Sunday at Horticultural Hall, Boston. There were excellent displays in both sections. Roses showed the freshening effect of recent rains and the strawberries and other seasonable fruits were never better in quality. The show was free, and attracted an attendance of about 2,000 visitors. Among the special attractions was an extensive general display of shrub bloom, peonies, etc., from R. & J. Farquhar & Co. The awards for flowers are as follows:

Hardy roses: 1st, Miss S. B. Fay. John C. Chaffin Fund (for amateurs only): Three blooms of any white perpetual rose; 1st, Robert Seaver, Frau Karl Druschki. Three blooms any pink hybrid perpetual rose: 1st, Robert Seaver, Mrs. John Laing; 2d, the same for Mrs. R. G. Sharrman Crawford. Three blooms any red hybrid perpetual rose: 1st, Robert Seaver, Ulrich Brunner; 2d, the same, for Genl. Jacqueminot. Three blooms of any new hybrid perpetual rose not offered in any American catalogue previous to 1900: 1st, Robert Seaver, Frau Karl Druschki. Hybrid perpetual roses, twelve named varieties, three of each: 1st, Miss S. B. Fay. Six named varieties, three of each: 1st, Miss S. B. Fay; 2d, W. J. Clemson. Six named varieties, one of each: 1st, Miss S. B. Fay. Best collection of hybrid tea roses, not less than twelve varieties: Miss S. B. Fay. Best three blooms of a variety introduced since 1905: Robert Seaver, J. B. Clark. Six blooms of Frau Karl Druschki: 1st, Miss S. B. Fay; 2d, W. J. Clemson. Six blooms of Mrs. R. G. Sharrman Crawford: 1st, Miss S. B. Fay; 2d, W. J. Clemson. Six blooms of Margaret Dickson: Miss S. B. Fay. Six blooms of Ben Cant: 1st, Miss S. B. Fay; 2d, J. T. Butterworth. General display: 1st, Miss S. B. Fay. Sweet Williams—display: 1st, Wm. Whitman; 2d, George Page; 3d, Wm. Whitman. Herbaceous Peonies: T. C. Thurlow & Sons Co. Collection of twelve named varieties, double: 1st, T. C. Thurlow's Sons Co. Specimen bloom, double: 1st, Wm. Whitman; 2d, T. C. Thurlow's Sons Co. Collection of six named double varieties, white: 1st, T. C. Thurlow's Sons Co. Vase of twenty-five blooms, double, pink or rose: 1st, T. C. Thurlow's Sons Co. Vase of twenty-five blooms, double, red or crimson: 1st, T. C. Thurlow's Sons Co. Campanula Medium collection: 1st, Wm. Whitman; 2d, George Page; 3d, Wm. Whitman.

Honorable mention was given to J. T. Butterworth for three hybrid orchids; R. & J. Farquhar & Co., for hybrid Digitalis; also for collection of peonies; E. J. Saylor, collection of peonies; also for peony Tourneselle.

In strawberries the varieties most prominent in the prize winning were Black Beauty, Marshall, Downing Bride, Heritage, Abington, Barrymore, Minute Man, Parson's Beauty.

HORTICULTURAL SOCIETY OF CHICAGO.

The executive committee of the Horticultural Society of Chicago has voted not to hold the usual fall flower show in the Coliseum building this year, but to hold a big exhibition next March in its stead. A dahlia and

aster show will be held at the Art Institute in September, the exact date to be determined by the seasonable conditions. A premium schedule for this exhibition is now being printed and will be issued shortly.

A premium schedule for the spring show next March is being prepared by a special committee. It will offer prizes as large as usually given in the fall show at Chicago. It is hoped in the spring exhibition to obtain a more varied display, and to arouse renewed public interest in the flower show.

J. H. BURDETT,
Secretary.

LOUISVILLE WANTS THE S. A. F. IN 1912.

Fifty florists from Louisville and New Albany met last night at a dinner at the Louisville Hotel as guests of the Louisville Convention and Publicity League for the purpose of arranging plans to secure for Louisville the 1912 convention of the National Society of Florists.—*Louisville (Ky.) Courier Journal*.

CLUB AND SOCIETY NOTES.

The regular meeting of the Chicago Florists' Club will take place at the Union Restaurant July 6. Walter S. McGee of the Wizard Brand Fertilizer Co. will read a paper on fertilizers.

A committee, consisting of J. C. Quinette, P. A. Chopin and Paul Abele has been appointed to look out for the interest of the florists when the so-called "fly ordinance" comes up for passage.

The Syracuse Rose Society held their first show on the 15th and 16th. It was not a success in any way. The exhibits were not as large as expected, and the public did not patronize it as some anticipated.

Arrangements for an outing, which is an annual affair with the members of the New Orleans Horticultural Society, have been started. A committee of three, consisting of Messrs. Baker, Panter and Eble, was appointed to see to the arrangements. No definite date has been set for the outing, but it is proposed to have it about the middle of July.

A HIGH HONOR AWARDED.

The H. H. Hunnewell triennial premium for the most tastily laid out and planted estate, in a competition extending over three years, has been awarded to Col. Harry E. Converse of "The Moorings," at Marion, Mass. The garden committee of the Massachusetts Horticultural Society, which has the duty of the bestowal of this honor, visited "The Moorings" on Monday, June 26, and were escorted over its various attractions by Col. Converse and his superintendent, D. F. Roy, to whose skill as a gardener, industry and judgment, the credit is due for the splendid development of this 300 acre estate. Great advancement has been made during the past twelve months, of which we shall have more to say later on.

June 28, 1911.

HORTICULTURE. Enclosed please find \$1.00, my subscription to HORTICULTURE, which has been a valuable asset in the past, hoping it will be even greater in the future.

O. A. H., Conn.

Obituary.

Peter Ott.

Peter Ott, head florist for the Baltimore & Ohio railroad at Mansfield, O., and said to be the oldest florist in the city, died at his home on June 11. He had been employed by the road twenty-seven years.

Edward B. Voorhees.

Dr. Edward B. Voorhees, a well known authority on fertilizers, director of the New Jersey Agricultural Experimental Station and professor of agriculture at Rutgers College, died June 6, at New Brunswick, N. J.

Richard Metcalf.

Richard Metcalf, florist, died at his home, 1041 Jefferson avenue, Brooklyn, N. Y., June 18. He was born in Ripon, England, in 1841, coming to this country while a young man. In recent years he has conducted three establishments in Brooklyn.

Louis Magin.

Louis Magin, a retired florist, was run over and killed on the railroad near his home in Maplewood, St. Louis, Mo. He was 60 years old and president of the social club in Maplewood called the Greenhouse Club. He leaves a widow and three children to mourn his loss.

Mrs. Frank McMahon.

A telegram has been received announcing the death on Tuesday night, June 27, of the wife of Frank McMahon, rose grower, of Seabright, N. J. Details are lacking, but we take opportunity to express our deep sympathy with Mr. McMahon in his great sorrow. Mrs. McMahon was a lady of rare and lovable personality.

NEWS NOTES.

Rockton, Ill.—Joseph H. Farnsworth has purchased the greenhouses of Roscoe Gammon.

Lima, O.—Adolph Fruck will now do business under the name of Adolph Fruck & Son, as he has taken his son into partnership.

Gouverneur, N. Y.—The Brainard greenhouses have been leased by John T. Humphrey of Rome, N. Y., and he will take possession about Oct. 1.

Omaha, Neb.—C. C. Colie has been appointed manager for the Stark Bros. Nurseries & Orchards Co. He was formerly their representative at Carthage, Mo.

West Grove, Pa.—American Pillar roses are now in full bloom at The Conard & Jones Company nursery. One lot was planted last June, another on July 12th, from 2½-inch pots, both a mass of bloom. Anyone seeing these plants can easily understand why this variety created such a sensation at the Temple Show, London, last year. It would be interesting for rose lovers to note and see the difference between this and other varieties. Philadelphia is also showing up grand. The recent rains have brought out the color wonderfully.

Coldwell Lawn Mowers

Hand, Horse and Motor

Coldwell's Motor Lawn Mowers

Will do the work of three horse
lawn mowers — and do it better

☐ They will mow up 20 per cent grades. ☐ They leave no hoof prints as horses do.
☐ They will roll the lawn smoothly. ☐ They do away with the expense of two
men and three horses. ☐ They are of no expense when not in use. ☐ They
are simple to operate and economical. ☐ They are a necessity on every large lawn

During Recess

Opening at Waretown.

Once more the date for the time-honored ceremony of opening for the season the hospitable clubhouse at Waretown on Barnegat Bay came around; once more generous Commodore John Westcott got into the harness as host—the occupation he likes best in all the world; and once more, on Friday, June 23, did the fortunate recipients of an invitation make their way to the spot where good cheer abounds and dull care is forgotten. From Washington came Wm. R. Smith, John Clark and W. F. Gude; from Summit, N. J., J. N. May; from Boston, J. K. M. L. Farquhar and Wm. J. Stewart; from Philadelphia, John Burton, Geo. C. Watson, S. S. Pennock, Robert Craig, Robt. Kift, David Rust, George Craig, W. B. Westcott, Geo. Anderson, D. Donoghue, Dr. P. Lane and R. McKenna.

The visitors brought with them a set of Balzac—16 volumes—for the library, and presentation of same to Mr. Westcott was eloquently done by Mr. Craig.

Blue fish were beginning to "run" in the bay and some nice catches for so early in the season were made.

All Waretown events are good, but this was "the best ever." May the genial proprietor live many years to enjoy the pleasures of disseminating sunshine among his brother men.

St. Louis Picnic.

The St. Louis florists' picnic will be held July 20th at Ramona Park. This was decided by the committee that met last week. The wholesalers have agreed as usual to close up at noon on that day. A great many retailers will also close for half a day. A fine band has been engaged for the occasion. Everything will be free, the florist club paying all the expenses.

The committees are composed as follows: Reception—W. J. Pilcher, J. J. Beneke and F. J. Fillmore. Games—Geo. Schriefer, Al. Ginns, F. Aloes, Otto Bouring, Paddy Patton, Frank Windler, all employees of wholesale houses.

Baseball contests between the Wholesalers and Retailers will again be one of the features.

The Wholesale Quartette, composed of employees of the W. C. Smith's wholesale house invited trade paper correspondents to one of their rehearsals last week. Mr. Patton's song, "Watch Us Grow," was like a barrel of lard—it was well rendered; so were all the other songs they sang. They will surprise some of the knowing ones at the florists' picnic.

Chicago Bowlers.

Members of the Chicago Summer Bowling League are keeping up their interest and Mrs. McKellar and Mrs. Asmus bowled with them last week. Some good playing is expected from the Chicago bowlers at the convention.

Scores for June 20th were as follows:

Kraus,	193 161 159	Olsen,	191 208 166
Lorman,	188 139 234	Wolf,	200 145 142
St. Louis,	143 110 187	A. Zeck,	206 152 176
J. H'ner,	147 123 186	Graff,	190 169 209
J. Zeck,	167 199 192	Asmus,	134 151 147
Ayers,	174 191 161	Stevens,	247 222 206
A. H'ner,	112 212	McKellar,	171 143
Mrs. A. m's,	— 122	Mrs. McK.,	— 162

New York Bowlers.

Scores recorded on Friday evening, June 23, 1911, were as follows:

Manda,	170 208 162	Childwick,	200 203 205
Scott,	166 158 169	Nugent,	111 108 156
Kakuda,	156 213 158	D'n'ld's'n,	199 196 199

The Chicago Carnation Co.'s baseball team lost out, 16 to 12, last week when playing the Washington Street team, Lockport team being disabled.

The Greek-American florists' outing will take place on July 6th on the steamer John Sylvester in New York harbor.

GREENHOUSES BUILDING OR CONTEMPLATED.

Plymouth, Ind.—Jacob Jordan, one house.

Chicago, Ill.—Frances B. Stanmeyer, one house.

Hempstead, N. Y.—Henry Weston, sweet pea house.

West Newbury, Mass.—Chas. F. Newell, additions.

Brooklyn, N. Y.—Henry Hession, two houses, each 59 x 192 feet.

Hobart, Ind.—A. Londonberg & Sons, two houses, each 27 x 100 feet.

Murray Hill, N. J.—Lyman B. Codrington, large sweet pea house.

Pencoyd, Pa.—West Laurel Hill cemetery, four houses 28 x 150 feet.

Yonkers, N. Y.—S. Untermeyer, Grey-stone, Lord & Burnham house 30 x 110.

Elmhurst, Ill.—Wendland & Keimel, ten houses 34 x 200; one house 27 x 200.

Saginaw, Mich.—The Wm. Roethke Floral Co., rebuilding range of houses.

Detroit, Mich.—Gust. Taepke is remodeling four houses on his Elmwood avenue plant.

Dedham, Mass.—R. & J. Farquhar & Co., one house 50 x 200, one house 54 x 200. King construction.

Jackson, Mich.—Clara Brown & Co., chrysanthemum house, 20 x 100. Other houses are projected for the future.

Grand Rapids, Mich.—R. Yonkers, two large houses; Peter Blanksma, rebuilding two houses; Henry Smith, two violet houses.

The Boston office of the Lord & Burnham Co. has recently booked the following contracts:

Lewiston, Me., Ernest Saunders, house 33.4 x 83 ft.; Newport, R. I., H. J. Hass, one house 36 x 100; one 12 x 100; Butler Hospital, Providence, R. I., large palm house.

Among the orders just billed by the Foley Mfg. Co. is one for a range of eleven houses for Wendland & Keimel, Elmhurst, Ill., to be equipped with flat rafters and steel channel gutters. Another just completed is for the new range for Wm. Breitmeyer at Charlotte, Mich., and still another for Heller Bros. at Newcastle, Ind. A contract is just being executed for Dingee & Conard, West Grove, Pa. All are using the new style gutters and malleable iron sash bars.

PHILADELPHIA NOTES.

Leo Niessen has been on a short vacation to the city by the sea. In Philadelphia parlance this means Atlantic City, of course.

Visitors: H. F. Littlefield, Worcester, Mass.; O. Joe Howard, secretary J. Van Lindley Nursery Co., Greensboro, N. C.; W. F. Gude, John Clark, Wm. R. Smith, Washington, D. C.

¶ When Uncle Sam wants horses for war—real use, he don't select them from beauty shows nor according to looks. He buys up such as street-car horses, all he can get, and such animals that have made good by steady honest work—the animal that averages well—day after day—for they have the power of endurance that will surpass anything in the world.

¶ Cold Storage Horseshoe Brand Giganteum have the same superior power of endurance. They have proved good—have stood the storage strain, and will average higher than any brand known in flowering results. We still have a limited quantity of fully matured Giganteum of last December delivery, which are excellent Cold Storage goods. They cost a little more perhaps than some brands but they are worth a lot more we think. Try them—order now.

Not How Cheap
But How Good

PERENNIAL FLOWERS

Every florist should have a fairly representable collection of "Perennial Flowers" in his establishment be it either for the purpose of growing them for cut-flowers or plant trade. Many of the best varieties are readily grown from seed but in order to have them fairly large in the spring they should be sown in June.

We offer a very complete collection in our "Wholesale Seed Catalogue." Write for it to-day

Wreck.

Among the Chicago people severely shaken up by a collision on the Chicago & Milwaukee Electric, Sunday night, are the parents of Miss Martha Gunterberg, both of whom are quite badly hurt.

Trade Items.

The Schiller Co. have plans laid for again enlarging their store on West Madison street. Additional work room is needed to handle their trade.

The E. H. Hunt Co. is offering special inducements to buyers during the summer months. A full list of supplies will be mailed upon application. See advertisement in another part of this paper.

Chas. McKellar finds the demand for cattleyas very good this month. The Mossia and gigas are both looked upon with favor by the June brides, and

make very acceptable shower bouquets when used with lily of the valley.

The horse show of the South Side Country Club last week, which is a society event, called for the use of cattleyas for corsages and table decorations. There were a hundred dinner parties given during the week.

Charlotte Megchelsen, Grand Blvd. and 47th street, Chicago, has a fine new ice box and is refurnishing and redecorating her store. The color scheme of dull green and white will prevail.

John Kruchten finds his work at his greenhouse plant to be fully one month ahead of the average year. He makes a specialty of Killarney roses and, despite the unusual weather, has some of the best stock of that favorite rose to be seen.

The Chicago Flower Growers' Association at a recent meeting decided upon the location at 176 Michigan avenue, mentioned in last issue. This moves the wholesale market area another half block east. The store is being put in shape and will be ready for occupancy about the 15th of July. No choice of manager has been made yet.

The J. C. Moninger Co. have just completed their extensive catalogue, upon which they have worked for two years. It covers every want in greenhouse construction, and its half tones and coloring make it very attractive as well as useful. Their boilers are now made in Geneva, N. Y. The Moninger Co. report an unusually busy season.

Kroeschell Bros. have been given an order for a duplicate to the No. 14 boiler they exhibited at the National Flower Show at Boston. The purchaser, John Barr, of South Natick, Mass., has found it so satisfactory that he will install a second one in his new addition. The Kroeschell boilers are taking long journeys this month, one going to Vancouver, B. C., another to Great Neck, L. I., for a private place, and the third to Chas. Disler at Irvington, N. J.

Personal.

J. A. McAdams of Fort Worth, Tex., is a Chicago visitor.

Mr. and Mrs. O. P. Bassett are spending a few days in Detroit this week.

Harry Balsley of Detroit is calling on friends here, on his way back from the west.

Alex Newitt of St. Joseph, Mo., is here to attend the wedding of his niece at Joliet, Ill.

Henry Kruchten will spend a month

in Colorado, making Denver his headquarters, but spending much time in the mountains.

Alex. Newitt of the Stuppe Floral Co., St. Louis, Mo., is calling on old friends here. He was for several years with the J. B. Deamud Co.

Harry Philpott and A. T. Pyfer are planning to take their annual outing together, immediately after the next meeting of the Florists' Club, of which they are officers.

Jack Byers of the Chicago Carnation Co., left Monday for a cruise with his motor boat, on the eastern shore of Lake Michigan. He will visit the lake shore towns and return in two weeks ready for no end of hard work for the busy firm he is with.

Mr. and Mrs. Frank Pasternick have returned from their brief wedding trip, and are receiving the congratulations of their friends. Among the wedding gifts were many tokens of the regard in which the trade, both wholesale and retail, hold the groom.

Adolph Poehlmann had a very narrow escape from a serious injury June 22d. As he was stepping into his surrey at Plant "B," the horse started to run, and with the lines dragging ran to Plant "A," successfully making all the turns, but striking a post in the yard. Mr. Poehlmann was thrown violently to the ground, and suffered internal injury. His physician thinks he will soon be about again.

Flower Market Reports.

BOSTON Last week's business was excellent all through.

The first three days of the present week were the same, but at the close there is every evidence that the tide is fast ebbing and the June business, winding up the season of 1910-1911 has now passed into history. There will be very little going on for the next two or three weeks in the flower trade. As to quality carnations are fast petering out. Roses are in better shape, particularly the Carnots, which are selling at a higher figure than any others excepting Beauty. Lilies are a veritable drug. Sweet peas are seen in all grades and sell accordingly—from 25 cents up to \$1.00 a hundred, according to quality. An abundance of everything is in sight. No shortages.

The market took a decided change for the better last week, and there was business for the trade in general, and it was well divided up. There was sufficient stock, but a good portion could not be used, especially in the carnation line, which were on the sleepy side. Roses went well, particularly white, and at times not enough could be had. Killarney and Richmond were in good demand, also other roses, of which there was ample supply. Beauties were fine, and sold well, also sweet peas, lily of the valley and other material. Candidum lilies came in, and there was a good clean up on these as well as on Longiflorums and Japans.

A general shortage of **CHICAGO** first-class stock is the feature of the market as June closes. Not too short but just short enough, is the opinion of many for, after several weeks of extreme heat, trade has about reached the summer level and an abundance of stock would mean unsold stock. The June weddings have been as numerous as formerly but an absence of large decorations has been noticed. The prohibition of the use of flowers in the commencement exercises of the Chicago public schools was accepted with little grace again this year but no public protest was made. The summer roses, Kaiserin, Rhea Reid and My Maryland, are supplanting the winter ones though some excellent Killarneys are still cut. American Beauty is as much in demand locally as anything and when cut just right is shipping very satisfactorily. In fact this is the point with shippers now, to have all roses cut at just the right stage. Sweet peas of all lengths except the very long ones are still coming in plentifully and growers expect the supply to last about another month. Carnations are holding on well but quality is poor compared with cold weather stock. Excellent lily of the valley from the local growers is selling well. Fewer prairie flowers than usual are sold this

A Seasonable Hose Offer THE P/M BRAND

This brand has been made specially to our own order and specifications, and stands the rough usage of the greenhouse better than any other make at the price. Quality guaranteed. 25 and 50 ft. lengths.

16 cents per ft., couplings included.

THE BULL DOG BRAND. Next to the P/M this well known make is in great favor with florists.

16 cents per ft., couplings included.

THE 32½c. HOSE This may sound an extravagance to many and yet we are told by some of our customers that it is even more economical in the long run than anything lower priced.

32½ cents per ft., couplings included.

All hose sold by us is guaranteed

year. Plenty of ferns are in but smilax and asparagus are scarce.

Very little change, if any, was noticed in the market the past week. Business continues fair, with stock plentiful. Beauties are equal to the demand, some fairly good stock being offered considering the season. Pink roses, which have ruled short all during the month of June, are again coming in more plentifully. White roses are in heavy crop, the better grades cleaning up nicely, while the shorter grades

move more slowly. The supply of carnations is rapidly diminishing, and those now coming in are as good as could be expected at this date. Sweet peas are showing the beneficial results of the recent showers, and are improving in quality and quantity. Shasta daisies were good property up to the middle of the week, when the demand fell off. Lilies are to be had in quantity, and find a fair market. Lily of the valley is plentiful. The demand for smilax is gradually slowing up, with the supply equal to market requirements. Of Asparagus plumosus and Sprengeri there is more than a sufficiency.

Flower Market Reports

(Continued from page 17)

Local market conditions
DETROIT are normal for summer, as experienced every year, but perhaps a little advanced because of the extreme heat. Stock coming in is less than two weeks previous, which condition is more pronounced through the absence of peonies. Roses from newly planted stock are being sent in in large quantities, but being of poor keeping quality, a surplus of today does not prevent a shortage of tomorrow. Sweet peas average very good, most of them being butterfly varieties which the retail trade appreciates fully. The demand for commencement bouquets and wedding flowers has been sporadic, but insistent. On such days it was with great difficulty only that good quality flowers could be obtained.

The retail florists are experiencing the normal June demand but the wholesale markets have difficulty in supplying the material in satisfactory quality. Roses run very poor as a rule, the choice grades being practically extinct for the time being. Carnations are also very small and close up by the time they reach the market. A few very fine cattleyas are seen and such things as longiflorum lilies and lily of the valley are all right as to quality. The number of longiflorum giganteum sent to Smith by A. S. Burns, Jr., for one month was 91,000 which is believed to be a new high record for one establishment. Large quantities of Crimson Rambler bloom are being sent in and these together with double deutzia are found very useful in decorative work of any extent. Spiraea Anthony Waterer, lovely as a garden subject, lacks in color when brought indoors among bright colored flowers and while quantities of it are shipped to the wholesale markets, very little sale is found. Crimson Rambler sprays bring from 1 cent to 1½ cents per spray.

PHILADELPHIA There is very little change to report in this market since our last week's resume. It is gradually getting down to the summer level. Another week probably will inaugurate the regular summer business. The trend was rather spasmodic—fair in spots and then dull again. American Beauty roses are still fairly plentiful and selling right well all things considered. Melody is still good and sells well—holding its color and quality remarkably. The car-

" " & Spem. (100 bchs).....	15.00	to 25.00	10.00	to 20.00

nation market is fair, quality generally not very good although there are a few exceptionally fine lots to be seen. Orchids shorter in supply and moving a little better. Lily of the valley has hardened up and the stock now offered is up to regular standard. A nice improvement is also to be noted in the water lily market. These are now in good regular demand and command fair prices with no surplus. They may now be regarded as a staple article for a while. Sweet peas coming in very good and moving off nicely in large volume. Gardenias are not plentiful but enough for the demand. Shakespeare and America gladioli in evidence and seem to move well. All greens plentiful.

Trade has settled **WASHINGTON** down to something approaching summer dullness. Stock is plentiful and is coming along in fair condition. Prices are about normal. Sweet peas, scarce and poor two weeks ago, are now more plentiful and quite satisfactory. There is little to relieve the general dullness of the situation.

The flowers that are **ST. LOUIS** now coming into this market are not very choice and show considerable suffering from the dry spell—especially the outdoor stock. Roses of all kinds are poor, still the choice bring a liberal figure. Carnations are small and poor also. Sweet peas are scarce and inferior. The best stock coming in now are the gladioli and lilies. These have a large demand and sell clean daily, gladioli bringing as high as \$8.00 per 100 and best lilies, \$12.50. Some extra good asters are coming in which bring from \$3.00 to \$5.00 per 100 and clean up.

Philadelphia, Pa.—The store furnishings, etc., of Robert A. Stewart, florist, 212 South 13th street, were sold on June 19th.

NEWS NOTES.

Duluth, Minn.—Eischen Brothers are succeeded by the Duluth Floral Co.

Boston, Mass.—The Boston Co-operative Flower Market and the Boston Flower Exchange will close every Saturday at 12 noon during July and August.

Rochester, Ind.—Shelton, the florist, has leased the Dunn Greenhouses. He will continue to grow stock at the Dunn place, while the selling will be done at the Shelton greenhouses.

Syracuse, N. Y.—The florists have reaped the largest harvest this spring they have ever had, all being practically cleaned out. Some have had to take part of their stock plants to fill imperative orders. There is no question but that each year sees a larger demand. All are anticipating a heavy call for chrysanthemums this fall, and are making preparations to meet it. There has been a greatly increased sale of flowers for graduation exercises, many of the country high schools sending in large orders for good flowers.

BUSINESS CHANCES

Here's a Mighty Fine Opportunity for a good man who knows the Nursery Business, or a firm who want a branch house.

I own one of the best greenhouse and nursery plants in the country—50,000 feet of glass is now in carnations and 130 acres in general nursery stock. I am a banker, a mighty busy man, and cannot give this enterprise the attention it deserves. A reliable nursery firm, or a competent man who possesses good business ability, will be sold a half interest at a fair price and on reasonable terms. It is desirable—but not absolutely necessary—that such a man should have a knowledge of greenhouse management and a married man is preferable. This locality is unexcelled for growing many kinds of nursery stock, and I believe it is an opportunity for a nursery firm or a capable man to establish a splendid business. If you feel that you are the type of a partner I am looking for, and can invest from \$15,000 to \$20,000 write to me at once.

V.Z., McFarland Publicity Service
Box 4, Harrisburg, Pa.

Peach bidders, who know how, wanted now.

PARTNER WANTED—An old established seed and implement house wants a live, hustling, young man to buy part interest and help in the active management of the rapidly growing business. The concern stands well in the trade and with proper help and management, can be made one of the largest in the country. All correspondence, confidential. Address Conservative, care HORTICULTURE.

HELP WANTED

Wanted First Class Grower

of Decorative Plants.

Must be experienced, a worker, single, sober and able to handle men. Responsible position. Apply with references to

A. A. MACDONALD
Duke's Farm, SOMERVILLE, N. J.

FOR SALE

FOR SALE Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick, A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 59 Montrose Ave., Brooklyn, N. Y.

MISCELLANEOUS

WANTED TO LEASE—From 15,000 to 20,000 feet of glass, within 50 miles of New York City; modern plant required, with good dwelling and outbuildings; prefer several acres. Chas. Barson, Ossining, N. Y.

Eldora, Ia.—R. C. Hindeman has been appointed manager for the Poland Floral Co.

"FUNGINE"

Metairie Ridge Nursery Co.

Harry Papworth, Pres.

New Orleans, La., June 13, 1911.

"Replying to your favor in regard to Fungine, we are pleased to say that we have found it a fine fungicide, especially on our Chrysanthemum cuttings, and all cuttings generally. Also fine for mildew on roses. It is the best fungicide we have ever tried."

Metairie Ridge Nursery Co.

Madison, N. J., June 21, 1911.

"I have sprayed our Crimson Ramblers with Fungine, and it proved a great success. Not alone destroying the mildew, but also taking the curl out of the leaves caused by the mildew. There is no remedy that I know of that will restore the leaves to their natural shape, only Fungine, and Fungine alone."

Wm. Whelan, Gdr. to A. de Bary.

CABBAGE KEPT FREE FROM WORMS.

Butterfly and Larva.

DRAKE'S GARDEN.

East Brookfield, Mass., Jan. 14, 1905.

We have used **Slug Shot** and always found it very useful. Our potato crop yielded 200 bushels to the acre. **Slug Shot** for Cabbage Worms is the best defense in the world.

Very truly, F. A. DRAKE.

Cabbage Worms.

The Cabbage Worm has spread wherever cabbage is grown. Whether early cabbage or late cabbage, in garden or field, it perforates the plant, and is of all worms one of the most disgusting, to find hidden away in the folds of the leaf.

IF YOU WANT CABBAGE FREE FROM WORMS, USE HAMMOND'S SLUG SHOT.

How to Destroy Cabbage Worms.—**Slug Shot** can be used lightly or heavily and the cabbage suffers no harm. The cabbage forms its head by the interior growth; it throws off its earlier and outside leaves, and no dust can enfold within its head. Apply **Slug Shot** with a Duster (see illustration), sieve it over the plants or full grown cabbages. The powder is very fine and goes a long way in field or garden.

What the Users say

USE KROESCHELL BOILERS, AND KROESCHELL GENERATORS AND PIPING SYSTEM: SATISFACTION GUARANTEED.

"The Kroeschell Generator purchased from you some time since is giving excellent satisfaction. It not only ADDS TO THE CAPACITY of the boiler on account of the increased circulation of the hot water circulation, and consequently less piping is required, but it also seems to MAINTAIN A STEADIER and more even temperature all over the houses where it is in use. For instance, the new house I have just completed, 43 ft. wide by 265 ft. long, and piped according to your instructions, is not varying more than two degrees all over the house at any time, and I consider that remarkable for so large a house. Another advantage is that WHERE ROSES ARE GROWN, sulphur applied to the pipes for CHECKING MILDEW is much more effective.

STEPHEN MORTENSEN, Southampton, Pa.

How U-Bar Curved Eave Houses Differ

The U-Bar construction is like a regular race horse stripped for the running. It is stripped of every heavy roof support—and is just a light, cobweb like, galvanized steel frame of great strength that makes the very lightest house possible—not only lightest, but every way durable. If it has a U-Bar frame, it's a U-Bar house—no other Curved Eave Houses are. Send for our New Catalog, and see for yourself.

GERANIUMS

The steady increase in the demand for Geraniums is proving beyond a doubt that they are the universal favorites with the flower buying public. That they are today more popular than ever before, in fact the demand during the past season nearly exhausted the available supply. We are increasing our stock for propagation to the extent that we shall produce them in enormous quantity next winter and feel confident that we shall be in a position to fill your orders to your entire satisfaction, but would suggest that your order be placed early. We have already booked heavy on some kinds. Good standard sorts at \$18.50 per 1000, from 2 in. pots.

A splendid stock in 3 in. pots ready for immediate shipment, at \$3.00 per 100 and up, including Ivy Leaved in such varieties as Rycroft's Sunrise, Mme. Thibaut, Mrs. Banks, Alliance, Pierre Crozy, etc., Variegated Foliage, Silver Leaf Nutt, Mrs. Pollock, Sophie Dumaresque, Mt. of Snow, L'Eleganta, and Duke of Edinburgh.

Achryanthes Emersoni, Alternantheras red and yellow, Coleus, Lemon Verbenas, Swainsona Alba, Hardy English Ivy. 2 in. \$2.00 per 100; 3 in. \$3.00 per 100.

Two New Hardy Cypripediums from Western China

Hardy cypripediums have been increased by the addition of two noteworthy species from Western China, as a result of the writer's recent plant-collecting work in that country. One of these, *C. tibeticum*, reached England in April 1905 and flowered the June following in Messrs. Veitch's Crombe Wood Nurseries. In 1906 it flowered again and was exhibited at the Temple Show, May 29th., receiving a F. C. C. Very few roots were introduced and the plant has in consequence, never got into gardens generally. On the Arnold Arboretum's second expedition just concluded (the writer's fourth in all) a considerable number of roots of this *C. tibeticum* and an even larger quantity of a new and yellow flowered species (*C. luteum*) have been successfully introduced to cultivation. The roots were received at the Arnold Arboretum, Boston, on April 12th. last, and a few plants were potted and kept in a greenhouse. On May 6th. *C. luteum* opened its flowers for the first time under cultivation and the photograph here reproduced was taken. The flowers are represented one-third natural size in the photograph but the originals were only about half their usual dimensions on account of their being forced.

These roots were dug up in October, 1910, transported some eighteen hundred miles by porters, boat, and steamer, and finally shipped from Shanghai on March 14th., 1911. Although the roots were a full six months from the time of collecting to that of planting they came through in good shape and hundreds are growing freely in the Arboretum nurseries. This augurs well for their vitality and their acclimatization should not be a difficult matter. Their hardiness, as judged from the altitude at which they occur in a native state and from plants growing in association with them, is assured. Both too, are sturdy, vigorous growers.

Cypripedium luteum is an erect growing species 20-45 cm. high. The flowers are solitary with sepals and petals deep, clear yellow; the pouch though occasionally all yellow, has usually a few spots or blotches of orange brown on its face.

Its habitat is the margins of thin woods and thickets; it also occurs on scrub-clad boulders stranded in bogs. Around Sungpan, in the extreme north-west corner of Szechuan, it is abundant in thin woods of spruce and silver fir, growing near the margin of

certain glacial torrents which are surcharged with petrifying limestone. Nevertheless, having seen it growing in a variety of soils, one would hesitate to say that a calcareous soil was necessary. A cool situation and plenty of leaf-soil would seem the essentials. This plant in habit, vigor and general appearance closely resembles our *C. spectabile* and where the latter thrives *C. luteum* should succeed.

Cypripedium tibeticum, as known to the writer, is a dwarf-growing species, 8-20 cm. high, but those from the Chumbi Valley attain to the height of 35 cm. The flowers are solitary, very large, with sepals and lateral petals striped and reticulated with reddish-purple on paler ground color; pouch usually dark maroon-purple, rarely paler. This Thibetan *Cypripedium* was originally discovered in the Chumbi Valley in 1879, and received the manuscript name of "tibeticum" from Sir George King. Subsequently, it was regarded as a variety of the Siberian *C. macranthon* until recognized by Rolfe in 1892 as distinct. The late Monsieur Franchet named Pere Delavay's specimens of this plant *C. macranthon*, var. *corrugatum*, and later, in 1894, raised it to specific rank under the name of *C. corrugatum*. The Siberian *C. macranthon* is widely spread and admittedly variable but anyone who has seen the two (*C. tibeticum* and *C. macranthon*) growing wild or under cultivation would never regard them as one and the same species.

Cypripedium tibeticum is widely spread along the Chino-Thibetan borderland and on the Alpine moorlands, between three thousand and four thousand metres, is numerically one of the commonest plants.

It occurs in countless thousands as the accompanying illustration, from a photograph taken the end of June, 1908, indicates. It is possibly the finest of all red-flowered hardy cypripediums.

In addition to the foregoing species the Arnold Arboretum is in possession of a third introduced with them from the same regions. This may or may not be the widely spread *C. macranthon*. Later Mr. Rolfe hopes to investigate the matter further and decide its identity.

The torrid wave

The week just passed will go down into history as one of the most trying ever experienced by the horticulturist. All records have been broken as to high temperatures and the wave seems to have covered practically the entire country east of the Rockies. In some sections the conditions were modified somewhat by copious rains previously which prepared the ground and growing things for the ordeal. In others not even this little advantage was enjoyed and everything is parched up for want of rain. At a loss of sunshine, with lack of rain and unprecedented torrid heat day after day has made the life of many growers one of anxiety. Of course a first-class product in flowers or anything else has been an impossibility under the circumstances.

Disarming the bully

Nothing of late has given us greater satisfaction than the evident determination of the people of the United States to get at the facts in connection with the express monopolies and their relations with their side partners, the railroads, in the transportation plundering that has been going on for so many years. The announcement of a proposed sweeping investigation by the Interstate Commerce Commission is glorious news. We have no doubt the facts when revealed will fully justify the undertaking. It stands to the credit of the S. A. F. that, as an organization, it was the first with the courage to tackle the bullying giant and first to take a fall out of him. Let us hope that the end of the oppression is now near and that in consequence, a new and better day is about to dawn in the industrial world.

Excuses not valid

The outcome of the sweet pea meeting and exhibition at Philadelphia has been a prolific cause for criticism and discussion whenever the devotees of the popular flower happen to congregate. Many local gardeners and also many of those north and east have been excusing their poor showing on account of the date. If that holds good how did Burpee do it in the latitude of Philadelphia and how was it that the next positions of honor were obtained by growers from Connecticut and New York? For some it was too early—for others, too late. But really where expert gardeners are concerned this hulla-balloo about a date seems rather far-fetched. Given a specified locality for a show the expert gardener has demonstrated time and again that he can so arrange his methods as to exhibit at that point and that a week or two makes little difference if he knows his business. We are learning from season to season just as they did in Great Britain on this point but over there they are further advanced. Of course we shall get there in time, but there is no use making weak excuses and hiding our heads in the sand. We can never make any progress that way.

A "transition period"

Many close observers, watching the lines of development and studying cause and effect as it appears at the present stage of the flower business are of the opinion that we have entered upon a sort of transition period, which, although its progress from day to day may not be apparent, will in time work changes of so radical a character that the florist of a few years hence will have to deal with totally different conditions from those that have appertained heretofore. The new alignments as they gradually assert themselves in different influential centres seem so variant that judgment as to how things will shape themselves differs according to the viewpoint of the observer. The future of the flower industry as read by a Chicago operator would, for instance, be quite different from that reasoned out by one whose point of observation is Boston, New York or Philadelphia, and the divergence of forecast would be equally wide as between growers and dealers, and between those who specialize in plants or in flowers. However, the readjustments are bound to come and, we doubt not, they will all be in the direction of better business methods and a more influential position for the florists' art among the leading commercial industries of our country.

Our notes this week on strawberries, from the pen of G. H. Penson, are the last contribution from that gentleman until fall as he is now about to start on a well-earned vacation. In due time he will resume his regular writing on "Fruits and Vegetables Under Glass" for HORTICULTURE.

Seasonable Notes of Culture on Florists' Stock

ANNUALS FOR LATE CUTTING

It is not too late to sow a number of annuals to meet a deficiency that always is felt in the latter part of the summer in the floral line. The most suitable varieties that can be sown now are candytufts, clarkias, calendulas, coreopsis, annual larkspurs and lupines, sweet alysums, mignonettes, scabiosas, nasturtiums, Gypsophila elegans, and Shirley poppies. Sow them in some place where it will be handy to use the hoe on them, as well as to give them water whenever they may need it. These will be found very serviceable stock at times for bouquets and floral pieces. They are bound to be gladly welcomed in the autumn unless we get an unusually early frost.

COMPOST FOR BULBS

A good many growers don't think of making any special preparation in the way of soil for their bulbs. The soil for bulbs should not be poor and worn out, but should be good live rich soil that has been thoroughly mixed some time before using. If you have plenty of sod and cow manure that were heaped up last fall, use it; you will have better flowers. In making a compost for all bulbs it is well to remember that it should be sufficiently porous to allow the free passage of water through it. If your soil is heavy you should consequently add some sand to render it lighter. All manure should be used when in a somewhat dry state; in a fresh state it has often proved very destructive in bulb growing. To have this compost in a fine mechanical condition make it up now and turn it over three or four times. Just before you use it see that it is not too dry nor sufficiently wet to cling together.

CARE OF YOUNG ROSES

Houses that were planted early should now be in fine growing condition. Keep the plants disbudded, but do not disbud all your plants at once, and do not remove all the buds from a plant at any one time, which has a tendency to check growth too much. It is better to look over your plants every other day. This object should be to make your plants break so as to prevent cropping, in a measure at least. Give a good syringing every bright day and on hot days give one or two extra syringings as it helps in keeping a cooler and moist air which induces good growth and makes it an easy matter to keep clear of red spider. See that the watering is carefully done; water around the plants first separately and then, if bed is dry, soak the whole, and continue to do this until the plants have filled the beds with roots. Ventilate freely now so as to keep the atmosphere as buoyant and bracing as possible, for this will be of material benefit in producing healthy plants. Staking or tying is now in order to keep the plants in an upright position. Keep the surface stirred at least once a week. When fumigating for green fly wait until the temperature drops below 72 degrees and see that your beds are not very dry otherwise the plants will scald.

FREESIAS

These bulbs are usually the first of the many flowering bulbs to arrive. Where a batch is wanted for or around Christmas plant as soon as you can get them in flats or pans. They will do well in flats that contain 4 or 5 inches of soil or in pans 10 or 12 inches in diameter. See that each flat or pan has proper drain-

age. Use two-thirds well decayed fibrous loam and about one-third well-dried cow manure and add a good dash of sharp sand. It is right to plant the bulbs about two inches apart each way to insure fine spikes. When planting push the bulbs down so that they are just covered. After planting place on a cool shed floor, or in a cold frame. Give them a good watering and if in a frame keep them shaded until they start, when they should have full sun. Keep them under frame culture away into September.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Chrysanthemums; Housing Carnations; Hollyhocks; Lorraine Begonias; Oncidiums; Asparagus Sprengeri; Lilies for Fall; Perennial Lupines and Larkspurs.

Varieties of Strawberries for Forcing

Strawberries will be nearly out of season by the time this is in print, but home grown strawberries on the table the first week in March is a thing to think of now, as layers for this purpose will soon need obtaining. With so many varieties grown in the field today it is quite a problem to select the most suitable for early forcing work. The two conditions are so extreme, that plants cannot be expected to thrive to perfection in both. On the one hand we have the hot sun of July and August when the plants are making up their crowns; on the other, when we expect them "to come forth in all their glory" with flowers and later fully developed fruit we have the dullest months of the year, viz., from December on fire heat can be brought to bear on them, but we all know one day's sunshine is worth four of fire heat.

Some varieties answer well to artificial heat but refuse to grow through the hot weather, consequently no satisfactory crown can be grown in time. One very noticeable variety in this respect is Royal Sovereign, an English variety which is a standard for forcing purposes over there. This was tried here and just refused to grow, although having the same treatment as other varieties. Marshall is found to force earlier and better than any other variety here. The plants "get away" good and make up a good crown and answer well to forcing. The batches started through December will not have very long stalks to the fruit; in fact no variety does. The flowers always carry an adequate supply of pollen. Parker Earle is somewhat similar, carrying a darker colored fruit but not such a reliable setter as Marshall.

We force more of Marshall than any other variety, but for later work we find President, Nick Ohmer and Dornan good. They take a little longer to develop than Marshall, but fine large berries can be grown on them. President is a solid fruit and ships well. Nick Ohmer and Dornan throw up a strong flower spike well over the pot and carry berries of excellent shape and flavor.

Probably other readers could tell us of other varieties which have been forced successfully.

George H. Benson

Dukes Farm, N. J.

NATIONAL SWEET PEA SOCIETY OF AMERICA

THE EXHIBITION.

As briefly announced in our issue of last week, the third annual meeting and exhibition of the National Sweet Pea Society was held in Philadelphia on June 29th and 30th, and proved quite successful—although not so large as expected. The season being unusually backward, many of the regular exhibitors from northern and eastern points were consequently unable to show.

The star feature was undoubtedly the magnificent Burpee display, which occupied the entire northern side of the main hall and took five men six hours to stage. The flowers were in splendid shape, the finest that we have ever seen shown, and the finest Burpee has done yet. The staging was exceedingly effective—the large handsome vases were arranged in tiers one above the other, the background being *Eulalia zebrina*. At intervals pyramids three and four feet high were arranged to break the monotony. There were over twenty thousand blooms in this Burpee collection—and over two hundred varieties. The most conspicuous and sensational variety was a new one named "Stirling Stent"—a glowing orange—which was imported from the Isle of Wight last fall and flowered for the first time here this year. Mr. Kerr assures us that this one stands out hot sun splendidly without burning and is "the greatest thing yet" in its color and type (Spencer). It was sent out in England last year at two dollars for six seeds and even at that extraordinary price the supply was altogether inadequate. Another extra fine one was Vermilion Brilliant, for which they were awarded the cup offered by the North American. The exhibit as a whole was given the premier award of the show—the Morse Challenge Cup; for the best commercial collection. They also were awarded the N. S. P. S. certificate of merit for the following new seedlings, also a silver medal for those new varieties in addition to the certificate:

Irish Belle: A rich rosy mauve, with a silvery suffusion. One of the most distinct sweet peas in existence. It is liable to supersede a whole lot of varieties heretofore leaders in its class and color.

Empress Eugenie: White, flaked pale lavender.

Fordhook Fairy: White, with a bluish blush suffusion.

Margaret Atlee: A rich cream and bright pinkish rose. One of the most beautiful and distinct of all the new varieties.

The certificate and silver medal also covered two seedlings as yet only under number and both coming from the amber and creamy pink varieties—the class in line for perfect yellow—for which many strenuous flights have been made, but with only moderate progress so far. W. Atlee Burpee has a standing offer for his ambitious scion, David Burpee, of three thousand dollars for ten seeds of the first real yellow sweet pea.

Henry A. Dreer put up a fine exhibit of the newer and choicer varieties of nymphaeas and other aquatics, also a nice collection of Japanese irises. Bertrand H. Farr, our distinguished peony specialist, was on deck with a nice lot of *Iris Kaempferi*, which formed the chief decoration in front of the stage and were a center

of attraction. Joseph A. Manda and Julius Roehrs Co. contributed interesting collections of choice and seasonable orchids. John Lewis Childs had a nice lot of *Calla Elliotiana*. Aphine and Fungine were very much in evidence and the genial M. C. Ebel had his hands full explaining their merits. Mrs. Geo. H. McFadden and Clement B. Newbold were the stars in hardy perennials.

The official prize list follows:

Class 1. Collection of sweet peas—First prize, Miss M. T. Cockroft, Adam Paterson, gard.; second, Herbert L. Pratt, Henry Gaut, gard.

Class 2. Vase of one variety of Spencer type introduced in 1911—John W. Pepper, William Robertson, gard.

Class 3. Grandiflora type—First, S. M. Goldsmith, William R. Seymour, gard.; second, Herbert L. Pratt.

Class 5. Spencer variety, mixed—Miss M. T. Cockroft.

Class 6. Magnificent, mixed—Mrs. George H. McFadden.

Class 9. Collection of twenty-five varieties, not fewer than twenty-five stems—John W. Pepper.

Class 11. Vase Ruby Spencer—Herbert L. Pratt.

Class 12. Mrs. Rautzahn Spencer—Miss M. T. Cockroft.

Class 13. White Spencer—Mrs. R. B. Ellison, Axel Lindroth, gard.

Class 14. Vari-colored—First, Herbert L. Pratt; second, G. W. Young, James Kennedy, gard.

Class 16. Fifty pink or rose—First, Thomas McKean Robert Abernethy, gard.; second, Miss M. T. Cockroft.

Class 18. Vase of a new variety—Silver cup, won by W. Atlee Burpee & Co.

Class 19. White—First, Miss M. T. Cockroft; second, Mrs. J. B. Trevor, Howard Nichols, gard.; third, S. M. Goldsmith, William R. Seymour, gard.

Class 20. Pink—First, Herbert L. Pratt; second, Mrs. R. B. Ellison; third, Henry Goldman.

Class 21. Deep rose—First, Herbert L. Pratt; second, Miss M. T. Cockroft; third, S. M. Goldsmith.

Class 22. Lavender—First, Mrs. R. B. Ellison; second, Miss M. T. Cockroft; third, Herbert L. Pratt.

Class 23. Salmon or orange—First, Herbert L. Pratt; second, C. B. Newbold; third, G. W. Young.

Class 24. Crimson or scarlet—First, Henry Goldman; second, Mrs. J. B. Trevor; third, S. M. Goldsmith.

Class 25. Primrose—First, S. M. Goldsmith; second, Thomas McKean; third, G. W. Young.

Class 26. Picotee edged—First, Miss M. T. Cockroft; second, Herbert L. Pratt.

Class 27. Bicolor—G. W. Young.

Class 28. Striped or mottled—First, Henry Goldman; second, C. B. Newbold; third, Miss M. T. Cockroft.

Class 29. Any other color—First, Mrs. R. B. Ellison; second, Henry Goldman; third, M. T. Cockroft.

Class 30. White—First, Thomas McKean; second, Mrs. George H. McFadden.

Class 32. Lavender or blue—Herbert L. Pratt.

Class 34. Striped or bicolor—First, Mrs. R. B. Ellison; second, Herbert L. Pratt.

Class 35. Any other color—C. B. Newbold.

Class 38. Bride's bouquet of sweet peas—Robert Kift.

Class 39. Three vases of Aurora Spencer, Countess Spencer and King Edward Spencer—Herbert L. Pratt.

Class 40. Vase of mixed—First, Miss Mona Robinson; second, Mrs. R. B. Ellison.

Class 42. Best table of sweet peas—John W. Pepper.

Class 43. Six vases Spencer or Unwin—S. M. Goldsmith.

Class 45. Finest collection of sweet peas, Spencer, Unwin and grandiflora types—S. M. Goldsmith.

In addition the following prizes were awarded by the Pennsylvania Horticultural Society.

Class 46. Sweet peas, best vase, mixed—First, Mrs. R. B. Ellison, Axel Lindroth, gard.; second, Henry Goldman, Anthony Bano, gard.

Class 61. Spencer varieties, best ten vases—W. W. Pezizer, Sr.

Class 64. Japanese iris, collection—First,

C. B. Newbold; second, Thomas P. Hunter, Joseph Hurley, gard.

Class 65. Hardy herbaceous perennials, display of twelve species—First, C. B. Newbold; second, Mrs. George H. McFadden, David Aiken, gard.

Class 69. Sweet peas, twelve vases of fifty sprays each—First, James McCrea, James Coleman, gard.; second, W. W. Pezizer, Sr., Walter Scott, gard.

Class 70. Zinnia elegans, Waterer's mammoth flowering—First, Mrs. George H. McFadden; second, C. B. Newbold.

Class 72. Outdoor cut flowers, collection of twelve species—First, C. B. Newbold; second, Mrs. George H. McFadden.

Class 73. Gloxinias—First, Mrs. J. J. Henry, Carl Lindroth, gard.; second, Mrs. George H. McFadden.

SECRETARY BUNYARD'S REPORT.

When I helped to organize the National Sweet Pea Society three years ago, I stated at the first meeting that it would and must be a success. Up to this time it has not fulfilled my highest expectations, but we have made substantial progress, have learned something, and have placed the society on a sound foundation. With the experience that is passed, we hope to still further the aims and objects of the society.

Up to and including this exhibition, we have held four shows, two in New York, one in Boston in connection with the S. A. F. National Flower Show, and the Philadelphia exhibition. All of these have been an expense to the society, no charge for admission being made. The only source of income is from the active membership, life members and the guarantors who have generously come to the front when needed. We have today 102 active members and 12 life members. Personally, I know that good results have accrued from our exhibitions. Perhaps the most material results are from the Boston Exhibition, the winter-flowering sweet peas shown by Wm. Sim of Cliftondale, Mass., exciting more general interest and admiration, so much that several florists in New York are building houses especially to grow sweet peas this winter.

The great difficulty in holding exhibitions in this country is its vastness. What would be a good date in Philadelphia is too early for New York, and a good date for New York is too early for New England, and that applies also to the West, so that the exhibition really resolves itself into a local show, which is a good reason for changing the place of meeting from year to year. Of course, this year has been exceptional owing to weather conditions. It has been suggested by one of our exhibitors that the date should be set at this meeting, and should be either the last week in June or the first week in July. This would give growers the opportunity to sow their seed to conform with these dates. It is much easier for a grower to hold off for a week than to force his plants into bloom. I trust that the Convention will seriously consider this matter.

Our society has helped to popularize the Spencer varieties among growers, private and commercial, and while some of the grandifloras are still popular, they are fast being displaced by the Spencer and Unwin types.

At Boston there were exhibited by Anton Zvolanek an entirely new race of sweet peas, some equaling and

others exceeding the beauty and type of the Spencers. Mr. Zvolanek deserves great credit for his work along these lines, and I hope in the near future this society will be able to accord medals to hybridizers and raisers of new varieties. I understand that The W. Atlee Burpee Co., at Fordhook are also working along these lines, and have some very promising seedlings. Credit is also due the gentlemen who have helped to finance our society, not only from its inception but also at a time when guarantee funds were needed for prizes, etc. I wish at this time to thank the generous donors of prizes, and your president, Mr. W. Atlee Burpee, for time and moral support so generously given.

If I were asked to name the best Spencer, Grandiflora and winter-flowering sweet peas today, I would give the following list apart from the varieties introduced this year:

SPENCER VARIETIES.

Asta Ohn Spencer, pure lavender with tinted pinkish rose, self colored; Aurora Spencer, orange rose or salmon striped on white; Apple Blossom Spencer, standard crimson rose, wings white tinged with pink; Captain of Blues Spencer, bluish purple with distinct margin of lilac; Countess Spencer, the original Spencer, clear pink; Flora Morse Spencer, delicate blush with pink margin; King Edward Spencer, pure red or crimson scarlet; Lovely Spencer, standard light blush with blotch of rose at the base; Othello Spencer, deep velvety maroon; Mrs. Walter Wright Spencer, rosy purple, self color; Primrose Spencer, pure light primrose yellow; White Spencer, pure white; Mrs. Routzan Spencer, primrose and buff, margin of light salmon; Helen Lewis, standard crimson orange, wings orange rose; John Ingman, rose carmine with rose veins; George Herbert, rose carmine.

UNWIN VARIETIES.

Frank Dolby, lavender and mauve; Gladys Unwin, bright pink a little deeper at the edges, almost self color; E. J. Castle, rose crimson with veins of deeper rose; Mrs. Alfred Watkins, bright pink at base shading to blush and buff at edges; Nora Unwin, pure white.

GRANDIFLORA VARIETIES.

Bolton's Pink, orange or salmon pink, veined with rose, extra early; Blanche Ferry, standard crimson rose, wings white tinged with pink; Burpee's Earliest white, pure white; Dorothy Eckford, pure white; Helen Pierce, marbled blue on ivory white; Hon. Mrs. E. Kenyon, clear light primrose; Lovely, deep pink, shading to very light pink at edges; Lady Grisel Hamilton, standard light mauve, wings lavender; Lord Nelson, standard indigo and violet, wings indigo; Miss Willmott, orange pink with veins of deeper orange rose; Mrs. Geo. Higginson, Jr., azure-blue, the lightest and clearest blue in sweet peas; Prince Olaf, bright blue, striped on white; Queen Alexandra, very bright red almost a true scarlet; Edward VII, bright red or crimson scarlet.

WINTER FLOWERING SWEET PEAS.

Snowbird, pure white; Christmas Pink, standard rose, wings white; Christmas white, pure white; Canary, primrose yellow; Flamingo, crimson scarlet; Christmas Captain, blue and purple; Florence Denzer, pure white; Greenbrook, white slightly touched with lavender; Mrs. Alex. Wallace, lavender; Mrs. Wm. Sim, salmon pink; Mrs. W. W. Smalley, satiny pink; Wallacea, lavender; Watchung, pure white; Mrs. E. Wild, rose salmon; Mrs. Chas. H. Totty, sky blue.

While experts may differ with me on my selection, people will not go far wrong in planting the above varieties.

Cornell University, where under the care of Prof. Craig and A. C. Beal, the trials of our society had been held, have just issued their bulletin No. 301 entitled "Sweet Pea Studies." These have been mailed to all members, through the courtesy of the University, under a frank without cost to the society. Thanks are due to the energy

and work of the above gentlemen. If any member has not received a copy, I would ask them to kindly notify me at once.

Referring to the above selection of sweet peas, I think we are somewhat blessed in this country by not having the interminable quantity of new varieties placed on the market as they have in England every year. Unless it has real merit over existing varieties, it has not a place in the American seed catalogue or in the garden, neither do we have the same confiction of synonymous varieties under different names. Our growers in California, where 80 per cent. of the sweet pea seed of the world is grown, are exceptionally careful not only as to the new varieties they disseminate, but also as to rouging their stocks; neither do they send out new varieties unless to their knowledge they are thoroughly set. Among the most distinct breaks of recent years are the varieties Sterling Stent and Earl Spencer. In reality these are Henry Eckford Spencers, which I believe would be a better name. Many colors we have today cannot be bettered. Those the hybridizers are aiming for are a real buttercup yellow, the scarlet of the geranium and the blue of the Delphinium Belladonna. In the meantime, the hybridizers should concentrate their efforts upon improving the size and substance of the flower, number of flowers on a stem, length of the stem and strength and habit of the plant, an American breed of flowering sweet peas that will stand our hot summers, so that not only in name but in fact they will become "the poor man's orchid" and rivaling that flower.

NOTES.

Thomas H. Logan was the genial representative of our city on many occasions during the week, and earned the golden opinions of visitors.

According to Mr. Kerr, "A Mechanical Rogue" is a foreign variety that gets in through the fault of cleaning machinery. This fact was strongly shown in the tests of the variety Helen Lewis.

Robert Craig made an excellent address of welcome, touched with feeling, fervor, wit, learning and all that was fitting for the occasion. He has lost none of his old-time pre-eminence in this line.

Adam Paterson came down from Connecticut and showed a few of us a thing or two. We had the pleasure also of greeting a good old "nutmeg" in the person of Walter Angus of Chapinville.

Edwin Lonsdale's paper and greetings (all the way from California) were very much appreciated, and showed that our good old horticultural war horse has lost none of his fire or form. He is in a class by himself.

The irrigation system at Burpee's came in for much favorable comment. It can be raked fore and aft by the mere turn of a crank—as some of the guests realized when David Rust turned the crank on them unexpectedly.

The pink snapdragons at Fordhook have the right shade—delicate, yet distinct—desirable for the cut flower

variety so much sought after, and it is not to be wondered at that they jealously guard each flower stalk, for seeding purposes.

Among the finest of the fine new varieties of sweet peas seen at the Burpee trial grounds, note these: Marchioness of Tweedale, G. C. Waud, Martha Washington, Rose de Barry. The latter is one of the finest shades, and shows up wonderfully under artificial light.

The May-flowering varieties like Burpee's Earliest White and Improved Blanche Ferry were passe, and could only be mentioned in a reminiscent vein. They helped, however, to bring up the fact of the coming winter Spencers, and to bring on an animated discussion on these.

H. A. Bunyard is the everlasting finest secretary! His wit, bonhomie and enthusiasm are inexhaustible and perennial—and lucky is the society that gets his wonderful personality back of it. J. H. Pepper is the recording secretary of the N. S. P. S., but Mr. Bunyard has a pleasant variation on that title. He calls him their "Recording Angel."

J. K. M. L. Farquhar was an interested visitor at Riverton and Fordhook this week, and was very well pleased with the fine work the Dreers and Burpees are doing in their respective fields. He was particularly impressed with the splendid executive abilities of J. D. Eisele in the new developments at Dreers; and the sweet pea and cabbage trials at Burpee's.

M. and Mme. Davy of Arpajon, France, were the guests of Mr. and Mrs. Earl on the 29th and 30th ult., at Fordhook. Some of the effervescent Americans who helped "pick a bone" must have been a sad puzzle to these Gallic visitors. The writer hopes the picture he arranged on the Burpee lawn for them will prove a success. Madame deserves the finest ever.

A. W. Strange ably represented Joseph A. Manda of New Jersey, and put up a very attractive orchid exhibit. Unfortunately, one of the best flowers of his collection was stolen just before an interested exhibitor arrived in his automobile especially to see it, and a thousand dollar order went a glimmering! The individual who did this is known, and sad to relate is said to represent a well-known seed house in this city.

It is rumored that the next annual meeting and exhibition of the Sweet Pea Society will be held in Boston. William Sim is the new president. The axiom seems to be established—where goes the presidency, there goes the next meeting. It is a good idea in many ways, and as a rule works out first-rate. David Rust thinks a hard and fast date for the next exhibition ought to be set now, and let everybody live up to it. The scheme of shifting the date to suit local conditions at the last minute has not proved good in practice.

Some one was talking about the difficulty of spelling various words. One man said all spelling was fierce! especially "ei" and "ie." Among others Mr. Pepper gave an amusing one about Robert Cameron. It appears the latter's notes were written out by an

amanuensis, and instead of saying that the display of My Maryland was very fine the text said the display of "Mary's Lambs" was great. David Rust's expert steno. "Lewis" was almost as good, when he said in his report that the Burpee exhibit was a magnificent failure. When the explosion exploded it was found that the right word was "feature"—magnificent feature, instead of magnificent failure!

THE FORDHOOK VISIT.

Among the visitors to the Burpee Fordhook Farms trial grounds on the 30th ulto, were noted among many others, the following eager students of the latest and best; the oldest and worst; the good and the bad in sweet peas and other flowers and vegetables:

Harry A. Bunyard, N. Y.; Charles H. Totty, M. C. Ebel and William Duckham, Madison, N. J.; David Rust, Phila.; John H. Pepper, N. Y.; Samuel Hamilton, Huntington, Pa.; Miss Review, Chicago; A. E. Wohler, Merion, Pa.; George C. Watson, Phila.; Harry Turner, Yonkers, N. Y.; Alfred Rust, Conshohocken, Pa.; Robert Kift, Philadelphia, Pa.; Bertrand H. Farr, Reading, Pa.;

THE NORTH AMERICAN CUP.

A. H. Sears, Connecticut; Dennis T. Connor, Philadelphia, Pa.; D. D. L. Farson, Overbrook, Pa.; Walter H. Hancock, National Farm School, Dowlstown, N. E. Kirby and A. M. Kirby, N. Y. City; Wm. Robertson, Phila.; J. Davy and Madame Davy, Asperon, France; Professor Beal, Cornell University.

Howard M. Earl (Mr. Burpee's manager) in the absence of the chief in Europe did the honors in fine style, and made all the foregoing and many

A SWEET PEA AND WHAT IT WON.

VERMILION BRILLIANT

We present on this page pictures of W. Atlee Burpee & Co.'s new sweet pea, Vermilion Brilliant, and the North

American cup, which it won at Philadelphia, on June 29th and 30th, 1911, as the best scarlet sweet pea.

other visitors feel thoroughly at home, and was indefatigable in showing everything of interest. George W. Kerr, his right bower and sweet pea expert, was an able second in this good work and with note books in hand toiled patiently under the hot sun for four hours and discoursed eloquently on the fine points of their thousands of trials. We must not forget to say a good word for Earl, junior. Douglas is only a boy yet, but he jumped right in and took a bevy of the lady visitors under his charge.

After the inspection a stirring event took place on the lawn in front of the old homestead when Harry Turner presented the North American cup won with the new variety Vermilion Brilliant. Mr. Turner's remarks were well

chosen, eloquent, and to the point! Then followed three cheers and a tiger for Burpee—the High Priest of the Sweet Pea in America! Mr. Earl in accepting the trophy, gave everybody credit but himself; but it was easy to be seen that he was the proudest mortal in the world. All in all it was a splendid afternoon well spent, and everyone went away happy and glad they had enjoyed the opportunity

INCORPORATED.

Kennebunk, Me.—The Franklin Forestry Co., capital stock \$10,000. Harry F. Gould, president and treasurer, Watertown, Mass.; Russell S. Langdell, Lowell, Mass.; Walter L. Dane, Kennebunk, Me.

CLUBS AND SOCIETIES

ROSE SHOW AT NEWPORT.

The postponed rose show of the Newport Horticultural Society was held June 27th in Sanborn Hall which is of much smaller dimensions than the hall usually used, but proved to be large enough, as unavoidable circumstances seemed to join in preventing as large a display as usual. However a few of the annual exhibitors exerted themselves with the result that for quality and arrangement the show was a decided success. The principal exhibitors were A. L. Dorward, gardener for Mrs. T. J. Emery, C. M. Bugholt, for Miss Fanny Foster, Hugh Williamson for W. W. Astor, Wm. Grey for Mrs. W. B. Leeds, John A. Forbes for August Belmont, J. Robertson for Mrs. T. O. Richardson, J. B. Urquhart for R. L. Beechman and Paul Valquardson for Mrs. W. G. Weld. Mr. Dorward was the most extensive exhibitor and carried off nearly all the first honors in the fruit and vegetable classes. The competition in roses was rather keen, there being three or more exhibits in nearly every class and most important of them was the collection of outdoor roses in which Mr. Williamson took first place with about fifty varieties of well selected flowers, Mr. Robertson was second with fewer varieties. Next in importance was the large display with arrangement to count and Mr. Urquhart was easily the first of three with a superb table of Hybrid Teas, Caroline Testout and Kaiserin A Victoria predominating. Mr. Urquhart also had it all his own way in the vase class of Hybrid Teas and also for vase of Frau K. Druschki. In the various classes for twelve specimens of Hybrid Perpetuals the honors were divided between Bugholt, Robertson and Forbes, Mr. Bugholt having the best of it. The varieties mostly used for those classes were F. K. Druschki for white, Clio and Margaret Dickinson for blush white, Mrs. John Laing, Mme. G. Luizet and Mrs. S. Crawford for pink, and Ulrich Brunner away in the lead as a red. In the Hybrid Tea class the best noted were Kaiserine A. Victoria, Caroline Testout, Etoile de France and the Lyon Rose.

Sweet peas were probably never seen here in better form. Three collections of six vases each were staged and Mr. Valquardson was awarded the first prize. Mr. Grey was a close second. Mr. Grey also showed the best cauliflower seen here in years. The usual fine display of table plants was represented by one collection only but they were considered worthy of the first prize. J. Robertson was the exhibitor. A new feature of the show was table decorations by gardeners' assistants and Hugh Meikle, at the H. M. Brooks estate, was first with a very neat arrangement of Mme. G. Luizet roses. The second went to A. Springett, assistant to Mr. Grey. Mr. Meikle was also the winner in the class for baskets of roses. The main feature of the show and the only one receiving a silver medal, the highest award, was the new Begonia Alice

Manning, a pale yellow of graceful drooping habit. This was exhibited by Paul Valquardson, who also showed other exceptionally well-grown tuberous begonias and gloxinias for which he was awarded a liberal gratuity.

The judges were Richard Gardner, James McLeish, James J. Sullivan, C. D. Stark, Paul Valquardson and Stewart Ritchie, and their decisions were received with general satisfaction. Sergeant-at-Arms Smith filled his usual place assisting exhibitors and maintained well his reputation as being the best worker of the society.

J. R.

JOSEPH HEACOCK.

President of the Florists' Club of Philadelphia.

On July 11th, the next meeting of the club, Mr. Heacock will celebrate his 65th birthday. We wish him many happy returns.

ST. LOUIS FLORIST CLUB.

The event in the history of the Florist Club took place on Wednesday night when the members celebrated its 25th anniversary at Pechmann Hotel with a banquet; 100 invitations had been issued and 63 accepted. A large U-shaped table was spread in the beautiful dining room of the hotel. The room was beautifully decorated with plants and cut flowers. Ex-president Fred Ammann was selected as toastmaster and he was at his best. After a splendid dinner he called upon Mr. Geo. Asmus, president of the S. A. F. and O. H., who responded to a toast, The S. A. F. H. B. Dorner, secretary of the S. A. F. responded to the toast, The S. A. F. Relationship with Florists' Clubs. John M. Connon responded for The Florist Club of the Present Day. Luther Armstrong spoke on the early days of the Florist Club and S. A. F. C. C. Sanders responded for The Retail Florists' Association. E. W. Guy, H. C. Irish and S. Kehrmann also spoke. A band of music was stationed behind a group of palms, who played sweet strains while the members feasted.

HORTICULTURAL SOCIETY OF NEW YORK.

A meeting and exhibition of the Society were held in the Museum Building New York Botanical Garden, on July 1st, the exhibition continuing also over Sunday. July is an uncertain month for an exhibition, but the interest manifested in this one by the good showing of exhibits was very gratifying. The next exhibition will be held in the same place on August 26th and 27th, and will be devoted mainly to gladioli. Schedules will be ready early in August, and will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, New York City.

The following is a list of the awards made on July 1st and 2nd:

Collection of outdoor roses—Scott Bros., first.

Japanese iris—Scott Bros., first; Mrs. F. A. Constable, James Stuart, gard., second. Sweet peas, 6 varieties—H. Darlington, P. W. Popp, gard., first; Mrs. A. M. Booth, E. Fardel, gard., second.

Sweet peas, 100 sprays—H. Darlington, first; Mrs. A. M. Booth, second.

Flowers of herbaceous plants—Mrs. F. A. Constable, first; T. A. Havemeyer, A. Lahodny, gard., second.

Flowers of shrubs and trees—T. A. Havemeyer, first.

Japanese iris, 6 varieties—T. A. Havemeyer, first.

Sweet peas, 3 varieties—H. Darlington, first; T. A. Havemeyer, second.

Special awards—T. A. Havemeyer, sweet peas, special prize; Mrs. F. A. Constable, Liliun candidum, special prize; Wm. Tricker, certificate of merit for Nymphaea Helen Fowler; Wm. Tricker, certificate of merit for Vinca minor aurea; L. S. Livingston, special mention for Romneya Coulteri; Mrs. A. M. Booth, sweet peas, special prize.

The judges were David MacFarlane, James Donlan and Wm. Tricker.

GEORGE V. NASH,
Secretary

YONKERS HORTICULTURAL SOCIETY.

On Wednesday, June 14, a most successful show was held in Hollywood Inn. Roses were a great feature, first prize for a collection going to E. A. McAlpin; gardener J. Woodcock, who staged over ninety varieties. Second to Mrs. J. B. Trevor; gard. H. Nichols. E. A. McAlpin was awarded three firsts for roses, Mrs. Trevor one first and one second, and Mrs. M. E. Sand, gard. T. A. Lee, one second. Mrs. Trevor showed sweet peas in great shape, receiving firsts for every entry. She also won first on vegetables, and S. P. Lillienthol, supt. H. Scott, second. Adolph Lewisohn, supt. J. Canning, showed vegetables of a high standard. S. P. Lillienthol was placed first for a collection of hardy flowers.

The Yonkers Nursery Co. exhibited hardy perennials, notably some fine forms of Delphinium formosum, also palms and standard bays. Julius Roehrs Co. put up one of their dainty orchid exhibits, fine forms of Cattleyas predominating. F. Milliot exhibited roses, gloxinias and Spanish iris, a couple of floral baskets serving as an object lesson in the use of the latter for decorative work. P. Macdonald exhibited ferns and floral baskets, a combination of peonies and gladioli being especially pleasing. Attendance was good, and the show has done

much to foster horticultural interest in
Yonkers. H. M. B.

ROYAL INTERNATIONAL HORTICULTURAL EXHIBITION, LONDON, 1912.

In connection with the above exhibition which will be held next May, in the grounds of the Royal Hospital, Chelsea, His Majesty King George V. has intimated his intention to offer a cup, valued at \$525.00 to be awarded for the best exhibit in the show. Many other valuable cups, medals, and awards offered by the Duke of Portland and others will be included in the vast number of prizes contained in the schedule. Altogether the exhibition promises greatly to exceed in interest and in spectacular effect any show of the kind ever held in any part of the world. There is reason to believe that the exhibition will be opened by the King and Queen on May 22, 1912.

CLUB AND SOCIETY NOTES.

The St. Louis Florist Club will hold its monthly meeting on Thursday afternoon, July 13, at 2 o'clock. The meeting is of importance as the annual nomination of officers takes place then.

Missouri State Vice-President F. H. Weber, of the S. A. F. has sent in a number of names for membership to Secretary Dorner and says he expects quite a few more before convention time. The florists' picnic will give him a good field to work on this month.

The Pacific Coast Nurserymen concluded their annual convention June 23, at San Jose, by the election of the following officers: President, P. A. Dix, Utah; vice-presidents, C. F. Lansing, Oregon; C. H. Smith, Salt Lake City; J. Vallance, San Francisco; Ray Hartley, Idaho; A. W. McDonald, Washington; Charles Trotter, British Columbia, and D. J. Tighe, Montana; secretary-treasurer, C. F. Tonneson, Washington; executive committee, M. D. Soles, Salt Lake City; A. McGill, Oregon, and Leonard Coates, Morgan Hill.

The annual rose show of the New Bedford (Mass.) Horticultural Society was held on June 22, and was the richest display of roses ever seen there. James Garthley of the H. H. Rogers estate, M. H. Walsh of Woods Hole, H. A. Jahn and others were among the principal rose exhibitors. Peonies, nymphaeas, delphiniums and Japan irises were shown in abundance. A. J. Fish was awarded a special silver medal for rose Silver Moon. Honorable mention was accorded the same exhibitor for new dahlia Giant Edelweiss.

The new schedule of the National Chrysanthemum Society of England for 1911 is just to hand, containing accounts for the past year, annual report, rules, list of affiliated societies and members, also prizes offered at the Society's exhibitions. Among the newly appointed honorary members we notice the names of M. Viger, President of the National Horticultural Society of France; M. Albert Truffaut, premier Vice-President of the same society; and M. Maxime de

la Rocheterie, President of the French Chrysanthemum Society. We notice too, that M. Louis Gentil, editor of our Belgian confrere, La Tribune Horticole, has been appointed a corresponding member.

This Society has recently published in a neat little pamphlet of 70 pages the list of the papers read at the Society's recent conference. There is a frontispiece of Sir Albert Rollit, President of the Society, and portraits of Messrs. Norman Davis, W. Higgs, H. J. Jones, R. F. Felton, Thos. Stevenson.

Among the contents is the report on the Paris Show, November, 1910, by C. Harman Payne and awards of the Floral Committee, 1910.

Altogether an interesting and useful addition to chrysanthemum literature, published by the National Chrysanthemum Society and supplied gratis to members.

A NOTABLE CAPE COD ESTATE.

The Committee on Gardens of the Massachusetts Horticultural Society visited recently the interesting estate of Mr. Wilton Lockwood at Orleans, Mass., and were greatly surprised as well as pleased to see what could be done in the line of ornamental gardening on Cape Cod, a section of the state usually regarded as not responsive to horticultural endeavor.

In a hollow among the hills, not far back from the Atlantic shore, Mr. Lockwood has established a garden and produced results well worthy of record. At the bottom of the valley is a small artificial pond well stocked with hardy Nymphaeas and other water plants and bordered by a grassy bank. Around this bank on level ground is a collection of some 300 varieties of peonies, of the choicest kinds and mostly in light colors. Notable among them is the recently introduced pure yellow peony, L'Esperance.

The whole garden up to the base of the surrounding hills is enclosed by a pergola covered on sides and top with numerous varieties of climbing and rambler roses. Particularly noteworthy among them was the Carmine Pillar, which covered a stretch of trellis twenty-five feet in width and presented a magnificent display. Jersey Beauty with large single creamy-white flowers was also conspicuous as well as the Moschata and Dawson. There was also a collection of Hybrid Teas and Perpetuals and among the trees and shrubs a row of the pyramidal oak attracted attention.

All along the roadsides and in grass land around the dwelling houses in the town were masses of the deliciously fragrant Pheasant's Eye Pink (*Dianthus plumarius*). It greatly interested the visitors to see how it has escaped from old gardens on the Cape; it is noticeably abundant in Orleans. There were also frequent patches of the Scotch broom (*Cytisus scoparius*) with its masses of golden flowers and apparently perfectly hardy here, though it is not so in the vicinity of Boston.

BRITISH HORTICULTURE

A Visit to Holland.

The deputation who lately visited the bulb farms in Holland from the Gardeners' Company (a guild of the city of London), were favorably impressed with the places visited. In a report published on their return it was stated that the area of bulb cultivation in Holland is about 11,000 acres. This acreage is steadily increasing, with a consequent continual rise in the value of the land. The increased attention paid to commercial bulb culture in this country apparently has not made a great difference to the Dutch industry. The growers have the advantage of much cheaper labor than is the case in Britain. An opportunity was afforded of studying the system adopted in securing a rotation of crops, also the work carried on by the Netherland Government in dealing with plant diseases and insect pests. In all districts the visitors were very warmly received, the fullest information being readily afforded. It was stated that the bulb industry is in a very healthy condition. About 40 per cent. of the bulbs are shipped to Britain, but the growers are always on the alert for fresh outlets. The trade with the United States and other countries is gradually increasing.

The Coronation "Boom."

The Coronation festivities, now an historic event of the past, proved a profitable time for the nurserymen and florists. Many of the clubs and mansions were beautified with charming arrangements of flowers in window boxes, red, white and blue being the predominant tints. A deputation from the Gardeners' Company waited on Queen Mary at Buckingham Palace on June 19th, and presented her majesty with a choice bouquet of Lady Hermione carnations in a silver gilt basket. The deputation also presented two unnamed carnations—one white and the other pink. Permission was granted for these novelties to be respectively named King George and Queen Mary. Carnations, both Malmaison and Perpetual-flowering, are largely cultivated in the royal gardens at Windsor. The Malmaisons include Princess of Wales, Duchess of Westminster, and Marmion. The comprehensive assortment of perpetual-flowering varieties comprise the leading American and British introductions. These blooms are extensively employed for decorative work in the royal palaces.

W. H. ADSETT.

OBITUARY.

A. B. Lewis.

A. B. Lewis, a prominent florist of Pontiac, Mich., and a very faithful member of the Detroit Florist Club, died on Saturday, July 1, of peritonitis, brought about by diseased kidneys and an abscess on the intestines. Some time ago he was brought to the sanitarium for treatment of nervous troubles from which he had apparently recovered. Under the circumstances his sudden demise was a great shock to his many friends in Detroit and elsewhere, all of whom sympathize sincerely with his family.

THE ROMANCE OF ORCHID HUNTING.

Mr. P. Harvey Middleton has written a very interesting article about Orchid Hunting in the "American Homes and Gardens Magazine." The narrative is very charming, but he has been so grossly misinformed that the whole thing appears to be a "Fairy Tale."

It is a very peculiar circumstance that very few people can write about orchid collecting without letting their wild imaginations work wonders, which they spring on the man who later takes those fibs as truths, and adorns them with his florid language. In the article in question there is a reference to a typical example of the kind of stuff that orchid hunters are made of.

"He had been near death's door with the fevers of the tropics and tropical swamps, he has been robbed and deserted by his guides and left alone to starve in Andean mountain forests, and has been attacked, tormented and all but eaten by hundreds of big, black ants. He has had to fight treacherous guides for his life, and has had escapes too numerous to describe.

"It was while engaged in hunting Orchids in Colombia for the Philadelphia Orchid Queen that a revolution broke out. Barrault was seized by Colombian soldiers and forced to fight for them. As a Frenchman he had seen military service, and philosophically accepting his fate he led a regiment of the Colombians to battle, and was engaged in seven stiff fights. It was on the last occasion, when the slaughter of his men seemed imminent, that Barrault seized a flag and rallying a handful of soldiers about him charged straight at the line of popping guns ahead. The rest of his regiment (who worshipped their apparently invincible leader) followed excitedly. On they rushed until almost hand to hand with the enemy, when suddenly Barrault staggered and fell severely wounded, and panic seized his followers, who turned and fled.

"And so Barrault, the orchid-hunting soldier, was thrown into prison by the rebels and there left to get well as best he could. Slowly, but surely, his fine constitution pulled him around, and one night about six months later he floored his guard and got away. Two days and nights brought him to the forest, where he knew rare orchids were to be found. Living on roots and herbs that former experience had taught him were good for food, Barrault gradually worked his way through the forest until he came to a lonely village off the track of the opposing armies. Here he secured another set of guides and started off on the trail of a wonderful snow-white orchid which had been graphically described to him by a half naked Indian in the streets of Bogota—"An orchid so big," said the native, clasping hands and rounding arms, 'and as white as snow on the mountain tops. I will take you to it.'

"Barrault headed an expedition that was fraught with many adventures, to the mountain haunt of the marvellously big flower. Hardly had he started before the first of them occurred. Barrault's saddle-girth broke as his mule was stepping gingerly along a narrow mountain path at the edge of a two-thousand foot precipice, over which the orchid hunter promptly disappeared. He was caught in a tree growing out of the side one hundred feet below, and after his guides, peering cautiously down the chasm, had recovered from their dismay, a rope was lowered and he was hauled back to safety, none the worse except for a few scratches.

"They arrived without further mishap at their destination, two weeks later, and were soon hard at work collecting the orchids, which grew in great profusion. Then swamp fever struck the camp, and one after another the guides fell ill, so that Barrault had to give up his beloved orchids and turn nurse. Then he, too, caught the fever, and was prostrated for days. Some of the guides recovered before he did and taking advantage of his helpless condition, stripped him of his possessions, including the orchids, and left him alone in the forest. In his weakened state it took Barrault a week to work his way out of the dense gloom of the forest, guided to some extent by the almost overgrown path his expedition had hacked through the undergrowth. But at last he

CYPRIPEDIUM CAUDATUM.

We present herewith a picture of a remarkable plant of *Cypripedium caudatum* as in flower now at the conservatories of Mr. Chas. J. Carpenter, New Brunswick, N. J., where Aug. Seeman is gardener. As this lovely cypripedium is becoming practically

extinct in its native habitat, and is consequently very scarce, it is very pleasing to receive a photograph of such a large specimen, showing in every way the cultivator's skill. We are indebted to Lager & Hurrell for the use of the photograph.

reached a cluster of huts and rested for a week. Then, with the determination of a man who never knows when he is beaten, he set to work organizing another expedition. 'It was during this trip,' wrote Barrault, 'that with two guides I stumbled into an army of big, black ants. Before we could escape they swarmed all over us from head to foot. It was half a mile to the nearest forest stream—a half mile covered with dense undergrowth. Frantically we crawled our way to the water, suffering agonies from the bites of the infuriated ants, and when, after what seemed years, we reached the stream's brink, we barely had strength left to fling ourselves into the water.'

"Barrault's heart was still set on the possession of that beautiful snow-white flower. He had the remnant of Mrs. Wilson's gold in belts strapped to his body, and the party had not proceeded far when half a dozen of his redskin followers conspired to kill him in order to secure this money, which he had been forced to show them in order to obtain their services. Just before sunrise on the following morning, he, who was always on the alert for trouble, heard a slight noise outside his tent. Peeping out he saw six of his guides, armed with the long knives they used in hewing their way through the undergrowth, stealthily advancing on the tent. Without waiting a moment Barrault seized the sword he had used to such good purpose in his fight with the rebels, and sprang out. The Indians, although surprised, relied on their superior numbers and returned the orchid hunter's sword-thrusts with murderous lunges of their long knives. Barrault skillfully parried their blows until he had backed up against a huge tree, and then the real fight began. With the dexterity he had acquired in the French army he beat down the guards of the Indians, severely wounded three of them, and put the others to flight."

In the New York Herald of August

16, 1910, the adventures of another one of these collectors were recounted, although they were not as marvelous as those of Mr. Barrault. As a sample we copy the following:

"With a force of forty Indians to cut a path through the dense forest, Mr. Benson, with guides and pack mules, made his way across Colombia from its capital, Bogota, and returned only after many narrow escapes, to say nothing of tribulations that came with the desertion of many of his Indians and the loss of others through death.

"Mr. Benson said that if it had been possible to climb the trees to which the orchids attached themselves, it would have been easy to obtain them, but that climbing was perilous owing to the presence of small poisonous green snakes hidden in the foliage.

"While making his way in a boat up the Carae River, Mr. Benson said his craft was overturned by an alligator, which with its mate made off with one of the Indian guides. Mr. Benson said that he saved the life of one of his Indians who had been bitten by a snake by keeping him walking about for fourteen hours to dispel the lethargy that followed the bite. At another time, when his chief guide had left to obtain more Indians, Mr. Benson got lost in the forest and wandered about for two days without food."

The writer does not believe that either one of the collectors mentioned told the stories as published. Some reporter let his mind wander and manufactured tales that went into print. If they ever heard these stories and contradicted them is something that I do not know of. If the wonderful exploits would refer only to green or blue snakes, tremendous precipices,

PANSY—Boddington's "CHALLENGE"—All Colors

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said, "Why don't you call it Defiance?"

Trade pkt., 50c; 1/8-oz., 75c; 1/4-oz., \$1.50; 1/2-oz., \$2.75; oz., \$5.00

Giant Rosy Lilac.15	.60	2.00
Giant Pretiosa. Crimson-rose, white margin, violet blotch.....	.15	.60	2.00
Giant White. Violet spot, the largest white.....	.10	.50	1.50

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

dense undergrowth, armies of black ants, swamp fevers, and pitched battles of one hero against a lot of Indians, the stories would not be harmful, and, except for their inaccuracy they would seem interesting. But when the collectors wilfully and maliciously slander the natives as "thieves and assassins," it is time to put a stop to such talk.

In no country on the face of the earth is property more respected and life more secure, than in the countries where these collectors go. There is as much danger of snakes and other animals there as there is in any place in Jersey and New York, and the climate where the commercial orchids grow and are collected is far better than any climate in the north and simply delicious.

It is peculiar that all the "green collectors," or the new starters are the manufacturers of these wonderful stories. We have not seen men like Lager, Bungereoth, Forget and other collectors of their calibre tell stories of the kind we have read as told above.

It is well for all to know that orchid-collecting is not such a dangerous undertaking; that heroes are not forced to take arms and fight the rebels in any country, and that they only do it in dreams; that it is very seldom that a man can see a snake; that orchids do not grow in the jungle or in deleterious climates; that the natives do not rob the collectors in any way, and that they are as honest as the collectors themselves. That no collectors

go into the forests to gather the plants except the natives; that the armies of dangerous black ants are the products of feverish imagination, and that the search for the "Snow-white Orchid," is nothing but one of the pretty little fibs given to ignorant readers.

I will take later on the description of orchid-collecting as it is done, and meanwhile I hope that the collectors will endeavor to give true accounts of their experiences, and especially to be careful about slandering the natives from whom they receive so many favors and who work so faithfully for them.

A COLLECTOR.

GLADIOLUS PINK BEAUTY.

This gladiolus may be said to be the first of an entirely new type. It is a large-flowered variety, blooming at the same time as The Bride and others of that section, and it may be expected to find great favor where an early display is wanted. The introducer is Mr. P. Vos, of Haarlem, Holland, at whose request I grew a number of bulbs in the garden here, he being desirous of testing its early-flowering qualities in Scotland. It has also been successfully tried in various parts of England, so that there is no doubt about its earliness. Planted with Childsii, Lemoine's hybrids and named varieties of the Gandavensis type during the last week of March, Pink Beauty bloomed seven weeks in advance of any of the others.—Thomas Hay in "The Garden," London.

PUBLICATIONS RECEIVED.

Plant Physiology, B. M. Duggar. Edited by L. H. Bailey. This is one of the "Rural Text Book Series," published by the MacMillan Company. This book is intended primarily for the student, but will be found useful by everyone engaged in any department of horticulture, affording the gardener the means of answering the many "whys" for much of the cultural phenomena which are constantly recurring and which he up to the present time has dealt with by imitation, rule of thumb or chance experiment. The time has now come when the educated horticulturist will be the most successful horticulturist, when scientific knowledge added to practical experience will be the gauge of the well-equipped culturist in any and all lines. The student in our agricultural colleges is getting this broad foundation so necessary to prepare him for the demands of the future. Dr. Duggar has given in the book under notice a big forward impulse to the study of plant physiology. The subject is treated in minutest detail and in the most lucid manner. There are over 500 pages and numerous illustrations. The price of the book is \$1.60 net, and we would most confidently recommend it to any gardener who aspires to advance in the knowledge of the fundamental principles of his calling.

During Recess

New York Florists' Club Outing.

A beautiful clear day, refreshing ocean breezes and a company of about 250 jovial picnickers all conspired to make the eleventh annual outing of the New York Florists' Club, June 28, a pronounced success. To this another factor may be added—the efficient manner in which the management of Witzel's Point Grove catered to the inner man. A pleasant trip down the harbor preceded the landing at the picnic grove. At the table when all were seated, President J. B. Nugent made a few brief and pertinent remarks of welcome and congratulation.

The sports were as usual a center of interest for old and young, and there were many of the latter in the company full of ambition to compete and win some of the tempting prizes listed in the program.

The Games.

Coupon prize, for first three numbers of tickets drawn—first, \$3, second, \$2, third, \$1: 1, Frank Traendly; 2, R. Wittman; 3, R. Karlstrom.

Ladies' bowling: 1, Miss A. Birnie; 2, Miss Middleton; 3, Mrs. Miesem; 4, Mrs. L. Schmutz, Jr.; 5, Mrs. Donaldson; 6, Mrs. B. Chadwick; 7, Mrs. L. Schmutz, Sr.; 8, Mrs. E. Wittman; 9, Mrs. Traendly.

Baseball, Benedicts vs. Bachelors—won by the Bachelors, score 4 to 0.

Children's race, 5 to 7 years, 35 yds.: 1, Genevieve Einsman; 2, Ethel Bettner; 3, William Miller; 4, Alfred Schmutz; 5, Chas. A. Traendly; 6, Dorothy Bolles; 7, Anna Karlstrom.

Girls' race, 7 to 9 years, 75 yds.: 1, Katherine Miesem; 2, Margaret Salkind; 3, Gertrude Schimmel.

Boys' race, 7 to 9 years, 75 yds.: 1, Chas. Miesem; 2, Jos. Wolter; 3, Ira Friedberg.

Girls' race, 10 years to 12 years, 90 yds.: 1, Barbara Miesem; 2, Louise Landon; 3, Eloise Schmutz.

Boys' race, 10 to 12 years, 90 yds.: 1, Edwin Einsman; 2, Laurence Einsman; 3, Geo. Wolter.

Young ladies' race, 13 to 15 years, 100 yds.: 1, Anna Miesem; 2, Olive Her; 3, Alice Wolter; 4, Margaret Weber; 5, Maria Thorne.

Boys' race (shoe race) 13 to 16 years: 1, William Manda; 2, Chas. Bogart; 3, Geo. Wolter; 4, Laurence Einsman.

Boys' race, 16 to 19 years, 150 yds.: 1, Philip Wolter; 2, Samuel A. Mills; 3, Edw. Manda; 4, Chas. Bogart.

Young men's race, 19 to 21 years, ¼-mile: 1, Geo. Gardner; 2, A. Weston; 3, Edw. Manda; 4, Frank Manker.

Young ladies' race, 16 to 20 years, 50 yds.: 1, Dora Strehle; 2, Annie Birnie; 3, Jeanie Birnie.

Special race, 100 yds., by request, C. W. Scott vs. John Miesem—won by John Miesem.

Men's pipe race, 25 years or over, changed by the committee to fat men's race: 1, Jos. Manda; 2, B. Jacobus; 3, Jacob Dreiser.

Married ladies' race: Mrs. A. P. Cain; 2, Mrs. A. G. Handel; 3, Mrs. Frances Salkind; 4, Mrs. H. Hornecker.

Married ladies' needle race: 1, Mrs. A. P. Cain; 2, Mrs. Wm. Ebert; 3, Mrs. Frances Salkind.

Growers race, open, 100 yds.: 1, Walter Schachtel; 2, Alex. Donaldson; 3, Anthony Pomper; 4, A. L. Miller.

Three-legged race: 1, Samuel Mills and Paul Rigo; 2, Edw. Manda and A. S. Handel.

Sack race: 1, Edw. Manda; 2, Walter Schachtel; 3, Chas. Bogart.

Peanut race, children under 10 years: 1, Ira Friedberg; 2, Chas. Miesem; 3, Chas. A. Traendly.

Growers' race (cut flowers only) 100 yds.: 1, Jos. Manda; 2, Alex. Donaldson.

Men's race, open, 60 yds.: 1, Philip Wolter.

Seedsmen's race, 100 yds.: 1, Edw. Boylan; 2, Otto Kronmuller; 3, Alfred Rickards.

Gentlemen's bowling: 1, Mr. Rovatzos; 2, Mr. Miller; 3, Mr. Wittman; 4, Frank H. Traendly; 5, Mr. Turner.

Running hop, skip and jump open to

men only: 1, Walter Schachtel; 2, Andrew Scott.

Elephant race: 1, Samuel Mills and Geo. Gardner; 2, Edw. Manda and Walter Schachtel; 3, J. H. King and A. G. Handel.

Special prize for largest family present—won by Mrs. Einsman's family.

Special prize for handsomest lady—Mrs. Holt, Sr. Also for handsomest baby under two years old, a prize to each as follows: John C. Donaldson, James Kessler, Andrew J. Handel and Gladys Manker.

Watermelon seed guessing the number of seeds contained in the melon proved to be 1121—1, Alfred Schmutz, guess, 1111; 2, Chas. Traendly, guess, 1110; 3, Chas. Lorenz, guess, 1100; 4, R. Wittman and A. C. Scott, guess, 1150.

After the games were finished dinner was served and the prizes were there distributed by President Nugent.

The outing committee was composed of Jos. S. Fenrich, chairman, Robert Young, secretary, A. H. Langjahr, treasurer, C. W. Scott, S. S. Butterfield, R. M. Schultz, B. Chadwick, John Donaldson and William Kessler.

Baseball at Philadelphia.

In one of the most interesting games ever played at Ardmore, Pa., the William Henry Maule Company's baseball team succeeded in defeating the Henry F. Michell Company's team by the score of 5 to 4. The game was full of sensational plays on both sides, which brought the spectators to their feet time and again.

A crowd of people witnessed the struggle for supremacy of the Seed League, which promises to be an interesting race before the end of the season.

Next Saturday, July 8th, Henry F. Michell Company's team plays Henry A. Dreer's, Inc., team at Riverton, N. J. The boys of both teams are practicing every day and a tight game is expected.

The score of Saturday's game is as follows:

	1	2	3	4	5	6	7	8	9	H	R	E
Maule,	3	1	0	1	0	0	0	0	11	5	4	
Michell,	0	0	0	2	0	0	0	1	1	14	4	2

An Interesting Fishing Trip.

A fishing party consisting of James E. Jones, Proprietor of the Advance Co., his son, Raymond, Fred H. Lemon, proprietor of the Fred H. Lemon Co., florists, Indianapolis, Ind., and two other local friends motored to Colon, Mich., on June 23rd. The trip was made on a very warm day and some tire trouble was experienced. Mr. Lemon, standing 6 feet 2 inches, wearing borrowed clothes for a fishing costume, represented a typical Ichabod Crane. Regardless of this, his fine disposition and comical jokes kept the party in a merry condition at all times. Several fine fish were caught by the party including a "billfish" or "gaarfish" which was 42 inches long. The rushed condition of the two firms above mentioned shortened the stay of the party and the return was made on the 27th without incident.

Chicago Bowling.

Scores June 22, 1911:

J. Huebner	160	179	171
J. Stevens	213	257	197
A. Huebner	178	122	149
Mrs. Asmus	111	122	
W. Lorman	153	166	156
Schlossman	145	138	126
A. Zeck	211	136	166
W. Graf	141	171	156
T. Vogel	156	192	114
J. Zeck	180	192	184

Extreme hot weather has made attendance lighter than usual and vacations are also cutting into the ranks of the bowlers.

¶The value of clay for pottery is not based on the mere cost of delivering the clay at a certain place, but on the quality of pottery, which, in the hands of artists, can be produced by that particular clay. Both material and art are necessary to create the ultimate value—one is dependent upon the other. So with lily bulbs, you must have good bulbs and be a flowering artist to evolve from them all they will produce. Bad bulbs are the most costly to buy because of the lost time, space, expense and effort wasted and then no returns, so how foolish it really is to buy bulbs because they are cheap—that's when you should be suspicious of them. Get good bulbs—base your costs on the average flower production and don't take chances on cheap bulbs, for one dose of bad bulbs will more than offset the additional cost of better bulbs for perhaps ten years. Horseshoe Brand Cold Storage Giganteum ready for delivery now or later—fully matured December 19.0 bulbs—the best produced. Prices sufficient to allow us a reasonable profit only. Write for them.

Seed Trade

Chicago, Ill.—By taking in No. 226 West Kinzie street, the Leonard Seed Co. has added about 15,000 square feet.

Philadelphia, Pa.—The Moore Seed Co. is moving into its large store at 125 Market street.

San Francisco, Cal.—The Trumbull Seed Co. has opened a store at 259 Market street.

Richmond Hill, N. Y.—A retail florist branch has been added to the seed business of Carter & Son.

Baltimore, Md.—The Frederick Weiseman Seed Co. and Robinson Bros. are two new seed houses to be established here.

New Ulm, Minn.—F. W. Kosek is now manager for the Minnesota Seed Co. He was formerly with the Farmers' Seed and Nursery Co., Fairbault, Minn.

Memphis, Tenn.—The United States Seed Co. has established a branch office at Front street and Gayoso avenue. Charles Jackson of Fredonia has been appointed manager.

Langdon, No. Dak.—Specifications are out for a new seed building to be erected here. It will be much the same as the seed building at the agricultural college.

Jackson, Mich.—The American Seeding Co. lost several carloads of farm machinery on June 27 by a fire which totally destroyed the big building of the Storage and Transfer Co., where it was stored.

Chicago, Ill.—The W. W. Barnard Co. have leased the stores at 231-233-235 W. Madison street, Chicago, and will move from their present quarters on Fifth avenue, January 1st, 1912. This will give them a much larger place and a better opportunity for handling their increasing retail business.

Howard M. Earl, manager for W. Atlee Burpee & Co., arrived home from his crop inspection tour of the 22nd ulto. The journey extended as far as the Pacific coast, and was a strenuous eighteen-day flying trip. We hope to get a line on how crops are looking, and what the prospects are—when he gets his breath. This will be of much interest to the seed trade—coming from a keen observer and one representing big things in seed growing and distribution.

Little Ads Bring Big Returns

Little ads in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

RHODODENDRONS AT REGENT'S PARK.

What is claimed to be the largest flower show made by any one firm in the world was held during the month of June in a shady dell covered with a huge ridge and furrow tent in the garden of the Royal Botanical Society, Regent's Park, London, by the well known firm of John Waterer & Sons of Bagshot, Surrey, specialists in American plants. This imposing annual display has been made by that firm in the same place for many years past.

It is an ideal spot, chosen with a view to the picturesque, and our best compliments must be offered to the firm on the marvellous artistic taste displayed, somewhat a rarity amongst English horticultural exhibitors. The area covered is something like half an acre.

We are about to proceed to make our notes and wander round the show on our own sweet way when a courteous attendant offers to place himself at our disposal. The mere mention that we are taking notes for HORTICULTURE of Boston, U. S. A., is sufficient to arouse his interest and to point out all that is newest and best in the vast agglomeration of beauty and color effect. We learn from him that there are approximately 3000 plants in the show, and that these comprise about 120 varieties. There would seem to be an increasing section of the flower-loving fraternity devoting their attention to the plant and small amateurs in and around our great cities are using the rhododendron much more freely than formerly, leaving aside aucubas, privets and other evergreen shrubs once so much the fashion.

It would be practically impossible to note all the many varieties that form the bulk of this important display, but passing along the outer border we notice at intervals some very attractive plants of Mrs. Tritton, crimson, light centre. Gloriosum, bluish white, Sappho, white heavily spotted, Baroness H. Schroder, white spotted, Mrs. Holford salmon crimson, Mrs. John Waterer, rosy crimson, Album Grandiflorum, white, Everestianum, rose lilac, Concessum light centre margined rose. Pink Pearl, seen in several fine examples is most attractive. Gomer Waterer white, slightly blushed, Prometheus, crimson, Stella, pale lilac, spotted, John Henry Agnew pale bluish, chocolate spots, Frederick Waterer fiery crimson, Michael Waterer scarlet crimson and Princess Hortense, lilac rose are all noted as fine samples that will maintain the best traditions of the firm. We pass rapidly in review in the various beds and groupings others that can only be just briefly mentioned and of which a special note was taken, viz.: Charlie Waterer, Strategist, Mrs. John Penn, Mme. Carvalho, Minnie, Lady Eleanor Cathcart, B. de Bruin, Mrs. John Clutton, J. Marshall Brooks, Mrs. Holford, Lady Clementine Walsh, Helen Waterer, Mrs. Britton, Countess of Tankerville and numerous others.

We can only briefly add a few notes concerning the remainder. A pretty bed further on contains a number of plants of Kalmia latifolia; another bed close by is composed of Viburnum plicatum, Japanese maples and azaleas.

Then we pass on to several more large and well filled beds of rhododendrons.

Altogether the show is an eminently successful one and does great honor to the firm that has organized it especially considering that only a few days previously they made a fine display at the Royal Horticultural Society's Hall of a similar character. In fact they filled the hall from May 30 to June 2nd with a similar kind of show entirely on their own account.

SOME INDUSTRIOUS BOYS.

There is an innovation in the Syracuse Park Department that might be followed with advantage by other cities. Two years ago some of the manly and independent high school boys asked the Superintendent of Parks, David Campbell, for work on the parks. After some consideration he consented to give some a trial, and gave them to understand there were no soft snaps, that they would have only rough hard work to do. He was agreeably surprised to find they made good. This year over eighty are employed, shoveling soil, digging, hoeing, raking and the like. One can see doctors', lawyers' and other professional men's sons with overalls and jumpers on working like good fellows—they do men's work and get men's pay. This roughing it will do them a vast amount of lasting good.

AN IMPORTANT LEGAL DECISION.

The circuit court has affirmed the
verdict and judgment for \$1,065 given
George & Allan, florists, Hyde Park,
Cincinnati, against the city as compen-
sation for loss and damage to plants.
In December, 1908, there was a break
in one of the mains near George &
Allan's greenhouses, and instead of
turning off the water from the broken
main the water was turned off from all
the mains in the neighborhood, and,
as a result, both of the sources of
George & Allan's water supply to their
greenhouses were cut off. Because of
being thus deprived of water the
florists were unable to maintain steam
heat for their greenhouses, and, in
consequence many of their plants and
flowers were destroyed.

E. H. HUNT, 131 N. Wabash Avenue, Chicago

CHICAGO NOTES.

Trade Items.

E. C. Amling asserts that White Killarney has supplanted Kaiserin, in his experience, and that in the near future a red Killarney will take the place of Richmond.

C. H. Ketcham of South Haven, Mich., who specializes in gladioli, is sending some fine stock to Chicago. His America were excellent and cut with four-foot stems.

All the wholesale houses are now closing at 5 p. m., as is their practice during July and August. Here is where they are the envy of the retailers, many of whom must keep open shop till 10 p. m.

The green and white windows are the most popular now and it certainly is a pleasure to the passersby to stop and look at them. Even the suggestion of coolness is appreciated by

pedestrians when the thermometer is near the hundred mark for days.

A large sign over the entrance to 176 Michigan avenue announces the opening of the Chicago Flower Growers' Association for the 15th of July and the building is being put in readiness. Two of the four stories will be occupied by the new firm and the others rented for the present. A wholesale florists' sign looks unusual on Michigan avenue, but the building is really very close to the old district, an alley only, separating it from the J. A. Budlong place.

Frank Oechslein, 4911 W. Quincy street, who grows plants for the wholesale trade, is fast getting his new range of six houses into shape. It will make a fine addition to his already fine place. A new office is also under construction and will greatly facilitate the handling of orders, etc. Over 4000 square feet of cement walk have been laid, the parkways have been planted to bedding stock and other general improvements made. The new range is constructed of cement walls with pipe frame. The Foley Manufacturing Co. furnished the rafters and gutters. A No. 12 Kroeschell boiler will complete the equipment.

Personal.

Phil Schup and family are at their summer home at Lake Geneva.

Nick Miller is able to take up his work again after being off duty for a month with a disabled shoulder caused by a fall from a ladder.

A Lange and family will start for the west July 10th. On account of the hot weather Mr. Lange has given up California and will make Colorado Springs his headquarters.

A. J. Simmons of 63rd street is rapidly regaining his health and is anticipating an outing with the National Guards, of which he is a member, at the state encampment.

Martha Gunderberg reports her mother as doing nicely though it is still too early to tell whether the cuts made by broken glass will leave permanent scars. Mrs. Gunderberg was on the Milwaukee car coming from the Saengerfest and reported last week as seriously injured.

Jack Byers, who left a week ago for a motor boat cruise on Lake Michigan, had a very narrow escape from drowning. The little boat met with a very rough sea and the engine broke just as she was going into the harbor. Had this happened outside it is extremely doubtful if the occupants of

the boat could have reached shore.

Mrs. Joseph Brooks of Morton Grove came very near being a victim to premature celebration of July 4th. While the family was sitting on the lawn Sunday evening a falling rocket stick passed through Mrs. Brooks' hair just grazing her head. It fell with great force and would have caused injury and possible death had it struck her squarely on the head.

Visitor—C. C. Sanders, St. Louis, Mo. Philip Breitmeyer, Detroit, Mich.

NEWS NOTES.

Cumberland, Ind.—A cold storage plant is being built here by the Smith & Young Co.

Haverhill, Mass.—The partnership of Leith & McDonald has been dissolved. Frank Leith will continue the business.

Riverside, Cal.—F. D. Mear has sold his half interest in the Riverside Nursery to E. M. Syp of the firm of Syp & Hendricks.

Atlantic City, N. J.—A partnership has been formed between Walsh & Burns, who will do a business in shrubs, plants, gardening, etc., at 415 North Illinois avenue.

Baldwinsville, N. Y.—The dwelling and greenhouse of Mrs. Thos. Emerick has been purchased by S. C. Baker, formerly of Baker & Son. He will continue growing a general line of stock.

Flower Market Reports.

BOSTON Today, the fifth of the intense heat finds the flower market almost wrecked. To get flowers into the city in any saleable condition is next to impossible and to think of shipping them out again is an absurdity. Never before have we faced such a situation. Roses, carnations and sweet peas—the three mainstays of the market are worthless when the boxes are opened. It is consoling, however, to know that we are at the very lowest point in the business season and the demand is at its weakest stage. For once Boston's famed east wind seems to have forgotten her but we hope it is not for long. All field crops are suffering from drought.

CHICAGO The summer season, with a few variations to the usual conditions, is fully here. For six weeks extreme hot weather has prevailed and the usual amount of stock greatly lessened in consequence. Indoor stock has narrowed down to Beauties, orchids, summer roses, lily of the valley, carnations and lilies. The Beauties are very good considering all things and the demand uses up the daily cut. Of summer roses the quality varies more. There are some splendid Killarneys, especially in white, and with orchids, lily of the valley and sweet peas have met the wedding and commencement demand, the indoor sweet peas just lasting through the month. Out-of-door sweet peas have been greatly retarded in some localities, by the extreme heat and the vines permanently injured, while in all sections the stems are shortening rapidly. The demand for orchids has been steady. Red roses are not used much and orders are for limited quantities only. Gladioli in splendid quality are coming from Michigan, and this showy summer flower sells well when good varieties are offered. The wholesalers generally claim to be pleased with the volume of business done the past month and if summer stock holds up to what it now is, are expecting fair trade during the summer.

Trade during the last week in June was all that could be desired. Supplies are decreasing very rapidly, and those houses that are fortunate enough in receiving stock of good quality find a ready market, as good flowers are none too plentiful. There was a liberal supply of short-stemmed Beauties, with the longer grades just equal to the demand. The Taft rose continues to show its superiority over all other pink sorts for summer blooming, with My Maryland next in line. Killarney, both white and pink, that are received are short in stem, but help to relieve any possible shortage in the demand for pink roses. White roses, which were in heavy crop during the previous week, slackened up, and with a good demand both locally and out of town for good white roses the market at times run short. Shorter grades were more plentiful. The receipts of carnations have become light, and those received clean up readily. Buy-

A Seasonable Hose Offer

THE P/M BRAND

This brand has been made specially to our own order and specifications, and stands the rough usage of the greenhouse better than any other make at the price. Quality guaranteed. 25 and 50 ft. lengths.

16 cents per ft., couplings included.

THE BULL DOG BRAND. Next to the P/M this well known make is in great favor with florists.

16 cents per ft., couplings included.

THE 32½c. HOSE This may sound an extravagance to many and yet we are told by some of our customers that it is even more economical in the long run than anything lower priced.

32½ cents per ft., couplings included.

All Hose sold by us is guaranteed. Store closes daily at 5 p. m., during July and August

ers are already inquiring for asters, but the prospect for these is not very bright, at least as far as local growers are concerned. Good sweet peas find a ready market, while those of poor quality are hard to move at any price. Shasta daisies are at an end for the season. Lily of the valley in fair supply and demand. Lilies are no longer as plentiful as they have been during the past month. They sell steadily, and prices are well maintained. The supply of green goods is in every way equal to the demand.

For several days we **DETROIT** have again been sweltering under a heat wave which breaks records daily as far back

as 27 years. I am certain that nobody, no matter how enthusiastic he is over Detroit's many excellent features of a city to live in and work in, cares for Detroit to be a record breaker in such a direction. That flowers of all kinds are more than scarce need hardly to be mentioned. Indoor sweet peas are all gone, and out of door are checked very much through the hot and dry spell. Retail demand has very much quieted down. Florists in general report the past June ahead of the one a year ago, but not as far ahead as May, 1911, was over May, 1910. This feature may be explained by the fact that the demand for bedding stock was more

Flower Market Reports

(Continued from page 40)

this year than last, on the other hand cut flowers had suffered very much from the hot weather in May, and the quality offered in June was very inferior.

NEW YORK Midsummer conditions have struck this neighborhood with sudden vengeance. Everybody who can get out of town has done so and, as for those that are left, flowers are about the last thing they need. The extreme heat which has covered a large part of the country during the past week about ruined the flower crop for the time being. The product is small as to bulk and almost useless as to quality. The retail stores make no pretense of carrying stock. Their windows as a rule are adorned with a few ferns or palms, an occasional bunch of garden or field bloom and sometimes a dish of water lilies. If an order should chance to come in the purchasing clerk gathers himself together and makes the round of the wholesale stores where he is as welcome as can be. Steamer trade has fallen off and quiet times are on for the next few weeks.

PHILADELPHIA We have looked carefully around the purlieus of Philadelphia for any signs of excitement in the cut flower markets. We have not found any to speak of and have the honor, therefore, to report that all is quiet along the Delaware. Some slight skirmishes were in evidence early last week and considerable loot was gathered in from the enemy; but later the operations were only of a commonplace character and barely sufficient to keep the commissariat department in ordinary rations. By Saturday much of the spoils were in danger of spoiling from the great heat—and were allowed to go to the enemy with little resistance. This strategic movement saved trouble and cleared the front for action on the 3rd. On the latter date some flank movements were successful with the American Beauty battalions and the enemy had to succumb to superior force, both in quality and indemnity. Worthy of special mention also, was the good work done by the Marylands. They were in fine form and got in the running considerably ahead of the Irish Brigade—the redoubtable Killarneys. The white squads were led by the Hohenzollerns in the nearby skirmishes; but for distance work the hon-

NEW YORK QUOTATIONS PER 100. To Dealers Only

ors must be awarded to the Irish. The Carrie Nations have shed their pants and are back in the cooking tents temporarily. Minor items not making history to any extent.

ST. LOUIS The market the past week showed very little of anything new and all the consignments continue poor grades in all varieties. Roses in demand but good ones are hard to find. Carnations also continue poor. Gladioli clean up daily. Lilies are good and lily of the valley has had a large demand. Sweet peas are very poor—in fact all outdoor stock is poor this season.

SYRACUSE The cut flower trade is dull, but large funeral orders keep the stock well worked up. The excessive heat for the past week or more has raised Cain with everything in the houses. There is some anxiety felt over the chrysanthemums, and the outcome next fall. Carnations in the field are doing finely, and promise some grand plants for fall work. Heavy and frequent rains in May and June gave them a good start, and frequent cultivation keeps the moisture in the ground. The plants are making a splendid growth. Some showers now would do much good, and tend to keep down red spider, which is bound to make its appearance if this excessive heat continues.

IN BANKRUPTCY.

Michael F. Toomey of Franklin, Mass., proprietor of the Oak Hill nurseries, and having a place of business at 10 Tremont street, Boston, has filed his schedules in bankruptcy in the United States District Court in which he acknowledges debts aggregating \$42,538.57. Toomey was petitioned into bankruptcy on June 8. His assets amount to \$749.12. Of the liabilities \$30,818.57 is unsecured and \$10,920 secured.

PERSONAL.

Carl C. Reck, florist, Main street, Bridgeport, Conn., was married June 20 to Miss Emily Reid Thomas.

Visitors in Boston—Mrs. Eugene Dailedouze, Brooklyn, N. Y.; Miss Millie Dorner, Lafayette, Ind.

Robert Hunnicks, head gardener to Mr. Wm. Maxwell, Rockville, Conn., has resigned his position and is going back to Newport, R. I.

Mrs. Fillmore, Sr., who has charge of the cut flower department of F. J. Fillmore & Sons, St. Louis, is visiting Kansas City, Mo., for a two weeks' vacation trip.

George Gordon of Beverly, Mass., started on July 6 on a two or three months' tour westward as far as the Pacific coast, stopping at Detroit, Denver, San Francisco, Portland, Seattle and other important points.

Mr. and Mrs. Charles Dingee, of West Grove, Pa., announce today the engagement of their daughter, Miss Marion H. Dingee, to Mr. George M. Barnard, of New Castle, Ind. Mr. Barnard is the Mayor of New Castle, and a son of former Congressman Barnard of Indiana. The wedding will take place in the autumn, at the country home of Mr. and Mrs. Dingee, at West Grove, Pa.

The many Boston friends of Mr. Michael Keenan will be glad to know of his success as manager for P. R. Quindt at his Salem street store, Syracuse, N. Y. Every one in the trade has a good word to say for him, and he is making a host of friends among all classes. His work as a designer is much praised. A very important item with all florists, is window decoration, and this receives his personal supervision, and many attractive and artistic displays have been made. The store itself has been greatly improved, and now looks up to date.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

Dept. H. A. Springfield, Mass.

CABBAGE KEPT FREE FROM WORMS.

DRAKE'S GARDEN.

East Brookfield, Mass., Jan. 14, 1905.

We have used **Slug Shot** and always found it very useful. Our potato crop yielded 200 bushels to the acre. **Slug Shot** for Cabbage Worms is the best defense in the world.

Very truly, F. A. DRAKE.

Cabbage Worms.

The Cabbage Worm has spread wherever cabbage is grown. Whether early cabbage or late cabbage, in garden or field, it perforates the plant, and is of all worms one of the most disgusting, to find hidden away in the folds of the leaf.

IF YOU WANT CABBAGE FREE FROM WORMS, USE HAMMOND'S SLUG SHOT.

How to Destroy Cabbage Worms.—**Slug Shot** can be used lightly or heavily and the cabbage suffers no harm. The cabbage forms its head by the interior growth; it throws off its earlier and outside leaves, and no dust can enfold within its head. Apply **Slug Shot** with a Duster (see illustration), sieve it over the plants or full grown cabbages. The powder is very fine and goes a long way in field or garden.

Butterfly and Larva.

NEWS NOTES.

Chicago, Ill.—An addition that will about treble the capacity of its iron-working plant is being made by the Foley Mfg. Co.

Montgomery, Ala.—The Fernhill Greenhouses will now be known as the Morningview Floral Co. The houses are to be moved to Evergreen street.

Framingham, Mass.—W. R. Nicholson has bought the greenhouse property and business of his father, William Nicholson. He will do considerable renovating and rebuilding, and will develop the plant into a first-class carnation establishment.

Port Jefferson, Long Island, N. Y.—Liberty Gardens has been incorporated with capital stock of \$10,000 by Arthur S. Greene, president; Henry E. Weekes, superintendent and manager; and Lavinia W. Greene, vice-president. The object is to produce vegetables, salads, fruits and flowers every day in the year. The present acreage is 14, but this will be increased from time to time. They expect to be ready for business about August 1. The true French intensive system will be followed and careful records will be kept to account for each foot of land and what it yields in profits. It is believed by

To-Bak-Ine Products Kill Bugs

You can buy it in Liquid Form, Fumigating Paper, Fumigating Powder and Dusting Powder (Booklet—Words of Wisdom—free).

"FUNGINE"

Westerly, R. I., June 28, 1911.

"We have given your Fungine a fair test and believe it to be alright. It seems to check mildew and from what experience we have had so far we believe that it will prove valuable in fighting this particular trouble."

S. J. REUTER & SON, Inc.

Metalrie Ridge Nursery Co.,
Harry Papworth, Pres.

New Orleans, La., June 13, 1911.

"Replying to your favor in regard to Fungine, we are pleased to say that we have found it a fine fungicide, especially on our chrysanthemum cuttings, and all cuttings generally. Also fine for mildew on roses. It is the best fungicide we have ever used."

What the Users say

USE KROESCHELL BOILERS AND KROESCHELL GENERATORS
AND PIPING SYSTEM: SATISFACTION GUARANTEED.

"Received your inquiry of the 9th inst. in regard to Kroeschell Generator purchased from you. We can safely say that without your Generator it would be almost impossible to heat our houses with any degree of safety, as our expansion tank is but 18 inches above the highest pipe line, and we had No Trouble Whatever in keeping the required temperature during the recent cold spell, with the thermometer at 12 degrees below zero. We are glad of the opportunity to recommend your Generator, Boiler and Piping Plans to our fellow florists, knowing that when placed as directed they will give perfect satisfaction. We Did Our Own Piping, and none of us ever had any experience in that line before.

TO BUYERS

Patronize our advertisers, they will treat you right

Maine

THE

Potato State

Buys the Best; There Is in Greenhouses

MAINE

For years Maine has been noted for her potatoes—no state in the Union now grows as fine or makes such a wholesale business of it.

She buys a goodly number of L. & B.'s complete "Iron Framers." This one of D. C. Blair's at Bar Harbor, Me., is but one of a dozen or more others right around in that section that have been sold comparatively recently by our Boston Office.

From Irvington, N. Y. to Bar Harbor, Maine, seems a long way to ship materials for a greenhouse, but Baton Rouge, Louisiana; Colorado Springs, Colorado; Los Angeles, California and such, don't stop for distance when they want one of our superior houses for superior purposes—so why should Maine.

The freight for such a distance is not such an item as you might think, as it is actually paid on finished materials only—materials that are all cut and ready for immediate erection. No large excess of cypress is shipped to be cut and wasted on the job as is the usual way—no excess of iron to be worked out by rule of the thumb measurements. The exact things needed are sent exact. They are made exact at the factory. Mention these facts to your employer; they are bound to impress him.

We are turning out over two houses a day at our factories but they have room for that one of yours. Send along the particulars and see if we can't work together and get things started.

HYDRANGEAS

FOR SUMMER FLOWERING

LARGE PLANTS IN TUBS FOR JULY AND AUGUST FLOWERING

We have an unusually fine lot of hydrangeas, which have been held dormant all winter. These plants will begin to bloom the end of June or early in July, and are in fine shape for flowering during July and August. We can furnish these plants in ordinary tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs painted green, with handles, as follows:—

Well budded plants in 14-inch tubs, \$3.00 each
Well budded plants in 16-inch tubs, \$4.00 each
Well budded plants in 18-inch tubs, \$5.00 each

FERNS

We have an exceptionally fine lot of Boston Ferns of the Harrisii type and a splendid lot of Pierson Extra fine plants, \$1.00 each.

Ferns, good and bushy well-grown plants in 8-inch pots that will please the most critical buyer.

MISCELLANEOUS BEDDING PLANTS

ABUTILON SAVITZI. 3½-in. pots, \$8.00 per 100.
AGERATUM. Blue and white. 2¼-in. pots, \$2.50 per 100.
ALTERNANTHERA ROSEA AND AUREA NANA. 2¼-in. pots, \$3.00 per 100.
ASPARAGUS SPRENGERI. 2¼-in. pots, \$3.00 per 100.
BEGONIA VERNON. 2¼-in. pots, \$3.00 per 100.
CALADIUM ESCULENTUM. Strong started plants, \$5.00 per 100.
CANNAS. Beaute de Poltevine, Florence Vaughan, Buttercup, Mlle. Berat, Robert Christie, Souv. d'Antoine Crozy, Roballion, Frederick Benary, L. Patry, etc. Strong potgrown plants, \$5.00 per 100.

CROTONS. Fine assortment, 3½-in. pots, \$25.00 per 100; 5-in. pots, \$6.00 to \$9.00 per dozen—according to size.
GERANIUMS. Double Grant, Trego, S. A. Nutt, Marquis de Castellane, Double Dryden, Jean Viaud, etc. Strong plants, 4-in. pots, \$7.00 per 100.
HELIOTROPE. 2¼-in. pots, \$3.00 per 100.
LEMON VERBENAS. Extra strong plants, 2¼-in. pots, \$6.00 per 100.
NASTURTIUMS. Fine plants in bloom, 3-in. pots, \$5.00 per 100.
PANDANUS VEITCHI. Fine plants, \$3.00 to \$5.00 each.
PETUNIAS. Single mixed, 2¼-in. pots, \$3.00 per 100.
SALVIAS. 2¼-in. pots, \$3.00 per 100.

GERANIUMS

The steady increase in the demand for Geraniums is proving beyond a doubt that they are the universal favorites with the flower buying public. That they are today more popular than ever before, in fact the demand during the past season nearly exhausted the available supply. We are increasing our stock for propagation to the extent that we shall produce them in enormous quantity next winter and feel confident that we shall be in a position to fill your orders to your entire satisfaction, but would suggest that your order be placed early. We have already booked heavy on some kinds. Good standard sorts at \$18.50 per 1000, from 2 in. pots.

A splendid stock in 3 in. pots ready for immediate shipment, at \$3.00 per 100 and up, including Ivy Leaved in such varieties as Rycroft's Sunrise, Mme. Thibaut, Mrs. Banks, Alliance, Pierre Crozy, etc., Variegated Foliage, Silver Leaf Nutt, Mrs. Pollock, Sophie Dumaresque, Mt. of Snow, L'Eleganta, and Duke of Edinburgh.

Achryanthes Emersoni, Alternantheras red and yellow, Coleus, Lemon Verbenas, Swainsona Alba, Hardy English Ivy. 2 in. \$2.00 per 100; 3 in. \$3.00 per 100.

Make a note to visit us when at the S.A.F. Convention.

Farquhar's RARE LILIES FROM CHINA

Hardy, Beautiful, Fragrant. The Finest Novelties Extant

Lilium myriophyllum

LILIUM MYRIOPHYLLUM Mr. E. H. Wilson, the famous plant collector, collected for us the bulbs now offered, in North-western China. He considers this the finest of all lilies. It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink and with a beautiful shade of canary yellow at the centre, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the jasmine, and lacking the heavy oppressive odor of most lilies. Blooms out-of-doors early in July.

Orders booked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

LILIUM LEUCANTHEMUM The bulbs offered were also collected by Mr. Wilson. This is one of the strongest growing lilies frequently attaining a height of six to eight feet. The flowers vary in number from five to ten on a stalk, and in size and shape resembling Lilium Harrisoni, greenish white shaded purple on the outside, and of the purest white within with a tint of citron in the centre. The flowers have a pleasing fragrance. This lily will undoubtedly be largely used for outdoor planting as well as for forcing. Many consider it the finest of all tubular-flowered lilies. It flowers somewhat later than Lilium myriophyllum, and being of larger growth, has a distinct place.

Orders booked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

Seasonable Notes on Culture of Florists' Stock

CHIRYSALETHUMS

Those plants that were benched during May will be benefited by some sort of nourishment now. This can be supplied in the form of bone meal and about half an inch of some well-rotted cow manure. This will help to keep the beds from drying out so often and keep the roots much cooler. Where pot plants are well filled with roots, feeding can be commenced. Use weak doses of cow or sheep manure, to which some soot has been added; this will make the foliage a fine dark green while also affording good food for the plants. It is necessary during this hot weather to give copious and frequent syringings to keep the temperature down as much as possible. Buds can be taken on most of all the early kinds after the first week in August. This would include Golden Glow, Monrovia, October Frost, Bergman, Mersthan Yellow, Merry Monarch and Alice Byron. Polly Rose, Glory of the Pacific and Virginia Poehlmann should not be taken before the 20th of August as they produce only poor flowers if taken earlier. Plants in the late houses should be encouraged to make all the growth possible now. If any buds appear from now up to September they should be pinched off. If mildew is prevalent use sulphide of potassium—half ounce to a gallon of water and spray over and under the leaves.

HOUSING CARNATIONS

It is well to bear in mind, when lifting the plants from the field, to remove them as quickly as possible to some place where they have some protection from the hot sun and dry winds. If you have plenty of plants select only the best and most shapely for benching. When planting make a hole with a trowel large enough to allow the roots to have a proper spread, and set the plants just a little higher than they were in the field, as a preventive for stem rot. Give a firm pressing around each and every plant. Shade your house with something that will come off in ten or twelve days. After the fourth day remove a little each day so that in either ten or twelve days the plants will be able to stand full sun. As soon as you have 50 or 60 feet of bench planted give each plant a good watering. Keep your house rather close for the first ten days and spray two or three times a day until the plants have taken hold of the sod, when spraying should be reduced to normal. Keep on plenty of ventilation for it is a necessity in securing sturdy short-jointed growth.

HOLLYHOCKS

Now is the best time to start a liberal lot of these useful plants. You can either sow seed outdoors or in a cold frame. Where you have the latter at command it will prove the best, for you can give shade until the seeds have germinated and, with watering during dry weather and little care generally they will grow vigorously until the fall. Give the ground where they are to be planted out a good quantity of well rotted manure and work it in by a deep digging, as they like a deep soil with plenty of manure. It is better not to plant these seedlings out until next spring, but winter them over in a cold frame. During three or four months of the severest winter weather they should be protected with glass sash.

LORRAINE BEGONIAS

From now on keep all flowers pinched off and stop any runaway shoots. Give the plants a place quite close to the glass which should not be too heavily shaded.

Where it is possible give them shade during the hottest hours of the day with a lattice that can be removed after 3 or 4 P. M. and need not be put on until 9 o'clock in the morning, or may be left off entirely during dull and cloudy days. Keep the air humid by wetting down the paths and beneath the benches; this will give tone to the foliage. When the plants begin to crowd give them a fresh stand with plenty of room between each for light and air. Ventilate so as to avoid any sudden fluctuations in the temperature. Give them a shift before they become pot-bound until you have them in their flowering size. Use a compost of equal parts of fibrous loam, leaf mold, and well decayed cow manure.

ONCIDIUMS

These are good orchids to grow commercially, especially *Oncidium varicosum* Rogersii which has become very popular with florists. Give this oncidium plenty of air at all times during the summer months and to insure an abundance of atmospheric moisture wet down the benches, paths and walls three or four times daily during very hot and dry days. From now until October use some shading material, but not too heavy, as these orchids like an abundance of light, without being exposed to the full sun. Permit the plants to dry out occasionally so as not to let them get "sour," but don't let them remain dry for any length of time. A good plan is to go over them about three times a week and take them down, as watering with the hose is not always satisfactory. Then those that are dry can be dipped in a tub of water, a method which always properly moistens the compost. In bright weather give syringing overhead once or twice a day. It is well to remember that all varieties delight in being as near the glass as practicable.

PERENNIAL LUPINES AND LARKSPURS

These stately and gorgeous herbaceous perennials are always in demand. It is not too late to sow a batch of seed now in a coldframe for they will germinate very soon. Don't be in too great a hurry to transplant—that is if the stock is not too crowded, for they can stand quite a while without suffering, as long as you keep on cultivating between the rows and keep the weeds down. A slight shade to protect them against the noonday sun will do good, but full exposure to the sun the rest of the day, with proper watering and cultivating, is best. *Lupinus polyphyllus*—both the blue and white—are good. Of the tall delphiniums, *formosum* and *formosum celestinum* are fine. In addition it is well not to forget the dwarfier growing Chinese delphiniums as they are fine also.

ASPARAGUS SPRENGERI

A narrow bench running along the front or the rear of a well-lighted house is the proper place to grow this decorative green. It can also be grown in suspended or in raised receptacles and will give a valuable lot of green to cut from when grown this way. Give it where possible at least 10 inches of soil as it wants lots of root room. A soil that will grow roses will be all right for it but you can make it richer as they require the richest kind of soil to grow good. It will do finely in a temperature of about 55 degrees at night, or a little higher with plenty of moisture at its roots and with a reasonable amount of freely circulating fresh air. When the roots have filled their benches, boxes, or baskets they should have regular potations of liquid manure.

LILIES FOR FALL.

Now is a good time to secure and start up a batch of retarded *Lilium longiflorum* and *speciosum*. They will come into flower when flowering stock is com-

LIBRARY
NEW YORK
BOTANICAL
GARDEN

paratively light. There is a fairly constant call for these choice lilies, especially for funeral work. Use 6 or 7-inch pots and let them start in as cool a place as you may have, to develop good root action before the tops start. A good place to put them is on a cool cellar floor. Water them whenever they seem dry and when the growth show above the pots give them a place where they will have full light. Be on the watch for aphids so that they will not get a foothold, or the result will be deformed and discolored blooms.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Callas; Mulching Mixture; Pansies; Painting and Repairing; Rambler Roses; Solanums.

Summer Flowering Orchids

The accompanying picture shows some of the summer-flowering orchids now in bloom among the Duke's Park collection, at Somerville, New Jersey. The group is made up of such species as *Cattleya Gaskelliana*, *C. gigas*, *C. Harrisoniana*, *C. Mendelii* and *C.*

GROUP OF SUMMER FLOWERING ORCHIDS

Warneri, with *Oncidium crispum*, *O. Forbesii*, and *O. citrosmum*, and *Epidendrum vitellinum*, all of which when arranged together make a pleasing group.

The other picture is a Digbyana hybrid, cross between *Brassavola Digbyana*, and *Cattleya Mendelii*, usually called L-C. Digbyano-Mendelii, and which I think is one of the best, if not the best of all the Digbyana crosses. The two flowers shown here are pure white except for the throat, which has the markings as in the *Mendelii* throat. The flowers each measure 9 1/4 in. across, and the lip 4 in. at widest part, with a very heavy fringe.

Now that the summer months are here and the sun is about as hot as it will be, and most of the fall and winter flowering orchids have their new growths coming along, great care should be taken to protect them from the direct rays of the sun. The *C. Percivalianas* and *Trianae*s will be more advanced than *Schroderae*, and root action will be more free with them. Therefore they should never be allowed to dry out so as to cause the plant to suffer. Again we very often find, where the plants have a quantity of young roots on the surface of the peat, that they are very often eaten by snails, and if not looked after the snails will soon clean

the young growth of all its roots. While there are many ways to catch the snails, I always claim that it is far better for one to look over his plants at night as this is the time the snails get their work in. Although it may take a little extra time, it will pay in the end where snails are bad, for a few nights of going over will soon do away with a lot of them.

Phalaenopsis will be making new leaves now, and should be kept growing and given all the light you can without burning them. As the young leaves keep pushing up an outlook should be kept for any injurious insects, as they are very tender. A little time taken each morning to look over each plant will go a long way to make them a success. Just as soon as the *C. Gaskelliana*, *Mendelii*, and *gigas* are through flowering, would be the best time to repot or top dress them as needed.

L-C. DIGBYANO-MENDELII

Gigas should be as near the light as possible and kept a little on the dry side after potting, as they seem to break better after a short rest.

William Shaw

Forcing Strawberries

Editor of HORTICULTURE:

Dear Sir:—I read with interest your notes by G. H. Penson on varieties of strawberries for forcing.

Marshall is my best early. *Excelsior* is best with some of my neighbors. *Commonwealth* is an extra good second early. For late forcing *Goldsborough* will be found very satisfactory. The long foot stalks enables it to hold the fruit away up and out from the pot so that you can spray longer to keep clear of red spider without causing loss of fruit by damping.

Stamford, Conn.

W. M.

THE BURPEE EXHIBIT AT THE SWEET PEA SHOW.

The illustration herewith presented gives some idea of the superb sweet pea exhibit made by W. Atlee Burpee

& Co., at the recent show in Philadelphia. The picture shows only about one-fifth of the length of the display. It is not possible to do justice to such

an arrangement in one photograph. The colors were beautifully contrasted and harmonized but this, of course, must also be left to the imagination.

A FEW OBSERVATIONS ANENT SWEET PEAS.

By Edwin Lonsdale, Lompoc, Cal.

To the Officers and Members of the National Sweet Pea Society of America:

We are all aware that the Sweet Pea by its own intrinsic worth has forged to the front and now heads the list among annual flowers; aided to some extent, of course, by its numerous ardent admirers.

The Sweet Pea is rarely out of place, and is almost equally at home, blooming in the city yard, as it is in the more pretentious gardens of the suburbanite or on the broader acreage, further afield, among the more wealthy. The late and highly respected Henry Eckford is everywhere accorded the honored title of "The Father of the Sweet Pea," having by painstaking and well-directed effort, in cross-fertilizing and selecting, improved it in many of the great essentials, which include size, color, and form, but it was the advent of that beautiful variety, Countess Spencer, which marked the greatest advance in the modern sweet pea; and, its tendency to "sport," or vary, which this modern type has a predisposition to do, is not the least among its interesting qualities. Someone has said that this sportive tendency "is a blessing in disguise," and I believe it. Most assuredly it has added zest to the growing of sweet peas generally in recent years, for many enthusiasts in these days are continually on the lookout for new color shades, new color combinations and an additional eighth of an inch to the standard!

The tendency that the modern sweet pea has to throw sports has caused many enthusiasts to observe more closely for color and other variations, and thus added materially to their pleasures in sweet pea growing. We hear sometimes the "carping critic" bewailing the fact that there are too many varieties, and some have gone

so far as to take the trouble of preparing lists of too-much-alike varieties, but we must always bear in mind that each color selection frequently has characteristics all its own which is often influenced by different soil or climatic conditions, so that it behooves us to try all varieties and hold on to those which answer our own individual purposes best.

Florists everywhere find sweet peas, both in the winter season and also when grown outdoors in summer time, always useful to cut from, and never out of place, and the newer "Spencers" with their larger and more wavy standards lend themselves most gracefully to all floral art; and, besides, this type also has another advantage for garden and floral decorations on account of its failing to set seed so freely as does the older grandiflora types, thus prolonging its season for producing flowers.

Among crimsons nothing in general cultivation is superior to King Edward Spencer, as it lights up so well under the influence of artificial light at night. For a delicate pink, the best selection of the original Countess Spencer is still one of the very best. For maroon, Othello answers the purpose well. White Spencer is one of the best in that color, and for a cream, Primrose Spencer at its best is at the head of the list. So far as I have seen in the light lavender color shade there is nothing better than the newer Florence Nightingale.

The foregoing list is of course recommended for outdoor growing in summer time. For winter blooming an entirely distinct type is made use of, among which may be mentioned: Earliest White, or Florence Denzer, and Mont Blanc. For cream, Earliest Sunbeams is good. Christmas Pink or re-selected Earliest of All Blanche Ferry are quite popular among the pinks, and for rosy lavender Mrs. Alex. Wallace, and for violet purple, Le Marquis is grown. The winter blooming class is not of the Spencer

type, but these I am reliably informed are on the way to arrive quite soon.

The crops of sweet peas seeds at this writing are quite uncertain, especially at Floradale, where on account of weather conditions planting was from four to six weeks later than in 1910.

CARE OF WASHINGTON TREES.

While the elm tree beetle and the caterpillar have been exceedingly numerous in the district this summer the district superintendent of trees and parkings has waged a vigorous campaign against them, and one of the most successful ones in years. The trees certainly are in better condition than they were a year ago. Some 7000 elm trees have been sprayed twice with arsenate of lead, applied by means of a 400-gallon sprayer, which has been added to the apparatus at the disposal of the park superintendent. Moreover, all the linden trees have been sprayed twice, and it is expected that there will be additional sprayings. Last year many trees were also denuded of foliage, which was entirely skeletonized so that the trees afforded no shade. No trees are in that condition this summer. The cost of the spraying has been but a trifle more than 8 cents a tree. Many caterpillars have been prevented from climbing up the tree trunks by bands of pitch applied to the trees, and men with gasoline torches have destroyed many of the pests.

F. J. DYER.

Utica, N. Y.—Wm. Matthews, the orchid specialist of Central New York, has refused a big offer for a rare white *Cattleya gigas*. He recently sent a splendid specimen to the Royal Gardens at Windsor. Although arrived at the age when most successful sons of Flora retire on their laurels, this veteran orchidist may be found constantly among his pets, which provide him with profitable recreation.

A notable introduction
 In our advertising department will be
 found the first offer in America of *Lilium*
myriophyllum, that beautiful hardy
 lily which its collector—E. H. Wilson
 —does not hesitate to call the best of all the lilies. If
 all that is claimed for this introduction should be sub-

stantiated (of which we have no doubt) this new-comer
 is destined to fill a large place, not only in garden work
 but as a florists' forcing bulb. It furnishes a welcome
 variation from the ever-present *longiflorum* and with-
 out the overpowering odor which is so serious a draw-
 back to the use of many otherwise elegant lilies for in-
 door decorations. *Myriophyllum* is now in full bloom
 outdoors and seems to take most kindly to New Eng-
 land climatic conditions. The offer of this lily and its
 companion *leucanthemum*, is, we believe, the first ex-
 ploitation commercially in America of the Wilson Chi-
 nese introductions.

A hibiscus
 show

We have been much interested in the ac-
 count given in the Pacific Commercial
 Advertiser of Honolulu of what was prac-
 tically the first flower show in the Hawaiian
 Islands, held on June 28 last. One would have to do
 some guessing before arriving at the facts as to the
 flower to which the show was devoted, which was none
 other than the hibiscus, of which we are told that over
 two hundred distinct varieties were staged. Among
 them were a score of imported varieties and a very
 small part of the balance were indigenous to Oahu, the
 great variety being the result of the careful labors in
 hybridizing and crossing on the part of the local hibi-
 cus enthusiasts who, it would seem are as zealous in
 this particular line as, for instance, our own sweet pea
 devotees are in theirs. Over two thousand people vi-
 sited the show between 11 A. M. and 4 P. M. Now
 that it is called to our attention, why not give this
 gorgeous flower a chance in our exhibitions here? Few
 subjects present better possibilities.

"What are
 you going to do
 about it?"

We hope that the interests of the
 florists and ornamental horticultur-
 ists in the proposed national inspec-
 tions laws and interstate quarantine
 will not fail of careful consideration
 at the coming S. A. F. convention in Baltimore. The
 Nurserymen's Association has been following up this
 matter with commendable persistency, through its hus-
 tling legislative committee of which Wm. Pitkin is
 chairman. We regret that the space at our disposal will
 not permit of our publishing the interesting report
 made by Mr. Pitkin at the recent convention of nur-
 serymen at St. Louis. There is much in it that should
 have deep consideration by that section of the trade
 which HORTICULTURE particularly reaches and some plan
 of action in co-operation with the Nurserymen's Associa-
 tion should be entered into by the S. A. F. The bill
 introduced by Representative Simmons of Niagara Falls
 and now in possession of the committee on Agriculture,
 to regulate the importation and interstate transporta-
 tion of nursery stock and to enable the Secretary of
 Agriculture to establish and maintain quarantine dis-
 tricts for plant diseases and insect pests, is only one of
 the many propositions, local and otherwise, in which
 the welfare of the horticultural interests is vitally
 affected. Field grown florists' stock, seeds of fruit and
 ornamental trees and shrubs, plants, cuttings, grafts,
 etc., are all included in the provisions of these bills
 and in the matter of interstate quarantine the florists
 have surely as much at stake as the nurserymen and
 their apathy under the circumstances seems incompre-
 hensible. Get busy before it is too late.

Obituary.

Wm. A. Woodward.

On Sunday, July 2nd, Wm. A. Woodward, Sr., of the seed firm of Wm. A. Woodward & Son of Latham, Albany County, N. Y., passed to "that bourne whence no traveler returns." We do not know Mr. Woodward's exact age, but are informed that he was "about" fifty years of age. Though Mr. Woodward was devoted to business, and was the owner of several valuable farms, he found time to devote his attention in a mild way to politics, and was school commissioner for his district for many years. He was a conscientious, upright man, and in all of his dealings with his fellow men aimed to observe the Golden Rule. He was a kindly, home-loving man, and when business did not call him away was always at home.

Those who knew Mr. Woodward best, appreciated his many fine traits of character. He was not a man who made close friendships readily, but went his way, faithfully performing his duties, and caring little what might be said or thought of him. We understand he leaves a widow and two sons. Whether they will decide to continue the seed business or not has not been learned, but to them we extend our heartfelt sympathy, and if we may be pardoned, the hope that the sons may emulate the virtues of their highly esteemed father, and wish them the highest measure of happiness and success.

Charles J. Marc.

Charles J. Marc, well-known among the florist trade of New York for many years as a grower of roses, azaleas, etc., died suddenly at Washington, D. C., on July 5, from neuralgia of the heart. "Charlie" Marc was an adopted son of the late Gabriel Marc whose place at Woodside, Long Island, he managed and whom he afterwards succeeded in business. The establishment was originally one of the most noted, many imported novelties having been first shown there, among them being the *Dielytra* (*Dicentra*) *spectabilis*. Mr. Marc married as his second wife the daughter of Mr. Garden of Washington and about ten years ago, having sold his property at Woodside to the Penna. R. R. retired from business and moved to Washington where he has since resided. He was born in Switzerland.

J. A. McPheron.

J. A. McPheron, nurseryman, died at the home of his daughter at Carrollton, Ill., June 22, aged 85 years. Mr. McPheron was a pioneer nurseryman of Carrollton and father of R. A. McPheron, proprietor of the Cottage Greenhouses, Litchfield, Ill., and J. Clint McPheron, florist, of Carrollton.

Paul De Longpre.

Paul De Longpre, who had a world-wide reputation as a flower painter, died at his home, Hollywood, near Los Angeles, Cal., on June 29, aged 59 years.

The members of the trade in and around Cincinnati extend their sin-

cerest sympathy to Tom Hardesty, whose father died the past week, and to Henry Gockel of Ft. Thomas, Ky., whose daughter Stella was buried on Tuesday of this week.

Death has again invaded the family of Frank McMahon, Seabright, N. J. His mother died on Thursday, July 6. The old lady had been in feeble health for a long time. Mr. McMahon buried his wife only a week previous.

THE LIGHTS AND SHADOWS OF THE AUCTION BUSINESS.

R. W. MacNiff, before the New York Florists' Club.

The auction business is as old as the world. Adam bid one of his ribs for the first lady ever known to be on the market, and as there was no opposition, he got her at his own offer. Now, there must be two offers to make a sale legitimate. If anyone else had been at the first garden auction, he and old Adam would be bidding yet. Imagine such a valuable flower as Eve being advertised for sale next Tuesday or Friday! Madison Square Garden wouldn't hold the crowd of florists. The horticultural auction business, you perceive, has the merit of antiquity.

My subject, however, deals with modern plant and flower auctions, and these are full of "lights" and "shadows." The "lights" include the light prices obtained, the limitless field that is developing, the return of humanity to the farm, and the consequent needs of the suburbanite; the joy of being instrumental in fostering a love for the beautiful; the consciousness of sending out our monuments in every direction, knowing that the trees and plants we sell will grow and blossom, and cheer with their perfume and beauty, unborn thousands, after we are safely planted under the daisies.

Then, there is the joy of standing "in the lime light," mesmerizing by voice, and persuasive smile, the multitude; soaking the fresh guys or the wealthy widows with something we see they want, no matter what the cost. These are "real lights" that help to lighten our burdens, and to dissipate the gloom, in our otherwise "shadowy" occupation. There is the light of knowledge we acquire every week; knowledge of plant life; of new varieties; of insects and insecticides, of the frailties of humanity; all most interesting to the inquiring mind. Then, there is the "velvet" in our business; 17½ per cent on every dollar's worth we sell, whether the grower receives the cost of production or not.

Only three or four hours' work a day, and only two days' work a week, the strengthening of our vocal chords, fitting us later on for ministerial work, when the great profits of the auction business inevitably draw too many enterprising opponents into the field! Is it any wonder we grow fat, and our bank accounts increase, and we ride in autos, and life is one sweet song?

But there are two sides to everything and everybody. Listen to the shadows, and then rejoice that you are now in the place Providence intended you should fill; and cease to envy the men who are wasting their

energies and nerves and talents in your behalf.

The path of the auctioneer is not strewn with roses. More likely dead rose bushes—with their thorns pierce his weary feet. His season is limited. If he makes any money he must crowd into weeks the labor that should be spread over months of ordinary toil. He must win and hold his growers against falsehoods and unreasonableness, and misrepresentation—he must be ready to give minutest details of every transaction; he must create confidence in foreign exporters whom he has never seen, and he must be financially strong enough to meet promptly every demand of his shippers. All these clouds must have silver linings, or shadowy indeed is the outlook otherwise.

He must have a deep knowledge of human nature, a memory, so keen that he never forgets a face or name; and tact and patience that preserve a smiling countenance, when his heart is bursting with cuss words and justifiable indignation. All these shadows must be seen and blown away before success is even possible. The auctioneer must keep his temper; and in a word become "all things to all men," if he would win them. His mind must be clear; his physical strength unimpaired—his constitution of iron. He must avoid artificial stimulants; never descend to offensive repartee, always give the retort courteous no matter how his dignity may be imposed upon.

Now, you know some of the shadows that hover over the auction business; and there are many others. There is the late season; with spring lingering long in the lap of winter—the long drought—the late or early Easters—the missent shipments, the express overcharges, the unwatered plants, the careless handling by railroad ignoramus. Then come the long office hours, the burning of the midnight oil, the innumerable details, the unavoidable mistakes, the impatient shippers, the slow collections, the betrayal of confidences, the carelessness of employees. Well! Now you have both sides of the burning subject. Aren't you glad you are not a horticultural auctioneer?

NEWS NOTES.

Highland Park, Pa.—The greenhouses of Mrs. J. Shelley, Philadelphia, are being removed to this place.

Manistee, Mich.—The Kitzinger greenhouses have been purchased by J. T. Harrell, formerly of Winchester, Ind.

Reading, Mich.—T. H. Stevens has moved here from Alvin, Texas. He was formerly of the firm of Stevens & Heller of that place.

Oregon City, Ore.—The greenhouse range of George Betz near here has been leased by George C. Robinson, formerly of the Tousette Floral Co., Portland, Ore., and A. E. Alder.

Newburgh, N. Y.—The Newburgh Floral Co.'s establishment has been given up by the parties who leased it and will again be conducted by the owner, Wesley Wait.

CLUBS AND SOCIETIES

CHICAGO FLORISTS' CLUB.

The regular meeting of the Chicago Florists' Club was held July 6th, and the following were elected to membership: Frank E. Gabler, 3708 Langley avenue; L. Hoeckner, 3810 Grand avenue; George H. Mohr, 31 W. Randolph street; W. Langhout, 31 W. Randolph street. All the officers were in their places, and 39 members present in spite of the hot weather. Allie Zeck, as chairman of the sports and pastimes committee reported progress on the arrangements for the picnic at Erhardt's Grove, Park Ridge, July 23d. Tickets are for sale at all florists' places. It was voted to donate \$35.00 from the club funds to be used for prizes. Committees with the following chairmen were appointed: on refreshments, Harry Philpott; grounds, Michael Fink; dancing, Al. Lehmann; sports, Allie Zeck; ticket collection, H. C. Blewitt.

The transportation committee reported the Monon route selected for the convention trip as far as Cincinnati, and the B. & O. the remainder. The J. C. Moninger Co. sent a communication regarding the revision of the rates on greenhouse material with the Western Classification Co., and a committee was appointed.

M. Barker, George Klehm and J. C. Vaughan were appointed a committee to entertain the delegates to the Railway Gardeners' convention here in August. A vote of thanks was extended to the Milwaukee Florists' Club for their entertainment. A report of the St. Louis Club picnic was given by Geo. Asmus. Steps were taken to advance the interests of Chicago in securing the S. A. F. convention of 1912, and Messrs. Rudd, Foley, Philpott, Pyfer, Winterson, Keimel, Asmus, Martin and A. Poehlmann were appointed a committee.

Walter McGee was given a vote of thanks for a very interesting talk on fertilizers.

FLORISTS' CLUB OF WASHINGTON.

The Florists' Club of Washington met on the evening of July 6 in the grotto back of Gude's floral store, which had been transformed into something bearing a legendary resemblance to a rathskeller, in honor of the occasion. There was a crab feast as the main attraction, and various stunts by members enlivened the evening's proceedings. Edward Schmidt was host at the crab feast. President Elmer C. Mayberry, Secretary O. A. C. Oehmler and others, including some of the visitors from Maryland, made remarks. The club took up and disposed of various details connected with the outing to be held at Huntsville, Md., when the club will open a new amusement park.

One of the principal topics discussed was the prospective visit to Washington by the Society of American Florists during the Baltimore Convention. A committee from Baltimore was in attendance, and arrangements were entered into for the proposed

visit. The Baltimore delegation included Superintendent of Parks N. F. Flitton, Richard Vincent, Jr., William J. Halliday, Robert L. Graham, I. H. Moss, John Terry, Fred Berger, E. A. Seidewitz. Mr. Vincent headed the delegation by virtue of his being president of the Maryland Horticultural Society, and vice-president of the Society of American Florists. There was much enthusiasm over the coming meetings, as well as over the outing set for Wednesday.

FLORISTS' CLUB OF PHILADELPHIA.

As usual, the midsummer meeting of this club was rather slimly attended, partly because of the intense heat, and partly because the members are many of them out of town, and partly because it is hard to get them to attend summer meetings in any case.

WILLIAM SIM

President-Elect, National Sweet Pea Society of America.

Nevertheless, there was a fair attendance to listen to Paul Huebner on "Railroad Gardening," and those who came were not disappointed. The following committees on the coming convention of the S. A. F. were appointed:

Transportation, John Westcott, David Rust, Samuel S. Pennock; hotels, George C. Watson, Robert Kift, Fred Hahman.

J. Otto Thilow announced that the speaker for the August meeting would be Xavier E. Schmitt of Fairmount Park, "Bedding Plants for Park Adornment." Frank M. Ross was elected to membership. The competitive method of selecting a bowling team for Baltimore having fallen through this year, the chairman of the games committee was given power to select a representative team. Many of the members are in favor of taking the boat trip to Baltimore, this being a pleasant variation from the usual method, and one that would be enjoyed by many.

A MADISON SYMPOSIUM.

Monday, July 10, was a warm proposition at Madison, N. J., as it was elsewhere, but a party of about a dozen braved the fierce heat and participated in a very pleasant social time, the principal reason for which was a meeting of the executive committee of the National Association of Gardeners who met for the purpose of signing the Charter granted by the State of New Jersey.

The following named visitors were present: William Kleinheinz, gardener to P. A. B. Widener, Ogontz, Pa.; Thos. Logan, gardener to C. R. Newbold, Jenkintown, Pa.; John H. Dodds, gardener to John Wanamaker, Jenkintown, Pa.; Xavier Schmitt, superintending gardener of Fairmount Park, Philadelphia, Pa.; E. Thathaway, gardener to R. C. Clowry, Tarrytown, N. Y.; Harry A. Bunyard and Wm. E. Maynard of New York, N. Y.; J. Austin Shaw, New York, and William J. Stewart, of Boston, Mass.

The trustees appointed under the Charter are Thomas Logan, Wm. Kleinheinz, M. C. Ebel, Robert Tyson and W. E. Tricker.

It was decided to hold the next convention at Madison, during the time of the Morris County Flower Show, October 26 and 27 next. The Association will contribute several valuable prizes to be competed for by its members. In the meantime a meeting will be held at Horticultural Hall, Phila., on July 17, on the call of the president.

The visitors, after business was completed, inspected the laboratories of the Aphine Mfg. Company, under escort of Mr. Ebel, who entertained them at luncheon at the Madison House and then gave them a ride to the establishment of C. H. Totty, where the fine young chrysanthemum stock was duly admired, thence to the gardens and greenhouses of the beautiful McKay Twombly estate now under charge of Robert Tyson who extended hospitality, and then to the James estate where they were cordially received by Wm. Duckham and Mrs. Duckham at their home after a tour through the well-kept houses and spacious flower garden under Mr. Duckham's guidance. Altogether it was a most enjoyable affair throughout.

CINCINNATI FLORISTS' SOCIETY.

This society held its annual meeting. The officers elected and installed for the following year are: President, Gus Adrian; vice-president, Wm. Murphy; secretary, Alex. Ostendorp; treasurer, E. A. Foster and director, Herbert Greensmith.

The club had as its guest Pres. Philpott and Sec. Pyfer of the Chicago Florists' Club. As is customary with everyone from that town they boosted Chicago and the Chicago Special, which will pass through this city on the way to the convention at Baltimore.

The outing committee, consisting of Chas. H. Hoffmeister (chairman), Al. Sunderbruch and Ray Murphy, gave a general outline of the program for the outing at Coney Island, July 20. There

will be a boys' ball game in the morning before luncheon; in the afternoon races for all classes, tug of war, bowling and baseball. Official program will be ready within a few days.

AMERICAN ROSE SOCIETY.

Following the Boston Flower Show, the Secretary of the American Rose Society suggested the desirability of preparing an accurate list of the roses of American origin for permanent record. One of the roses exhibited at Boston and which has been filed with us is the Madison, originated during the year 1906, the parentage being a cross between the Pearl, Bride and Meteor.

There will be a general meeting of the Rose Society at Baltimore at the Society of American Florists' Convention in August. There are some matters that cannot be settled until that meeting, pertaining to the prize awards at Boston. The certificates of merit have been forwarded to A. N. Pierson, F. R. Pierson Co., and Robert Scott & Son.

BENJAMIN HAMMOND,
Secretary.

CLUB AND SOCIETY NOTES.

The weekly exhibit of the Worcester County (Mass.) Horticultural Society on June 22 was strong in small fruits, peonies and herbaceous perennial flowers.

The Rhode Island Horticultural Society held its annual Rose and Strawberry Show in Elysium Hall, Providence on June 20th. The quality of the exhibits was excellent throughout.

The Bar Harbor Horticultural Society held a very fine midsummer flower show at Bar Harbor, Me., last week. The many fine private estates were well represented by the high class products of their expert gardeners, in plants, flowers and fruit.

A RHODODENDRON SHOW.

Our cover illustration this week gives a view of the rhododendron show by John Waterer & Sons in the hall of the Royal Horticultural Society, London, a few weeks since.

As seen in the picture, the main interest of the show was rhododendrons. Of these there were upwards of 1,000 plants, and it was estimated there were upwards of 50,000 blooms; and in probably as good condition as it is possible to show them. About 100 different varieties were staged, and the principal sorts exhibited were Pink Pearl (which formed the centre of the two beds arranged in the middle of the hall right and left of the main entrance) set up in a mass relieved by the foliage of Japanese Maples, and as a contrast to them were plants of fine red varieties such as Michael Waterer, Fred. Waterer, Prometheus, Doncaster, etc. Opposite the main entrance was a mass of the beautiful old variety, Lady Eleanor Cathcart, one plant of which was about eleven feet high. Underneath this was a fine group of Gomer Waterer, which promises to take its place as one of the finest hybrids in cultivation. Associated with these was a splendid mass of the new "Alice," a variety raised from Pink Pearl, and considered by many to be superior. Mr. Waterer has a great opinion of it

as a florists' plant. In color it is a lovely tint of pink rather deeper than Pink Pearl, and while the flowers are not quite so large individually as those of Pink Pearl the truss is about the same, and being more compact in form it lasts longer in its full beauty.

All the well-known varieties, such as Michael Waterer, Francis B. Hayes, Strategist, Mrs. Tom Agnew, John Henry Agnew, etc., etc., were shown in small groups, broken up with a few very fine specimens of Japanese maples, hollies, yews, conifers, etc. A particularly pretty effect was obtained by the use of the lovely semi-double Rhododendron Fastuosum flore pleno, in conjunction with the variety, Everestianum, and others of similar shades of lilac mixed with white sorts such as Sappho, Madame Carvalho, etc.

The exhibition was a considerable undertaking, and the plants were sent by rail practically in full bloom, upwards of sixty two-horse vans being required to take them from the railway to the hall. Besides rhododendrons, there were two fine masses of Kalmia latifolia, and a very pretty bed of Rhododendron azaleaoides or odoratum, as well as various other plants such as Himalayan rhododendrons, rare pines, pittosporums, Viburnum plicatum, many varieties of vitis such as Coignetiae, Henryii, flexuosa, etc.

The exhibition created a great interest, and will doubtless lead to others of a similar nature. Many visitors said they had never seen the hall look so beautiful.

During Recess

Chicago Florists' Picnic.

Arrangements for the annual picnic of the Chicago Florists' Club, July 23rd, are now well under way. Two trains on the Wisconsin division of the Northwestern leave the new depot at 11:00 and 12:15 and return at 8:29 and 9:28 p. m. Baseball will be a feature and the wholesalers and the retailers will strive against each other for the honors. No printed programs will be issued, but there will be racing, dancing and various sports with prizes.

Chicago Baseball.

The Chicago Carnation Co.'s baseball team has been getting in some effective work and doing credit to their fine new suits of blue and white. July 4th they won a return game with Marley, score 14 to 8, and July 9th defeated the Frankfort team 10 to 5.

Michell-Dreer Baseball Game.

The second game of the Seedsman's League series was played at Riverton, N. J., on the 8th inst., resulting in a victory for Michell. The Michells took their opponents by surprise in the first innings, and before the Dreer boys had woke up scored four runs. After that it was nip and tuck until the seventh when Dreers got in two runs and another in the eighth. Both teams are above the average for amateurs, and both played well. Pitching on both sides fine. Michells appeared to have the best of it on the stick, and the steal and infielding, but not much. The umpiring was something

fierce. Ask any of the players. The score follows:

Batteries: Michell-Deakney and Mitchell; Dreer-Winkelspecht. Umpire—Hampton.

The next game of the series will be Craig vs. Michell, at the Michell trial grounds, Andalusia, on Saturday, 15th, at 3 p. m. We hear that the Craig boys snort at the idea of losing a game to a bunch of city folks. We are also privately informed that "those West Philadelphia farmers will have to get a move on if they don't want a goose egg." "You pays your money and you takes your choice." Better come out and see the fun—in any event.

Bowling at New York, July 7, 1911.

Notes.

Members of the New York and New Jersey Plant Growers' Association to the number of sixteen enjoyed an outing to Coney Island on the night of July 5.

A fishing trip is being organized between the two Boston flower markets, and a special boat will be chartered for July 21. Any florist desirous of taking this trip please notify W. A. Hastings at the Boston Flower Exchange not later than Wednesday next. This will be one time, plenty to eat, and no one should miss it.

The baseball team composed of salesmen of the Boston Flower Exchange played the team from Thos. Roland's in Nahant on July first. The game was an exciting one, and at the fifth inning the score stood 9 to 2, after which the Flower Market team piled up the runs, the final score being 12 to 13 in favor of the Flower Market. In the last inning a double play for the Market was an exciting feature. The battery for the Market was James Murray and Elliott Filson; first base Green, second Frank Edgar, third Matthew Ruane, short stop Walter Aylward, right field Jacob Brennan, left Wm McAlpine, center Wm. Paterson. Umpire, Thos. H. Carr.

Following the game both teams were the guests of Mr. Roland at lunch on the estate.

Providence, R. I.—A new office building is being erected at the greenhouses of Timothy O'Connor, Blackstone Boulevard.

RAILROAD GARDENING AS A PAYING INVESTMENT.

An Address by Paul Huebner, Landscape Gardener for the Reading R. R. System, before the Florists' Club of Philadelphia, July 11th, 1911.

Mr. Chairman and Gentlemen:—It is a good many years now since I last had the honor of addressing you on the subject of "Railroad Gardening." At that time—some eight or ten years ago—there were not so many of the railroad systems of the country that had adopted this policy in which my company was one of the pioneers. A good many more have taken it up since then, and you will no doubt be glad to learn that the Reading has taken no backward step, but has kept steadily along on the same broad and enlightened policy as it first mapped out. You understand, of course, that the hard-headed gentlemen who manage railroads, do so from a dollars and cents standpoint—and look on the embellishment of station grounds and approaches from the dollars and cents standpoint only—and not from an aesthetic point of view. They realize that it attracts travel and settlement and by so doing not only helps current revenue, but improves the value of their real estate. Nevertheless, these managers are to be commended for their breadth of view and for their far-seeing good policy—even from those of you who work for the advancement of Horticulture in a spirit of altruism for the public good. The community which the Reading serves are given constant pleasure by this policy and are inspired thereby to efforts of their own along horticultural lines. The character of the architecture of the stations has been greatly improved of late years and the surroundings have to conform. Improved grounds and improved stations are two of the best advertisements a road could have and worth far more than their cost in that connection. Safety and convenience come first, of course; but elegance is equally desirable if the cost be not too heavy.

I am often asked which is best for work of this kind—shrubbery or bedding plants. In reply to that I always answer that there is plenty of room for both, and I use both freely. When and where, depends, of course, on the size of the space to be planted—also on the surroundings. Shrubby is generally most effective when used as a background. When in flower it is very attractive. But for glowing effects and striking pictures that will make the passengers sit up and take notice and carry with them strong impressions—strong enough to make them talk about when they go home—be their home near or far—there is nothing like the brilliant cannas and geraniums and other tender plants which make these erstwhile dull and unsightly locations a glory all summer long and carry the fame of the Reading to the ends of the earth. I receive letters from all over the country from passengers who write the company asking as to what canna that was or what geranium that was and so forth, showing very clearly the strong impression made (even from a flying train at 60 miles an hour), and the good advertisement the company gets out of it.

While there is no great change in

Railroad Gardening at Reading, Pa.

the policy of the road as to my department nor in my management and methods in same during the ten years that have elapsed since I last addressed your club, there is some change in the varieties of plants we use. For instance:—in geraniums, we used then, Madam Thibaut, for pink; La Pilot, for scarlet; and La Favorite, for white. Now these "best ones" of their day, have been superseded by La Glorieuse, as pink; John Doyle, as scarlet; and Madame Buchner, as white. We also use Abbe Schaeffer as a scarlet, and Jean Viaud as a pink. These varieties not only have

PAUL HUEBNER

better flowers than the old ones; but they are also more constant bloomers. Salleroi is still our standby as an edging.

In cannas we are now using Fuerst Bismarck, King Humbert, Madame Berat, Madame de Poitevine, Philadelphia, Admiral Avellan, Columbia, Robusta and Italia. We still use Florence Vaughan a little; but for a good yellow, Richard Wallace is the best of them all.

We have made recently some very effective beds with a combination of ricinus, caladium and abutilon; and, of course, we still use the coleus very largely. A big coleus bed laid out in a design is certainly a very gorgeous sight. The big bed at Trenton Junction, for instance, is a good example of what can be done with the coleus.

A bed like this will take three thousand plants; but they are easy to grow and are inexpensive. The shrubbery in the background helps this situation very much, and, of course, the lively green of the surrounding lawn is indispensable. Imagine what a dreary, uninteresting place this would be without this blaze of color framed in green and harmoniously toned by its background of shrubbery! Take again, the little triangle at the Terminal Station in Philadelphia. This is but a little patch, but it is the glimpse of the unexpected which catches the eye and pleases the traveler. This bed is made of coleus, caladiums, achryanthes and alocasia. The cloverleaf bed in the same patch is of geraniums, edged with ageratum, with a yucca in the center. The work at Langhorne Station is distinctive, as it has a fine perspective, and has an excellent background of privet hedging. Geranium John Doyle is used very freely here in conjunction with coleus beds.

I am still a strong believer in the privet for hedging. We use the California variety and find very little trouble with its winter killing, about which some complain. It has proven very satisfactory with us, being a quick grower, a beautiful glossy green, and absolutely free from all insect pests. We use this largely for wind-breaks to prevent snow drifting in winter as well as for ornamental purposes. Even when it does freeze, it comes up again from the roots. I do not use the barberry except in mixed shrubberies. I use the whole shrub family; but the various spireas and deutzias are our favorites. We also use the hardy hydrangea very profusely. Philadelphia, weigela, hibiscus and Pyrus Japonica are also freely used. In lilacs we like Marie Le Graye best for white, and for a dark one, Souvenir de Antoine Spaeth. Madame Lemoine, a double white one is also very fine.

I generally mingle evergreens with the shrubbery, which latter are cut out gradually, leaving the evergreens. Trees are not largely used, chiefly because they would obstruct signals—a very important matter; but where they are permissible the Norway maple is the one preferred. It is the most uniform and is not so apt to break if kept reasonably trimmed. We trim our hedges twice a season only for outside points; but elsewhere, where they have to be always neat and uniform, three or four times at least.

And now, gentlemen, coming back

PANSIES SOW NOW

We are making a specialty of Pansies. Our collection is the richest in variety and quality ever offered in this country. If you want the finest pansies that it is possible to obtain, make your selection from the following list of seeds:

MIXTURES OF GIANT FLOWERED PANSIES.

Holmes' Triumph of the Giant. Robust compact growing plants; heavy foliage surmounted by enormous flowers of perfect form and great substance, on strong tall stalks. Petals overlapped and undulating. Rich and rare colors: Trade packet, 50c.; 1-16 oz., \$1.00; ½ oz., \$1.75; ¼ oz., \$3.00; ½ oz., \$5.00; oz., \$8.50.

Bugnot's Giant Spotted: Trade packet, 40c.; 1-16 oz., 85c.; ½ oz., \$1.50; ¼ oz., \$2.50; ½ oz., \$4.50; oz., \$7.50.

Holmes' Mammoth Five-blotched. Cassier Type but flowers double size, magnificent colors. Trade packet, 35c.; 1-16 oz., 75c.; ½ oz., \$1.25; ¼ oz., \$2.00; ½ oz., \$3.50; oz., \$6.00. Giant Cassier: ¼ oz., \$1.75; ½ oz., \$3.00; oz., \$5.00.

Mme. Perret. Great American Giant, "Red White and Blue:" ¼ oz., \$1.50; ½ oz., \$2.50; oz., \$4.00.

Odier Five-spotted Beauties: ¼ oz., \$1.25; ½ oz., \$2.00; oz., \$3.50.

Goliath and Orchid (Cattleya) flowered, same price as Odier.

Giant Trimardeau: ¼ oz., \$1.00; ½ oz., \$1.50; oz., \$2.50.

Trimardeau, Giant Spotted Parisian: ¼ oz., \$1.50; ½ oz., \$2.50; oz., \$4.00.

Cassier and Trimardeau Mixture: ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00.

Holmes' Giant Masterpiece. Enormous flowers, 4 inches across, daintily ruffled edges, clearly distinct markings and, in fact, a flower of recent introduction that has won volumes of praise from lovers of this particular flower. It is a master indeed of its class. ¼ oz., \$1.75; ½ oz., \$3.00; oz., \$5.00.

GIANT FLOWERED SORTS.

Giant Cassier, Hortensia red, same price: ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00.

Giant Marmorata: ¼ oz., \$1.00; ½ oz., \$1.50; oz., \$2.50.

Odier Five-spotted Yellow and Five-spotted White, beautiful, and Psyche, curled Five-blotched, charming: ¼ oz., \$2.00; ½ oz., \$3.50; oz., \$6.00.

Giant Vulcan, brilliant dark red with five black blotches, grand effect: Trade packet, 50c.; 1-16 oz., 85c.; ½ oz., \$1.75; ¼ oz., \$2.75; ½ oz., \$4.75; oz., \$8.00.

Giant Trimardeau, separate colors, Adonis, Atropurpurea, Fire King, Canary Bird, Indigo Blue, Emperor William, Lord Beaconsfield, Peacock, White with eye: ¼ oz., 75c.; ½ oz., \$1.25; oz., \$2.00.

Crimson King, Mauve Queen, Snowflake: ¼ oz., 85c.; ½ oz., \$1.50; oz., \$2.50.

Auricula flowered Prince Bismark, striped, light blue, rosy lilac, marbled on white ground, King of Blacks, violet blue: ¼ oz., 60c.; ½ oz., \$1.00; oz., \$1.50.

Atropurpurea, do albo-marginata atrosanguinea, auricula-flowered, azure-blue, Snow Queen, Diana, Fairy Queen, Prince Bismark, yellow with eye, striped fancy, Wallflower Colored, gold margined, Havana-brown, light blue, Emperor William, Mahogany, Black Prince, King of the Blacks, pelargonium flowered, Peacock, quadricolor, rubra, violet, Victoria, violet white margined, white with black eye: ¼ oz., 35c.; ½ oz., 60c.; oz., \$1.00. Aureapura, Coquette de Poissy, Fire King, orange, Lord Beaconsfield: ¼ oz., 40c.; ½ oz., \$75c.; oz., \$1.25. Cardinal: ¼ oz., 85c.; ½ oz., \$1.50; oz., \$2.50. President Carnot and Emperor Frederick: ¼ oz., 50c.; ½ oz., 85c.; oz., \$1.50. Sunlight: 1-16 oz., 75c.; ½ oz., 1.25; ¼ oz., \$2.00; ½ oz., \$3.50; oz., \$6.00.

HOLMES SEED CO., Harrisburg, Pa.

to the title of my story, "Railroad Gardening as a Paying Investment," I think the fact that my company has kept the system up enthusiastically during all the twenty-one years I have been in their employ and are as keen for it as ever, is striking evidence that they have found it a paying investment. The territory over which I have direct charge runs from Philadelphia to Williamsport; from Reading to Harrisburg; from Reading to Allentown; from Philadelphia to Chestnut Hill; from Philadelphia to Bound Brook; from Philadelphia to Bethlehem; from Camden to Atlantic City and Cape May, and several other branches. If any of you feel like getting away from the smoke, dust and din of the city, and settling down among healthful and pleasant surroundings—and have the price—first take a run along any of those lines any fine day in summer; and if you do not find something that will suit both your desires and your dollars I will be very much mistaken.

"Greetings and Welcome you'll find there before you. And the oftener you come the more we'll adore you."

The greetings of the blooming flowers and the welcome of healthy surroundings—with safe and perfect serv-

ice thrown in—for a very small consideration.

HORTICULTURAL QUARANTINE.

Congressman Burnham has introduced a bill "to regulate the importation and interstate transportation of nursery stock, to enable the Secretary of Agriculture to establish and maintain quarantine districts for plant diseases and insect pests, to permit and regulate the movement of fruits, plants, and vegetables therefrom, and for other purposes."

The bill provides that it shall be unlawful to import or offer for entry into the United States from any foreign country any nursery stock unless a permit from the Secretary of Agriculture or a satisfactory certificate of inspection from the proper official of the country from which the importation is made, to the effect that the nursery stock is free from insect pests or injurious diseases, but food articles and nursery stock imported for scientific or experimental purposes are excepted from this regulation, when imported under regulations prescribed by the Secretary of Agriculture.

The Secretary of Agriculture is authorized by the terms of the bill to quarantine any State or Territory or any portion thereof when he shall de-

termine the fact that a dangerous plant disease or insect infestation exists there. The bill is sweeping and explicit. It makes violation of the provisions contained in it a misdemeanor punishable by a fine not to exceed \$500, or imprisonment not to exceed one year, or both such fine and imprisonment in the discretion of the court. The sum of \$25,000 is mentioned as the amount to be appropriated to carry out the provisions of the bill.

NEWS NOTES.

Glens Falls, N. Y.—A. J. Binley is rebuilding and extending his extension plant. His patent flower box holder is in increasing demand.

Doctor Little has the finest collection of orchids in this vicinity and is constantly adding to it with new varieties.

Syracuse, N. Y.—Park Superintendent Campbell has suggested to the Rose Society that Kirk Park be set aside especially for a rose garden. It has a rich soil and a considerable area of sunny lowland peculiarly suited to the planting of the Queen of Flowers. The Rose Society is young, but full of enthusiasm and proposes to make this the Rose City as its sister city, Rochester, is well named the Flower City.

PANSY—Boddington's "CHALLENGE"—All Colors

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said, "Why don't you call it Defiance?"

Trade pkt., 50c; 1/8-oz., 75c; 1/4-oz., \$1.50; 1/2-oz., \$2.75; oz., \$5.00

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

ST. LOUIS NOTES.

Charles Schoenle spent a few days in Kansas City this week with the Million Club.

C. C. Sanders has returned from a trip to Chicago where he purchased material for a new green house.

Fred C. Weber of St. Louis and S. S. Skidelsky of Philadelphia spent ten days recently at French Lick Springs, Ind.

Miss Matilda Meinhardt, who is traveling in Europe this summer expects to return home the first part of September.

Edwin Westeman, F. H. Weber's right hand man was married last week and is away on a bridal trip East for two weeks.

The Ladies' Home Circle spent a pleasant day's outing on July 10 at the Chain of Rocks Park in North St. Louis. Mrs. John Steidle is president of the Circle.

Fred Foster has wagered with W. C. Smith that he could beat him in a 300-yard race at the St. Louis florists' picnic. Mr. Smith has accepted the wager. It will be a \$5 hat.

State Vice-President Fred H. Weber says that he has made arrangements with the Pennsylvania R. R. at \$32 for round trip St. Louis to Baltimore convention with stop over privilege.

The Retail Florists' Association has changed its meeting night to every second Monday in the month. This

body is doing good work and should be encouraged by a larger membership.

Otto Bournig, brother-in-law of H. G. Berning, has had a sad loss in the death of his little son, Harold. The funeral took place on July 4th. The trade extended their sympathy to the bereaved parents.

Secretary Beneke of the Florist Club says everything is in shape for the Florists' picnic which takes place Thursday, July 20. There will be two ball games this year. Sanders' team, who are the champions will again play the Bentzen team and there will be a short game between teams of wholesalers and retailers. A special foot race has been arranged between "Billy" Smith and Fred Foster. The winner gets a new hat. The young folks will be well taken care of in the way of games and there will be a prize waltz for ladies. During the day the wholesale quartette will sing. Everything is free to florists and their families. All expenses will be paid out of the Club's treasury.

Harrisburg, Pa.—V. Grant Fower has been appointed head of the Harrisburg park system under the Park Commission and Parker Thayer Barnes becomes assistant superintendent. Mr. Barnes is a well-known horticulturist and writer, connected of late with the staff of "Suburban Life." He is a capable young man and will fill the position with credit.

¶ When you employ a lawyer in matters of importance what do you consider most—his fee or his services? No man knows what his services are worth better than a lawyer and he seldom asks less than their value. It is better to have a good lawyer and pay the price, than to have a poor one and lose the case. Of course, occasionally a poor lawyer wins a case which you might profit by, but if you strike an average you will invariably find the good lawyer is the most economical to employ by far. In buying lily bulbs or any kind of bulbs it is more economical to buy the best you can in regard to quality. Every grower will realize this if he stops to think. Now is the time to consider lily bulbs from storage for fall flowering. When fall comes you will wish you had them and it is better to have them than to wish you had.

Order now.

You can have Horseshoe Brand Giganteum, Formosum, Auratum, and Magnificum of very good quality for delivery now or later. Prices are very reasonable.

Not How Cheap
But How Good

Seed Trade

The Seedsmen's Convention.

Seed trade matters have been somewhat neglected for the past few weeks, and the proceedings of the Seedsmen's Convention were not reported as fully as the importance of the matters considered deserved. Many of the papers are worthy of being carefully read and studied, while others not of a technical character deserve special mention because of their treatment of matters of general interest to all including the ladies and those not personally identified with the seed business. Such a paper was that of Edgar Gregory, giving in brief and almost statistical form a history of Marblehead. Many of the historical places mentioned by him were visited by members and their friends whose interest was aroused by his paper.

The President's address contained a number of practical and useful suggestions, and their importance may be appreciated when it is learned that a special committee appointed to consider them, recommended the adoption of all. Mr. Page has set an example which his successors will no doubt be willing to follow in their annual addresses—more of a specific and practical character, and less generalization.

Like practically all similar organizations, the American Seed Trade Association annually appoints a number of committees to work along certain lines in the interests of the Association, and these committees are expected to submit the results together with such recommendations as they may consider wise, at the next annual convention. While some few always submit a report many others do not, which is unfortunate as most of the subjects claiming attention are important to the interests and prosperity of the seed trade as a whole.

The question box was revived at this convention and many pertinent and practical questions were asked, not all of which received convincing or satisfactory answers. Of technical papers, those of Prof. Wheeler of Rhode Island, and Dr. Woods of Maine easily took the lead.

A new feature, and one which seems to have been greatly appreciated, was the reading of telegraphic crop reports at the Thursday morning session. Whoever this innovation is to be credited to deserves a vote of thanks, as the comments were unanimously appreciative. This ought to be an important feature of every future convention, and should be extended to include cabled reports from the leading European seed growers.

Crop News.

Crop news is not of a rosy character, and there has been considerable change in conditions in the brief interval since the convention, mainly of an unsatisfactory nature, but even now nothing definite can be said of any item, not even peas, which will require several weeks more to reach maturity, and during which time much damage may befall the crop as a whole, while it has reached such a stage of development that but little time is left for improvement. From information at hand, we believe har-

vesting of Alaskas and the Extra Early varieties will begin between July 15th and 20th, but it will be some weeks yet before the late varieties will be harvested. Doubtless some sort of estimate of the earlies will be possible within a few weeks, but anything approaching definite percentages will not be possible before September or October. Enough is known to make it clear that the pea crop as a whole has suffered quite serious damage, particularly in view of the intense heat of the past weeks.

Some Pea Advice.

Anyone who is on the short side on peas should cover if possible, and not quibble over prices, as any figures quoted now may look low in a few weeks' time. We offered this advice last year and those who followed it had reason to be thankful. The trouble we apprehend will be to secure offerings from reliable growers, and right here we warn all against buying from and but well known and reputable sources. Don't be tempted by attractive prices or samples. The leading experts of the world cannot state with confidence what the crop will be by a sample of seed, and we don't use the word, "crop" in the sense of quantity, but of quality and character. Many seedsmen and canners who were tempted by low prices from unknown or questionable sources have chewed the cud of repentance ever since and assert with great vigor, "never again!" Let us hope not.

Government Crop Report.

The last Government crop report indicates quite accurately the general crop situation, not only affecting grains and potatoes, but practically all crops east of the Rocky Mountains. This report shows that field corn has been severely injured, that a continuation of the heat and drouth another week or ten days would be really disastrous. We may be sure that if field corn is suffering to this extent it must be at least as bad with sweet corn and in all probability the latter has suffered worse damage than the former. Vine seeds have unquestionably suffered severe damage, although we have been unable to get anything of an authentic character up to this writing. We should like to be optimistic, but due regard for the truth and the facts compels us to state that the outlook at the present time is about as discouraging for seedsmen's crops as they have ever been at this time of year. Of course, California products are an exception, and, barring sweet peas, the crop situation in California is fairly satisfactory.

The European Situation.

Nothing new regarding the European situation has come to hand and probably there will be little change in the news until after the crops are harvested, when something definite will be known. As "hope springs eternal," we must continue to hope for the best and trust that the final result will not be as discouraging as present conditions indicate.

Potatoes Fail.

By the way, we have neglected to

comment on the outlook for potatoes, which according to the Government report is the lowest in a quarter of a century. In many of the western states the crop is a virtual failure, and it looks now as if a dollar a bushel for eating stock will not be considered high next fall.

Important!

With further reference to the New York seed bill, we are advised by M. H. Duryea that the bill has been passed by both the Assembly and the Senate and now awaits the signature of the Governor. Any protests on the bill should be filed immediately with Governor Dix at Albany.

It is hoped that all the New York seedsmen will protest vigorously.

Personal.

R. Nicholson is no longer connected with the Texas Seed and Floral Co., Dallas, Texas.

Walter Mott has taken a position as traveling salesman for Wm. Elliott & Sons, New York.

A. T. Boddington and family of New York have taken a cottage at Nantucket, Mass., for the summer.

Miss Mabel Grey, daughter of Thomas J. Grey, and bookkeeper in her father's seed store in Boston, was married on Wednesday, July 5, to George Ernest Martin.

Notes.

Munford, Ala.—The Street Seed and Stock Farm Co. has been incorporated, capital stock \$10,000. J. C. Street, George J. Street and Anne D. Street, incorporators.

Shenandoah, Ia.—At the annual meeting of the Henry Field Seed Co., held July 1, a dividend of 9 per cent was declared and the following officers elected: Henry Field, re-elected president and general manager; A. L. P. Thompson, vice-president; H. E. Eaton, secretary and treasurer. The old directors were re-elected and A. M. Eldridge was elected to fill the vacancy which has existed for a year.

Washington, D. C.—Business is very dull in Washington. There has been a large exodus to vacation resorts, and the prospect of an adjournment of Congress in about thirty days more helps to depress business. Stock is in fair supply, but it has been seriously affected by the heat, and the hail storm of last week did some damage to plants and garden truck growing in the open. Prices are essentially unchanged. Most of the florists, having a little leisure, have been putting in new window displays, in most of which water lilies and mimic pools with rustic settings of rocks, ferns and bark play a prominent part.

NEW FLOWER STORES.

CHICAGO NOTES.

Fire Loss.

The N. C. Moore Greenhouse Co., of Morton Grove, Ill., had the misfortune to lose its greenhouse plant by fire, at noon, July 4th. A year ago Mr. Moore, who is an engineer, had a large new boiler shed built in the most approved method and this as well as the most of the houses is a complete loss. The water is drawn from a well by means of gasoline engines and a tank of 60 gallons was on the top of the well. This exploded, shutting off the water supply and connection was made at Plant B of the Poehlmann Bros. Co. a long distance away. An unusually fine stock of young carnation plants were ruined and a quantity of hay and rye were also lost. A slight leak in the pipes near the tank is supposed to have been the cause of the disaster.

To Educate the Public.

The wholesalers and retailers are being approached by representatives of the Chicago Tribune in behalf of a scheme which will educate the people with a more liberal use of flowers and thereby add to their sales. The florists are not unanimous in their way of regarding it, some thinking the Tribune much more apt to see results than themselves for the proposition means an outlay of thousands of dollars. Others are willing to wait for future results and pay the price for the education of the public. The matter is still open.

Trade Items.

F. L. Tornquist of Benton Harbor, Mich., is here purchasing greenhouse material for an addition to his place.

The W. P. Lynch Greenhouse Co. has the frames up for their new range of houses at W. 22nd street and Harlem avenue.

Jas. R. Biggam, representing the Alpha Floral Co., of Kansas City, Mo.; Mr. Biggam says all outdoor stock has been destroyed by the excessive heat and they will depend upon the Chicago market exclusively for supply.

O. W. Freese has the position as manager of the new Chicago Flower Growers' Association at 176 N. Michigan avenue. Mr. Freese has been in the wholesale market of Chicago for many years and is well known to the trade.

Miss Catherine Nanz and mother of Owensboro, Ky., are visiting B. C. Nanz, who is with Bassett & Washburn at Hinsdale. They are also taking advantage of the low prices at E. H. Hunt's supply house. Miss Nanz's father was a pioneer florist and established the business in Kentucky thirty-five years ago.

Personal.

John Degnan is off for a week's vacation.

Adolph Benesh will spend two weeks at Lake Villa, Ill.

Fred Sperry of Vaughan & Sperry is taking his turn at recreating now.

Joe Weiss of the J. A. Budlong Co., is spending two weeks at Minocqua, Wis.

Mr. and Mrs. O. P. Bassett left for Pasadena, Cal., July 11th, where they will reside.

John Sinner and N. Wietor returned

Saturday from White Sand Lake, where they spent their vacation fishing.

Clara Burkhart and Marie Hayes from the E. H. Hunt Co.'s supply house, are taking a well-earned vacation.

Nelda Wolf, who has kept the J. A. Budlong books for twelve years, has gone west with her sister. Margaret Russell of St. Louis, Mo., succeeds her.

Charlie Johnson of the Washington Flower Market will spend two weeks at Paw Paw Lake. This retail firm report the number of weddings as ahead of that of last season.

As the result of an accident while cranking his automobile, Saturday, Frank Oechslein is carrying his right arm in a sling. One of the bones is broken just above the wrist.

Harry Philpott and A. T. Pyfer left for Cincinnati, and will visit other cities in that vicinity during the coming week. Mr. Philpott will not return to Winnipeg till after the convention.

Frank Ayers sailed in the regatta race in which the Chicago Yacht Club and the Columbia Yacht Club competed for the valuable Herbst cup. The Vencedor, on which he sailed, is one of the fastest on the great lakes, and won third prize going, and second coming back from Milwaukee, July 4th.

W. H. Hilton of 63rd street has just returned from a trip to Kentucky, where he has a tobacco plantation and from Alabama where he has a pecan and orange grove started. Mr. Hilton is one of those fortunate retail florists who has shown his ability to keep several irons in the fire at once. Incidentally, Mrs. Hilton should come in for her share of the credit, too, as she gives her time to the store.

Other visitors.—John Baucker, Freeport, Ill.; W. A. Bitler, Kokomo, Indiana; J. W. Lynn, Belvedere, Ill.

PERSONAL.

Wm. H. Carr, a popular salesman of the Boston Flower Exchange, has just returned from an enjoyable vacation.

Thomas Pegler, salesman at the Boston Flower Exchange, sailed for Europe for a short vacation on Carmania from New York on July 12th.

John McKenzie of North Cambridge, Mass., sailed from Boston, Saturday, July 8, on the steamship Canada for a good time on the other side.

Harry Wild, superintendent of the Converse estate at Conyer's Manor, Conn., with wife and two children, sailed on the Parisian from Boston for Glasgow on July 7, for a well-earned summer vacation in his native country. He will return via Quebec and Montreal.

John B. Nugent, Jr., the well-known florist, and president of the New York Florists' Club was married on July 6 to Miss Sabery Dorsell, a popular soprano singer and prima donna of the New York Hippodrome. Mr. Nugent secured a divorce from his first wife some years ago. The young lady whom he has now married has on several occasions entertained the New York Florists' Club on their ladies' night, and a host of good friends wish the happy couple a long and prosperous life together.

Gibbs Bros., at Lynn, Mass., have taken a lease on two adjoining stores, which they will throw into one elegantly appointed store—one of the finest in New England. In the rear will be a conservatory for which the contract has been awarded to Lord & Burnham Co.'s Boston office.

Flower Market Reports.

BOSTON In common with the greater part of the country Boston has been sweltering in a summer broil unprecedented for severity and duration. Flowers are very poor in consequence and but few are being sent in. The demand is very light and is limited to the small proportion of salable material received. The ordinary run of roses, carnations and sweet peas are unloaded with much difficulty on the street fakirs. Cattleyas, lilies and lily of the valley are of satisfactory quality as a rule.

This section has had its share of the hot weather, which has caused stock to arrive in bad condition. There has been plenty of everything in season, though the supply is gradually falling off, especially in the carnation line. Beauties have been fine, but only in light demand the past ten days. Maryland, Kaiserin and Carnots have had the preference. Lilies have had their share in the demand and some good giganteum, auratum and magnificum have been arriving and sell well. Lily of the valley was in good supply, peas in over supply and there was plenty of snapdragon, cornflowers and swainsona as well as plenty of greens.

The first week in July was an exceptionally good one for the season. Shipping trade was particularly active and all stock that could by any means be classified as approaching first class was quickly used up. The demand for lilies has been unusual and one or two growers who had a summer crop of callas found them good sellers, many preferring them to Harrisii which now have so many buds. The few gladioli now being cut sell readily, preference being given to the best varieties. Asters do not amount to much yet, only a few straggling bunches being in the market. Early asters do not give promise of playing a prominent part this summer, growers evidently having planted but few. Carnations that are fair for the season sold readily last week. Roses, of which the Killarney family form the bulk, are small and stems average short. Some of the best, however, sold as high as 12c. during the week. Richmond, though not a summer rose has in other years proved of more service than in this one. New Beauties are beginning to come in and are cut with good stems. Comparatively few out of door flowers are coming in, owing to the hot weather. Green goods sell well and there has been plenty so far, with the exception of smilax. The second week in July opened very dull.

Prices on stock in **CINCINNATI** this market are holding up better than at this time in past years. This is because there is only a limited amount to be had. Sometimes the good stuff cleans up quickly and runs short, while at others its sale is languid. Combined with this there has been a torridity of weather that has made life unbearable for man and flower. In roses the cut of white has shortened slightly, while pink especially have increased. Lilies and gladioli have been very good property, and on most occa-

sions run short of the demand. A few local indoor asters have appeared, but they are still a negligible quantity. Some carnations, mostly Enchantress,

are still offered. The above mentioned and snapdragons form the bulk of the offerings.

Flower Market Reports

(Continued from page 81)

Under present conditions of weather and business there is really little of interest or value to be communicated concerning the flower market. All roses, carnations and sweet peas are in the worst possible shape and choice stock of either is almost an impossibility. The finest product for the time being is the Cattleya gigas. These are superb and seem to revel in the heated atmosphere. At the other extreme of the cattleya class are the C. Gaskelliana, which on account of their small size, etc., bring only about one-quarter of the price willingly paid for the gigas. Of lilies and lily of the valley there are an abundance and they are usually good, although some poor material is received in both classes. Gladioli begin to assert themselves, but the flowers are small. The wholesale houses are almost empty, very little stock of any kind coming in and most of them close at 4 p. m. daily.

Business has fallen off very much, and conditions are now down to a real summer basis. To keep pace with this, many growers are throwing out their stock preparatory to replanting and consequently have little to ship. The weather has been excessively warm, and much of the outside stuff usual at this time of year is dried up. Sweet peas are one of the principal crops affected and are very poor at present. Asters have not improved much during the past ten days. Lilies are in good shape and thankfully received. Another good thing is the double white petunia. About once every three years the growers of these hit it right and get good money. But they don't go if there be anything better in sight. Out door gladioli have now commenced—varieties like May, Augusta and Brenchleyensis being seen in quantity. Another favorite subject is the light lavender Centaurea imperialis. All roses are below standard except American Beauty. These are about the best value on the market—the sales of same being as satisfying as could be expected. Gardenias are very poor and very scarce. Orchids have shortened up considerably. The hot weather has been pretty hard on field-grown carnation plants.

NEW YORK QUOTATIONS PER 100. To Dealers Only

Midsummer dullness is now upon the flower trade. The wholesale markets are dull, with very little good stock coming in. Gladioli, lily of the valley and lilies are about the only good stock in sight. Carnations are very scarce. Roses seem plentiful but small and soft. Asters bring \$5, and tuberoses stalks \$5.

Long continued WASHINGTON heat, with only an occasional shower the effects of which were fleeting, brings vegetation to a sorry pass around Washington. As a consequence local supply of cut flowers is decidedly poor. Retailers report that they find trade unsatisfactory and stagnant. Phlox, asters, dahlias and other garden flowers are in rather unsatisfactory condition. Wild flowers from the corners of the worm fences are displayed attractively by the florists. Summer roses are fairly good, considering everything. The first Beauties, while small, are fairly satisfactory. White carnations are scarce. Lily of the valley of good quality is coming in plentifully. Harry Kirk makes a welcome addition to the yellow roses available.

It is rumored that A. J. Guttman is soon to reenter the wholesale cut flower business at 114 W. 28th St. New York.

Bedford, Mass.—Norris F. Comley, who four years ago leased the greenhouse establishment of Fred. Parker, has relinquished the lease to Mr. Parker and sold him the crop which consists of about thirty tons of tomatoes under glass. Lack of needed water supply, Mr. Comley states, was his reason for giving up the place. He will concentrate his efforts on his own plant in Lexington, Mass., hereafter, and has purchased the glass for a large house which he will add this season.

PERSONAL.

Friends who have felt concerned about the recent illness of David Welch, of Welch Bros., Boston, will be pleased to learn of his arrival at his destination, Mallow, Ireland, in good health and spirits, on July 5.

Mr. Velie, who has now fully recovered from his operation, will resume his duties in charge of the Boston office of Lord & Burnham Co., next Monday, and Mr. De Forest, who has been in charge during Mr. Velie's illness will return to New York.

W. H. Eiss, who has been connected with the W. F. Kasting Co., Buffalo, for some time, has severed his connection with that firm. Mr. Eiss has been in ill health for sometime and left last Tuesday for a trip to the northwest where he has interests in mining. The craft wish him every success.

Cincinnati florists who are away or going away on trips are as follows: Mr. and Mrs. J. A. Peterson for Scandinavia, Denmark and Germany; Max Rudolph and Henry Schwartz for Germany and possibly France; Fred Gear to Rochester, N. Y., with the Shriners; Geo. Trome to Atlantic City, with the Elks; Mr. and Mrs. A. C. Herhman and daughter of Covington, Ky., to Chicago and Alex Ostendorp to Washington and in Virginia on the Potomac.

Philadelphia Visitors: Mr. Trome, prop. Trome's Flower Shop, Cincinnati, O. (on his way to the Elks Convention, Atlantic City, where he has the contract to decorate chair for Exalted Grand Ruler); Mr. Conlon, of the Connelley, McCarthy Co., Charleston, S. C.; Chas. Vorkeller, So. Bethlehem, Pa.; James Brown, of Corbesville, Pa.

Advertise Your Stock In Horticulture

If you could figure up how much business you do not get because someone had forgotten your address or 'phone number, or because someone did not know you had what they wanted you would be surprised at the amount you had lost.

Look Carefully Through The Buyers' Directory

It is the Key to the offers of Advertisers in each issue.

It will remind you of the things you need now.

Advertise Your Stock In Horticulture and Stop This Leak

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

250 page catalogue free. Write to-day

The Home Correspondence School

Dept. H, Springfield, Mass.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft bodied insects.

An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material.

It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

FOR SALE BY SEEDMEN

Send for name of nearest selling agent. Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country. Aphine and Fungine can be used in house or field.

MISCELLANEOUS

WANTED to lease near good town a good Market Garden of about five acres, with greenhouse, good dwelling and out-buildings. Where landscape work could be carried on preferred. Reply to B. T., care of HORTICULTURE.

CABBAGE KEPT FREE FROM WORMS.

Butterfly and Larva.

cabbage, in garden or field, it perforates the plant, and is of all worms one of the most disgusting, to find hidden away in the folds of the leaf.

IF YOU WANT CABBAGE FREE FROM WORMS, USE HAMMOND'S SLUG SHOT.

How to Destroy Cabbage Worms.—Slug Shot can be used lightly or heavily and the cabbage suffers no harm. The cabbage forms its head by the interior growth; it throws off its earlier and outside leaves, and no dust can enfold within its head. Apply Slug Shot with a Duster (see illustration), sieve it over the plants or full grown cabbages. The powder is very fine and goes a long way in field or garden.

DRAKE'S GARDEN.

East Brookfield, Mass., Jan. 14, 1905.

We have used **Slug Shot** and always found it very useful. Our potato crop yielded 200 bushels to the acre. **Slug Shot** for Cabbage Worms is the best defense in the world.

Very truly, F. A. DRAKE.

Cabbage Worms.

The Cabbage Worm has spread wherever cabbage is grown. Whether early cabbage or late cabbage, in garden or field, it perforates the plant, and is of all worms one of the most disgusting, to find hidden away in the folds of the leaf.

IF YOU WANT CABBAGE FREE FROM WORMS, USE HAMMOND'S SLUG SHOT.

How to Destroy Cabbage Worms.—Slug Shot can be used lightly or heavily and the cabbage suffers no harm. The cabbage forms its head by the interior growth; it throws off its earlier and outside leaves, and no dust can enfold within its head. Apply Slug Shot with a Duster (see illustration), sieve it over the plants or full grown cabbages. The powder is very fine and goes a long way in field or garden.

TO BUYERS

Patronize our advertisers, they will treat you right

ERECTED FOR MR. E. S. HARKNESS, NEW LONDON, CONN.

HAVE HITCHINGS BUILD YOU A GREENHOUSE

HAVE them do it, simply because it's their particular business. It being so, it only stands to reason that they can satisfactorily build for you a house meeting all the exacting requirements of perfect plant producing enclosures of glass.

Furthermore, their construction has an iron frame; which means a house of great endurance and conse-

quent freedom from repairs. If your "up keep" is practically nil and your flowers and fruit production the highest possible grade—then your house becomes an investment, not a luxury. Ours are investments. Send for catalog.

The illustrations are many—the text brief and particularly informative.

HYDRANGEAS

FOR SUMMER FLOWERING

We have an unusually fine lot of Hydrangeas, which have been held dormant all winter. These plants are now in bud and bloom, and will flower in fine shape during July and August. We have a fine lot of blue hydrangeas, as well as pink. Plants are in splendid shape for immediate use, and will flower during July and August—at a time of the year when they are in the greatest demand.

We can furnish these plants in ordinary butter tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs, painted green, with handles, as follows: Well budded plants in 14-inch tubs, \$3.00 each; 16-inch tubs, \$4.00 and \$5.00 each.

FERNS

We have an exceptionally fine lot of Boston Ferns of the Harrisii type; also a splendid lot of Pierson Ferns. Good, bushy, well-grown plants in 8-inch pots, that will please the most critical buyer, \$1.00 each.

LILIUM HARRISII

THE BERMUDA EASTER LILY

We offer a selected and carefully grown stock of the original pure Harrisii. There are only one or two lots of bulbs on the island as good as the stock that we offer. We take pleasure in offering this stock, because it will be found to be very superior to the average stock that is generally offered. This is one of the healthiest and cleanest lots, and will give much better satisfaction than the stock usually obtainable. Our customers who had Harrisii from us last year stated it was the best they had received in years.

We have only a limited stock, which we are offering, and when stock is exhausted, we shall have no more to offer this season.

Fine selected bulbs, 6-7 inch, 350 to the case, \$16.00 per case, or full thousand lots at \$45.00 per 1,000; 7-9 inch, 200 to the case, \$17.00 per case, or full thousand lots at \$80.00 per 1,000; 9-11 inch, 100 to the case, \$18.00 per case, or full thousand lots at \$175.00 per 1,000.

They Cost Only One Cent a Word Undisplayed

GERANIUMS

The steady increase in the demand for Geraniums is proving beyond a doubt that they are the universal favorites with the flower buying public. That they are today more popular than ever before, in fact the demand during the past season nearly exhausted the available supply. We are increasing our stock for propagation to the extent that we shall produce them in enormous quantity next winter and feel confident that we shall be in a position to fill your orders to your entire satisfaction, but would suggest that your order be placed early. We have already booked heavy on some kinds. Good standard sorts at \$18.50 per 1000, from 2 in. pots.

A splendid stock in 3 in. pots ready for immediate shipment, at \$3.00 per 100 and up, including Ivy Leaved in such varieties as Rycroft's Sunrise; Mme. Thibaut, Mrs. Banks, Alliance, Pierre Crozy, etc., Variegated Foliage, Silver Leaf Nutt, Mrs. Pollock, Sophie Dumaesque, Mt. of Snow, L'Eleganta, and Duke of Edinburg.

Achryanthes Emersoni, Alternantheras red and yellow, Coleus, Lemon Verbenas, Swainsona Alba, Hardy English Ivy. 2 in. \$2.00 per 100; 3 in. \$3.00 per 100.

Farquhar's RARE LILIES FROM CHINA

Hardy, Beautiful, Fragrant. The Finest Novelties Extant

Lilium myriophyllum

AWARDED SILVER MEDAL BY MASSACHUSETTS HORTICULTURAL SOCIETY, JULY 15, 1911.

LILIAM MYRIOPHYLLUM Mr. E. H. Wilson, the famous plant collector, collected for us the bulbs now offered, in North-western China. He considers this the finest of all lilies. It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink and with a beautiful shade of canary yellow at the centre, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the jasmine, and lacking the heavy oppressive odor of most lilies. Blooms out-of-doors early in July.

Orders booked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

LILIAM LEUCANTHEMUM The bulbs offered were also collected by Mr. Wilson. This is one of the strongest growing lilies—frequently attaining a height of six to eight feet. The flowers vary in number from five to ten on a stalk, and in size and shape resembling *Lilium Harrisii*, greenish white shaded purple on the outside, and of the purest white within, with a tint of citron in the centre. The flowers have a pleasing fragrance. This lily will undoubtedly be largely used for outdoor planting as well as for forcing. Many consider it the finest of all tubular-flowered lilies. It flowers somewhat later than *Lilium myriophyllum*, and being of larger growth, has a distinct place.

Orders booked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

SEEDSMEN AND NURSERYMEN

6 AND 7 SOUTH MARKET ST., BOSTON

Seasonable Notes on Culture of Florists' Stock

CALLAS

Don't neglect your richardias now. Shake all the old soil off and pot up into 6 or 7 inch pots. Give them a compost of three parts fibrous loam to one of well-decomposed cow manure and a good dash of bone meal. After the bulbs are potted they should be placed outdoors in a frame with coal ashes to stand on. Care should be exercised in watering for at this stage they make roots rather slowly and are very likely to receive too much water. Neither allow the plants to dry out too much nor keep soaked with water, as one is as bad as the other. When they have made some top growth syringe them regularly every day, and fumigate whenever there are signs of thrips or fly. You can keep them out in a frame until there is danger of frost. Some time in September they can be given a place in a well-lighted house that does not run below 60 degrees at night.

MULCHING MIXTURE

Now is the time to prepare your mulching material for fall and winter use, on all such crops as roses, carnations, etc. By getting the material ready now it will save time and some anxious worry later on. In preparing this mulch make it rich. I would say let it consist of two parts of well-decomposed cow manure to one part of good fibrous soil. You will have to chop it up quite fine and make it up into a neat pile and let it stand for about three weeks and then turn it over three or four times at intervals of about every ten days, when it will be in a fine mellow condition to put through a $\frac{3}{4}$ -inch screen. This should then be stored away under a shed or any other place where the rain and snow will not reach it. Where you want to use bone meal or other fertilizing material this can be added at any time before applying. Having this mulch in good condition and in a handy place under cover constitutes one of the first elements of success in growing good flowers.

PANSIES

From now until August 20th pansy seed for spring use should be sown, but as a general rule with a majority of florists the first week in the next month is the date selected. Buy the large-flowering strains and sow in a cold frame. Make a compost of loam and leaf mold in equal parts and add about one-third of well-decayed manure. After digging over your frames, place about four inches of the above mixture, for, to grow pansy to perfection you simply must give a soil of high fertility. Shade the frames with whitewashed sash or, what is still better, lath shutters, with laths about half an inch apart. Sow the seed in drills about four inches apart. After the seedlings have made their second pair of leaves they can be thinned out to stand about four inches apart and the others that you have thinned out can be trans-

planted into other frames of rich soil. Be sure to keep the beds moist and clear of weeds.

PAINTING AND REPAIRING

A few reminders about painting and repairing will not be out of place now. Summer is the best time for this kind of work, when houses are dryer and the weather such that you can give them full exposure to the drying air. You can make all such work more tolerable by shading your house or by placing some covering over the roof during torrid weather. All necessary work to put houses in good condition before the approach of cold weather should be done now. There is nothing worse than leaky and draughty houses. Give a general inspection as to painting, puttying, and repairing; examine boilers, fire-boxes and grates, also give piping a thorough going over and readjust ventilators and all other machinery. If you take note you will find that the most prosperous growers are always those who put their houses in proper shape before the cold weather sets in.

RAMBLER ROSES

When Ramblers have made a long and stout growth they should be put outside to ripen up their wood. Place them on some material which they will not root into for you do not want them to make any more growth but to give them a gradual ripening up. Great care should be taken not to harden up the wood too early. Don't let them wilt on account of the lack of moisture in the soil, but keep them watered for some time yet as from now until the end of August they are making buds that will give you fine trusses of bloom for next Easter. See that each plant has room to allow plenty of light and air around it. By the end of August you can begin to shorten up on the water and by the time we begin to have cold weather they will be nicely ripened up.

SOLANUMS

Berried solanums that are in the field should be encouraged to make rapid and bushy growth. Those that seem to be making too much top growth should have their tops pinched out. During the next six weeks these plants, if on well enriched land, will make fine large and bushy stock. Keep the soil well-stirred which will help these plants during the dry part of the summer and keep them growing right along. If the weather is very dry it would be wise to use the hose where possible. When watering them give one good and thorough watering and that will suffice for at least ten days. Merely sprinkling the plants should not be practiced as it does more harm than good. These plants can be lifted and potted up the last of August or early in September. Keep them freely syringed and shaded for a few days and they will soon become established.

John J. M. Farrell

Mr. Farrell's next note will be on the following: Calanthes; Violets; Bougainvilleas; D. es; Gardenias; Scabanthus.

Our Seventh Annual Convention Number

Will be issued under date of August 12, 1911. It will be full of interest for those who go to the Convention at Baltimore, and equally so for those who stay at home. It will be widely distributed and in publicity value to the advertiser will have no superior. Take a generous sized space. You'll find yourself in good company. ❀ ❀ ❀ ❀ ❀ ❀ ❀ ❀ ❀

Window boxes

It is interesting to read in the London Morning Post the list of plants most generally in use for window boxes. Besides the zonal and ivy-leaved pelargoniums, yellow daisies, nasturtiums, petunias, fuchsias and ver-

benas which, with a number of other things not mentioned, make up the popular list for such purposes in this country, there are mentioned *Cytisus racemosus*, *calceolarias*, musk and several species of campanulas. In this connection we notice that the Philadelphia North American bemoans the fact that there is a very evident falling off in the quantity of window gardens in Philadelphia as compared with two years ago and observes that "it seems a pity that the custom is dying out." We trust the North American is mistaken. The Philadelphia florists should see to it that the custom does not die out in their city. Florists in other cities, likewise.

Convention time

The receipt of the preliminary announcement and program for the Convention of the Society of American Florists and Ornamental Horticulturists reminds us that the time for that important annual event is almost here. The program for the various sessions at Baltimore, as given, affords but little idea of the interest and significance that will attach to the meetings and the matters of vital import to ornamental horticulture which will receive attention. For the majority of members no doubt the special sectional sessions arranged for Thursday will present the greatest attraction, each individual being drawn to that department most closely touching his own welfare. While these divided meetings may be numerically small they are, however, likely to accomplish much more in a practical way than is the case with large mass gatherings such as have been the rule at most S. A. F. Conventions in the past and we think the Society will do well to still farther enlarge upon this sort of Convention activity from year to year. More detail as to what topics are to be discussed in the sectional meetings would seem to be desirable in this preliminary program. A little more meat in the document would have added considerably to its persuasive value in stimulating attendance at Baltimore.

Don't miss it

From advices received from time to time it is in evidence that local Convention preparations are being carried forward with commendable diligence. The Baltimore spirit of hospitality is something more than an emotion—it is business with the Baltimorean and the orderly system and masterly grasp of details which they have attained was well evidenced on the occasion of the side visit to Baltimore at the time of the Washington Convention and previously at the American Carnation Society's meeting. The trade exhibition, also to some extent under local direction, is an assured phenomenal success as a perusal of the list of amounts of space already spoken for will show. This exhibition is now, in truth, the strongest support of the S. A. F. Convention as an all-important annual event, from a trade standpoint. When it is considered that this is the second big display of the kind within five months—both in eastern territory—the attitude of the leading manufacturers, growers and dealers in horticultural goods and of the purchasing element in the trade towards this feature as a business enterprise must be obvious. The absence of any dealer from this affair now, savors of business suicide and the consumer who misses this golden opportunity to keep in touch with what is new and improved is making a very costly mistake.

BRITISH HORTICULTURE.

The Olympia Show.

In previous years the Royal Horticultural Society has held a summer show in the picturesque grounds of Holland House, Kensington. This privilege is no longer available. Consequently the society had to select Olympia in West London as the venue of the exhibition. This is a spacious and unsightly building, usually selected for the international horse show and other big events. It furnished a large area for trade exhibits, but the undraped roof proved very trying to the flowers during the spell of excessively hot weather experienced. The leading firms sent their finest floral treasures. There was room for improvement in the general effect produced, the stands being arranged on conventional lines, without any serious attempt to produce any bold effects with artistic grouping. The chief prize was a 50-guinea silver-plated Coronation challenge cup, offered by the Council for the most meritorious exhibit. This was secured by Messrs. H. B. May & Son, of Edmonton, who, as usual, distinguished themselves with their fine display of ferns. The Olympia cup was secured by Messrs. W. Paul & Son, of Waltham Cross, whose array of roses elicited endless admiration. The cut blooms included Mme. Jules Grolez, Mme. Ravary, Le Progres, Joseph Hill, Mrs. A. Waddell, Richmond, Celia, etc. Standard Ramblers made a grand show. The Sherwood cup was allotted to the Duke of Portland for a magnificent collection of fruit, which was admirably staged.

Lady Carnation Exhibitors.

Amongst the carnation exhibits was an interesting collection staged by the Thatcham Fruit and Flower Farms, near Newbury, Berks. This is an undertaking which owes its origin to the enterprise of two ladies, Miss Hughes-Jones and Miss Peers. Some ten years ago they rented an old farm-house and a field. With the assistance of some students they erected glass houses and frames. A successful market garden on the French intensive lines was subsequently established. About five acres of land are under cultivation, with about 700 feet of glass. The leading varieties of carnations are being cultivated on the American system; these are supplied to the London shops. Judging from the quality of the flowers staged a very high cultural standard has been reached. Lady students are trained in all branches of commercial horticulture at this nursery. Women are invading all professions on this side of the Atlantic, and already there are several who are profitably engaged in nursery and market gardening work. A woman gardener has built up a lucrative mail order concern; she reaches a large number of customers through the medium of the religious press. Another lady has worked up a good business as a landscape gardener, in which she finds full scope for her artistic abilities. Recently a very attractive show was held in London in connection with the Women's Agricultural and Horticultural Union. Amongst the varied displays were some instructive plans and models of gar-

dens made on waste spaces by school children of New York, U. S. A., shown by Miss Parsons, daughter of the organizer. The show was an indication of the advance made by women in this particular branch. W. H. ADSETT.

SWEET PEAS AT PASADENA, CAL.

Editor HORTICULTURE. Not to be entirely outdone by the National Sweet Pea Society of America, we had a show of sweet peas at Pasadena, by invitation of the Board of Trade of that beautiful city, in Southern California, on the very same day the National Society was holding its show in Philadelphia, Pa.

The accompanying little picture was taken of the group made in the greenhouse at Floradale, the Burpee Farm at Lompoc, Cal., before same was sent by express to its destination, and this

is what Mr. Barnhart, editor of the acknowledging receipt of same:—

"The sweet peas arrived in perfect condition. I had a bevy of pretty girls unpack them and arrange them in a way that only girls can."

"Lonsdale! they were great and no mistake. The crowds of people who visited that show, I think, took down every name, and absorbed the copies sent of the '35th Anniversary Supplement' in no time."

The sweet peas growing here on Floradale seed farm are apparently trying to make up for lost time, for they are now growing very rapidly and blooming much more satisfactorily than they were when the blooms were gathered to be sent to Pasadena. We cannot, however, tell at this writing what the harvest will be. Bountiful I hope.

EDWIN LONSDALE.

PERSONAL.

E. H. Wilson, wife and daughter, will sail from Liverpool for Boston on the Zealand, on August 15, to take up a permanent residence here.

J. F. Musiel has been engaged as grower and manager for the new greenhouse department of the Greening Nursery Co., Monroe, Mich.

Otto W. Frese has accepted a position as manager of the Chicago Flower Growers' Association store, Chicago, Ill., which will be opened August 1st. Mr. Frese resigned his position with Pochmann Bros. July 5th.

We learn from a letter just received from England that *Lilium myriophyllum* is being offered there from 15 shillings to one pound a bulb. This is about three times the price quoted in this issue of HORTICULTURE by Messrs. Farquhar who control the stock in America.

A NOTABLE CANANDAIGUA, N. Y., ESTATE.

Scrubberg is the charming summer residence of Mrs. F. F. Thompson, who twice each month during the season grows open the beautiful grounds to the public, who thoroughly appreciate the graceful act. Approaching the main entrance which faces a drive about one-half mile long, the first thing that strikes the visitor is a splendid pair of Colorado blue spruce, standing like sentinels on either side of the main gateway. Inside one passes through an avenue of fine specimens of *Thuja gigantea* fully 20 feet in height. The path leading to the left leads to a Japanese garden which is an exact reproduction of a Tokai palace garden. To the right is situated the fine range of glass presided over by Robt. Ballantyne, who is justly proud of his charges, particularly the fruit section. At the time of my visit the peach house was a glorious picture, a heavy crop of Royal George being in perfect condition. Other varieties grown are Eltruge and Rivers' Orange. The melon house will shortly be a delight to the eye with its heavy crop of luscious fruit. Irondequoit is a favorite variety with Mr. Ballantyne. The orchid houses are almost empty, most of the splendid specimens being summered outdoors under laths. They are the picture of health.

The drouth has been a great drawback to all plants outside, the subtropical bedding being especially affected. The hardy borders are a grand sight, a long bed of *Monarda didyma* in one direction and a similar bed of *delphiniums* directly opposite made a pleasing contrast.

Ten thousand visitors at one time have been recorded at this lovely spot overlooking Lake Canandaigua.

W. M.

ROSE GARDEN AT ELIZABETH PARK, HARTFORD, CONN.

Our cover illustration shows a pretty view of the Rambler rose arches in this great rose garden, planned and laid out by Theodore Wirth when he was superintendent of the Hartford Park Department and well carried on and cared for by his successor, George A. Parker, and his efficient assistant, Alex. Cumming, Jr., who has especial charge of the roses. The collections of all class of roses from the diminutive dwarf polyanthas up to the most rampant climbers are very extensive and, all being carefully labeled, the opportunity for studying and identifying varieties is unexcelled and is taken advantage of by throngs of visitors.

The garden, as a whole, this year was grand and it is not stretching the truth to say there was not a noticable flaw in it. The picture we present shows how luxuriantly the ramblers grow and bloom.

Eight lights of high candle power have been installed this year, making the Garden usable through the evening, the roses showing well under the artificial light. Mr. Parker tells us that the evening lighting has been successful even beyond expectations, as it attracted several hundred visitors each evening and enabled a class of people to visit this garden who would be unable to do so during the day time.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

Preliminary Programme of the Twenty-Seventh Annual Meeting and Exhibition to be held at the Fifth Regiment Armory, Baltimore, Maryland, August 15th, 16th, 17th and, 18th, 1911

Tuesday, August 15, 1911.

2.00 P. M.—“Address of Welcome,” His Excellency, the Governor of Maryland; “Address of Welcome,” His Honor, the Mayor of Baltimore. Response, Robert Craig. Address, President George Asmus. Reports of Officers, Committees, etc. Report of Committee on President's Address. Discussion. Miscellaneous Business. Judging of Trade Exhibits.

7.30 P. M.—President's Reception. President Asmus wishes it distinctly understood that the reception will be informal and that the most comfortable costume will be the most appropriate.

Wednesday, August 16, 1911.

9.30 A. M.—Reciprocity with Canada on Floral Products. From the American Standpoint, Mr. P. Welsh. From the Canadian Standpoint, Mr. E. I. Mepsted. Discussion. Advisability of a Spring Meeting, Wm. F. Kasting.

10.30 A. M.—Selection of Next Meeting Place. Nomination of Officers for 1912. Report of Judges of Trade Exhibit. Annual Meeting Ladies' Society of American Florists.

2.30 P. M.—The Private Gardener, Wm. Duckham. Discussion. The National Flower Show, F. R. Pierson. Discussion.

8.00 P. M.—Illustrated Lecture, “Ornamental Horticulture Abroad,” J. K. M. L. Farquhar.

Thursday, August 17, 1911.

9.00 A. M.—Sectional Meetings. Florists' Telegraph Delivery. American Gladiolus Society. American Carnation Society. American Rose Society. National Sweet Pea Society. Florists' Hall Association.

11.00 A. M.—Election of Officers. Amendments to Constitution and By-Laws to be acted upon. To amend Article IV, Section 2 to read as follows:

Section 2. Fees and Assessments.—Any eligible person may become a member of the Society on the payment of \$5.00, and such payment shall cover the annual dues for the balance of the calendar year.

The annual dues shall be \$3.00 per year, payable in advance on the first day of January. Any person may become a life member on payment of \$50.00 and be exempt from all further assessments.

Afternoon.—Bowling Contest and Other Sports.

8.00 P. M.—In hands of Ladies' Society of American Florists.

Friday, August 18, 1911.

In the hands of the Gardeners' and Florists' Club of Baltimore.

THE TRADE EXHIBITION.

List of Exhibitors to July 7th.

Section A.

Robert Craig Co., 600 sq. ft.; F. R. Pierson Co., 300 sq. ft.; Bobbink & Atkins, 300 sq. ft.; Lager & Hurrell, 150 sq. ft.; H. Eichholz, 50 sq. ft.;

Fred Lapp, 50 sq. ft.; Conard & Jones Co., 50 sq. ft.; Henry A. Dreer, 600 sq. ft.; Chas. D. Ball, 100 sq. ft.; Shaw Fern Co., 150 sq. ft.; Storrs Harrison Co., 50 sq. ft.; Jackson & Perkins Co., 80 sq. ft.; W. A. Manda, Inc., 300 sq. ft.; I. H. Moss, 200 sq. ft.; Harrison Bros., 200 sq. ft.;

Section B.

John Lewis Childs, 300 sq. ft.; B. Hammond Tracy, 100 sq. ft.; Arthur Cowee, 300 sq. ft.; J. B. Hutchinson, 40 sq. ft.;

Section C.

Lord & Burnham Co., 320 sq. ft.; U. S. Radiator Corp., 320 sq. ft.; Hitchings & Co., 320 sq. ft.; Kroeschell Bros. Co., 320 sq. ft.; M. Garland & Co., 320 sq. ft.; Johnston Heating Co., 320 sq. ft.;

Section D.

Revere Rubber Co., 200 sq. ft.; Means & Thatcher, 100 sq. ft.; Gem City Boiler Co., 200 sq. ft.; A. H. Hews & Co., 100 sq. ft.; Wilson Plant Oil & Fertilizer Co., 100 sq. ft.; Thomsen Chemical Co., 100 sq. ft.; Wilmer Cope & Bro., 100 sq. ft.; Advance Co., 100 sq. ft.; American Auxiliary Heating Co., 200 sq. ft.; Morehead Mfg. Co., 40 sq. ft.; King Construction Co., 40 sq. ft.; Plant & Land Food Co., 160 sq. ft.;

Section E.

Jos. G. Neidinger, 400 sq. ft.; Edwards Folding Box Co., 100 sq. ft.; Wm. J. Boas & Co., 100 sq. ft.; Reed & Keller, 400 sq. ft.; Schloss Bros., 200 sq. ft.; Roseville Pottery Co., 200 sq. ft.; Wertheimer Bros., 200 sq. ft.; Bayersdorfer & Co., 900 sq. ft..

Section F.

Herry F. Michell & Co., 600 sq. ft.; Griffith & Turner, 300 sq. ft.; Stumpp & Walter Co., 300 sq. ft.; A. T. Boddington, 300 sq. ft.; Henry A. Dreer, 300 sq. ft.; Hubert Bulb Co., 150 sq. ft.; Julius Roehrs Co., 300 sq. ft.;

Section G.

S. S. Pennock-Meehan Co., 200 sq. ft.; Jones the Holly Wreath Man, 200 sq. ft.; McFarland Publicity Service, 100 sq. ft.; J. Bolgiano & Sons, 400 sq. ft.; Florists' Exchange; Alphine Mfg. Co.; O. F. Zurn Co.

“Exhibitors are reminded that the duties of the Judges are limited to the consideration of and the making of awards to Novelties and Improved Devices only. Exhibitors are required to make previous entry of all such exhibits with the Superintendent in writing.” Full rules and regulations, together with the rates, may be obtained by addressing “Mack” Richmond, Superintendent, 1813 Pulaski street, Baltimore, Md.

TRANSPORTATION.

The Trunk Line Association has granted a rate of one and three-fifths

(13-5) on the certificate plan. Tickets may be secured not earlier than August 11th and not later than August 16th, except from stations where it is possible to reach Baltimore by noon of August 17th when tickets may be secured on that date. Tickets will be good returning up to and including August 22d.

In securing your tickets purchase a regular full one-way first-class fare and be sure to request a certificate. No reduction in fare will be made unless a certificate be secured at the time of the purchase of the ticket.

For those living outside the district of the Trunk Line Association inquiry should be made of your local agent for rates to Eastern points. There are many rates in force during August and it is possible to travel at a much reduced fare.

Where members are desirous of joining parties from the larger cities information concerning the trip may be secured by writing to the secretaries of the local florist organizations.

HOTELS.

List of the leading hotels in Baltimore, rates and location. These hotels are all on the European plan.

Hotel Belvedere, “Headquarters,” Charles and Chase streets. Rooms, without bath, \$2.00 to \$4.00 per day. Rooms, with bath, \$3.00 to \$9.00 per day.

Hotel Rennett, Liberty and Saratoga streets. Rooms, without bath, \$1.50 to \$4.00 per day. Rooms, with bath, \$2.50 to \$6.00 per day.

Hotel Stafford, Mt. Vernon place. Rooms, without bath, \$2.00 to \$4.00 per day. Rooms, with bath, \$3.00 to \$7.00 per day.

Hotel Altamont (three squares form Convention Hall), Eutaw place and Lanvale street. Rooms, without bath, \$1.00 per day. Rooms, with bath, \$1.50 per day up.

New Howard, Howard, near Baltimore street. Rooms, without bath, \$1.50 to \$2.50 per day. Rooms, with bath, \$2.50 to \$3.50 per day.

Hotel Caswel, Baltimore and Hanover streets. Rooms, without bath, \$1.50 to \$2.50 per day. Rooms, with bath, \$2.50 to \$3.50 per day.

The New Carrollton, St. Paul, near Baltimore street. Rooms, without bath, \$2.00 up. Rooms, with bath, \$2.50 up.

Hotel Junker (Strictly Stag), 20-22 E. Fayette street. Rooms, without bath, \$1.00 to \$1.50 per day (each person). Rooms, with bath, \$1.50 to \$2.50 per day (each person).

Hotel Raleigh, Holliday, near Fayette street. Rooms, without bath, \$1.00 to \$4.00 per day. Rooms, with bath, \$2.50 to \$4.00 per day.

Hotel Kernan, Franklin and Howard streets. Rooms, without bath, \$1.50 up. Rooms, with bath, \$2.00 up.

For further information, address

WILLIAM FEAST,
331 N. Charles St., Baltimore, Md.,
Chairman pro tem “Hotel Committee.”

DUES.

All members should send in their dues in advance and secure their certificates and badges and so avoid the necessity of waiting at the Secretary's office to pay their assessment. This will also be a great convenience to the Secretary, who has many other duties

to perform. Dues cannot be paid while meetings are in progress. A badge and membership receipt are absolutely necessary before any individual can sign the roll and receive invitation cards for any of the entertainments. This rule will be strictly enforced. Badges will also be necessary in order to get into the Exhibition Hall. All not having badges will be required to pay the admission fee.

On receipt of \$3.00 from those who have paid their 1910 dues or \$5.00 from all others, the Secretary will promptly mail to the sender a certificate and badge. Bring your certificate to the Convention with you.

Send your dues now to the Secretary, H. B. Dorner, Urbana, Ill.

BOSTON TO BALTIMORE.

The Boston delegation to the S. A. F. convention in Baltimore will leave the South station, Sunday, August 13, at 6 P. M. The trip will be made by way of the Fall River boat which should make this route especially popular. The delegation will arrive in New York about 7 A. M. on the 14th, leaving at noon with the New York delegation due to arrive in Baltimore at 4.16 P. M. The Belvidere Hotel, the official S. A. F. headquarters, will be headquarters for the Boston delegation. The fare will be \$8.50 going, by the certificate plan. 3-5 rate return. Reservations for staterooms etc., can be made through W. A. Hastings, State Vice-President, S. A. F., Boston Flower Exchange, C Park street, up to August 11. This should be a good chance for those florists who are not members of the S. A. F. to put in their application for membership through the State Vice-President.

It is expected that Boston will turn out a good-sized crowd, especially as they have a favorite candidate for the S. A. F. presidency in J. K. M. L. Farquhar, whose good and faithful work on the National Flower Show is deeply appreciated not only by the Boston people but by the fraternity in all parts of the country.

NEW YORK TO BALTIMORE.

As the time is drawing near when the work in the greenhouse is less, it gives us time to think of the convention of the S. A. F. and O. H. This is an event in which every "live" florist should be interested. To perfect the necessary arrangements, John B. Nugent, President of the New York Florists' Club has appointed a very much alive transportation committee, Frank H. Traendly, chairman, and this committee has left nothing undone to make this the banner year en-route to the Convention City. They have arranged for a special train, the best equipped on the B. & O. R. R. to convey the members and their friends to Baltimore. Train leaves West 23d St., 11.50 a. m., and foot of Liberty St. at noon on Monday August 14th. At the last meeting of the club a resolution was passed extending an invitation to members and friends of the S. A. F. and O. H. and their guests en-route to Baltimore.

The fare on the certificate plan will be \$4.65 going and return \$2.80. Do not miss this opportunity. Those of us who attended the convention at Rochester still have in mind the enjoyment we had en-route, and Mr. Traendly has as-

sured me that this trip will outclass that of last year. Those who are not members of the S. A. F. and O. H. or the New York Florists' Club should not hesitate a moment in announcing their intention of attending, and should let Mr. Traendly know so he can make the necessary arrangements for accommodation. Every florist can arrange his work so that he can be with us, to meet brother florists from all parts of the United States and Canada, and the exhibition, I am sure, will well repay you.

Application blanks for membership will gladly be furnished. Do not forget the date.

Hoping to have the largest attendance that ever left New York City,

With kindest greetings,

A. L. MILLER,

State Vice-President, New York-East.

A NEW ENGLAND BEAUTY SPOT.

One year ago we gave a description of the work of improvement and de-

DAVID F. ROY

velopment being done on the fine estate of Col. H. E. Converse at Marion, Mass., on the shores of Buzzard's Bay. "The Moorings," as the place is appropriately named, comprises about 80 acres of elevated undulating land well clothed with luxuriant woods, the broad verandas of the mansion overlooking the gardens and a sea view of rare beauty.

The superintendent in charge of the estate is David F. Roy, and in our notes last year we described briefly some of the more important work he was doing in bringing up the grounds and plantations to a high horticultural standard during the three or four years since Col. Converse had acquired it. We have been familiar with Mr. Roy's ability as a gardener for many years, but must confess we were not prepared for the wonderful results of one year's further development which were in evidence when we recently revisited The Moorings, the achievement being all the more remarkable because of the well-known sandy and unproductive character of Cape Cod's soil. The improvements carried forward in the past year in-

clude a broad expanse of velvety lawn where last year was a potato field, the completion of a tennis court, said to be one of the best in the country, the extension and planting of the aquatic pools and picturesque rockeries, the planting of large groups and skirtings of rhododendrons and conifers and the finishing up of a spacious rose garden enclosed by hedges of the newest and best of the Ramblers. The flower garden is extensive and exceedingly brilliant, the fruit houses are filled with luscious product and on every side the transformation accomplished in so brief a period is a delightful surprise. This is one of the estates in competition for the Hunnewell Triennial Premium, and the present is its third year of inspection by the Garden Committee of the Massachusetts Horticultural Society. These premiums are awarded for improvements and skilful care, and are a stimulus to ambitious effort on the part of proficient gardeners such as D. F. Roy, aided and abetted by the unstinted liberality and encouraging comradeship of "the best employer in the world," as Col. Converse is lovingly portrayed by his faithful adherent, and we are sure that nothing but death will ever part these two congenial friends.

IN A HARTFORD GARDEN.

In a recent visit to the garden of the Goodwin estate at Hartford, Conn., we were much interested in the method followed by that accomplished gardener, J. F. Huss, in raising dahlias in pots for exhibition. The plants are grafted, each on a single tuber which has been cut off below the eye. The result is dwarf, bushy specimens, symmetrical and beautiful. The pots are plunged outside. Among the bedding begonias we were greatly impressed with *Perle de Geneve*. It forms a veritable ball of vermilion pink bloom, compact and very uniform and has gone through this exceptional summer in perfect condition. Another striking picture is a bed of *heliotrope La Duse*. It is dwarf and sturdy in habit and produces enormous flat spikes of rich dark color. No grower of bedding plants should omit this fine *heliotrope* from his list. Mr. Huss says that its only fault is that he finds it rather hard to winter.

Dianthus Chinensis Vesuvius makes a dazzling edging for a long mixed border. The individual plants vary occasionally in color but the type is dazzling scarlet. The flowers are single with deeply lacinated petals and very profuse. It is one of Haage & Schmidt's introductions.

The fern rockery at this place is always a most interesting and inspiring sight. Every variety of hardy ferns obtainable in any part of the world have been assembled here in picturesque groups and masses and the sportive *filix-femina* is seen in most astonishing and almost endless variations. The rose garden, than which there is none better kept in this country, has been very fine this year.

Mr. Huss says that the slaughter of conifers last winter was the worst in his experience. This accords with reports generally from all sections of the eastern United States.

CLUBS AND SOCIETIES

AMERICAN GLADIOLUS SOCIETY.

Schedule of prizes for the Second Exhibition of Gladiolus Blooms to be held in connection with the S. A. F. Convention at Baltimore, Md., August 15-18, 1911.

Open Class.

No. 1. Henry F. Michell Co. Silver Cup for the best 25 spikes of new Gladiolus Kunderdi "Glory" exhibited in one vase.

No. 2. Vaughan's Seed Store. Silver Cup for the best and largest collection of blue shades in lots of 6 separate colors; not less than 25 spikes.

No. 3. M. Crawford. 50 bulbs of Gladiolus "White Lady" for the best 6 spikes of any white variety.

No. 4. Peter Henderson & Co. \$10 for the best 10 varieties not now on the market; 3 spikes each.

No. 5. W. Atlee Burpee. \$10 for the best collection of 10 varieties; 6 spikes each.

No. 6. E. E. Stewart. \$5 for the best vase of 12 spikes Gladiolus "Golden Queen."

No. 7. E. E. Stewart. \$5 for the best vase of 12 spikes Gladiolus "President Taft."

No. 8. B. F. White. \$5 for the best vase of new seedlings not less than 25 varieties, never before exhibited.

No. 9. E. H. Cushman. \$5 for the best vase of 25 spikes of one white variety.

No. 10. A. T. Boddington. \$5 for the best vase of any named yellow variety.

No. 11. John Lewis Childs. \$10 for the best collection of Childs' varieties; 3 spikes each.

No. 12. The Gardener's Chronicle. Challenge Cup for the exhibit containing the largest number of standard named varieties, correctly labeled.

No. 13. Stump & Walter Co. \$10 for the best collection of 15 varieties; 3 spikes each.

No. 14. B. Hammond Tracy. Silver and Glass Vase for the best table decorated with Gladioli, the table to be laid for 6 covers.

No. 15. N. L. Crawford. \$5 for the best center-piece for dining-table.

No. 16. Frank Banning. \$10 for the best vase of Gladiolus "Niagara," 3 or more spikes.

No. 17. H. H. Groff. \$10 for the best exhibit of Gladioli in white and light; dark; blue; and yellow hybrids, not more than 3 spikes of each variety and not less than one vase of each color section.

No. 18. Rowehl & Grauz. \$12 for 100 spikes Gladiolus "Augusta;" \$8, 2nd; \$5, 3rd.

No. 19. A. E. Kunderd. \$10 and 100 bulbs Gladiolus Kunderdi "Glory" for the best display of above variety.

No. 20. A. E. Kunderd. 100 bulbs of Kunderdi "Glory" for the best vase of 20 spikes of above variety; 50 bulbs for 2nd best vase.

No. 21. Kelway & Son. Silver Medal. Best collection named varieties, Kelway's large flowered strain.

Amateur Class.

No. 1. W. E. Kirchhoff Co. Gold Medal for the best display of Gladiolus "Princeline."

No. 2. Montague Chamberlain. Silver Cup for the best 6 named varieties, 1 spike each.

No. 3. John Lewis Childs. \$5 for the best vase of Gladiolus "America," not less than 12 spikes.

No. 4. A. T. Boddington. \$5 for the best collection of yellow named varieties exhibited by an amateur.

No. 5. J. M. Thorburn & Co. Silver Cup for the best collection of Primulinus type and hybrids.

No. 6. L. Merton Gage. \$5 for the best 6 varieties of blue Gladiolus exhibited in one vase.

No. 7. A. E. Kunderd. 100 bulbs Gladiolus Kunderdi "Glory" for the best vase of 6 spikes of above variety; 50 bulbs of Kunderdi "Glory" for 2nd best vase.

No. 8. Arthur Cowee. \$5 for the best exhibit of 10 spikes each of a yellow variety, and a blue variety.

No. 9. Arthur Cowee. \$5 for the best exhibit of 10 spikes each of a red variety, white variety and a pink variety.

The following rules will be strictly adhered to.

No. 1. All entries must be made to the

Recording Secretary not later than three days before the first day of the exhibition, on blanks provided by the Secretary for the purpose.

No. 2. Exhibits in competition for prizes must be of the exhibitor's raising.

No. 3. Exhibits must be in place by 12 M. each day on which exhibits are to be judged.

No. 4. Exhibitors are required to keep their flowers in fresh condition during the time the exhibition remains open.

No. 5. Exhibitors will be awarded but one premium in each class in which they compete and then only where the exhibits on their merit warrant the judges in making awards.

No. 6. While the Society will take reasonable care of the property of exhibitors, yet it will not in any way be responsible for the loss or damage of anything exhibited.

No. 7. Exhibits after being staged cannot be removed until the exhibit is closed, without the consent of the Exhibition Committee.

No. 8. The Society requests exhibitors to attach labels to exhibits. Correct naming of varieties is very important.

No. 9. Exhibitors will be required to provide tables and everything else necessary for table decorations.

No. 10. In entering, every exhibitor agrees to be governed by the rules.

The Society will provide space and vases for Amateurs and Private Gardeners. Professional growers and dealers will be required to provide their own space and vases. When it is desired that exhibits be staged by the Society, notice should be sent as early as possible to the Corresponding Secretary. Exhibits by express should be addressed to American Gladiolus Society, Fifth Regiment Armory, Baltimore, Md., express charges prepaid.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual sweet pea exhibition on Saturday and Sunday, July 15-16, in Horticultural Hall, Boston, was not as large as in previous years owing to the great heat and the unprecedented drouth of the last few weeks, which have shriveled up and seriously affected the growth of all flowers. J. O. Christensen, gardener for the estate of W. J. Clemson of Taunton, had a fine display of sweet peas, two tables being filled. This display won ten first prizes. Frederick Mason with a less extensive display won two firsts, one second and one third.

The sensation of the show was the contribution of new lilies from China by R. and J. Farquhar & Co. These were all collected by E. H. Wilson and included were a number now flowered for the first time in cultivation, some as yet unnamed. Of one of these, a most beautiful new species which Mr. Wilson has named Farquhari, we shall have more to say in our next issue. The lovely *L. myriophyllum* was represented by an extensive display of cut blooms, with a background of Japan iris, hemerocallis and other summer flowers and received the honor of a silver medal. Messrs. Farquhar were also awarded a certificate of merit for everlasting pea White Pearl.

A splendid group of Japan irises was shown by Dr. Harris Kennedy.

The fruit and vegetable displays were very fine, Wilfrid Wheeler, William Whitman, W. J. Clemson, Geo. V. Fletcher, W. G. Kendall, Fred'k Mason, Oliver Ames, Warren Heustis & Son and T. J. Grey Co., being the leading prize winners. The last named showed Grey's Perfection cucumber in fine form.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

The Thirteenth Annual Convention of this Association will be held at Kansas City, Mo., August 8, 9 and 10. Convention headquarters will be at the Baltimore Hotel. W. H. Dunn, Superintendent of Parks, Kansas City, is looking after local preparations. The program is as follows:

Tuesday, August 8. 9:00 A. M.—Meeting of Executive Committee.

10:00 A. M.—Annual business meeting. Address of welcome, His Honor the Mayor, Dennis A. Brown, and Hon. D. J. Hafl, President Board of Park Commissioners. Response, William J. Zartmann, President American Association of Park Superintendents. Balloting for members. President's address, William J. Zartmann. Reports of officers and committees. Unfinished and new business.

2:00 P. M.—"Uniform Park Accounts and Reports and the National Census Bureau," Dr. Ernest C. Meyer. "Street Trees," J. J. Levison, Forester City Parks, Brooklyn, N. Y. "Architecture of Animal Buildings," Dr. Frank Baker, Superintendent Zoological Park, Washington, D. C.

6:30 P. M.—Entertained by the Commercial Club at dinner. Address, "Parks are to Cities what Lungs are to Men," Hon. Henry D. Ashley, Park Commissioner, Kansas City, Mo.

8:00 P. M.—Automobile ride through parks and boulevards, spending balance of the evening in Electric Park.

Wednesday, August 9. 9:30 A. M.—"Road Construction and Maintenance." It is hoped to have with us for this discussion representatives of the New York State Highway Department, the Massachusetts State Highway Commission, and the Highway Department of the Borough of Bronx. "Insects," Herman W. Merkel.

12:00 M.—Automobile trip to Kansas City, Kans.

1:00 P. M.—Luncheon in Budd Park.

2:00 P. M.—Automobile fifty-mile boulevard trip.

5:00 P. M.—Visit to Swope Park.

6:30 P. M.—Dinner at the Refectory in Swope Park, as guests of the Board of Park Commissioners.

Thursday, August 10. 10:00 A. M.—Trolley trip to Soldiers' Home, Kansas, Penitentiary, Leavenworth, Fort Leavenworth.

1:00 P. M.—Entertained at luncheon by the Leavenworth city officials.

The Secretary's address is F. L. Mulford, Office of Horticulturist, Dept. of Agriculture, Washington, D. C.

ST. LOUIS FLORIST CLUB.

The monthly meeting, July 13, 1911, was well attended. After all the routine work had been finished the trustees reported on the coming picnic and that all arrangements were completed. The bulletin committee reported that the first year was completed and that the Bulletin had been a success and recommended it be continued. The secretary read a telegram from Secretary Pyfer of the Chicago Florists' Club, asking the delegates to the S. A. F. meeting to Baltimore to travel via B. & O. R. R. and meet their special at Cincinnati. This was turned over to the transportation committee. The chair then announced the nomination of officers. Robert J. Windler was nominated for president and C. E. DeWever for vice-president. For secretary, J. J. Beneke and for treasurer, W. C. Smith. For a three-year term trustee J. F. Ammann and F. A. Weber, and for a one-year trustee W. C. Young and C. C. Sanders. Election of officers will take place August 10th.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The regular monthly meeting of this club was held on July 11th. It did not develop that the club would be very largely represented at Baltimore. On the certificate plan, the cost for the round trip will be \$13.05. The use of mileage would make the cost slightly cheaper, and there might be an opportunity to take advantage of the Atlantic City excursion rates.

Those desiring further information should call at the Pittsburgh Cut Flower Co., 121 7th street, and if it should later prove that the attendance would warrant, a car could easily be procured.

On the question of a club picnic President Jones appointed E. C. Reine-man, J. Hutchinson, J. W. Ludwig, T. P. Langhans and W. Q. Potter a committee with power to act.

The Elliott Nursery Co., Springdale, showed a good collection of hardy herbaceous flowers; Nell McCallum showed promiscuous garden flowers; Phipps Conservatories, Schenley Park, sweet peas; Phipps' Conservatories, North Side, fancy caladiums, a very beautiful and striking exhibit for which the judges, Messrs. P. S. Randolph and Jas. Hutchinson awarded to the foreman, James Moore, a cultural certificate.

There will be no August meeting. Subject for September meeting: Gladioli; seasonable flowers; fruits and vegetables.

H. P. JOSLIN, Sec'y.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The regular meeting of this society Friday evening, July 14th at Stamford, Conn., was well attended, 75 members present. We now have 150 members. The executive committee reported arrangements completed for the first annual outing and games at Bonnie Brae Inn, New Rochelle, July 26. Contests and games start at 10.30 A. M. Dinner served on the lawn at 2 P. M. The committee have arranged everything possible to make the affair most enjoyable for all. Contests and games (prizes for all events) music and colored quartette and Bonnie Brae famous dinner. Tickets \$2.00.

The exhibits at the meeting were of very fine quality. Honorable mention was given to James Stuart for *Achimenes coelestinum*, George Woundy for *Dendrobium nobile*, A. Peterson for sweet peas, P. W. Popp for *Lilium auratum* and sweet peas, Chas. Adcock for *Ponderosa* tomato. Alex Geddes was highly commended for new muskmelon *Heytesbury King* and Adam Patterson for sweet peas. Vote of thanks to A. S. Peterson for *Hydrangea arborescens grandiflora alba*. Exhibitors gave short talks and answered questions regarding their exhibits. This is one of the most interesting features of this society's meetings.

J. B. McARDLE, Secretary.

Edwin Lonsdale sends the following note and query:—"The National Educational Association is now holding its convention in San Francisco some 15,000 strong. Why not the Society of American Florists and Ornamental Horticulturists here in 1915?"

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular monthly meeting of this Society was held Wednesday evening, July 12. It was decided to hold the Dahlia Show in Pembroke Hall, Sept. 26, and the Executive Committee were requested to draw up a schedule. The annual outing will be held on August 10. Mr. F. Adams gave a very interesting talk on Humus Leaf Mold which is being produced by Francis & Camerden of Quogue, L. I.

Three first prizes for sweet peas were awarded to J. McDonald. G. Barton won the special prize offered by J. Ingram for 12 varieties of sweet peas. H. Gaut received honorable mention for sweet peas and F. Petrocchia for cucumbers.

The exhibit for August will be 12 mixed asters, 6 Japanese lilies, 12 gladioli. Mr. J. Ingram offers a prize for 4 vases of asters, white, pink, blue and rose.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the rose, "Wilhelmina," by Hoerber Bros., of Chicago, Ill., becomes complete.

H. B. DORNER,
Secretary.

COST OF PLANTING AND CARING FOR ORCHARDS.

It will be of interest to the people of this vicinity who are thinking of establishing orchards in the near future to know the cost of starting and caring for young orchards. One of the purposes of the Demonstration Orchards established by the Massachusetts Agricultural College is to collect data on the cost of the various operations connected with orcharding. Eight orchards have been planted thus far and while the cost of planting varies in different places owing to the types of soil and labor conditions, the data available covers nearly every condition found in the state excepting where land has to be cleared.

The cost of preparing five acres of land and planting the trees thereon varies from \$40 to \$59.75. This variation is easily explained. In the first instance the land has been in plowed crops the year previous, the men to do the planting were more accustomed to that kind of work and the owner was more continuously in direct charge. Most of the orchards were established for less than \$52. The orchard on which \$59.75 was expended for preparing the land and planting, was established on land that had been in sod for some time and was sufficiently stony to make the digging of holes a difficult task. Then, too, the land was prepared and trees planted with hired help, at a cost of 50c per hour for man and team and 17½ to 20c per hour for man. In all cases the cost of labor was figured at prevailing prices. As in all orchard operation the cost depends largely upon the speed at which men work and when the owner is present who is also a good manager of men, the cost can be greatly reduced. In one case where representatives of

the college were present, with a crew of five, four of whom were inexperienced four acres of an orchard were staked out in perfect lines in all directions and 130 trees planted in less than eight hours.

Basing the estimate upon the results obtained in the Demonstration Orchards, it is possible for anyone to establish orchards with hired help in almost any part of the state at a cost not greatly exceeding \$12, per acre for small areas and proportionately less as the area increases. Where extensive orchards are being planted it is possible to reduce the cost of preparation and planting to 6c per tree when planted 20 feet apart.

Another interesting bit of information that has been obtained from the Demonstration Orchards is the cost of the operations incident to the first year's growth, and the possible returns from associated crops planted. The data from three orchards shows the cost of caring for trees and the associated crops to vary from \$75 to \$156 and the value of the associated crops was sufficient to so cover the expenses that the net cost of establishing and caring for the orchard one year, which includes preparation of the land, planting the trees, and a reasonable fertilizer bill, was under \$4 per acre. In the other orchard, one acre of strawberries had been planted the year before and with the other associated crops yielded a net profit of \$25 per acre.

Without a doubt an orchard started in Massachusetts and given proper care can be made to pay for itself and yield something in the way of interest on the investment even before the orchard comes into bearing.

PUBLICATIONS RECEIVED.

A CENTURY OF BULB GROWING.—A memorial of the "Bloemhof" nurseries centenary (1811-1911). By Ernst H. Krelage. (Head of the firm of E. H. Krelage & Son of Haarlem).

This publication is, unfortunately for most of our readers, printed in Dutch. It is a filial tribute by the author to the work of his ancestors, who took so large a part in the upbuilding of the bulb industry in Holland. The business of which he writes has come down from father to son until the present day and has been developed to one of great extent and prosperity.

The first chapter in the book deals with the Haarlem bulb industry in the first years of the 19th century; chapter second recounts the starting of the business and its development till the founder's death. The third covers the period from 1855 to 1901, during which the business was under the management of the late Jacob Heinrich Krelage, a man of great learning and philanthropic usefulness. The last chapter is devoted to the interim from 1901 up to the present time.

The Cleveland Flower Exposition Company, Cleveland, O., was incorporated recently, capital stock, \$15,000. This company was organized for the purpose of holding the Cleveland Fall Flower Show, Nov. 13 to 18, and the show is following. The company consists of the eleven members of the board of control who are acting for the Cleveland Florists' Club and The Flower Club.

During Recess

Chicago Sports.

The success of the Chicago Carnation Co.'s base ball team is still a matter of pride with them, and they have added to their record by defeating the Minooka team six to five on July 16th.

The Chicago Bowling Club still has a faithful, though small following, and made the following scores July 10th:

J. H'ner, 152 216 169 J. Zeek, 159 185 183
W. Wolf, 174 149 155 G. Vogel, 113 138 167
B. L'ner, 185 155 118 A. H'ner, 164 144 192
A. Zeek, 158 165 171 E. Schultz, 161 155 147

All arrangements are completed for the Chicago Florists' Club annual picnic. A feature of the day will be the ball game between the wholesalers and the retailers. The line up is as follows:

WHOLESALE.—1b, Lormer; ss, Matchin; 3b, A. Zeek; lf, Graff; 2b, Goerrish; rf, Winterson; cf, Farley; c, Keefe; p, Mathes.

RETAILER.—1b, Kral; ss, Christianson; 3b, Ebling; lf, Endees; 2b, Ollinger; rf, Krentz; cf, Schonten; c, Schumacher; p, Wolf.

The usual races will take place for girls and boys under 6, 12 and 16 years, respectively.

The young ladies will be called upon to show their ability to run 60 yards, while the married ladies will run half that distance. The fat men, weighing over 210 pounds, without whom the picnic would not be really a picnic, will run for the amusement of the company, and a "free for all" in a 150 yard dash will complete the races. Suitable prizes will be awarded to the winners.

Washington Florists' Outing.

That the annual outing of the Florists' Club of Washington was a great success was the verdict given by all who took the trip to the park at Huntville, Md., July 12. All kinds of games and guessing contests enlivened the day and the dinner which was served greatly added to the general good feeling.

Many of the stores closed early in the afternoon to allow the clerks and others to participate in the festivities. Four special cars of the W. B. & A. R. R. were provided to carry them to their destination. The visitors from Baltimore went direct to the park from their city and were greeted by the local members at Huntville.

The leading feature of the day was the baseball game. The store people were pitted against the market people and but for the catcher, who had a way of allowing the hot ones to slip by him, the store people would doubtless have won. As it was the market people won by a score of 4 to 3. The store people, who performed prodigies of valor, were as follows: George Shaeffer, s. s.; Frank Ecker, 3b.; Albert Booth, c.; George Cooke, c. f.; William Smith, 2b.; Walter Hawley, r. f.; Charles Scarborough, p.; Geo. Daldish, l. f.; Frank Smith, 1b. It certainly was a hot game. The winners, who as already stated, really ought to have lost (ask any of the store people about this), got glory enough without having their names printed. They were fortunate in having as a scorer Milton Thomas, of Thomas & Sly. I. Rosnosky, salesman for Michell, Philadelphia, acted as umpire during a portion of the game. There were potato races, girls' races,

boys' races, young ladies' races, fat men's races, and other things, including lots of refreshments.

The committee in charge of the excursion consisted of Messrs. Otto Bauer, John Robertson, Jr., W. H. Kimmell, Edward Schmidt and W. A. Bolinger. Between 200 and 300 persons attended.

The Dreer Picnic.

The annual picnic of the Henry A. Dreer store employees to the firm's grounds at Riverview took place on the 15th inst.; some fifty or sixty ladies and gentlemen taking the trip and every one said they had had the day of their lives. J. Otto Thilow of the firm was only told of the matter at noon Saturday, but he managed to have a special car at 1.15 just the same. A straw ride and a baseball game, "Seeds vs. Plants," were features—with plenty of refreshments on the side. The baseball item resulted in favor of the "Plants," showing conclusively that they were of the stronger growth.

Victorious Michells.

Count that day lost
Whose low descending sun
Sees not the Michell nine
Put Craig's men on the run.

That day lost, was the 15th. The Michells were on hand at the Michell Farm, Andalusia, but the Craig boys did not put in an appearance. The explanation: short one pitcher. A practice game was played with the Andalusia town team and a pleasant afternoon put in notwithstanding the disappointment, the score standing 13 to 0 in favor of the Michells.

1 2 3 4 5 6 7 8 9 R H E
Michell, 3 2 2 3 0 3 0 0 0 13 18 1
Andalusia, 0 0 0 0 0 0 0 0 0 0 2 3
Umpire: V. A. Cowgill, Salem, Ohio

Next Saturday, July 17th, the Michell team plays William Henry Maule at Ridley Park, Pa. This promises to be the hardest game of the season, and will practically decide who will be champion of the Seed League.

New York Bowlers.

The Astorias will have a club at Baltimore and some of their heavy weights came over last Friday to give the New Yorks some pointers. But New York has improved some and will be heard from at the convention. The scores:

D'n'd's'n, 173 191 179 Cook, 134 129 143
Ch'd'w'k, 189 190 201 Kakuda, 156 153 153
Meisen, 181 194 186 Scott, 146 139 144
Manda, 167 177 175

The annual outing of the Gardeners' and Florists' Club of Providence, was held on Wednesday, July 19. A sail down the river, where refreshments and dinner were served, was enjoyed.

The Omaha Florist Club will hold their fourteenth annual picnic on July 27th, afternoon and evening, at the Courtland Beach where a large attendance is expected and a good time for all is promised. All the flower stores are expected to be closed that afternoon in order to give everybody a chance to attend the picnic.

LEWIS HENDERSON, Sec'y.

CHICAGO NOTES. "Innocents Abroad."

H. Philpott and A. T. Pyfer, president and secretary respectively of the Chicago Florists' Club, left Chicago, July 8th, for a friendly call at Cincinnati and elsewhere. They gave a very enthusiastic report of the cordial way in which they were received everywhere. During their stay at Cincinnati they were the guests especially of C. Critchell, president of the Cincinnati Florists' Club, Wm. Murphy, Mr. Fordner, J. A. Peterson and R. Witterstaetter. Mr. and Mrs. J. A. Peterson entertained them at dinner Tuesday, although they were busy with preparations for leaving for Europe on Friday.

Kentucky hospitality was exemplified by Geo. Schulz, son of Jacob Schulz, Louisville's leading florist. An electric sign for this store at-

HYDRANGEAS

FOR SUMMER FLOWERING

We have an unusually fine lot of Hydrangeas, which have been held dormant all winter. These plants are now in bud and bloom, and will flower in fine shape during July and August. We have a fine lot of blue hydrangeas, as well as pink. Plants are in splendid shape for immediate use, and will flower during July and August at a time of the year when they are in the greatest demand.

We can furnish these plants in ordinary butter tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs, painted green, with handles, as follows: Well budded plants in 14-inch tubs, \$3.00 each; 16-inch tubs, \$4.00 and \$5.00 each.

FERNS

We have an exceptionally fine lot of Boston Ferns of the *Harrisii* type; also a splendid lot of *Pierson* Ferns. Good, bushy, well-grown plants in 8-inch pots, that will please the most critical buyer, \$1.00 each.

LILIUM HARRISII

THE BERMUDA EASTER LILY

We offer a selected and carefully grown stock of the original pure *Harrisii*. There are only one or two lots of bulbs on the island as good as the stock that we offer. We take pleasure in offering this stock, because it will be found to be very superior to the average stock that is generally offered. This is one of the healthiest and cleanest lots, and will give much better satisfaction than the stock usually obtainable. Our customers who had *Harrisii* from us last year stated it was the best they had received in years.

We have only a limited stock, which we are offering, and when stock is exhausted, we shall have no more to offer this season.

Fine selected bulbs, 6-7 inch, 350 to the case, \$16.00 per case, or full thousand lots at \$45.00 per 1,000; 7-9 inch, 200 to the case, \$17.00 per case, or full thousand lots at \$80.00 per 1,000; 9-11 inch, 100 to the case, \$18.00 per case, or full thousand lots at \$175.00 per 1,000.

**F. R. PIERSON COMPANY, Tarrytown-on-Hudson,
NEW YORK**

tracted especial attention. An American Beauty rose bursts into bloom by degrees making an impressive advertisement. Louisville is reported as strong for the S. A. F. Convention in 1912, and it is expected to send enough florists to Baltimore to fill a special car which will join the Chicago Special at Cincinnati. Enough more will join at Cincinnati and vicinity to fill another, so the "President's Special" will be one of the grandest trains to the convention at Baltimore.

Mr. Mathews welcomed the visitors to Dayton, O. He lets no one forget that he is in the florists' business, for he advertises continually, and in unique ways, generally on something that can be carried home, such as fans, cups, etc. Geo. Bartholomew of the Miami Floral Co. was seen, and is off for Europe before this.

Gladioli.

So important a factor in the Chicago summer flower supply has the gladioli become that along with improved varieties growers are seeking better methods of cultivation. C. H. Ketcham of South Haven, who is sending probably the finest stock into this market, is now cutting an almost pure white Rieve de l'Anjou, sometimes called White America. It has a large perfect flower, borne on a four foot stem, and stands shipping perfectly. Last week Mr. Ketcham had a sprinkling system installed that will reach his 25,000 plants and put an end to the dangers of the summer drouth.

Among the Retailers.

C. A. Samuelson, 2134 Michigan avenue, will begin next week the erection of a conservatory on the roof of his present store. This will give him a fine place for plants and materially add to his present equipment.

At the E. Weinhoeber Co.'s store

the employees are taking their annual trips. Mr. and Mrs. D. O. Robertson are in Canada, and will visit several eastern cities before returning. W. W. Adams the order clerk is having a three weeks cruise of the Great Lakes. When they return Mr. and Mrs. Frank Pasternick will visit relatives in Cincinnati.

Della Bonson, who is in charge of the office at A. J. Mangel's has just returned from a week's outing. A feature of the redecorating of this store, now in progress, is the placing of 13 Grecian columns for ornamental purposes through the store. They are pure white, twelve inches in diameter. They will afford means for decorating the store for special occasions, and are very ornamental when left plain.

H. A. Fisher of Kalamazoo, Mich., is here looking after stock and visiting his brother, Geo. Fisher, who is buyer for the H. A. Fisher Co., of Kalamazoo and Battle Creek, Mich. On Sept. 1st this firm will move into its new retail store in the New Burdick Hotel, where they will have more room and better facilities for handling their trade, and will have one of the most elegant establishments in the state.

The Alpha Floral Co. has particularly attractive windows this summer. They extend a long distance both sides of the corner and are two stories in effect. A preponderance of palm and ferns set off to good advantage the comparatively few colored blooms now to be had, and from the platform of the elevated trains the view into the windows is very pleasing. John J. Burke, head salesman, will spend two weeks at his former home in St. Louis, Mo.

Personal.

C. N. Dickinson and family are at

their summer home at Pelican Lake, Wis.

Mrs. Frank Beu contemplates taking a trip east in August.

Henry Van Gelder, manager of the Percy Jones commission house, is ill.

C. L. Washburn and family left this week for an automobile trip to the historic Starved Rock and vicinity.

Mr. and Mrs. C. H. Fisk leave about Aug. 1st for California and from there will go north into British Columbia, spending six weeks in travel.

Among the week's visitors are Adolph Reiss of Shelbyville, Ill.; Carl Meier, Green Bay, Wis.; Ralph Latham and Mr. Carlson, Minneapolis, Minn., and A. C. Reicher, Michigan City, Ind.

Miss Frances Brundage, formerly secretary of the E. H. Hunt Co., is back from her trip in the southwest greatly improved in health. She will assist the office force during C. N. Dickinson's absence but will not take any permanent position at present.

A. Lange and family are at Colorado Springs. Of the clerks who are taking their outings are Harry Peterson, who is in Canada, Arthur Lawson, who will go to Waukegan, Ill., Lilian Yetteberg, in Sawyer, Mich. Wm. Wolf will wait till the convention and take his with the florists at Baltimore.

W. F. Vlk, 5041 Ashland avenue, who left with his little daughter for an extended trip to the Pacific coast on the 6th of July received a telegram upon his arrival in Portland, Ore., announcing the serious illness of his wife with blood poisoning. A rose thorn had pierced her thumb and the whole arm was infected. Mr. Vlk reached home on the 15th. Mrs. Vlk is somewhat improved and hopes are entertained for her recovery.

PANSY—Boddington's "CHALLENGE"—All Colors

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said, "Why don't you call it Defiance?"

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

Seed Trade

Clover Seeding Lost.

The following communication has been issued under date of July 18, from the office of the Secretary of Agriculture at Washington:

The clover and grass seed grown this spring in wheat, rye and other grain, has been parched up and killed, either wholly or in part on thousands of fields in the central western and northern states. This is a serious situation and calls for prompt attention. If the clover is not replanted, it means no clover hay next season and the planting of some substitute crop for hay next spring at considerably increased expense will probably be necessary. Not only that, but the failure of the clover crop means the loss of the green manuring crop in the rotation and a disarrangement of the whole farm plan of crop rotation. The situation should be met at once. Every piece of new seeding should be examined and, if it has been burned up, steps taken to replant it at once.

One of the best ways known, to get a stand of clover is to disk the stubble field as soon as the grain is off, allowing the disk to run about three inches deep and working the stubble into the soil. The disking and cross disking should be sufficient to clean it of weeds and grass and put the top three inches of soil in fine filth. Keep the ground cultivated until the first seeding time, then sow about ten pounds of clover seed mixed with 6 to 8 pounds of timothy per acre and harrow the seed in. A still better way than harrowing, is to sow the grass seed with a grain drill, letting the seed run down the grain tubes from the grass seed box and covering the seed from 1 to 1½ inches deep.

By sowing clover and grass seed alone in this manner, without a nurse crop, it makes much more rapid and vigorous growth than when sown with grain. By disking the land also, a much better seed bed is made than could be obtained by

plowing, since when ground is plowed in dry weather it breaks up lumpy and lies up loose and is very difficult to work down into a compact seed bed such as is essential for the best results with clover and grass seed. In addition, the grain stubble worked into the top soil by disking seems to form a top mulch especially beneficial to clover.

This method of seeding clover is becoming quite general in some of the middle eastern states where farmers over large sections are giving up the practice of spring seeding with grain because of frequent failure to catch and seeding alone after the grain is cut instead. By this method clover and grass seed may be sown in the central and western states as late as September 15, and still make a good stand that will not winter kill, but in the extreme northern states the seeding should not be made later than August 15.

To summarize, grass seedings in spring from have been burned out on thousands of farms. Replant now by disking the stubble about three inches deep and sowing clover and grass seed alone without a nurse crop by August 15.

Notes.

Robert Nicholson, president of the Texas Seed and Floral Co., Dallas, Texas, for 25 years, has severed his connection with that firm and established himself in the wholesale seed business at 401-403 Commerce street, Dallas.

Clarke & Keller, of Shawnee, Okla., report the demand for seed since the recent rainfall which brought the drought to an end as the largest ever experienced in their business. The sale of corn for replanting is especially heavy.

The Texas Seed and Floral Company of Dallas has filed a complaint with the interstate commerce commission

☞ Selling cheap bulbs is a little like putting up a wet paint sign—many people put their hand on the paint to see if it really is wet. Of course nine times out of ten it is wet, and nine times out of ten florists who buy cheap bulbs find they are everything the word cheap implies. Now a few good Cold Storage Giganteum or Magnificum planted now will net you a good profit in the fall when they will flower. Giganteum planted August 1st will flower for Thanksgiving and September 1st for Christmas; times when you really need them. You must order them now, however, and get them planted. Horseshoe Brand Cold Storage bulbs are superior owing to their keeping qualities and because they are thoroughly matured. Prices very reasonable—upon application. Write us.

Earl Talks on Crop Prospects.

An Interview by Our Philadelphia Correspondent with Howard M. Earl, Manager for W. Atlee Burpee & Co., July 10, 1911.

Some weeks ago we announced in these columns that we had hopes of being able to give our readers a few hints as to crops and the outlook gleaned from the impressions of that experienced observer, Howard M. Earl, during his recent comprehensive crop inspection tour from the Atlantic to the Pacific and back. These hopes have been realized. Mr. Earl very kindly granted your correspondent some precious minutes, and we give herewith a few of his frank expressions on the situation and outlook—as he saw them:

Among the first questions asked:—"Mr. Earl, if it is permissible to ask such a delicate and important question of the world's leading wholesale sweet-pea growers, would you be willing to say without reserve how the sweet pea crop looked to you early in June during your visit to California?"

"Certainly! A paper of HORTICULTURE'S standing in the reliability and conservatism of its seed trade news—not to speak of its enterprise and leadership in that connection—is entitled to information relating to California crops. To state the matter clearly I may put your question under its proper divisions:

"One. On the whole sweet pea crops in California early in June were late—owing to rains coming at an abnormal time."

"Two. Sweet peas will probably average fifty to seventy-five per cent of a crop. The shortage is especially pronounced in the true "Spencer" class. These are as usual, casting their blooms without setting seed."

"What about the other crops you examined?" was asked.

"Onions look well, and there should be a fair average crop—ample for all demands. The only exceptions I would note are:—Yellow Globe Danvers, and Southport Yellow Globe. On these two varieties, I believe, many growers are already heavily oversold—judging from present indications on their acreage. I think white varieties will also be under an average crop; but I have a suspicion that many seed firms have contracted with the growers more than they can use in their trade, and therefore think there will be plenty of white to go around."

"Is there any truth in the report that the parsnip crop will be short?" "Yes," said Mr. Earl, "I think that report is well founded. Many growers lost their roots entirely, and I found that many growers who had not lost all their roots were already heavily oversold. Some of the latter had been east taking orders from the seedsmen while the damage was happening. So they are not to be blamed for having 'bitten off more than they could chew.' Yes, there is no doubt of it—parsnips will be very short."

"How are the carrots coming along?"

"These are in the same boat as the

parsnips. They will be a very short crop. The roots were partially or entirely lost. Of all the carrot crops I saw on my trip, not one looked promising or in anyway up to the mark."

Your correspondent at this point was getting rather blue and pessimistic. He asked his cheerful "image-breaker" if he didn't have a few optimistic items to mix in. All lean and no fat is a pretty poor cow—on the table.

"Oh; don't get alarmed, there are lots of things that are all right. Take salsify for instance. That looked very nice—very promising—and I am sure will be a full crop. Then there is radish. I think, all things considered, radish also will be a good crop. With some growers there are fields that are a bit 'spotty;' but taking character of the season into consideration, there is no doubt in my mind as to the outcome when the harvest comes around. As for parsley, everything looks rosy for a good yield. But I do not look for any surplus as there has been a big shortage in Europe, and our dear cousins across the water are eager to take all our surplus at good figures. There should be a fair crop of celery and leeks are looking very promising."

"Very good, Mr. Earl, that is encouraging; but there is a very important California crop you have not mentioned yet. What about lettuce?"

"Yes, of course, I had that in mind when you interrupted me with your 'fat and lean' foolishness. As everybody knows, there is a very large area devoted to this in California, to supply the regular American trade. Last year, however, in addition to this, there were several important French seed firms who on account of unfavorable conditions in France decided to risk a crop on the Pacific Coast. So the area this year is much larger than usual. I cannot give a very glowing account of the outlook. I think the crop will only be about fair to middling. At the time of my visit the outlook did not seem to be nearly so promising as it was at the same time in 1910."

"They grow spinach and tomatoes out there?"

"Yes, to a limited extent. Spinach looked fairly well. Tomatoes had only just been set out, so little could be predicted about them."

"What about beans? We look a whole lot now—adays to the Pacific Coast for Limas and such."

"Sure enough! Especially in Southern California—in such places as Ventura, Santa Paula, and other towns that go to make up what they call the bean district. Of course, I was too early to form a definite opinion, as beans were but just beginning to make their growth. But judging from the excellent stands which I saw, I should say that there are good prospects for Limas, and other varieties that do well in that climate. Other sorts, planted farther north, also looked promising. A curious feature of the situation, is the exaggerated idea a farmer has as to what a seedsmen should pay him for Limas for seed, when the demand for dried beans for food, is good! But it is no funnier than the same notion of the Eastern brother when Navy beans are in good demand. Both think the price

of seed beans should go up accordingly—independent of any conditions, for or against, in the seed trade."

"We guess that about exhausts the supply of interrogation points for the present, Mr. Earl, and we thank you very much for your interesting talk both for the readers of HORTICULTURE and for ourselves. But just one final one.—We suppose California has now about reached its limit in regard to seed production and we will now have to look further afield for our increasing needs?"

"By no means. Very few realize the possibilities of California as a seed-producing locality. As time goes on, we are going to find that the possibilities there are almost without limit and that many, many more varieties—varieties that are now grown in Europe and elsewhere can be grown to far better advantage in California. There is nothing more positive to my mind than the truth of Peter Henderson's dictum 'California will yet be the seed garden of the world.'"

We think our readers will be pleased with the foregoing condensed epitome of a three-weeks' trip among the growing seed crops of the west by a gentleman who is a keen observer and an able and experienced seedsman. It is hard to get a seedsman to talk, and your correspondent is rather conceited over having at last been able to get one of the big ones to "open up." We shall persevere, now that the ice is broken, and may get some more by and by.

GEORGE C. WATSON.

We understand that the fierce fires which have been raging in Michigan are located directly in the pea-growing section. The subject is so serious a one that we hesitate to quote from one of our jocose correspondents who suggests that we may find next year a new variety of pea pushed by some enterprising seedsman under the name of "Baked" or "Roasted."

DETROIT NOTES.

Mrs. J. F. Sullivan is now rapidly
improving.

Mr. Tony Smith, who left the em-
ploy of John Breitmeyer's Sons green-
houses has bought out the flower store
of O. R. Kohler.

The ranks of workers in local stores
are well thinned out. Vacation trips
are in order everywhere. Albert
Stahelin is erecting a new range of
greenhouses.

Harry Breitmeyer has formally an-
nounced his engagement to Miss M.
Baudet, a very prominent local society
belle, and the date of the wedding has
been set for Oct. 10, '11.

Wm. Heilscher has at last become
a benedict. He did it very quietly and
cute but his many friends will be
awake when he returns.

F. DANZER.

A PASTORAL WINDOW SCENE.

The accompanying illustration shows how W. J. Palmer & Sons, the leading florists of Buffalo, N. Y., made their show window a beautiful and refreshing picture during the hot days of early July. There was an old mill with stream and water wheel and mill pond bordered with trees, in which pond lilies floated and gold fish darted. On the bark rim turtles sunned themselves and on a rustic bridge sat a brownie fishing. Cool and delightful it looked to the public as

they passed along in the broiling heat and they stood two and three deep gazing into the refreshing scene and apparently experiencing a sense of comfort, as on a hot night in the theatre, when a wintry scene is put on the stage the ladies' fans all over the house become motionless.

The question of appropriate window adornment in the dull summer season is a poser sometimes but there can be no better test of its efficacy than to see a crowd of admirers constantly around it.

ST. LOUIS NOTES.

C. Young & Sons Co. held a meeting of stockholders and election of officers last week.

B. Eschner of M. Rice & Co., Philadelphia, is here this week calling on the trade and will be a guest of the trade at the Florists' picnic.

F. M. Widener of Highland, Ills., has bought the establishment of Ammann & Johanson at East St. Louis, Ill., and Mr. Widener will take charge July 15.

Each of the wholesalers has given \$5 for prizes to be given at the Florists' picnic this week Thursday. The Belleville florists, too, have offered a good prize.

Ludwig Zimmer, who has a floral store at Biddle Market left last week for a two months' trip to Germany to visit his folks in Hamburg. His store is closed for the summer.

James Arado of Young's has returned from his vacation fishing out west. Will Young will spend his vacation at Atlantic City, N. J., and Miss Kling chief clerk at the greenhouses left this week for a two weeks' trip to Colorado Springs.

INCORPORATED.

Los Angeles, Calif.—Ingleside Floral Co., capital stock \$20,000. Directors, H. D. Ross, A. W. Ross and F. Edward Gray.

Trenton, N. J.—Goeller Bros., florists, capital stock \$10,000. Incorporators, Joseph M., Nicholas J. and Martin J. Goeller.

PHILADELPHIA NOTES.

Messrs. Bunyard, Ebel, Maynard and others of the Gardeners' Association, held a meeting here on Monday. By-laws were the principal subject under discussion. David Rust, William Kleinheinz and John H. Dodds were appointed a committee to consider and report.

Fred Gear, retail florist of Cincinnati, was a recent visitor on his way to Atlantic City. He was the guest of the Pennock-Meehan Co., and later of M. Rice & Co. He says all cities look alike to him, but such personalities as Samuel S. Pennock, M. Rice and E. J. Fancourt, makes Philadelphia stand out to the eyes of Cincinnati. The writer sent cordial messages to Albert McCullough, J. Chas. and Dan, and hopes they are selling lots of Timothy.

On the evening of the same day (17th) a meeting of the joint committee on Fall Exhibition was held. Neither Messrs. Stroud, Rust nor any members of the trade were present, so it would look as if no interest is being taken by the trade, although as we understand it, the reason for the committee's existence is to get the trade to take some interest. But the P. H. S. deliberately shook the trade interests for the private gardeners' twenty years ago, and now that that policy has proven to have been a mistake, it is too late to undo it.

NEWS NOTES.

Melrose, Mass.—A. M. Tuttle Co. have sold their greenhouses on Sargent and Howe streets to Charles Rapp of New York.

Fishkill-on-Hudson, N. Y.—An extensive addition to the present Paint & Slug Shot Works of Benjamin Hammond is being planned.

Iowa Falls, Ia.—Mr. Pollard's interest in the Pollard Floral Co. has been purchased by J. M. Pierce of the Iowa Homestead of Des Moines.

Tewksbury, Mass.—Irving French is moving his business from Whipple street to the property he has just purchased on Castle street. He will build a residence and greenhouses on this new property.

Flower Market Reports.

BOSTON There is a decided scarcity of good flowers here. There is plenty of material, but it is generally of low quality, although it brings prices that are good for the season. Business is considered good. Roses find a fair demand at better prices than last week. Lilies are rather scarce at present and have also advanced in price. There are no good sweet peas, short stems and diminutive flowers being the rule. Asters begin to appear, short stemmed, but of acceptable quality for so early. Lily of the valley market is fluctuating and irregular.

A change took place in **BUFFALO** the market on Thursday of last week when the heavy supply was cut off, and on Saturday a shortage existed, especially in the carnation and rose line. A heavy demand on floral work helped to consume a good portion of material which a week or so previous had no buyers. Lilies were fine, Giganteum, especially Formosa, were had, but not equal with the former. Rubrums were in quantity, and were a good help out. Beauties are in good supply, and shorter grades preferable. No good Richmonds, but some 'Maids and Bride were seen. Gladioli have made their appearance, but not from local growers. The rain on Monday will help along, and in a week's time home grown stock will be had, for which the trade is in waiting. Very few good asters are had, as the time is a little early yet.

CHICAGO There is the usual tendency to think the market a little duller than ever before in midsummer but those who are comparing their books with those of last year find conditions much the same. The record-breaking weather of the spring months and early summer has reduced the supply and consequently raised the prices on any first-class stock higher than customers were accustomed to pay in summer. Some growers are cutting a fairly good supply of medium length Beauties, which are most in demand. Not many real short-stemmed Beauties are to be had. There are plenty of short Killarneys but long ones are scarce. Lilies of several kinds are to be had in abundance. Some very fine callas are in the market this week, and water lilies are here in quantity. Carnations are small but bring a fair price to the grower though hard to handle by the retailer. Gladioli and asters are helping out decidedly. Lily of the valley is good and some sweet peas are again seen since the cool days. The first blooms of the rose Mrs. Aaron Ward, home-grown, are being cut by Bassett & Washburn. Stock of this eastern favorite was bought by several Chicago growers. Just now it is used principally with lily of the valley in corsages, the stems being short and blooms small but the color is perfect.

DETROIT Asters as well as many other out-of-door flowers must be considered a failure this year. On the other hand sweet peas, carnations, etc., have received a new lease of life and the stringency in these old standbys is re-

Flower Market Reports

(Continued from page 113)

is exceptionally fine, still prevailing forest fires have seriously damaged what were formerly very productive fern gathering grounds.

Summer conditions, NEW YORK summer quality and summer prices are now in control here. They are not materially different from what they have been in other years except that quality generally runs unprecedentedly poor, owing to the severe climatic experiences of the past month. Outdoor crops are naturally the worst affected and asters, which are now due to make their presence felt are in poor shape thus far although signs of improvement under the better weather conditions now prevailing are seen. Orchids are fine but slackening up in quantity. Carnations have never been worse than now.

Business in the PHILADELPHIA flower trade here last week was fairly satisfactory for the season. There is a smaller volume of stock arriving and of course it is of poorer quality than it was but recently. This is especially true of roses, although many other lines are similarly affected. American Beauty is one of the bright spots in the situation, being about the best value of anything now offered. While roses are not up to the mark—even Kaiserin making but a medium showing. Marylands are the best among the pinks—but the best is nothing to brag about. Carnations also are rather inferior and the supply has shortened up notably. The orchid market goes along on an even keel—with enough cattleyas for all demands. Gardenias have improved considerably. Lily of the valley is excellent and selling well. Of asters there is some very fair stock of Queen of the Market arriving but a large majority are very poor. When the aristocrats, like the Crego and others of that class, begin to come in then there will be something doing in the aster line. Gladioli are finding a ready sale. America, Augusta and Brencleyensis are the principal sorts so far. Centaurea imperialis, the lavender pink one, is a favorite item. Easter lilies have shortened up some, but there seems still enough to go around.

ST. LOUIS The market conditions have been anything but satisfactory to the retailer for some time past. In looking over the four wholesale houses

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS

	Last Half of Week ending July 15 1911		First Half of Week beginning July 17 1911	
Cattleyas.....	20.00	to 50.00	20.00	to 50.00
Lilies, Longiflorum.....	2.00	to 4.00	2.00	to 4.00
Lily of the Valley.....	1.00	to 2.00	1.00	to 2.00
Gladioli.....	2.00	to 3.00	2.00	to 3.00
Stocks.....	.50	to .75	.50	to .75
Disals.....	.10	to .25	.10	to .25
Sempdragons.....	1.00	to 3.00	1.00	to 3.00
Asters.....	1.50	to 2.00	1.00	to 2.00
Sweet Peas (per 100 bunches).....	1.00	to 4.00	1.00	to 3.00
Gardenias.....	15.00	to 20.00	15.00	to 20.00
Adiantum.....	.50	to .75	.50	to .75
Saxifex.....	5.00	to 8.00	4.00	to 8.00
Asparagus Plumosus, strings.....	to 35.00	to 35.00
" " & Spreu. (100 bchs).....	10.00	to 20.00	10.00	to 15.00

hardly enough first-class stock can be found to supply half the demand and that is not very large now-a-days. The long, dry and hot spell has a great deal to do with these conditions. Roses and carnations are scarce. Fine gladiolus come in with burned tops. Sweet peas are done for. Tuberose stalks bring \$5 a hundred. Extra good asters sell well at from \$3 to \$5 per 100.

WASHINGTON The drought is held responsible for the poor condition and scarcity of all out-door flowers. Perhaps the most marked effect is seen in carnations, which are in poor condition. Asters are slow in reaching market, and they are also in poor condition. Gladioli are somewhat better but not entirely satisfactory. Phlox is also poor. Roses, on the contrary, are fairly good. Lilies are in fair supply. Gude reports his pet, the Enchanter, to be proving a particularly fine hot weather rose. Stephanotis is doing nicely and is in good demand. Altheas "by the million" are relieving the demand for carnations and are used in great quantities in decorations. Gardenias are coming in more plentiful. The worst is now probably over in the flower shortage.

Max F. Jahn, a florist whose place of business and home is in 1300 State street, met a genial young man last Wednesday who gave the name of George Uhrick and represented himself as a fellow florist in the West. Mr. Jahn extended the hospitality of his home comforts to the young man, who accepted the invitation and stayed over night. When Mr. Jahn went to arouse his guest the following morning he discovered that the young man had gone in the early morning hours. A roll of bills containing \$25 was missing. Mr. Jahn and the police are anxious to meet Mr. Uhrick.—Springfield, Mass., Union.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The annual picnic and games of this club will take place at Caledonian Grove, West Roxbury, Mass., on Wednesday, July 26. The sporting events will begin at 10 A. M., and will include running races, etc., for boys, girls and adults and fat men, quoit match, and baseball, Commercial versus Private Gardeners, for all of which prizes are offered.

NEWS NOTES.

Springfield, Ill.—The Capitol Greenhouses have been leased by Arthur C. Canfield, florist at State street and Grand avenue. George Dinkel will be manager of this branch.

Newell, W. Va.—The Lake Newell Floral Co. greenhouses have been leased by the Chester Greenhouses of Chester, W. Va., and will in the future be known as the Colton Greenhouse Co.

Baltimore, Md.—Vernon Jett, alias Harvey Arnold, will be held in the Baltimore jail until the fall term of court on the charge of using the mails to defraud. Jett, it is alleged, when in need of money, would send bogus orders to C. R. Burr & Co., who conducted a nursery business at Manchester, Conn., and on which the firm would allow him a 25 per cent. commission.

The produce interests of Boston, headed by the Boston Produce Company, have joined in a complaint before the Interstate Commerce Commission today against the Atlantic Coast Line Railroad on account of transfer charges for melons at New York.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

Obituary.

Charles Neiglick.

Charles Neiglick, father of Charles T. Neiglick, florist at North State street, Chicago, died on July 6th from heat prostration.

Leonard G. Ward.

Leonard G. Ward, son of George E. Ward, of Beverly, died at his home, 6 Pleasant street, Salem, Mass., July 4th, with heat prostration. For the last few years he had been employed by Southworth Bros., Beverly, formerly having been in partnership with his brother, Harry Ward, at the North Street Greenhouses. He was 32 years of age and leaves a wife and two children.

Marshall Symmes.

Marshall Symmes, market gardener, and oldest resident of Winchester, Mass., died at his home, Symmes Corner, on July 19. He was in his 93d year, having been born Oct. 27, 1818, in that part of Medford later set off as part of Winchester.

Mr. Symmes was a direct descendant of Zachariah Symmes, who came to this country in 1634. He was a blacksmith until an accident at the forge cost him the sight of one eye. He then purchased the Governor Brooks farm at Symmes Corner and was for more than forty years a market gardener.

Daniel W. Coquillett.

In the death of Daniel William Coquillett, the Department of Agriculture has lost the entomologist who invented the hydrocyanic method of purging orchards of insect pests and who discovered the usefulness of the Vedalia beetle as a destroyer of scale. Mr. Coquillett, who died July 8th at Atlantic City, was born January 23rd, 1856, near Woodstock, Ill. In 1881 he was made assistant State entomologist of Illinois. Soon after he went to California, where he became field agent for the division of entomology, United States Department of Agriculture. In 1893 he was appointed assistant entomologist and at that time removed to Washington.

LITTLE BOBBIE.

He Writes About His Pa's Plants.

By William F. Kirk in Boston American

When Pa came home last nite he walked rite oaver to the gee-ra-nium plants, & he began for to talk to them. Oh, you deer, deer littel gee-ra-nums, he said, I wish that you wud become orchids. There is no reason why you shuddent becom orchids, Pa sed to the flowers, no reason in the world, besides, orchids cost moar.

Ma began to look at Pa kind of close, the saim old look wich I have seen so often. See here, Lite of my Life, Ma sed to Pa, I want to ask you a questun. How long did it tak you to git hoam after you left the office?

Pa im strate hoam, Pa sed. Why do you ask?

I ask, sed Ma, beekaus you are too talkativ. You are talking to the flowers, & that is a sure sine that sumthing is rong. It is bad enuff wen you cum hoam this way & talk to me, sed Ma, or to little Bobbie, tho hevings knows, Ma sed, that you over talk yourself then, but wen it gits so bad that you cum hoam & talk to the flowers in the window, I think that sumthing shud be did.

Well, sed Pa, let me explain. I met a friend of mine from Californy this afternoon that is a relative of a man named Prof. Von der Naillen & a grate frend of

THE HOME CORRESPONDENCE SCHOOL

Dept. H. A. Springfield, Mass.

WANTS, FOR SALE, ETC.

Advertisements in this column cost a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Ham-filton Place, Boston.

BUSINESS CHANCES

PARTNER WANTED—An old established seed and implement house wants a live, hustling, young man to buy part interest and help in the active management of the rapidly growing business. The concern stands well in the trade and with proper help and management, can be made one of the largest in the country. All correspondence, confidential. Address Conservative, care HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick, A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—One Furman Heater, seven sections, serial 3957, size 308, good condition. One Furman Heater, six sections, serial 5401, size 307. Needs one new section. Strout's, Biddeford, Me.

MISCELLANEOUS

WANTED to lease near good town a good Market Garden of about five acres, with greenhouse, good dwelling and out-buildings. Where landscape work could be carried on preferred. Reply to B. T., care of HORTICULTURE.

Lutler Burbank, the inventor of the spineless cactus & the un-winking potato & the naked banana, etc. This frend told me that the way the grate wizard Mister Burbank made the funny plants he made was to walk around in his garden & talk to the plants. For instans, Pa sed, Mister Burbank will walk out into a garden of thorny cactus & look at them gentel & tender, & say Deer littel thorny plants, you look ugly now; but in time, if you realize that I am yure frend, all them ugly spikes will go off you & you will be smooth all over, like a music publisher. Then, sed Pa, the littel cactus plants wud always look back at Mister Burbank & say. All rite, old chap, we will do the best we can to lose our ruff ways, & in time the plants wud becom butiful and smooth.

Ma was lookig kind of scared, she kept following Pa around & I went with her. Then Pa Calm to the lettuce. Lovely Lettuce, sed Pa, be calm & pashunt. Yu are going to git the rite kind of treatment wile you are in this garden, beekaus I am yure frend & shall always be yure frend. Cheer up littel Lettuce, sed Pa, & git big & prickly, like a alligator pear. Then you will be a combinasun salad, Pa sed & git ate by a college boy & a actress. Then Pa went oaver to the green peas & he said, Precious Peas, listen to me. I am yure frend. I worship you & shall proteck you. You shall grow & grow & grow until in yure glorius manhood yu shall becom beans, Pa sed, & git baked. Then sed Pa, beware of Boston!

Then Ma sed, "Come on, Burbank," & she helped Pa up & made him go into the house.

GREENHOUSES BUILDING OR CONTEMPLATED.

Wellston, Mo.—Louis Peeters, house 30 x 100.

Wellston, Mo.—Alex. Johnson, two rose houses.

McPherson, Kan.—C. A. Simonson, house 32 x 80.

Kalispell, Mont.—The Flathead Floral Co., addition.

Geneva, Ind.—Charles E. Fields, range of houses.

Tewksbury, Mass.—Irving French, range of houses.

Fullerton, Md.—E. W. Fiedler & Co., carnation house 24 x 203.

Spokane, Wash.—T. E. Westlake Co., one vegetable house.

Ballston Spa, N. Y.—Henry Bensell, Schafer Estate, addition.

Brooklyn, N. Y.—Brooklyn Institute Museum, range of houses.

Sedalia, Mo.—Archias Floral Co., three houses each 18 x 100.

Scranton, Pa.—T. B. McClintock, three houses each 20 x 100.

Fitchburg, Mass.—C. W. Moeckel, greenhouse and boiler house.

Salem, Mass.—J. R. Hamilton, plant house 26 x 75; a boiler house will also be erected.

Salt Lake City.—A number of Murray citizens, backed by the Murray Commercial Club, are planning to form a company for the purpose of promoting the building of a big hot-house, where it is intended flowers shall be grown to supply the Salt Lake market. J. W. McHenry, president of the Murray Commercial Club, with a number of others interested, have been visiting various proposed sites.

The Foley Manufacturing Co. are now erecting a range of four houses for F. F. Scheel at Schermerville, Ill. They are of the latest Foley construction, having channel iron gutters and flat rafters. This company report an unusually busy season.

Announcement is made that the Wanamaker Mansion at "Lydenhurst," Jenkintown, Pa., which was destroyed by fire some years ago, is to be rebuilt at once. The contract for the stone work amounting to \$38,500 was awarded on the 14th inst. to Joseph Mandes & Bro. Jno. T. Windrim of Philadelphia is the architect. The landscape work is already about completed—the recent year's improvements on the original work having been done under the supervision of the head gardener, Jno. H. Dodds.

PATENTS GRANTED.

- 997,299. Seed and Fertilizer Distributor. Thomas Joel King, Richmond, Va.
997,450. Weed Cutter. Samuel F. Jenkins, Washta, Iowa.
997,454. Sod Cutter. John Lindner, Waconia, Minn.

Augusta, Me.—The appointments made by Commissioner of Agriculture John P. Buckley, have been approved and salaries fixed. Among these are A. K. Gardiner, state horticulturist, \$125 per month, and G. A. Yeaton, assistant horticulturist, \$85 per month.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale and all soft bodied insects. An excellent cleanser for decorative stock.

Used as a spray you can rely upon it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material.

Prof. W. F. Massey, associate editor of the Market Growers Journal, replying to an inquirer for a remedy for black spot on roses, writes (July 1st, 1911):—"The Fungine advertised by the Aphine Company is worth trying on this disease. It is promising here as a fungicide."

\$2.00 per gallon, 75c. per quart.

It is reported that the Atlantic Fertilizer Co., Curtis Bay, Md., intend to build quite a large addition to their plant at that place. According to present plans the new portion will be of brick and stone, with reinforced concrete foundation and slag roof, making the building entirely fireproof. Bids will shortly be asked for on the work. The Atlantic Fertilizer Co. has already completed the structural work on their new steel and concrete pier and are now installing the necessary machinery thereon.

TO INVESTIGATE FRUIT TRANSPORTATION.

Representative Faison has submitted a resolution in Congress, which has been referred to the committee on Interstate and Foreign Commerce, calling for the cause of delays in handling fruit. The resolution is as follows:

Resolved: That the Interstate Commerce Commission be, and is hereby, directed to make an immediate and complete investigation of the transportation and refrigeration (while in transit) of all fruit and vegetable crops grown and marketed in eastern North Carolina, or elsewhere in the United States, by the Atlantic Coast Line and Pennsylvania Railway Companies, the Southern and Adams Express Companies, the Armour Refrigerator Company, and other railroad or transportation companies and refrigerator companies engaged in transporting such fruit and vegetable crops to the northern markets, especially Washington, District of Columbia; Baltimore, Maryland; New York, Boston, and other markets, for the purpose of ascertaining what is the cause of the constant, continuous, and disastrous delays for the last ten years in the schedules of said companies' fruit and vegetable freight, refrigerator-freight, and express trains in transit to the said markets.

The said Interstate Commerce Commission is hereby empowered to assess damages to said fruit and vegetable crops and products from such delays, and to fix the freight rates and make fast schedules for all future transportation of all such fruit and vegetable crops as may hereafter be necessary to market the same without material injury to the growers of said crops in North Carolina and elsewhere.

Owning Your Greenhouse What It Means

This is the U-Bar.
The Bar That
Makes U-Bar
Greenhouses The
Famous Green-
houses They Are.

YOU can talk about the things cold frames will do for you "until the crows come home," but if you want real flowers, real budding plants that you can count on being top notch year in and year out—then a greenhouse is the only thing. The only thing because it is the **sure thing**. With a greenhouse your frames become doubly valuable, as then one helps the other greatly to the advantage of both. With a greenhouse you can control temperatures and conditions and can have what you want when you want it. But don't allow anyone ever to persuade you that any other curved eave house is just as good as the U-Bar. It's not so. We want to show you exactly why. Send for the catalog as a starter.

CHICAGO FLOWER GROWERS' ASSOCIATION

Wholesale Growers of Cut Flowers and Plants

President, John F. Kidwell

Secretary, George C. Weiland

Vice-president, E. Meuret

Treasurer, Anton Then

General Manager, Otto W. Frese

OPEN AUGUST 1

We handle the stock of 60 well known growers who specialize in Beauties, White Killarneys, Pink Killarneys, Richmonds, Brides, 'Maids, Lily of the Valley, Orchids, Asters, Sweet Peas, Violets, Chrysanthemums, and everything else for the florists' trade. In green goods we have Smilax, Asparagus in strings and bunches, Galax Leaves and Fancy Ferns.

SIXTY GROWERS 2,000,000 FEET OF GLASS

These growers have been selected with care as to their size and the quality and variety of the stock they grow. In approximating the amount of glass they control, we believe 2,000,000 feet a modest estimate, so that with this amount of glass we will be second to none in quantity of stock we shall receive. The quality also will be varied, so as to meet the requirements of every florist. There will be a large supply of extra fancy roses; also the grades ranging to short. The growers have been selected so that we will have a large supply of every kind of flowers as they come in season. We have also growers who specialize in Beauties, orchids, valley, roses, carnations and green goods. These, with a large percentage who grow all the miscellaneous stock, **make us one of the largest wholesale cut flower houses in Chicago.**

The second floor of our four-story building will be used for the sale of plants. We have growers who specialize in these and we expect to become a factor along this line. You will hear more on this later.

We will be in readiness August 1 to receive orders, every detail being perfected. On that day we will have a full line to offer, so you need have no hesitancy in wiring or writing for rush or future shipments. **Your orders will have the most prompt and careful attention** and will leave on the first and quickest express.

Charge accounts are solicited and there will be no delay in shipment on that account. C. O. D. shipments will be made only to those who are new, without reference accompanying order.

We solicit your correspondence and will gladly give any and all information requested pertaining to the business. We hope to receive your valued assistance toward making this a success, assuring you it will be wholly advantageous to you.

176 N. Michigan Ave., Between Randolph and Lake Sts., **CHICAGO**

Seasonable Notes on Culture of Florists' Stock

CALANTHES

These orchids are now in active growth and should have a genial moist atmosphere with a common sense supply of water at the roots. On all favorable opportunities give them ventilation without allowing direct or cold drafts to strike them. At this time of the year we are very liable to have a spell of cold and wet weather which causes the temperature to fall below the normal. This is the time you need a little fire heat, just enough to slightly warm the pipes and you will be able to keep a chink of air on all the time, which helps to keep the atmosphere active and sweet. Calanthes are now beginning to fill their pots and pans with roots. A little stimulant in the way of either weak cow or sheep manure can be applied about once a week with benefit, and as the roots get more matted in their pots they can have it twice a week until the flowers commence to expand. Keep a lookout for thrips.

CARE OF VIOLETS

From now on no winter-flowering stock requires more watching and judicious attention than the violets. Go over them every week and remove all decayed or diseased leaves, weeds, etc., for they like absolute cleanliness. Give frequent and shallow cultivation thus insuring a sweet and open soil. It is during August and September that so many promising houses of violets go wrong from the want of proper ventilation and care in watering. In order to have strong sturdy and healthy plants when the short and dark days come give all the air you can day and night until winter sets in. Be always very careful in watering; look over the beds good at first, then you will detect the dry spots which can be watered, thus helping to keep your beds at an even degree of moisture. Give a good syringing early in the morning on all fine days so as to allow the foliage to become dry before night. About the middle of August if your plants are making a fine vigorous growth give them a half or three-quarters of an inch of a mulch of either sifted cow or horse manure that is well decayed, as it feeds the surface roots and prevents the continually drying out of the beds.

BOUGAINVILLEA

Plants that have been growing vigorously and have filled their pots with roots should have a shift. Give them a soil of a more lumpy character. Sod that was cut last fall will be all right for them. A good compost is three parts of soil and one of cow manure. See that they have plenty of drainage as they will need a free supply of water while growing. Keep them under glass and in a position where they will be exposed to full sun. See that they have a daily syringing for the next six weeks. By the last of September begin to keep on the dry side so as to secure a ripened condition of the wood to make them flower freely. It must be remembered that these plants like a comparative rest but at the same time they should never be allowed to get too dry. While resting give them a cool house—say about 50 degrees and keep air on as much as possible.

DOUBLE DAISIES

It will pay any florist living in the suburbs to grow these plants for spring sales. For the ground work in

bulb beds they are very satisfactory, and for making separate beds in partial shade they are also well worthy. They sell well in baskets at Easter. Sow the seed in shallow boxes now or any time before the middle of August. When they are large enough to handle set five inches apart in a cold frame. With the coming of winter give them some protection, and whenever there is any mild weather see that they have plenty of air. Give them the same treatment as pansies and they will succeed all right.

GARDENIAS

Continue watchfulness in all general matters connected with the culture of these plants. Gardenias that were benched early in June will now be advancing very rapidly and at all times they must have every care and encouragement to promote a quick and sturdy growth. Damping down will now be necessary two or three times a day to supply the proper moisture in the atmosphere. Examine the beds each day so there will be neither dry spots nor places showing a saturated condition both of which are very detrimental to this class of plants. Shoots that are making a vigorous growth should be pinched back so as to induce a lateral growth. It should be remembered that while the gardenia delights in a high temperature, great care should be taken to ventilate freely on all suitable occasions so as to secure a gentle circulation of fresh air. Such treatment greatly assists in making good wood for flowering later. Keep the plants free from such insect pests as mealy and red spider by a sharp spray of water forcibly directed on the under side of the leaves and through the plants and if this fails try spraying with an insecticide. You will find several advertised in HORTICULTURE. When the beds begin to get full of roots they will be in condition to stand a light mulch. Give them a dusting of very fine bone first over the surface, and then a light mulch of well rotted cow manure. The best principle to follow in feeding is to give a little at a time, but often.

SCHIZANTHUS

If you want a nice batch of these plants for next winter sow now. See that you obtain the best strain of seed and sow on some fine mixture of equal parts of loam and leaf-mold with a dash of sand through it. Previous to sowing give the pans or flats a good watering and then sow the seed on this and cover very lightly, pressing the soil even all over. Place a pane of glass over the flat or pan and see that the soil does not get parched. When the little seedlings are up a cold frame is an excellent place to summer these plants in. When they are large enough pot off singly into small pots, and shift as they may require until a 6 or 7-inch pot is reached. For the two last shifts use a rich mixture of two-thirds fibrous loam, to one-third of well rotted cow manure and pot firm. To insure fine compact plants keep them pinched freely until the early part of October. Keep them in a frame for the next six or eight weeks as they will be better than if in the greenhouse. *Schizanthus Wisetonensis* is a fine type to grow. These plants want a cool house culture at all times—say about 50 degrees at night.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Achimenes; Calceolarias; Coreopsis grandiflora; Eucharis; Liliun Harrisii; Winter Sweet Peas.

the producing interests in the northeastern section of the United States a clause including flowers in the free commodities might have been squeezed into the bill. However, we look for a very interesting debate when those two sharpshooters E. I. Mepsted of Canada and P. Welch of America get at it. We don't know where Mr. Mepsted stands on the question, as Upper Canada would probably oppose and Lower Canada favor the free entry of flowers from the United States, although on the matter of free entry to the United States, Upper Canada might be "werry willin'," but if P. Welch cannot manoeuvre E. I. Mepsted into a defensive position it will be because the latter is much more artful than the most of us. Get to Convention Hall early on Wednesday morning if you want some fun.

Senate bill 3, introduced by Senator
 An educational project Carroll S. Page, now in the hands of the Committee on Agriculture and Forestry provides for Government

aid to the States in promoting a better system of education along agricultural and industrial lines and in home economics. The problem of wise and efficient training of young men and young women, always a paramount one, becomes now more serious than ever under the restrictions on a broad-gauge mechanical knowledge imposed by existing factory methods in the division of labor and by labor union proscription. As Mr. Page forcibly points out, Germany is now outrunning us in the race for commercial supremacy due in a large measure to the fact that when the German boy reaches the age of 12, 13 or 14, his characteristics, his physical equipment, the bent of his mind, are carefully ascertained and he is given a training which equips him for the life work which he decides to follow. "Not so with the American youth of the great middle class, especially in our villages and cities. He is turned adrift and the question presented to his mind is, not what will my future life work be? but rather, Where can I get a job that will furnish me the wherewith to buy my clothes and pay my entrance with my best girl to the moving picture show? In the majority of cases if he can find a position as boot-black, newspaper vender or messenger boy, he is content. In any event he follows the lines of least resistance and takes the work nearest at hand with little or no thought as to growing up into a well-rounded manhood. If he be a farm boy, he works along without specific training and becomes another of that great number who secure from the soil only half the profits they should." The high school, the academy and the college are taking excellent care of those boys who are financially able to avail themselves of their advantages, but for him who cannot, little remains but the prospect of a cheap manhood. If the entry of the National Government into a comprehensive and liberal co-operation with the States for instruction in agriculture and the trades will modify and improve these defects in our industrial system then, by all means, let us have it even if it becomes necessary to economize by cutting out a battleship or two!

Reciprocity?

Reciprocity with Canada is now an assured fact, at least so far as this side of "the line" is concerned. We cannot see just where any practical result can be reached by a discussion of the question of "Reciprocity with Canada on Floral Products" as is provided for in the program of the Baltimore Convention. Last year at Rochester would have been the time to have got busy with this proposition and, with a little assiduity on the part of

LILIUM FARQUHARI.

Our cover illustration this week shows another of the new hardy lilies collected by E. H. Wilson in his Chinese explorations. Mr. Wilson thought enough of this new species to name it *Lilium Farquhari* as a compliment to Messrs. Farquhar of Boston, with whom his relations have for years been of the most friendly nature.

At Horticultural Hall, Boston, on Saturday, July 22, this lily was exhibited for the first time and received the award of a silver medal. It was shown in cut form from the garden and as plants in pots, some of the bulbs having produced two, three and four flower spikes.

The flowers are very large, pure white except for a shading of green on the lower outside half of the trumpet and a soft green stripe towards the base of each petal inside. The nine plants shown displayed considerable variation in type, the shape of the trumpet, height of stalk, and the fragrance differing in several specimens. The photograph which we have reproduced gives an excellent idea of the waxy beauty of this new comer which, being hardy and easily grown, should in time take a high place among the forcing lilies as well as for garden use.

Messrs. Farquhar at the same time showed *Lilium myriophyllum* again and the impression grows that this beautiful lily has surely come to stay. Pure white with orange flush in the centre and deliciously fragrant, it will undoubtedly become a popular cut flower. Also a large exhibit was made of a very uniform strain of *Lilium longiflorum* grown in Korea and these were given honorable mention.

TOMATO DISEASES.

In Bulletin No. 138, June, 1911, of the Massachusetts Experiment Station, Dr. George E. Stone has treated the subject of Tomato Diseases in an exhaustive manner. This is a topic to which Dr. Stone has given many years of study and experiment and is an unimpeachable authority. Every one of the 32 pages covered is valuable reading for the vegetable gardener. Some sixteen diseases, induced by parasitic organisms or by abnormal functions are fully treated as their causes and prevention, soil conditions, etc. Dr. Stone sums up as follows:

"Tomatoes are subject to various dis-

eases, some of which are common to outdoor plants and others confined to those grown in greenhouses, and many affect crops grown under either condition.

The methods of treating outdoor crops necessarily differ from those required inside, since in the latter case the environment is more or less under control, and by proper control of the environment most of the diseases may be eliminated.

The principal diseases affecting outdoor tomatoes are the blossom end rot, tomato scab (*Cladosporium*), anthracnose (*Colletotrichum*), leaf blight (*Septoria*), leaf blight (*Cylindrosporium*), leaf mold (*Alternaria*), bacterial blight, downy mildew (*Phytophthora*) and timber rot (*Sclerotinia*). The first six occur to a greater or less extent in Massachusetts, some of them occasionally causing considerable damage. The others have been noted elsewhere and have often proved troublesome.

For the present, spraying must be recommended for the treatment of outdoor tomato diseases, although in some cases it is of doubtful value, and the returns from the crop during certain seasons in some sections would warrant little expenditure in this direction. Proper training and pruning are beneficial and a sufficient water supply is of value in the control of the blossom end rot.

The principal diseases affecting greenhouse tomatoes are the blossom end rot, timber rot, scab (*Cladosporium*), eel worms, wilt, surface molds, burn or scald, hollow stem, Oedema and mosaic disease. Of these, the first four are the most important and can be absolutely controlled—the blossom end rot by sub-irrigation, timber rot and eel worms by sterilizing the soil, and scab or *Cladosporium* by regulating the air moisture. The remaining ones are of little importance and as a rule result from abnormal conditions which should not be present.

The most important features in greenhouse culture are those connected with the management of the crop. Too great stress cannot be laid upon the necessity of the gardener's understanding the influence of such factors as heat, light, moisture, ventilation, etc. He should be careful about introducing radical changes in the management of the crop, and much discretion must be used in the application of fertilizers."

Copies of the bulletin may be obtained on application to the Agricultural Experiment Station, Amherst, Mass.

SPRAYING TO KILL DANDELIONS.

Review of Bulletin No. 335, N. Y. Experiment Station, by F. H. Hall.

In spite of the beauty of their bright blossoms in early spring, dandelions are regarded with disfavor by practically every lawn-owner. Their rapid growth, crowding out the grass, prevents the development of an even sward; and their coarse leaves, unsightly flower-stalks and fuzzy tops serve as unseemly decorations for the ideal lawn. They have been fought, and usually with slight success, wherever they have appeared in dooryards, parks or boulevards. Digging them up is tedious and disheartening; for their abundance makes it no small task to cut them out even on a few square yards, and unless cut very deeply, new crowns form and the owner's labors result only in an increase in the numbers of plants. In tests at the Station two plants were cut off repeatedly, below the crown, before any of the new leaves were four inches long; yet one plant died only after seven cuttings, the other after eight.

In other parts of the country, spraying with iron sulphate (copperas) has been reported successful in controlling these lawn pests; so that it was with high hopes that an experiment along this line was started on the Station grounds. A 10-ft. strip about 100 feet long of blue-grass lawn was sprayed six times during the summer of 1909 with iron sulphate solution containing 1½ lbs. of the chemical in a gallon of water, the sprayings being about four weeks apart and made, as far as possible, under conditions thought best adapted to kill the weeds. Success was not reached that year; so in 1910 the sulphate was increased to 2 lbs. to the gallon, the applications were made two weeks apart, and in three treatments the strip was sprayed twice, from different directions.

By the end of June, six treatments had been given and the effect on the grass of the lawn, with checking of growth by drouth, made it unsafe to spray longer. At this time 1085 living dandelion plants still remained, few less than on the untreated lawn beside the strip.

The spray blackened the dandelion foliage, so that the first impression was that the treatment was effective. It did retard or prevent blossoming; but it did not destroy the roots. The application of the copperas also made the grass foliage black and unsightly, though this effect usually disappeared before the next spraying. In no way, however, can spraying with iron sulphate be considered a success in removing dandelions from lawns in New York State.

Our Seventh Annual Convention Number

It will be issued under date of August 12, 1911. It will be full of interest for those who go to the Convention at Baltimore, and equally so for those who stay at home. It will be widely distributed and in publicity value to the advertiser will have no superior. Take a generous sized space in HORTICULTURE. You'll find yourself in good company. ❀ ❀ ❀ ❀ ❀

IT PAYS!

IT PAYS!

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

BALTIMORE'S CONVENTION PROGRAM.

The convention program of the Gardeners' and Florists' Club of Baltimore, is now quite definitely settled. A fine steamer has been secured and an excursion trip down the bay to Tolchester Beach, a famous attractive resort, the Coney Island of Baltimore, will be given the guests. At this place the games will be played—the races, shooting, baseball, etc. At six o'clock the boat will leave and go farther down the bay, returning to the city about ten. From present indications it would seem that another steamer will have to be chartered, but the committee will be equal to the occasion whatever it may be. The aim is to make the Baltimore convention a record maker.

Among the prizes offered for bowling for ladies are the following: Boas cup, silver by Bolgiano, cut glass vase by Stewart & Co., cut glass bowl by Hutzler Bros., hand bag by Pennock-Meehan Co., silver by Dreer, silver belt buckle by Mrs. Christie, bowling ball by Brunswick, Balke, Collander Co.; Japanese bread tray by Rice & Co., flower holder by J. W. Putts Co., fern dish by Brager & Co., cut glass yase by Eisenberg, umbrella by Goldenberg & Co. Highest individual score, cut glass by ladies of Washington, D. C.; most strikes, linen center piece by O'Neil & Co.; most spares, silver cup by Michell; highest score in a special game which will be the third game rolled, silver cup valued at \$75, by Hochschild & Co.

Among the prizes for men's bowling are a good many money specials and valuable prizes by Pennock-Meehan Co., M. Rice & Co., Hosea Waterer, Edw. Reid, Pres. Geo. Ammus, Michell, Dreer cup, silver bowl by W. J. Johnson of Baltimore, F. C. Bauer of Baltimore, silver cup; Thos. H. Patterson of Baltimore, dozen fruit knives. There are many other prizes which will be given on the potato race for girls between 15 and 25, and boys between 15 and 20. There are also a number of good prizes donated for bowling that are yet to be assigned, as the sporting committee desire to distribute them so that everyone will have a chance to pluck a plum.

The ladies' committee have arranged for a grand trolley ride in special cars, which will visit all the suburban sections, and a fine luncheon will be served at the Country Club en route. This will be for ladies only.

BALTIMORE'S WELCOME.

Members of the Society of American Florists and Ornamental Horticulturists:

In a very short time from now our city will be open to receive you as our guests, coming here from far and near, to this, the twenty-seventh annual Convention Meeting of the Society of American Florists and Orna-

mental Horticulturists, and we stand ready to extend the right hand of fellowship to one and all.

We hope that none will miss this opportunity to be here to renew old friendship and make new friends. We firmly believe our society is growing, and the indications are that this will be one of the best meetings and largest trade exhibits that the society has ever had. So "Come One, Come All," and let us have the pleasure of welcoming you in this our beloved city of Baltimore, and when we extend the parting hand, may you return to your homes well repaid for your visit, and with pleasant memories of the Baltimore Convention.

The different committees have worked faithfully together with the

RICHARD VINCENT JR.

single idea of making this meeting the most successful in the history of the Society. The hotel accommodations will be found ample and in equipment equal to any in the country, and reasonable rates, so that accommodations can be gotten to suit every one's taste, from the costly to the more moderate. Terms and conditions will be found in trade papers. Mr. Wm. Feast, who is the head of the Hotel Committee, will be more than pleased to locate any one of you, as you may wish, if you will communicate with him.

A large amount of space has already been taken in the Armory for exhibition purposes, but more good space is still left. We have one of the largest and finest exhibition halls in the country, where every one will be on an equal footing, as all is on the one floor. The Armory also contains rooms for the general meeting and committee meetings, also rooms for rest, comfort and convenience. Come and take possession and everything we have is yours for the time being.

Also try and bring some new mem-

ber with you, so that he or she may be benefited, and the society may increase in strength and usefulness.

Respectfully yours,

RICHARD VINCENT, JR.

Vice-President.

White Marsh, Md., July 20, 1911.

CONVENTION NOTES.

Although my two years' service as secretary have been pleasant ones, I wish to announce to my friends that I will not be a candidate for re-election. My duties at the University have increased to such an extent that it will be impossible for me to spare the time necessary for the work of the S. A. F. The duties connected with the office of secretary are rapidly increasing and the time is approaching when the secretary will be compelled to devote all his time to the interests of the society.

Knowing the importance of the position, I feel that I should make this statement in order that the members have enough time to think over the situation and select a new candidate.

S. A. F. & O. H. pins will be issued shortly to all life and pioneer members and to those annual members who have paid their dues for 1911. The pin will be necessary for admission to the exhibition hall.

Attention of florists should be called to the fact that to get the benefit of the meetings, the exhibition and the entertainments, it will be necessary to be a member of the S. A. F. & O. H.

By order of the president, a meeting of the executive board is hereby called for 10 o'clock Tuesday, August 15th, at the Belvedere Hotel, Baltimore, Md.

H. B. DORNER,

Secretary.

Urbana, Ill.

PROPOSED INTERNATIONAL EXHIBITION.

The First Provisional Schedule for the International Horticultural Exhibition to take place in London, England, May 22-30, 1912, has been issued from the office of the Honorable Secretary, Edward White, of Victoria St., Westminster, S. W. The exhibition will be held at the Royal Hospital, Chelsea, where about twenty acres of land have been set aside for the purpose. It is forty-four years since the last International Horticultural Exhibition was held in London.

Baltimore, Md.—Another severe hail and rain storm has caused much damage to local conservatories. A considerable quantity of glass, reset but a few weeks ago following a similar storm, was broken; hothouse plants were broken down and the beds flooded. In the fields, the farmers suffered very heavy losses, the wind and hail damaging the crops, especially beating down corn. Fruit trees also were badly injured. It is stated that in Westminster (Md.), hailstones four inches in diameter fell.

CLUBS AND SOCIETIES

AMERICAN GLADIOLUS SOCIETY.

Program of second annual meeting, Fifth Regiment Armory, Baltimore, Md., August 16 and 17, 1911:

Wednesday, August 16, 3.30 P. M.

Address of welcome, Mr. George Asmus, President S. A. F. and O. H. Reading minutes of last meeting. President's address. Financial secretary's report. Treasurer's report. Nominating committee's report. Report of committee on "What Constitutes a First Size or Saleable Bulb."

Thursday, August 17, 9 A. M.

Report of judges. Election of officers. Report of miscellaneous committees: bulletin, exhibition, etc. Report of committee on nomenclature. New business. Lecture, "Gladiolus Diseases," by Prof. Whetzel, or assistant from Cornell University, followed by discussion and reports from state committeemen on diseases.

L. MERTON GAGE,
Cor. Sec.

The exhibits will be staged in a room near the superintendent's office, and will be the headquarters for all the members. A desk will be furnished for those who wish to attend to their correspondence in the Armory.

It is earnestly desired that intending exhibitors make their entries as early as possible, which will greatly facilitate the work of the committee. Entries close August 12th and must be sent to the corresponding secretary, L. Merton Gage, Orange, Mass., who will furnish schedules and blank entry forms upon application.

H. YUELL,

Chairman Exhibition Committee.

NORTHERN INDIANA FLORISTS' ASSOCIATION.

The Northern Indiana Florists' Association held their annual meeting at Winona Lake, a handsome summer resort, in which are more high-class entertainments than any similar place to be found anywhere in the country. We are proud of it and would like all our friends to come and see for themselves. The meeting was well attended, but the exhibition consisted entirely of gladioli, mostly from A. E. Kunderd of Goshen, originator of the new Ruffled gladiolus, samples of which were on display together with a number of others which were pronounced by all to be the finest they ever saw. Henry Johnson, Kendallville, also exhibited a vase of creamy white with pink throat, such as every florist is looking for for their retail trade.

The election was the important business of the day and resulted as follows: President, J. D. Conner, Wabash; vice-president, Harry White, North Manchester; secretary and treasurer, A. J. Wagoner, Columbia City; directors, Simon Humfeld, Muncie, and Paul Beyer, South Bend. Three new members were added, making a total of 42.

The next meeting will be at Fort Wayne, at which time we shall hold a fall show, which we hope will be patronized by many outside growers as a liberal list of premiums will be

offered. The date will be published later.

A. J. WAGONER, Secretary.

FLORISTS' CLUB OF WASHINGTON.

Wm. F. Gude will entertain the Florists' Club next Tuesday evening on the lawn at his residence. It will be "ladies' night", and the meeting will be social as well as business. The principal topic will be the question of entertaining the members of the S. A. F. who may come over from Baltimore when the convention is held in that city. The Washington florists expect to do something hospitable, but although a number of plans have been tentatively suggested, nothing definite has yet been agreed on, and it is expected that some decision will be reached Tuesday night.

F. J. DYER.

Because of the backward season the exhibition of annuals and perennials by the Lenox (Mass.), Horticultural Society has been postponed until August 10. James O. Clifford, Walter Jack and Thomas Paige are a committee for arrangements.

PERSONAL.

Richard Rolston will take charge of the new store of C. J. Friedman, 63 West Congress street, Chicago, Ill.

Louise Greenwood Stewart, daughter of Wm. J. Stewart, and Ralph Willett Messinger of Taunton were married at Winchester, Mass., on Wednesday, July 26.

Recent visitors in Boston—Robert Shock, representing M. Rice & Co., Philadelphia; J. J. Karins, representing H. A. Dreer, Philadelphia; Ed. Gernaly, Montreal, P. Q.; Chas. H. Vick, and Mr. Mandeville, Rochester, N. Y.

Visitors in Philadelphia: Fred Cooney, Cincinnati, O.; George Carson Boyd, Wilmington, Del.; J. J. Conlin, representing Connelley & McCarthy Co., Charleston, S. C.; Coroner King, Norristown, Pa.; Chas. Ebele, Jr., New Orleans, La.; J. A. Penny-packer, So. Bethlehem, Pa.; Charles J. Graham, Cleveland, O.

During Recess

St. Louis Florists' Picnic.

This much-talked-of picnic took place at beautiful Ramonia Park, Thursday, July 20th. A committee consisting of E. W. Guy, J. J. Beneke and W. C. Smith had everything in readiness for a good day's enjoyment. The attendance was not quite so large as on previous occasions but there was a good crowd numbering about 400, the larger part of them going out in the afternoon in time for dinner. A fine band kept the young folks in good humor in the dance hall and the lake offered fine boating and fishing.

Messrs. Pilcher, Fillmore and Beneke were the reception committee and Al. Gams, "Billy" Patton and F. Windler had charge of all the games, for which fine prizes were offered.

The walking match for growers only was won by John Connon. Young ladies' race won by Miss Anna Bishop. Girl's race, Miss Lizzie Lowe. Boy's race, Wheeler Detgen. Ball throwing contest for men, Al Gams. Ball throwing contest for ladies, Mrs. Faerber. Fifty-yard race, for men over 50 years, J. J. Beneke. 100-yard dash for young men; a field of 15 started in this and it was won by Oliver K. Sanders. Married ladies' egg and spoon race, Mrs. Oscar Kuehn. Hop, step and jump contest, Al Gams. Tug of war, two sides of 12 men each, picked by R. J. Windler; the pull was a long one and after tugging back and forth the rope broke and both sides hit the ground hard, the committee declaring it a draw. The ball game was declared off as the retailers failed to get their team out. This, they say, will be played later in the month. The prize waltz came next and was judged by Messrs. Pilcher, Eschier and Windler. The prize was awarded to Miss Martha Helwig and Frank Windler. After supper the young folks took charge of the dance hall. Everyone had a splendid time and the day will long be remembered.

Gardeners' and Florists' Club of Boston.

The annual picnic of the Gardeners' and Florists' Club of Boston took place, as scheduled, on Wednesday, July 26, at Caledonian Grove, West Roxbury, Mass. The day could not have been more delightful as to weather if made to order, and the grounds proved to be the most desirable and satisfactory which the club has ever visited. The crowd in attendance was large, and the competition on the various games and stunts was very keen.

Wm. J. Kennedy, officiated as ring master, Edward Rose as starter, Wm. McGillvray as handicapper, Wm. N. Craig as clerk, K. Finlayson, Thos. Westwood, A. F. Barney, Geo. Shield, James Wheeler, Frank Allison, Wm. Harvey and Peter Fisher as judges, James L. Miller as umpire and P. J. Turley, Wm. Downs, Robt. Cameron, John P. A. Guérineau, Wm. J. Kennedy and P. M. Miller as committee.

The two great events of the annual picnic are the baseball game and the tug-of-war, in each of which the commercial and private gardeners are pitted against each other. The baseball game was won by the commercials

by a very close margin. The captains were A. E. Walsh, commercial, and R. W. Curtis, private. The tug-of-war was won by the private gardeners under Captain Duncan Finlayson. Wm. Hastings was captain of the commercial bunch. The fat-men's race, always a fun provoker, was won by D. F. Roy of Marion, on a scratch, and Mr. Roy was the proudest man "that ever came down the pike."

Prizes for the various classes were given by Lunt, Moss & Co., T. J. Grey, Co., W. N. Craig, P. Fisher, M. A. Patten, Ames Impl. and Seed Co., H. F. Mitchell Co., D. Iliffe, H. Terry, Fottler, Fiske, Rawson Co., Lord & Burnham Co., W. J. Anderson, P. M. Miller, Boston Plate and Window Glass Co., Eber Holmes, Jos. Breck & Sons, Stumpp & Walter Co., Thos. Roland, J. F. Shea, Thos. Pegler, New England Nurseries, Thos. Westwood, H. M. Robinson & Co., P. di Stacio, Penn the Florist, A. H. Hews & Co., Wm. McLaughlin, W. E. Fischer, Benj. Hammond and Duncan Finlayson.

A Chicago Outing.

It takes more than a rainy day to daunt a crowd of Chicago florists bound for a picnic. On Sunday as the time drew near the skies darkened and the rain fell. Notwithstanding two hundred tickets were presented and not a florist nor a florists' friend but stoutly maintain they never had a better time than at Erhardt's Grove, Park Ridge, July 23, 1911. Sympathy is being freely extended to the Retailers who were defeated by the Wholesalers at baseball, the score standing 16 to 9. In the races the prizes were won as follows.

Girls under 6—L. Kohout, H. Covert.
Boys under 6—L. Zeck, P. Ottenbacher.
Girls under 12—H. Covert, A. Serneuz.
Boys under 12—L. Zeck, G. Erhardt.
Girls under 16—L. Krauss, J. Glassman.
Boys under 16—B. Johnson, C. Enders.
Single Ladies over 16—L. Goerlsch, L. Krauss.
Married Ladies Mrs. P. Olsen, Mrs. Harrington.

Mr. Gernenz carried off the honor due to the fat man. In the 150-yard dash open to all Joe Enwert and Mr. Lully were winners. L. Koropp and Mr. McDonald made themselves famous as pie eaters and received respectively an order for a hat and a pocket knife.

The Cincinnati Florists' Outing.

The Cincinnati Florists held their annual outing at Coney on last Thursday. A heavy shower towards evening that lasted for a couple of hours served to put a damper on the baseball game, but not upon the enthusiasm of the crowd. The games subsequently resulted in a bowling match of a single game which the bowlers with the aid of two eminent stars won.

The results of the other contests was as follows:

Boys' ball game won by Growers (Ben George, Jr., Capt.)
Boys' 100 yd. dash won by Geo. Culver.
Donor of prize: Beckman Floral Co.
Boys' sack race won by Adolf Demler.
Donor of prize: P. J. Ohnger.
100 yd. dash won by Chas. Windram.
Donor of prize: J. M. McCullough's Sons Co.
Senior men's race won by Ed. Murphy.
Donor of prize: R. Witterstaetter.
Mile run 1st, Jos. Erdwax; 2nd, Chas. Wm. Drann.
Donor of prizes: C. E. Mitchell, J. M. McCullough's Sons Co.
Married ladies' race won by Mrs. Wilhelm.
Donor of prize: E. G. Gillett.

Single girls' race won by Miss Marie A. Hoffmeister.

Donor of prize: Avondale Floral Co.
Bowling (ladies) highest score 1st, Mrs. Ehland; 2nd, Mrs. Pfeiffer; booty, Mrs. R. C. Witterstaetter.
Donor of prizes: L. H. Kyck, John Jennings.

Men, highest total in series of 3 games—1st, Wm. Schumann; 2nd, Wm. Sunderbruch; 3rd, Ray Murphy; 4th, Al. Sunderbruch; booty, Ed. Horning.

Donor of prizes: Ray Murphy, C. H. & O. H. Hoffmeister, Al. Horning.
Highest score in single game—R. C. Witterstaetter.

Donor of prize: Wm. Murphy.
Highest number of strikes and spares—1st, Wm. Schumann; 2nd, Ray Murphy.

Donor of prizes: Lawrence Fritz, J. M. McCullough's Sons Co.

Six are tied for the consolation prize, consisting of a nursing bottle, filled with the best rye in town, for the one making most splits.

Taken as a whole the outing was an unqualified success and well repaid the efforts of the committee in charge.

A Detroit Outing.

The Michigan Cut Flower Exchange invites all its friends, employees of local florists and their families, to an outing, next Monday. The party will start by boat, leaving at the foot of Bates street at 1 P. M., going up the river to Peake Island, and returning at 7.00 P. M. This island was purchased by the local ferry company from Mr. Theo. D. Buhl, a millionaire hardware merchant, and it contains a very large summer residence and extensive farm buildings. It is well stocked with the choicest fruits of all kinds, and is slowly being converted into a pleasure ground by the ferry company. It will be the first time that a party of excursionists have set foot on the island. To have some idea of the number who will accept this invitation the Michigan Cut Flower Exchange is issuing tickets free of charge.

FRANK DANZER.

New York Bowlers.

The generous offer made by F. R. Pierson of a bowling ball to each of the five members of the New York Bowling Club averaging the best in thirty games from April to August, will be appreciated by the winners—Messrs. Chadwick, Manda, Kakuda, Scott and Shaw, the averages ranging from 130 to 180. This is not, however, the team that will represent New York at Baltimore. Bowling by the New York Florists' Club's Association continues every Friday evening. The scores last week, July 21st, were:

Kakuda	174	179	159	Scott	140	134	152
Manda	199	187	180	Shaw	147	151	146

Chicago Bowlers.

Chicago bowlers met as usual July 18 and as a result of the summer practice five were selected to represent the team at the S. A. F. convention in Baltimore. The fortunate men are J. Zeck, W. Wolf, P. Olsen, Geo. Asmus and Ed. Winterson.

The Michell ball team was again disappointed on Saturday, the 22nd, in having their game with Maule's Seed House cancelled at the last moment. The manager had to hustle around for a game, and succeeded in booking the strong General Electric Company team. Score: Electrics, 8; Michell, 6. After the game Miss Mabel Beringer entertained the members of the team at dinner at her home in Norwood, Pa., and a very enjoyable evening was

spent. Next week (July 29th), Michells cross bats with the team of Pen-nock-Meehan Company.

CHICAGO NOTES.

Ready for Opening Aug. 1st.

Everything is being rushed to completion at the building rented by the Chicago Flower Growers' Association, at 176 Michigan avenue. The ice box being built by Orr & Lockett is probably the largest built for the trade in Chicago, and costs \$1200. The compartments are so constructed that they can be shut off, reducing space for the dull season. All the ice is overhead, thus giving all possible space for stock. J. Kidwell, president of the association, states that all stock from the sixty growers will be pooled and then graded, and the system was studied with the help of an accountant till it is his belief that the individual grower will know exactly the grade of his stock and the price it brings as well as the amount lost, if any. A large, light, sorting room at the rear, an office at the front, and zinc covered tables complete the equipment. The basement will be used for storage and the second floor for plants. Otto W. Fresé, the manager, is getting out circular letters to the trade this week.

Trade Jottings.

Phil. Schup of the J. A. Budlong Co. report the shipping trade as very good. Late asters here look very promising.

The Chicago Carnation Co. are cutting the best asters seen in the market this week. They are grown under glass.

Frank Beu, whose place on North 40th avenue has steadily grown in value, has now added a lot 100x175 facing on Montrose avenue and cornering on the original place. This gives an excellent store site and possibilities of extending the business in that rapidly growing section.

O. J. Friedman will open his new store, known as the Western Floral Co., at 63 W. Congress street, Aug. 1st. Richard Rolston, formerly with J. F. Kidwell & Bro. will be in charge.

Personal.

Henry Van Gelder who has been seriously ill is again seen in the market.

Frank Ayers is in Paris, Texas, called home by the serious illness of his mother, Mrs. H. C. Lark.

Miss Ella Schaefer is missed from the stenographer's desk at Bassett & Washburn's, and will be away two weeks.

Miss Corinne Pherson, of Vaughan & Sperry's has returned from Buchanan, Mich., and Miss Charlotte Paradise has a leave of absence early in August.

John Starrett, florist of the La Salle hotel underwent an operation this week necessitated by a fall on the icy stairs going into the market two years ago.

John Pavechick, head of the wire department of the E. H. Hunt Co., is enjoying a postponed vacation. Several large orders have kept the entire force at work overtime for weeks.

Among those enjoying vacations at this time are Robt. Northam, manager for Geo. Reinberg, at White Lake, Mich.; R. E. Schiller, at Sioux Falls; Herman Schiller at Sister Lakes, Mich.; Jack Byers on a lake trip, and F. Wright, in Michigan.

MINNEAPOLIS CIVIC CELEBRATION.

The city of Minneapolis has just closed a colossal civic celebration in which the formal completion of the great public park project of uniting the waters of Lake Calhoun with Lake of the Isles was a central feature. The affair, which extended over the period of a week and upon which over \$100,000 was expended for spectacular features, was not designed to be wholly entertaining but included much that was educational and inspiring.

From the beginning to the end every feature was a success. Everything was executed with a completeness that the words "well done" could be associated with each and every event. All the prominent streets were richly adorned with elaborate decorations. On about two miles of business and one and one-half miles of residential streets floral decorations, consisting mainly of window boxes, were the chief attraction. One of the best decorations was that along the "Nicollet Court of Honor." Upon entering this court one was confronted by a continuous perspective of festooned green attached to great white pilasters in line on either side of the court. The windows of the buildings were filled with flower boxes, which in mass gave one the idea of a vertical flower garden. The composition was unique and beautiful in the daytime, and at night, being brilliantly illuminated, compared with fairyland.

We show in this connection pictures depicting the type of window boxes most widely used. It will be noted that the make up is of plants of moderate cost, easy care and good staying qualities so that the show will be at-

Window Boxes at Minneapolis. No. 2.

tractive all through the summer and people generally may be expected to follow the example thus given of the fine results obtainable from a trifling expenditure. The contents of the boxes are given as follows:

The box shown in illustration No. 1 is six feet in length, one foot wide and ten inches deep. It contains forty-two plants, namely: Two each of *Dracaena indivisa*, *nasturtium*, German ivy; four each daisies, *Vinca minor*, *coleus*, *Begonia Vernon*, sweet alyssum; eight each "Howard's Star" petunia and *S. A. Nutt geranium*. Illustration No. 2 shows boxes four feet in length each containing two each of *Dracaena indivisa*, *nasturtium* and *heliotrope*; three *coleus*, four each *vinca* and *geranium*, six petunia and six *lantana*—twenty-nine plants in all. The *nasturtiums* and other vines starting from

the ground will soon reach and intermingle with the box plants making a very pleasing effect.

Minneapolis, as already noted, has the making of one of the finest park systems in the world. Same consists of 3400 acres of park land and 37 miles of boulevards, and is under the management of that resourceful and tireless man who has no superior in his field of work, Theodore Wirth, superintendent. The boulevards at present extend more than half-way around the city and in the near future it is planned to make them a concentric feature, thus enabling one to reach all of the large parks by way of the boulevards. It is within these large parks that some of the greatest events of this Civic Celebration have taken place.

THE EVOLUTION AND POLLINATION OF SWEET PEAS.

Dr. A. C. Beal before the National Sweet Pea Society of America.

Evolution.

During the first one hundred years of the history of the sweet pea only three varieties or colors were known, viz., purple with blue wings, pale red with white wings (Painted Lady), and white. The black and scarlet appeared in the last years of the eighteenth century. It is quite probable that the scarlet was very far from what we conceive a scarlet sweet pea should be today. In Martyn's edition of Miller's Gardener's Dictionary, 1807, we find the white, the Old Painted Lady, the New Painted Lady, the latter with a rose-colored standard and pale rose wings, Old Purple, and a variety having a violet keel and wings and purple standard. Sayers describe the scarlet sweet pea as *Lathyrus flore rosea*, while the Painted Lady is described as "Fleshed" color. From this we

Window Boxes at Minneapolis. No. 1.

may conclude that the New Painted Lady, a rose-colored variety, was sometimes called scarlet.

The first of the striped varieties was offered in 1837 and since that date this group has been augmented until the classification now includes Striped and Flaked (red and rose, purple and blue). This classification, however, does not express the real range of color in this group, for we have crimson stripes, e. g., America; red and rose stripes on white—Aurora; red and rose stripes on primrose—Jessie Cuthbertson; mauve stripes—Gaiety; blue stripes—Prince Olaf, and Mester maroon-flaked like Senator. The American growers have introduced the majority of the best varieties of this group among which are America, Aurora, Columbia, Day-break, Gray Friar, Juanita, Pink Friar, Ramona and Wawona. Many of these are now procurable in the waved form.

The variety Blue Edged, the probable forerunner of the picotee forms, appeared in 1860. This was a white variety with a well-defined blue edge, a probable hybrid between *L. Magellanicus* and a white variety of *L. odoratus*. The variety, at all events, was the first to exhibit a distinct blue color among sweet peas. Later it was known as Blue Hybrid, under which it won an award from the Royal Horticultural Society. Sutton & Sons sent out Butterfly in 1878, which somewhat resembled Blue Edged. The so-called "blues" that followed were Invincible Blue, Madame Carnot or Imperial Blue, and Captain of the Blues, all of which had considerable red in the standard. It was not until 1899 that a good blue, in Navy Blue (Lord Nelson), appeared.

The first of the soft pink varieties was Crown Princess of Prussia, 1868-9. Isa Ecaford, Peach Blossom, and Lovely are the improved varieties of this color.

The efforts of the breeders of sweet peas have not all been directed toward the development of new shades of color. The form of the flower has also received attention. The earliest representations of sweet pea flowers show a loose, irregular bloom, with the edges of the standard turned back, i. e., reflexed. Often, if not always, the standard had the notch in the apex and frequently in the margin. The standard, which is the principal part of the flower, has been improved in substance and the notches have been eliminated. The old type had a narrow base, and with the improvement noted has come a "filling out" of the lower edges of the standard so that the outline approaches a circle.

In their efforts to secure varieties of the best expanded or open form many beautiful hooded varieties were originated. While this form was condemned as inartistic by many sweet pea specialists, it nevertheless secured a permanent place. Prima Donna, Lovely and Countess of Radnor are of this form.

When many had reached the conclusion that no further advances in either size or form were to be expected and that the efforts of future breeders

would be directed toward securing new colors and more flowers per stem, Nature demonstrated that she had other surprises in store.

In 1901 the Countess Spencer variety was exhibited and caused quite a sensation. The National Sweet Pea Society awarded it the highest honors. This variety was distinct from all preceding introductions because the standard and wings waved. The flowers were very large and borne in fours on stout stems. It was introduced in 1904.

The parentage of this variety has been given as (Lovely x Triumph 1898) x Prima Donna 1899. However, there appeared in 1905 a variety named Gladys Unwin which was the same color, but smaller and less waved than Countess Spencer, which was a selection from Prima Donna without known crossing being effected. These varieties, however, were forerunners of the new type which revolutionized sweet pea culture in England and has revived and quickened the interest in America.

Pollination.

We have previously noted that the pistil and stamens are enclosed in the keel formed by the partial coalescing of the two lower petals. A very slight pressure upon the base of the keel will cause the pistil to suddenly appear in the tip of the keel. The stigmatic surface is usually covered with pollen, and at the same time the stamens appear to view. If the pressure is released these organs disappear as suddenly from view.

Those who are looking for flower adaptations for the promotion of cross-fertilization would say at once that here we have a mechanism which is operated by the weight of a bee alighting on the keel, and the pistil and stamens rise up striking it upon the body, receiving and giving pollen. Thus as the insect visits flower after flower, natural cross-fertilization is carried on.

This, however, is not the case. In the first place, if we examine flowers in the bud stage, we find the pollen ripe. The position and condition of the stigma changes, for before the maturation of the pollen, the stigma is below the anthers. A day or two later the stigma has risen to a position among the anthers and is viscid enough to hold the pollen grains.

In another day or two it has grown beyond the anthers. Self-fertilization has taken place and the development of the legume begun. This process has taken place before the flower is fully open. Sometime later the pistil is pushed out of the protecting keel by the developing pod.

Such is the normal fertilization of sweet peas, as observed upon examination of the flowers. Attention has been called to the fact that the sweet pea stood practically for one hundred and fifty years, and the question asked how it can be reconciled with natural cross-fertilization.

During the writer's experience in the field last season for three months studying varieties and recording observations, not a single instance occurred of a bee alighting upon the keel of the flower, nor were any observed crawling between the wings. All the bees observed visiting the flowers, alighted on the outside of the wings,

and in practically every case, thrust the proboscis down between the right wing and the standard. In this connection it may be mentioned that the bees did not show a preference for any particular color, but flew from row to row and color-section to color-section.

Mr. T. H. Dipnall has observed that bees attack sweet pea flowers. The bee (a yellow and white banded species) alighted on the calyx, crawled around to a certain position, and cut a hole through the calyx so that it could thrust its proboscis through and suck the nectar at the base of the pod. The reason is not clear why the insect prefers one side of the flower since the structure is similar on each side.

It is to be remembered in this discussion that sweet peas grown under glass in winter are not visited by bees, but every flower in sunny weather will set seed if the blooms are not kept cut.

Since the introduction of the waved type there has been much discussion about the difficulty in fixing varieties and the reasons for it. Some growers, having secured what was to all indications a fixed stock, discovered after sending it out, that it was not fixed. Some growers thought it only occurred when the novelty was sent to California to work up a large stock of seed, or after it had passed into the hands of the California growers. One of the theories advanced to explain this was that some insect in California was responsible for some cross-pollination of flowers. In our own trials this past season no differences were observed between English or American grown stock since we had seeds of novelties direct from the originators and our varieties were from the introducers. Others say that bees visit the flowers and they believe that crossing takes place in the waved type which it is maintained does not produce normal flowers in that the pistil sometimes projects beyond the keel.

It appears that if this view is correct the poor seeding of the waved type would not occur or at least that the worse the fault of the flowers the greater the crop of seed. Thus the varieties which seeded freely would become cheap and drive out the others. The writer thinks that the results obtained by the seed growers contradict the theory. It appears that the poor setting of seed may be due to the fact that the pistil may grow out beyond the anthers before the latter are mature and thus fertilization be prevented by irregular development of the parts. Otherwise the pollen may be impotent in some varieties, but this does not occur so far as the writer has studied the reports of the sweet pea breeders. The writer did not observe any pistils showing the defect mentioned, but as our season was very dry our plants did not make an exceptional growth which would be likely to express itself in abnormal flowers. However, it was observed that some varieties seeded more freely than others. We have planted most of the varieties this year from seeds saved in 1910, and knowing those which were fixed last year as well as those with rogues of certain colors we think that some light may come upon this matter of cross-fertilization, if any, in the sweet pea.

THE NEW CHRYSANTHEMUMS FOR 1911.

Read Before the Morris County Gardeners' and Florists' Society by C. H. Totty.

Just as regular as the year rolls around, so does the chrysanthemum enthusiast, at flowering time propound the question, "What have you that is new in 'mums?"

There seems to be a perpetual craving among the chrysanthemum growers, more than any other flower growers, for something different. Since I have been giving you what we may here term as the "Yearly Digest" of new varieties, which now extends over a period of nine or ten years, we have seen many wonderful changes in the chrysanthemum. The marvellous flowers of Mrs. David Syme, exhibited at our own show last fall demonstrates perhaps a greater advance than any other variety, although in any color the peer of five years ago is of very average quality today. Chrysanthemums, it is true, run out more quickly than roses or carnations and many new varieties must be continually raised to keep the standard moving upward and onward, but, even if they did not run out, the variety that we thought was a king five years ago, would be easily outdistanced in the shows of 1911 by this year's seedlings.

The chrysanthemum today is systematically hybridized and a careful and scientific record is kept of the peculiarities and good points of each variety. Where variety has perhaps a splendid color and is deficient in foliage the hybridizer will use that type just to get the color fit on a sturdy stem or he will proceed to work on a variety that is perfect in form but small, to get that same form in a flower two or three times as large. The old days of saving seed indiscriminately from pollination by the wind or bees, are past and while one cannot yet definitely forecast exactly what will result from different crossings, a percentage of the seedlings will come near the desired result.

I will briefly describe a few of the novelties for 1911. What the varieties that I recommended so highly last year have done, is now a matter of history, Mrs. D. Syme, Howard Gould, Lemon and Onunda being among the most prominent flowers in the exhibition just past. It is very encouraging to see one's varieties maintain their winning way year after year, but, as before stated the result is due to scientific selection of the seedlings and we may reasonably expect that still further advances will be made in the future.

Looking first at the variety Wm. Turner; this showed up splendidly with us, though stock was too limited to be exhibited at many of the shows. Mr. Wells stated, when writing regarding its winning the Gold Medal at Edinburg, that it would easily beat Mrs. Syme. Those of us who remembered the way Mrs. Syme was exhibited at Morristown in November, might perhaps be pardoned for a little scepticism, did we not know that in almost every case, varieties sent out by Mr. Pockett as improvements on this or that, have invariably fulfilled the prediction of their raiser. Wm. Turner is an excellent grower, just as strong as Mrs. Syme and it will be interesting

to note how long it takes the former variety to climb to the top of the heap.

The variety that I like best of all the novelties is Mrs. G. C. Kelly. This is certainly a splendid grower and seems to combine every good feature the chrysanthemum should have, and so far as I could see from my limited stock, has no faults whatever. I had seven plants and each one produced a perfect flower. The color is old rose with a reverse light enough to give a general effect of silvery pink. I have predicted that this variety will be a leader in the shows next fall. Time will prove whether I am right or not.

E. M. Byrnes, which many of you saw growing at my place is not going to set the world on fire for size. It is only medium, but the color is wonderfully brilliant. We have today many splendid scarlets raised from the same stock, Pockett's Crimson, Pockett's Surprise and Leslie Morrison being perhaps the most largely grown. Byrnes, on account of its wonderful color, is entitled to be grown alongside of these kinds and I think it possesses wonderful possibilities for the hybridizer.

Harry E. Converse may be described as an improved Howard Gould, giving somewhat the same color with a larger flower and heavier growth. My only objection to Converse is that it is so slow in reproducing that I am afraid most of the exhibitors this year will have to go without it, as stock is altogether too limited for general distribution. Lady Carmichael is a white which was heavily recommended by its behavior in Australia. Past performances have taught us that varieties that do well in Australia and stand the sun and weather will also do well here, as our climatic conditions are much the same. When we get temperatures running up into the seventies, and brilliant sunshine, unless a variety has lots of petals in it, it will become hollow-eyed and is then only half its proper size. Carmichael should next year make an excellent showing as it is a splendid grower and carries itself like a major. I think when this variety gets into general cultivation it will be considerably grown by the commercial men to whom stiffness of stem is one of the chief essentials of profitable cultivation. These varieties are the cream of the Australian seedlings imported for testing in this country and represent the final assortment of a great many thousand seedlings and it is in a large measure due to this unsparing pruning down that the Wells-Pockett varieties occupy the enviable position that they do at the present time.

Of the American-raised seedlings, F. E. Nash is the only one I have seen personally and I am consequently not in a position to say much regarding others. Nash is a Duckham seedling, having much the same color and splendid habit of growth but it has reflexed petals, whereas the Duckham petals are incurved. There are other American seedlings—Tarrytown, Morristown, Lenox, Glen Cove, etc.—but I have not seen any of them and therefore am not in a position to give you any information about them.

The novelties in types other than the tremendous exhibition flowers also show marked improvement. The newest singles, for instance are very dif-

ferent to the types we were working with five years ago. Some of the best of this year's set are Miss Hilda Wells, a beautiful red with a yellow zone at the base of the petals; Crimson Mary Richardson, which is a sport of the most popular single ever sent out—Mary Richardson, and is worth growing by everyone; and two very handsome yellows are Margaret Totty and Emma L. Davis.

And while speaking of singles I may here mention that during the past two or three years I have been experimenting and working up a group of what I may term, Early-Flowering Outside Singles, which I have gotten down to such a fine point that I can guarantee them to be in full bloom the last week in August and the first week in September. These, no doubt, will fill a long-felt want and will give a much different appearance to the estates and gardens where the superintendent is an enterprising man and wishes flowers along the drive or in clumps on the place. It not only adds to the beauty of the same but they will give an over-abundance of flowers to use, whereas if it weren't for these, as has been the place appears barren. Now if he wants to find something to cut he has it. These single chrysanthemums are certainly very effective no matter how they are used.

Pompons are not grown as much as I think they should be. Any gardener who has to produce great quantities of flowers from a limited space will find it hard to grow anything that will give as good return for the time and space involved as these chrysanthemums. They can be grown outdoors all summer and lifted in the fall and potted or stuck into a deep frame and they will give an abundance of flowers until quite late in November. Some newer varieties that are not as yet generally distributed are: Barney, Golden Bronze, Myer's Perfection, a very handsome white, Sylvia, Urith, Windlass and Yellow Gem.

The type known as Early Flowering varieties, which many of you with an old-country training will recall as flowering so profusely outdoors during the months of August and September, will also give you varieties well worthy of your time and attention. We have been importing these sorts for the last three years trying to get a selection that would come early enough to give good satisfaction before the frosts. As you are probably aware the intensely hot sun in July and August causes most of the early buds of these varieties to dry up. This is, of course, explained by the fact that the chrysanthemum is a cool-growing plant. I would suggest, wherever possible, to plant them on a border facing north, where the rays of the very hot sun do not rest on them for many hours during the day; also, where a man is not handling very many, a continuous use of the sprayer will help much to develop and expand the buds, thereby diminishing the loss of the same.

We now have some fifteen or eighteen varieties that will begin to flower the third week in August. They need no greenhouse and one need not worry about bud selection; simply give good soil and persistent cultivation. Plants set out in the spring and left to develop naturally produce handsome bushes literally covered with flowers. I would state that as a commercial

PANSY—Boddington's "CHALLENGE"—All Colors

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-seeds, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion the finest that money can buy—the finest your money can buy. A lady writes me and says: "Why don't you call it 'Challenge'?"

Giant White. Violet spot, the largest white.....	.10	.50	1.50

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

proposition these varieties produce more money per plant than any of the best large-flowered kinds.

A few of the most distinct and best growers are as follows: Ethel Blades, Horace Martin, Carrie, Marie Masse, Crimson Masse, Roi de Blancs, Tottie and Lillia. These types like the Pompons, are hardy enough in our section, with a little protection of dry leaves or litter. The better way to handle them, though, is to lift a few roots and carry them through the winter either in a greenhouse or cold frame, then propagate young plants every spring. One reason many people do not have the success they should have with Pompons, is because they imagine that once a

plant is set out it is good indefinitely. This is only half true. The plant will live, but experience teaches any grower that the best way to handle these varieties is to plant out young stock every spring in new soil and they will make better plants and give far more flowers than by being allowed to remain year after year in the same position. I may also state that I am trying to bring before the public once more, the incurved varieties. They seemed to have dropped into oblivion the past six or eight years. Previous to that I have seen special classes arranged at the shows and every gardener took as much interest in his incurved varieties as he did in his large-flowering ones, and with this idea in

mind I have listed this year several good and tried varieties including Chas. Blick, Chas. Pacque, Frank Triston, G. W. Matthews and Mathew Russel, also several others. There are many other varieties of Anemones, large Anemone Pompons and new Japanese Anemone Pompons that I am at present experimenting with to find out their true worth.

In conclusion, there is nothing but a cheerful prospect in view for the chrysanthemum. The number of plants sold each year by the different houses catering to this specialty is something wonderful and so long as we can keep introducing new and meritorious varieties, so long will interest be maintained and everyone benefited.

CONVENTION NEWS

Will be a leading feature in each issue of Horticulture all through August. Thousands of interested gardeners and florists will read it. If you have anything seasonable to offer **ADVERTISE IT NOW** and catch the cream of the trade.

BOBBINK & ATKINS

WORLD'S CHOICEST FLORIST AND NURSERY PRODUCTS.

We are growing in our greenhouses and in our 250 acre nursery a large variety of material constantly in demand by florists. Our Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

Seed Trade

Cable reports from England would indicate that sweet pea seed crops there will only be about one-third of an average.

Michigan has been favored with rain, which happy occurrence ought to make the pea and bean growers dance and clap their hands with joy.

San Jose, Cal.—Chas. Schlessinger of San Francisco has purchased the 650-acre seed farm of the Braslan Seed Growers' Co. on Downer avenue.

W. Atlee Burpee, who has been attending the sweet pea show in England will visit the cultures of Hjalmar Hartmann & Co., Copenhagen, with his son, by the end of July.

Phoenix, Ariz.—A new firm, the Arizona Seed Co., has located at 137 No. Central avenue. Wm. S. Humbert, proprietor of the John Orme ranch, is president and Marshall Humphrey is manager.

W. Atlee Burpee reports from London, England, that the exhibition of the National Sweet Pea Society was a great success. A remarkable feature of same was the evident passing of the grandiflora type into oblivion—as not more than twelve or fifteen of these were shown. Everything Spencer.

Hugh Dickson comes out strongly against the practice which seems to have crept into the British trade of having several names for the same thing in sweet peas. This no doubt is accidental in some cases; and may be genuine duplicate sports in others; but at any event the result is confusion—and the list ought to be reduced.

There is lots of talk about the Copenhagen market cabbage of late. One authority claims it is the earliest flat head in existence. It also has superior quality; trims up well, and gives very little waste. R. L. Watts of State College, Pa., is an enthusiast, and we shall have a report from him on the subject later.

Green Bay, Wis.—An addition, 60 x 100 feet, three stories and basement, is to be built by the Everett B. Clark Seed Co. The building is to be of brick and will have another seed cleaner as well as an Otis elevator installed in it. It will provide additional storage room as well as additional equipment to accommodate 95 more hand pickers. At Milford, Conn., they are putting up a brick warehouse, 38 x 62 feet, three stories and basement.

Salina, Kan.—The shortage of crops in the West has caused such a drain on the cane, kaffir corn and millet seed markets in Salina as to empty them completely. As a result, it is said, it is simply impossible to buy the seed here now. Cane, millet and kaffir corn are the late crops and the farmers of western Kansas, spurred to hope by the rains that came too late to save their wheat, are planting large acreages of the feed crops. Shipment after shipment of the seed has gone West on the Union Pacific and Missouri Pacific main lines, and up the Plainville branch. Whether this shortage will work a hardship or not is not known. A number of people in this vicinity have contemplated plowing up patches of potatoes because of the failure of the crop and putting it in cane or millet, and it may be that they can not obtain the seed.—*Topeka Journal*.

CATALOGUES RECEIVED.

Robert Nicholson, Dallas, Tex.—Wholesale Quotations on Field Seeds.

Bertrand H. Farr, Reading, Pa.—Quality Bulbs and Plant Specialties. This is a vest pocket list, artistic cover design and excellent make-up throughout.

Advance Company, Richmond, Ind.—Illustrated descriptive list of the Advance Ventilating Apparatus and Greenhouse Fittings. A useful "Dimension Card" for top ventilation estimates is enclosed.

Hosea Waterer, Philadelphia, Pa.—1911 Bulb Catalogue. Printed on heavy coated paper and bound in dark grey covers, gold lettered, this catalogue will make a most excellent impression. It is quite comprehensive and illustrations show up well.

M. Herb, Naples, Italy.—General Catalogue of Bulbs and of Seeds for Autumn Sowing. This catalogue of sterling goods is printed, as heretofore, in English, French and German. A number of interesting seed novelties are illustrated.

Peter Henderson & Co., New York, N. Y.—1911 Midsummer Catalogue. Fresh and inspiring as ever. "New Fall Fruiting Strawberry Americus" in natural colors, makes a pretty and appropriate illustration for the front cover page. The back cover page shows half a dozen of the best strawberries for succession fruiting.

J. M. Thorburn & Co., New York City.—Wholesale Trade Price List of High-class Bulbs for Forcing and Outdoor Planting. Everybody knows Thorburn's and this reminder that they have issued a wholesale bulb list

is almost superfluous. All the good sorts are listed, of course, and the prices are "bedrock." A list of pansies and other reasonable seeds is appended.

R. M. Ward & Co., New York.—"Bulb Talks." This little art pamphlet is not exactly a catalogue, although it quotes price on the militant "Horseshoe Brand" bulbs and roots and other products. It is a compendium of philosophy and unanswerable logic which we think Benjamin Franklin would have been proud to father. A streak of humor runs through it all and when you start to read it you'll stay till the finish if you're a thoroughbred. Send to 12 West Broadway, New York for a copy.

Stark Bros'. Nurseries and Orchards Company, Louisiana, Mo.—"The Stark Year Book." This is without doubt the most elaborate publication in its class in this country. There are thirty-one superb full-page fruit and flower pictures in natural colors on heavy coated paper, and the typographical work, throughout, is very fine. While this is a complete descriptive catalogue, yet it is unique in that prices are not quoted on anything. It presents in condensed form much that is valuable for the guidance of the grower of fruit or ornamental stock.

Giant Exhibition PANSY

The "Distinctive"
Florist Pansy

Gigantic in size, robust in texture, beautiful in form and gorgeous in coloring, are only a few of the descriptions we can give in this limited space.

Spring City, Pa.
The Giant Exhibition Pansies, seed of which I purchased of you last Fall, are now in bloom. I wish you could see them. The flowers are of the largest size and finest colors. I have grown Pansies for the last twenty years and thought I had the best, but I must say yours take the cake; they must be seen to be appreciated.

Seattle, Wash.—Edward Thomas,
florist, 1813½ Seventh avenue, was
held up and robbed by a pair of high-
waymen the night of July 11. They
stepped from the shadow of a porch
and at the point of revolvers searched
his pockets. When released he im-
mediately notified the police but the
bandits could not be found.

Boston, Mass.—The Rosary, 214
Clarendon street, J. J. Casey, prop-
rietor, will move on September first to
549 Boylston street. The new store
faces Copley Square near the Library,
Trinity Church and several large fash-
ionable hotels and should prove an
exceptionably favorable location. A
new front to cost \$1,000 is being con-
structed and this, with interior altera-
tions and improvements, will make it
one of the finest stores in this section
of the city.

Amoy, China—The Pacific Mail
Steamer on July 15 took as part of her
cargo 230 tons of narcissus bulbs for
the American market. This is the
first shipment of its kind from this
port, it is said.

IN MID-SUMMER

Yes, it is now mid-summer. For a few weeks to come you will have to be wide-awake to catch the little chunks of business that occasionally materialize in this low-tide period.

LET US HELP YOU

Whether mid-summer or any other season we are always "on our job" and can give you more and better goods than you can get for your money anywhere else. Our H. Bayersdorfer's novelty purchases in Europe this summer are beginning to arrive. "Are you on?" Write us a line and we'll send you a list. At same time try a few of our Preserved Natural Ferns, Magnolia and Cycas Leaves, etc. They never wilt. Once tried always wanted.

H. BAYERSDORFER & CO., 1129 ARCH STREET, PHILADELPHIA, PA.

A DETROIT BANQUET DECORATION.

The accompanying illustration shows a most unusual treatment of a large banquet table which will no doubt interest those of our readers who are called upon from time to time for work of this character. In reply to our inquiry as to details of the design and its execution, Albert Pocheion, of the L. Bemis Floral Co., who carried out the work, responded as follows:

The table for this banquet was set for 112 plates in an oval shape through the convention hall of our largest hotel. The question came up how to decorate the inside space of same, which was 24x65, or 1562 square feet. I suggested to lay out a miniature park sloping in the inside table edge 2 ft. 8 in. down to the level of the floor, using an electric fountain with 109 sprays of water. This fountain was set in an oval pond 6x10 ft. and 8 in. high filled with all kinds of white and colored water lilies and plants. Around this pond was a saucer shaped cut mobile race track with six small automobiles running around at two different speeds, it being so figured out that every eight minutes these six cars would pair off and run around in three pairs then would pull away from each other again. The fountain was illuminated with six bullseye electric lamps thoroughly insulated to prevent short circuit or blowing out fuses. The rest was laid out in a park with all roads leading either to an entrance

(archway) from the table or to the race track. Throughout the park were regular street lamps with electric lights in same.

The lawn was made of prepared green sheet moss, the flower beds were round, oval, diamond and square wire frames filled with moss and flowers. The shrubbery beds were in irregular shapes. The walks were sand, gravel and shells, the rocks corkbark. The whole park was enclosed with miniature boxwood hedge with arches and pyramid boxtrees for entrances. The rest of the hall was appropriately decorated.

While the photograph is very good still it does not give enough credit to the detail work of this job. All mechanical work as well as electrical work was operated from one switchboard near the speaker's place and at his will was turned off and on.

Obituary.

David Kalisher.

David Kalisher, representative for Lion & Co., ribbon specialists of New York, died suddenly on July 11. He was well known through the central west. A widow survives him.

Philip Koch.

Philip Koch, for many years associated with his father in the flower business on Liberty avenue, Pittsburg, Pa., died at his home, 146 Carver street, recently. He was thirty-eight years of age.

Flower Market Reports.

BOSTON A few cool nights this week have had the effect of shortening up the supply, but not much influence yet in improving the quality of stock coming in. Roses are from young plants mostly and the buds and stems are of the pee-wee order. Beauty roses are in fair demand and normal supply. Carnations are very poor—hardly worth making mention of them. Asters are on the increase. The quality is not bad considering the conditions, and the blooms, although small, show that they are mostly of the better types and not the little runts that in years past composed most of the early shipments. Lily of the valley is in light demand but some of it is superb in all respects and well worthy of the top price. Lilies of good quality are in fair supply and excellent demand. Gardenias are again in sight and will be obtainable regularly throughout the balance of the season.

There is practically no change in the market conditions from previous weeks, stock a little on the scarce side, and at times certain material hard to get. Asters and gladioli are just coming on, but no large quantities have had as yet. The demand has been good on roses though Beauties have not moved as fast as wished for. Killarney and other roses have been fairly good, and sold very satisfactorily. There are fine lilies in the market, also lily of the valley, but the latter are not overplentiful. Corn flowers and a few other garden flowers, are about the only thing received, and have sold very well.

Conditions have not changed in the Chicago cut flower market during the past week except possibly in degree. The scarcity of good stock at this season is not unusual but it is more scarce than in other years. The temperature has taken a decided drop, and for the past two weeks stock along all lines has been greatly invigorated but no increase in quantity. This is especially noticeable in roses and some very fair summer stock is now on the counters. The general tendency is to dispose of all stock each day; only a small amount, if any, is left over. Shipping trade is very lively showing the scarcity of flowers to be general. Asters are coming in this week much more freely, and many of them are good for the first of the season. Stems are now reaching from eighteen to twenty inches. Prospects are for a good gladiolus season. The market has this flower in all sizes and colors. Beauties are gaining each week. Lilies of several kinds; lily of the valley, gypsophila and a few sweet peas all tend to help out the summer supply.

Summer flowers seem to be taking their own sweet time about coming into the market this season. Where other summers at this time the supply of asters and gladioli was easily adequate or more than adequate, this year they are just beginning to arrive in any quantity at all. On Tuesday of this week the first large shipments of asters came in. The prices on all stock is holding up in a way that must be most gratifying to the growers. Roses are now too plentiful and clean

ASTERS

For the early varieties, good sized flowers with long stems, splendid quality; pinks, purples and whites. Orders of any size can be taken care of on short notice, our growers cutting in large quantities, which reach us daily about 8 a. m.

\$1.00 to \$2.00 per hundred
Extra choice \$3.00 per hundred

NOTE:

This has been a trying season for Asters. Our growers have been particularly fortunate, and our qualities are therefor, above the average. The best values going! We take no credit for this. It is Fate.

up very readily. Longiflorum lilies, auratum and rubrum sell well and are always offered in more or less quantity. Considerable feverfew and hardy hydrangeas are also being utilized. As a whole the market is far short of the amount of cut flowers it might use at the time of the present writing. The green goods market is ample.

Conditions here are absolutely unchanged. The rain which appeared a week ago was of too short a duration to be of any account, still we had a nice cool week which was somewhat refreshing to out-of-door crops. The present high wind is annulling the benefits of several heavy showers. Sev-

Flower Market Reports

(Continued from page 115)

eral interviews with wholesale growers confirm the writer's previous prophesy that next winter will see a greater scarcity in carnations than last winter. The plants being housed now are, as a rule, much smaller in the crown than a year ago and we all know what this means. Those who had a perfect watering system in their fields lost most of its good through the extreme heat.

Business shows little

NEW YORK change from last week—a decrease, if

anything. On the other hand the supply of roses is probably at its minimum. Carnations are out of the running, but aster shipments are steadily increasing. The quality of these is ordinary, for the most part, though some good flowers are seen. Queen of the Market is the prevailing variety. Lilies are more plentiful, a better supply being in prospect. Gladioli are not showing up well; there are more poor flowers than good ones. The lily of the valley situation is easier as there seems to be a halt in the demand. Quotations on orchids remain unchanged. There is little call for smilax or asparagus.

Considering that this is the good old summer time

last week's business was fully equal to, if not above, the average of former years, and the prices realized for the stock received were in the main as good as could have been expected, if not better. Asters and gladioli are now leading features in the market. Both items meet with a ready sale. Our opinion is that asters as a rule do not compare favorably with last year, as yet, the dry weather early in the season having given the extra-earlies a great set back. There is, however, one of our markets a conspicuous exception to this, for some reason. There they are very good, but no particulars are forthcoming to account for the phenomenon. Climatic condition; irrigation; or something—perhaps. But in a week or so we shall have the finer mid-season varieties, and then the outlook will be for "some class" in the aster market. Gladioli are fine and selling well. There is not much to be said for the rose market. Beauties sold up pretty well and they may be said to be about the only variety that makes anything like a show for the money. Marylands are the best sellers among the pinks. Brides have come back very nicely and are now something worth looking at. Carnations are on

" " & Sprea. (100 bchs).....	10.00	to 20.00	10.00	to 15.00

their last legs. Orchids and lily of the valley both good. Enough for the demand. Tiger lilies, also speciosum rubrum and album are welcome new arrivals. Longiflorums are in excellent demand and prices have jumped quite a little. Too many plumosus, adiantum and other greens around—as is usual at this time of year.

ST. LOUIS

thing but good all of last week. Stock that is coming in now is not good but still the wholesalers are asking good prices. The best sellers are gladioli and it looks as though the market will be crowded with all varieties before the end of the week. Carnations are very few and poor. Everything else is plentiful except smilax, for which there was an extra good demand all of last week. The weather is still warm and the dry spell is playing havoc with all plants in the fields.

WASHINGTON

Business is decidedly dull. The slackness of trade is being utilized to redress show windows and do other things which are neglected during the busy season. At Gude's floral store a very attractive rockwork fountain has been constructed in the center of the store, with an arrangement which permits of throwing on colored lights from beneath the fountain. This electric fountain will be a feature of the establishment for some months at least. Stock is scarce and prices but indifferent. All outdoor stuff has suffered from the hot, dry weather, and although there have been showers recently, it is doubted whether they have come in time to do much good.

PUBLICATIONS RECEIVED.

Maryland State Horticultural Society. Report of Summer Meeting held in Berlin, Md., July 29, 1910, and Thirtieth Annual Meeting held in Fifth Regiment Armory, Baltimore, December 1-2, 1910. This report starts off

with a portrait of R. Vincent, Jr., president for 1910, and there are several full page illustrations of exhibits, etc. Secretary T. B. Symons has given us a very instructive and readable volume and from it we are convinced that the Maryland State Society is doing a good and practical work.

City of Boston; Department of Parks. 36th Annual Report of the Board of Commissioners for the year ending January 31, 1911. The contents of this volume are, as usual, interesting. The general report of the Commissioners to the Mayor of Boston is the first chapter and then follows the report of Superintendent Pettigrew to the Commissioners. Details of location, area and equipment of parks and playgrounds, expenditures, income, betterments, statistics, etc., are given and then comes the report of Olmsted Brothers, a comprehensive document occupying 54 out of the 95 pages comprised in the volume, recounting the deductions from an inspection of the Boston parks and submitting comments and suggestions on matters of design connected therewith.

Superintendent Pettigrew's report is mainly statistical but it describes with characteristic enthusiasm the establishment of a herbaceous or "Grandmother's" garden in Franklin Park last year and a picture of this feature is inserted. Three elaborate plans of the proposed zoological gardens are bound in the book.

National Chrysanthemum Society (England), schedule of prizes, list of members, etc., for 1911, including also the annual report and financial statement for 1910.

This Society has published an interesting book on the Culture and Exhibition of Large Chrysanthemum Blooms, report of the proceedings at a conference held on December 5, 1910, etc. A portrait of Sir Albert Kaye Rolit, President of the Society, appears as a frontispiece.

Advertise Your Stock In Horticulture

If you could figure
up how much busi-
ness you do not get
because someone
had forgotten your
address or 'phone
number, or because
someone did not
know you had what
they wanted you
would be surprised
at the amount you
had lost.

GREENHOUSES BUILDING OR CONTEMPLATED.

Spirit Lake, Ia.—J. M. Klein, addition.

Chicago, Ill.—John Schoepfle, house 24 x 60.

Warsaw, Ind.—Willard W. Dederick, addition.

Malden, Mass.—Burgess & Cooney, addition.

Lewiston, Mont.—Luther Wardeu, two houses.

Stockbridge, Mass.—C. S. Mellen, conservatory.

Syracuse, N. Y.—Charles Bourne, house 30 x 150.

Newtown, Pa.—Henry F. Banks, range of houses.

Grand Island, Neb.—E. Williams, rebuilding two houses.

Fulton, Ill.—John Aggen, two vegetable houses, each 21x100.

West Hartford, Conn.—W. W. Thomas, sweet pea house, 34 x 160.

Norwood, Pa.—The Robert Craig Co., four houses each 44 x 150.

Princeton, Ill.—W. E. Trimble Greenhouse Co., two houses and store.

Spartanburg, S. C.—The Oakhurst Greenhouses, two houses each 25 x 100.

San Francisco, Cal.—The California Evergreen Co., two fern houses each 30 x 130.

Minneapolis, Minn.—Hans Rosacker, violet house. The Central Floral Co., house 60 x 150.

Tuxedo Park, N. Y.—Mrs. C. M. Bell, range of houses. Mrs. Cooper Hewitt, addition.

Burlington, Vt.—Ground has been broken for a range of greenhouses at the University to be erected in the rear of Morrill Hall. The range will consist of a two-story head house 25 x 60 feet and three even span greenhouses 20 x 60 feet. Material has been supplied by the John C. Moninger Co. The houses will be heated by low pressure steam and it is expected to have them ready by the opening of the college term.

UNIVERSITY OF WISCONSIN, SHORT COURSE.

The University of Missouri announces the appointment of Mr. A. J. Meyer of Howell, Michigan, as superintendent of the short winter courses in agriculture. Mr. Meyer was formerly a student of the University of Wisconsin, and assisted in the instruction of short course students at that institution. In 1910 and 1911 he was instructor in the short winter courses at Missouri. The appointment of Mr. Meyer indicates that the University will increase its facilities for instruction in this popular course, and will make every effort to provide for the increasing numbers already assured for the coming year.

The facilities of the Missouri College of Agriculture have been taxed to the utmost by the large enrollment of students during the past two years. The two year short course, which begins November 1 each year, and continues until March 1, has attracted larger and larger numbers of students, until during the past year the enrollment reached more than three hundred.

The college has come to be regarded

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

SITUATIONS WANTED

Scientific Farming, Fruit Growing, and other cultures. Gentlemen who own Farming Estates not on a paying basis should consult with the advertiser—satisfying acreage, etc.—who would undertake management on a commission basis, and make a big paying enterprise. Production estimates and values on one year's crops, and expenditures given for inspection. Apply Z. Z., care HORTICULTURE, 11 Hamilton Place, Boston.

A thoroughly practical Nursery and Seedsman, and Fruit Specialist, would like an engagement either as a managing grower or as a salesman. Is also a specialist on grass seeds for golf links, lawns, or permanent agricultural pastures for hay or grazing purposes. Apply, J. J., care HORTICULTURE, 11 Hamilton Place, Boston.

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick, A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—One Furman Heater, seven sections, serial 3957, size 308, good condition. One Furman Heater, six sections, serial 5401, size 307. Needs one new section. Strout's, Biddeford, Me.

BUSINESS CHANCES

PARTNER WANTED—An old established seed and implement house wants a live, hustling, young man to buy part interest and help in the active management of the rapidly growing business. The concern stands well in the trade and with proper help and management, can be made one of the largest in the country. All correspondence, confidential. Address Conservative, care HORTICULTURE.

with favor by the farming and other business interests of the state, and young men who, eight or ten years ago, would have taken up the study of law, medicine or engineering are now enrolling for work in agriculture.

On some of its out-lying farms, the experiment station has succeeded in increasing the yield of clover from one-half to two tons per acre by proper soil management, and in Southwest Missouri it has been shown that corn may be increased twenty bushels per acre and wheat twelve. The horticultural department has discovered methods of pruning peach trees so as to produce two additional crops in eight years.

PRATT'S "SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance." **B. B. PRATT CO., 50 CHURCH ST., NEW YORK CITY.**

NEWS NOTES.

Greenville, S. C.—The Holland greenhouse have been purchased by Emile Bovey.

Atlantic, Iowa—The Atlantic Greenhouse Co. has moved to Ninth and Linn streets.

Rhinebeck, N. Y.—C. A. Kilmer has purchased the greenhouse and property of Walter Ripley.

Waxahachie, Tex.—The capital stock of the Southwestern Nursery Co. has been reduced from \$8,000 to \$4,000.

Crescent City, Fla.—Charles Schubert has purchased property here and will grow roses for the home market and to ship to his partner in Tennessee.

Elkhart, Ind.—A severe hail storm on July 11 did much damage to greenhouses and stock in this vicinity. Wm. Currier lost 1000 lights; Fred P. Liven-good is said to have lost 90 per cent of his glass; Hugh Hills, 500 lights; Frank J. Beavan, about 300 lights; W. H. Troyer, about 500 lights. The B. E. Sassman greenhouse lost considerable glass. The rain that came with the hail did enormous good.

PATENTS GRANTED.

997,943. Cultivator and Sectional Cultivator-Teeth. Samuel L. Allen, Moorestown, N. J.
998,322. Flower Holder. William H. Bone, Columbus, Ohio.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale and all soft bodied insects. An excellent cleanser for decorative stock.

Used as a spray you can rely upon it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material.

Prof. W. F. Massey, associate editor of the Market Growers Journal, replying to an inquirer for a remedy for black spot on roses, writes (July 1st, 1911):—"The Fungine advertised by the Aphine Company is worth trying on this disease. It is promising here as a fungicide."

\$2.00 per gallon, 75c. per quart.

Michigan "The Automobile State"

Buys The L and B Iron Frame Greenhouses

It is said that of the 200,000 new automobiles sold in the United States last year fully one third of them were made in Detroit, Michigan. No wonder it is called the automobile state.

Here is one recently erected for Henry Ford, the great automobile manufacturer. A splendid big square palm house and a two compartment, curvilinear wing. It's one of those houses of ours that is more than half iron. Aside from the glazing members the frame is made completely of iron. Built to last, and it will. Built to grow the best that's possible—and it does. Built to be an attractive feature of the grounds—and it most decidedly is. If you want a thoroughly up-to-date house built by absolutely reliable people, then send for our catalog. It's a most convincing bit of conviction. When sending, kindly include your employer's name and address and we will see that he gets one too.

HYDRANGEAS

FOR SUMMER FLOWERING

We have an unusually fine lot of Hydrangeas, which have been held dormant all winter. These plants are now in bud and bloom, and will flower in fine shape during July and August. We have a fine lot of blue hydrangeas, as well as pink. Plants are in splendid shape for immediate use, and will flower during July and August—at a time of the year when they are in the greatest demand.

We can furnish these plants in ordinary butter tubs at \$2.00 and \$3.00 each.

Plants in new cedar tubs, painted green, with handles, as follows: Well budded plants in 14-inch tubs, \$3.00 each; 16-inch tubs, \$4.00 and \$5.00 each.

FERNS

We have an exceptionally fine lot of Boston Ferns of the Harrisii type; also a splendid lot of Pierson Ferns. Good, bushy, well-grown plants in 8-inch pots, that will please the most critical buyer, \$1.00 each.

LILIUM HARRISII

THE BERMUDA EASTER LILY

We offer a selected and carefully grown stock of the original pure Harrisii. There are only one or two lots of bulbs on the island as good as the stock that we offer. We take pleasure in offering this stock, because it will be found to be very superior to the average stock that is generally offered. This is one of the healthiest and cleanest lots, and will give much better satisfaction than the stock usually obtainable. Our customers who had Harrisii from us last year stated it was the best they had received in years.

We have only a limited stock, which we are offering, and when stock is exhausted, we shall have no more to offer this season.

Fine selected bulbs, 6-7 inch, 350 to the case, \$16.00 per case, or full thousand lots at \$45.00 per 1,000; 7-9 inch, 200 to the case, \$17.00 per case, or full thousand lots at \$80.00 per 1,000; 9-11 inch, 100 to the case, \$18.00 per case, or full thousand lots at \$175.00 per 1,000.

DAHLIAS Every Day in the Year

Farquhar's RARE LILIES FROM CHINA

Hardy, Beautiful, Fragrant. The Finest Novelties Extant

Lilium myriophyllum

AWARDED SILVER MEDAL BY MASSACHUSETTS HORTICULTURAL SOCIETY, JULY 15, 1911.

LILIUM MYRIOPHYLLUM

Mr. E. H. Wilson, the famous plant collector, collected for us the bulbs now offered, in North-western China. He considers this the finest of all lilies. It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink and with a beautiful shade of canary yellow at the centre, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the jasmine, and lacking the heavy oppressive odor of most lilies. Blooms out-of-doors early in July.

Orders looked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

LILIUM LEUCANTHEMUM

The bulbs offered were also collected by Mr. Wilson. This is one of the strongest growing lilies—frequently attaining a height of six to eight feet. The flowers vary in number from five to ten on a stem, and in size and shape resembling *Lilium Harrisii*, greenish white shaded purple on the outside, and of the purest white within with a tint of citron in the centre. The flowers have a pleasing fragrance. This lily will undoubtedly be largely used for outdoor planting as well as for forcing. Many consider it the finest of all tubular-flowered lilies. It flowers somewhat later than *Lilium myriophyllum*, and, owing to larger growth, has a distinct place.

Orders looked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

Seasonable Notes on Culture of Florists' Stock

ACHIMENES

Keep these plants nicely stalked as growth advances so as to have in good form before the buds start to open. When the soil becomes filled with roots they will stand a good supply of water at the roots, and would be greatly benefited by a weekly application of liquid manure. When the flower buds are fully formed and just before they begin to open they can be moved to a cooler and airy house that is well shaded. They will do better here at this stage of their growth than if kept in warmer quarters where they are bound to make a drawn and spindly growth. Be careful not to submit them to too great a change at first, but gradually inure them. When they are through blooming place them by themselves in a moderately warm house where they will have plenty of light and air. Don't neglect to give them water when they may need it so that the leaves and stems may be kept fresh and healthy until the tubers have attained their full size and maturity. When allowed to die off prematurely they will only have insufficiently matured tubers which will never give good results.

CALCEOLARIAS

Now as the end of summer approaches it is time to sow calceolaria. Use clean pans or flats with plenty of drainage, which is a very essential point. A good compost to sow on is loam, leaf-mold and sand in equal parts. An inch of the top layer should be sifted very finely. The pans should be thoroughly dampened before you sow your seed. After sowing press the surface over with something smooth and place a pane of glass over each pan. Place them in a frame where they will have protection from rains and later on from frost. See that the sashes are fixed so that air can be freely admitted. In a few weeks they can be transplanted into flats, about an inch apart, using the same soil as mentioned above. When the cool nights set in, they will start a vigorous growth, and when large enough should be potted into 2 or 2½ inch pots using a little heavier soil. It will be necessary to keep them clear of green fly by fumigating once a week if you want nice healthy plants.

COREOPSIS GRANDIFLORA

These plants make a very valuable crop for Memorial Day with their handsome golden yellow flowers of four inches in diameter. Sow the seed now in a coldframe and when they are large enough plant them about 10 inches apart in another coldframe. With this winter protection you can grow fine clumps that can be potted up or planted out in a cool house from January till March. Those that you don't use can be kept until April and then planted outside where they will flower from June on if the seeds are kept from maturing on the plants.

EUCHARIA

Plants that have produced a crop of flowers, should be given a liberal amount of water at the roots with

plenty of moisture in the atmosphere until more new heat has reached its full use and development. This growth completed, they should have a period of from 4 to 6 weeks rest by gradually withholding water until the leaves begin to flag slightly when they should have just enough water to freshen them up again. Follow up this treatment by keeping dry as before and then again a slight watering. This alternate treatment can be continued for a month or six weeks so as to give them a period of partial dormancy, but be sure to give them enough of water to keep the leaves plump or otherwise they will be injured. This resting and flowering treatment can be practised with good results two or three times a year. Now is a good time to plant a bench of established plants from 4 inch pots, spacing them from 6 to 8 inches apart. They like any good soil and some well decomposed cow manure in equal parts. When the benches or pots become filled with roots they will be greatly benefited by a weekly soaking of manure water during their growing period. A crop of flowers coming in at this season should be slightly protected against the fierce rays of the sun.

LILIUM HARRISI

If lilies of the Harris type are wanted for early flowering, the planting of the bulbs should take place as soon as you can get them, so as to give them time for good root formation. Any good soil that does not contain green manure will do. A good compost to use is three parts of loam to one part of well-rotted cow or barn-yard manure. Place the bulbs so that after they are potted they will be entirely below the surface of the soil. Then give them a good watering to settle the soil. They should then be stood closely together in a frame, and covered with 4 or 5 inches of soil so as to keep them cool and to hold an evenness of moisture. While they are making root growth they will need attention—during an exceptionally dry spell the application of one or several doses of water, or during a prolonged rainy spell a covering of some sashes. In about a month or six weeks most of the bulbs should have made a good start in filling their pots with roots. You can separate them into several grades by going over them from time to time. Give the most advanced ones a good light position on a bench in a cool house.

WINTER SWEET PEAS

For an early winter crop you can sow the seed from now until the first of September. They can be sown directly in the bench or bed, but when you have a crop to take off you can sow them in 4 inch pots which will give them plenty of room to grow for some time. Select a house where they can have at least six or seven feet for head room; more would be better. Give them a soil well enriched with raw manure if possible, but where this is unprocureable well-rotted sheep or horse manure will answer. See that the bench or beds are provided with good drainage.

It appears to be quite a common custom of "Floral Art" late, for the "floral artist" who has executed a wheelbarrow, fire truck or similar "design work" in flowers or for the trade paper

which likes to adorn its pages with illustrations of such masterpieces, to take refuge in an apologetic sort of way behind the plea that the customer was determined to have this and would not accept anything else. In these gratuitous admissions of "the small voice within" we think we can see indication of a healthy awakening to a realization of the incongruity of these crude productions and that the florist owes it to his profession and the public to endeavor to develop his art to a higher and better plane. At the meeting of the retailers in connection with the Baltimore Convention advantage should be taken of the present receptive attitude of the trade on this important subject, and a campaign of education upward inaugurated.

That florist who advertises his business Where many most liberally and continuously in local newspapers, street cars and other florists lack available publicity mediums will be found almost invariably to be the busiest and most prosperous in his line in his town. There are exceptions, of course, for advertising unsupported by good management loses much of its value. Indeed, it is a question whether the success which comes to the persistent advertising florist is a direct result of the advertising or is due rather to the exercise of a clear-headed business ability of which a well-directed advertising campaign is only one outward manifestation. Considering, however, the overwhelming proportion of floral establishments in which modern business system is practically disregarded and things run just at random, it is easy to see that there is a big field for improvement if the florist occupation is to attain its due and rightful position among the foremost commercial industries.

It is not easy to imagine any more effective advertising expedient than a well-maintained place brilliantly adorned with tasteful examples of the use of plants and all the appointments kept in harmony and up to the standard appropriate to an avocation in which refinement and artistic taste are dominant qualities. That so few, comparatively, of the florists' establishments one sees in traveling from place to place are so kept and adorned is a reflection far from favorable to the florist business as a whole. In that bright little pamphlet, "Bulb Talks," issued by R. M. Ward & Co., on which we commented in a previous issue, there are some excellent bits of advice and suggestion to the local florist as to ways and means of publicity and surprise is expressed at the rarity of business signs on these establishments. As Mr. Ward says "there are thousands of greenhouse plants in the United States without a sign of the proprietor's name about the place. In this respect a very valuable asset is neglected and lost."

Some Choice Conifers

Coniferous evergreens are of such paramount importance in all forms of landscape gardening in the colder parts of the United States that it is somewhat surprising that more attention is not given to the choicer and more beautiful kinds. Although many thousands are planted annually these are composed of comparatively few species and, though we cannot afford to dispense with such standard sorts as white pine, common hemlock, Austrian pine and blue spruce yet it should be borne in mind that there are many others equally well and, in some respects, better adapted to ornamental planting and which at the same time are equally hardy and as easy to cultivate. A very conspicuous feature of the National Flower Show held in Boston in March last was the numerous collection of evergreens. Among the more noteworthy being excellent displays from the Messrs. Farquhar, the Eastern Nurseries, Messrs. Bobbink & Atkins and W. A. Manda. A very large and representative collection can at all times be seen in the Arboretum where intending planters will do well to make a visit specially at this time of year.

Abies Veitchii is a fast-growing species from Japan with dark green foliage, very silvery on the under side. It is apparently capable of making a very handsome lawn specimen. So fine a tree as *Abies Nordmanniana* is an excellent companion to the foregoing, somewhat similar but less silvery beneath. Few conifers make a more symmetrical specimen or produce a finer effect than this and the intense green of the foliage is emphasized when it is planted in juxtaposition to a blue spruce.

One of the most beautiful and interesting of all evergreens is the Umbrella pine from Japan which is at present quite rare in gardens, but its singular beauty and hardiness should ensure it being largely planted. *Sciadopitys verticillata* should be planted in a position where the soil is moist during the growing season but not at all waterlogged and a compost of loam and leaf soil or peat will meet its requirements.

Two very handsome conifers with glaucous foliage are *Cedrus atlantica glauca* and *Cupressus arizonica*. The former should be planted in a position where it is sheltered from cold winds in spring by surrounding trees which often cause more damage than any frosts we experience. It is succeeding well in the Arboretum.

Several forms of the common hemlock are deserving of extended cultivation especially good forms being *Tsuga canadensis compacta*, a dwarf growing form of close habit and *T. C. Sargenti* a very handsome pendulous variety. *Taxus cuspidata*, the Japanese yew, is undoubtedly the best variety for any purpose in the colder parts of this country, for whatever weather we may experience during the winter or early spring it never becomes brown or is in any way affected.

The *Retinosporas* are among the most useful and beautiful of smaller-growing conifers, well suited for the embellishment of the most cultured part of the pleasure grounds. *R. filifera* is one of the most graceful with long drooping thread-like branches. It has two excellent varieties *aurea* with golden foliage and *glauca*, which is quite uncommon, but a beautiful form. *R. obtusa nana novae* is also desirable and so is *R. Crippsii* if a sheltered place can be found where its bright golden foliage is not injured by cold winds.

Varieties of *Thuja occidentalis* are numerous and many are worthy of inclusion in all gardens. Among the dwarf-growing forms we have such excellent sorts as *Geo. Peabody* and *Cloth of Gold*, both with attractive golden foliage while *Hovey*, *Tom Thumb*, *Little Gem*, *Globosa* and *Ellwangeriana* are excellent green forms.

The more uncommon junipers are also deserving of much extended cultivation, the most noteworthy being: *chinensis argentea* with bluish green and white foliage; *tamariscifolia*, a low growing evergreen, fine for covering ground, large rocks, etc.; *chinensis Pfitzeriana*, a very pleasing, graceful plant; *sabina tripartita* and *Virginiana Schottii*.

One of the most desirable of all conifers is the hardy form of *Cedrus Libani* or Cedar of Lebanon, which has been introduced to this country through Professor Sargent. As is well known the ordinary form of Lebanon cedar which forms so conspicuous a feature in many gardens and parks in Europe is not capable of withstanding the severities of the climate here but this new variety has successfully withstood the last ten winters in the Arboretum and will evidently prove a great addition to our list of ornamental evergreens. The foliage is a beautiful light green and the habit especially graceful. Specimens from four to twelve feet in height can now be seen in the Arboretum.

Arthur. E. Thatcher

Arnold Arboretum.

Dahlia Rheinkönig

This is one of the novelties of the present year of the Giant Cactus type. It is an ideal variety for florists' use as a cut flower, being pure white, with petals of great substance and stems long and rigid. Its sturdy habit of growth and free blooming qualities make it also an assured garden favorite. It is catalogued this year for the first time by Deer.

Rose Madame Melanie Soupert

The rose which forms the subject of our cover illustration this week is one of Pernet-Ducher's introductions of 1906. It has developed good and satisfactory qualities in the garden in this country and has undoubtedly come to stay. The color is salmon yellow suffused with pink and carmine. The flowers are semi-double and in bud form are extremely shaped and attractive.

CLUBS AND SOCIETIES

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Parties arriving in Kansas City on Monday evening trains, August 7th, will of course, have ample time to make hotel arrangements and be ready for the opening meeting at the City Hall. Parties arriving on the morning trains, August 8th, will have time to go to the Baltimore Hotel, or any other hotel which you may select, make your hotel arrangements and get to the City Hall at Fifth and Main streets by 10 o'clock for the opening meeting. Those whose trains may be delayed a little may come directly to the City Hall and their hand baggage will be taken care of there and hotel arrangements can be made after the opening meeting.

The Baltimore Hotel has been selected as headquarters and has made the rates for rooms at from \$1.50 up. It is a high grade hotel, very complete in all its arrangements, and is not crowded in August. There will be ample room there.

In case you wish to go to one of the other hotels, the Sexton is directly across the street from the Baltimore, the Savoy is a couple of blocks away, and the Kupper Hotel and the Denmore are convenient to the Baltimore. In any of these last hotels mentioned rooms may be obtained from \$1.00 per day up.

I wish all visiting officials to call at the Park Board office in the City Hall first, register and obtain credentials, going from there directly into the Council Chambers where the opening meeting will be held. After you have all arrived at the Park Board headquarters we will then be able to give you definite directions for the rest of the time of the Convention.

If you have been a little in doubt about coming to this Convention, please now reconsider and either come, or send a representative from your city. This is going to be a rousing meeting and great good should come from these conventions. We will be greatly disappointed if you are not here.

W. H. DUNN,
Superintendent of Parks.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

St. Louis to Baltimore.

St. Louis Vice-President Fred H. Weber of the S. A. F. says he has a list of names of those who are coming, but you can't tell in the florist business when they will get up in the last minute to come or not. The club meeting on Thursday will no doubt bring out the real list of those going. Mr. Weber has been working hard and succeeded in rounding up quite a few new members to the Society.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club will hold an important meeting on Thursday afternoon, August 10th. At this meeting the annual election of officers for ensuing year will be held. All the candidates who were nominated at the July meeting have a large following and a hot election is in store.

AMERICAN GLADIOLUS SOCIETY.

Only a few days remain before the second annual exhibition of the American Gladiolus Society takes place at Baltimore and notwithstanding discouraging reports of damaging droughts from many parts of the country I believe that our exhibition will surpass the splendid show we made at Rochester last year. The growers that have kept the cultivator busy during the dry spell will be able to bring some good spikes of flowers to Baltimore. We have had practically no rain for nearly two months in Orange, the first good rain coming the 24th, and another good one on July 29th, but I kept the soil stirred twice a week and am now cutting as fine flowers as I ever have. The judicious application of the 5 per cent. solution of formalin on scabby bulbs has resulted in giving me the healthiest plants one could wish from such stock.

The extreme hot weather forced some varieties into bloom a week earlier than I ever had them before and a few days before they began to flower the tip buds scorched as though they were held over a blaze of fire. It was surprising to see how the rain brought them around again. It is generally believed that cutting the spike when the first two or three flowers open will result in producing a stronger bulb that will give you a better spike of flowers the next year. I took this for granted for several years but have been doing a little experimenting for the past three years and find that nearly all bulbs that I have grown for seed give me a spike of flowers equal to those that I cut flowers from.

I am receiving some rare species of gladiolus bulbs from the Transvaal. These are sent me by a well-known collector of botanical specimens, George Thornecroft, Barberton, who has discovered many rare plants including gladiolus and a rare pink cyrtanthus named after him by the authorities of Kew Botanical Gardens. Mr. Thornecroft has also sent me some bulbs of a new cyrtanthus with umbels of pure white flowers. A few bulbs in a pot are beautiful as freesias. They flower around Barberton in May and June and multiply enormously from offsets. They grow in South Africa at an altitude of 5000 feet but the frosts there are not severe so I do not yet know whether they are hardy enough to plant out in the fall here.

Returning to the gladiolus, Mr. Thornecroft tells me that there is a new species which is very beautiful, the finest one they have, that flowers in December. It is a large flowering variety; color, old gold, splashed with red. Many of these species are interesting but of little use in breeding for garden sorts. L. MERTON GAGE

H. Yonell, financial secretary of the American Gladiolus Society, sends us record of the following additional prize offered for competition at Baltimore:

Class 10, for amateurs, Mr. Francis King offers \$10 for the most harmonious and beautiful color arrangement of gladiolus spikes, number of colors and quality to count, no less than 50 spikes.

FLORISTS' CLUB OF PHILADELPHIA.

Convention matters and a talk on "Park Gardening" by Xavier Schmitt were the leading items on the program at the regular monthly meeting of the above club held on August 1st. Jno. Westcott reported for the transportation committee and after considerable discussion of various routes it was decided to go by the B. and O., the Tuesday morning, on the 10.17 train. All members to be notified with return postal so that if number of replies warrant a special car can be procured. This shows the importance of every one answering promptly. The fare is the regular four-dollar excursion. Each member buys his own ticket in the usual way. No bother at all with rebates and committees and so on this year, as the distance being short there would be no saving. The hotel committee reported and read offers from ten or twelve of the leading Baltimore hotels, and this information is now on tap for all who may want it. No headquarters have been selected, it being thought wisest to let each member pick out the hotel that seemed to suit him best. Mr. Schmitt's address was very well received, and we hope to find room for it in our columns at an early date. The bowling team will consist of:—Jno. H. Dodds, Wm. Robertson, Samuel Batchelor, Robert Irwin, and D. T. Connor.

NEW ORLEANS HORTICULTURAL SOCIETY.

Claude L. Ory, a prominent florist of the upper section of the city, was elected president of the New Orleans Horticultural Society on July 21, after one of the most exciting elections ever held by that body, Mr. Ory defeating R. E. Simon, another well known florist, by one vote, the final count being 15 to 14.

The meeting was full of interest all the way through, and quite a surprise was sprung when Mr. Ory was placed in nomination and elected. It had been originally agreed to elect Mr. Simon president by acclamation, but when the nominations were made and the vote called it was found that Mr. Simon was not present.

J. E. Newsham and several of the other members brought up the point that a man could not be elected to the presidency unless he was present, and after a resolution had been passed making this a law of the association, Mr. Simon appeared on the scene. His friends then urged him to enter, as the nominations had been reopened. Mr. Simon did, but Mr. Newsham would not withdraw his candidate. The voting was done on the Australian secret system.

The other officers elected, all by acclamation, were: B. M. Wischer, vice president; John Eblen, treasurer; C. R. Panter, secretary; Richard Eichling, corresponding and recording secretary.

Mr. Eblen, the treasurer, was elected to his twenty-seventh term, while Mr. Panter took up his tenth term as secretary. The finance committee appointed consisted of Joseph Steckler, E. Baker and P. A. Chopin.

LOCALITY SHOULDN'T COUNT.

In some things the human race today is very wise. For instance, when it starts out to find the best cabbage for its particular needs, it cares nothing about locality. Copenhagen, Maryland, Kamschatka, Kalama, South Carolina, Aberdeen or Tipton, too are all the same to them so long as they get the goods. But when it comes to selecting an officer for our National Society—well—then they seem to indulge in such considerations as—Does he belong to our village, what is his religion, is he an A. P. A., is he a prohibitionist, is he a quaker, is he a Dunkard; does he part his hair in the middle; does he go down stairs to dinner in his shirt sleeves, does he believe in the nebular hypothesis, and a whole lot of other things that are not germane to the subject at all. Why can't the same wisdom be displayed in selecting an officer as we evidence in selecting a vegetable. The best fitted for the job is what is wanted, no matter where located. Genius knows no latitude, no longitude. It may happen anywhere in the littlest hamlet or the biggest city. What we as enthusiasts in the welfare of our chosen profession should strive for is to get the best man irrespective of locality. This cry—"well, there should be something for the North as well as for the South" sounds sensible and fair; but on analysis is the rankest nonsense, and moreover, it is worse. It is a mischievous and dangerous doctrine. It leads many well meaning but unthinking people astray. Many of us do not look far beyond our town, country or state and the big men near us seem to us good enough for the rest of the world. They may be; but we must first compare them with the best that other parts can offer, and then forget our own little bailliwick for the good of the country. Sectionalism is the commonest of human failings. Let us not delude ourselves into the belief that this failing is a virtue. Let us rise above that, and say: the best is what we want wherever it comes from! Give us the best our country has not the best in our little burg; but the best the United States can give us.

GEORGE C. WATSON.

BRITISH HORTICULTURE.

Amongst the Roses.

The trade growers were well represented at the annual show of the National Rose Society, in the Botanic Gardens, Regent's Park, on July 7th. Competition was keen in most departments, with the result that a magnificent collection of the "Queen of flowers" adorned and scented the

INTERIOR VIEW OF S. A. F. EXHIBITION HALL, BALTIMORE, MD.

spacious marquees. In the nurserymen's classes, the championship was won by Hugh Dickson, of the Royal Nurseries, Belfast. He received a gold medal for Mrs. Sam Ross, a delicately tinted H. T., and Mrs. R. Draper, a H. T. of a pleasing pink shade; also a silver gilt medal for Souvenir of Portland, Oregon, a H. T., of a crimson cerise hue. Rev. J. H. Pemberton, of Haverling-atte-Bower, Essex, secured a silver gilt medal for Danae, a perpetual-flowering yellow cluster rose. Cards of commendation were awarded to the following: Miss Muir Mackean, Nancy Williams, and British Queen, shown by S. McGredy & Sons; Sunburst, by G. Beckwith & Son; Coronation, Hugh Dickson, and Ethel, by Charles Turner. In the classes for the best blooms, Hugh Dickson received a silver medal for Mrs. Stewart Clark, as the best H. T.; G. Prince, had a similar award for Mme. Jules Gravereaux, the best Tea variety, and Harkness & Son, for Hugh Dickson, the best H. P. variety. The decorative classes were particularly well filled, some artistically arranged designs being shown.

The Sweet Pea Show.

Sweet pea enthusiasts have every reason to be satisfied with the attention given this year to their favorite flower. One of the daily papers has given the sweet pea a "boom," and is organizing this month a great show at the Crystal Palace for the thousand

pounds prize offered by the proprietors. This has evoked an enormous number of entries from all parts of the United Kingdom. The annual exhibition of the National Sweet Pea Society in London on July 11th and 12th was a gratifying success; crowds of visitors admired the high standard of excellence prevailing in most departments. W. Atlee Burpee, of Philadelphia, renewed acquaintance at the show with many of his British confreres, and cast a critical eye over the exhibits in the class for the best American varieties. The first prize in this section fell to Sir Randolph Baker, who was to the fore as a prize taker in other classes. A distinguishing feature was the success of the Irish growers, who are evidently forging ahead as successful growers of this popular flower, as well as of the rose. There were no striking novelties. The awards were as follows: First-class certificates—Barbara, orange self, Robert Holmes, Tuckswood Farm, Norwich; Dobbie's Thomas Stevenson, orange scarlet, Dobbie & Co., Edinburgh, N. B. Awards of merit—F. Seymour Davis, rosy pink, F. Seymour Davis, Farnham, Surrey; May Campbell, cream, splashed with red, and Mauve Queen, rose lavender, after the style of R. F. Felton, both shown by Dobbie & Co.; Mrs. B. Gilbert, white, suffused pale purple, Gilbert & Son, Bourne, Lincs; Red Star, crimson, A. Malcolm, Duns, Scotland.

W. H. ADSETT.

Our Seventh Annual Convention Number

Will be issued under date of August 12, 1911. It will be full of interest for those who go to the Convention at Baltimore, and equally so for those who stay at home. It will be widely distributed and in publicity value to the advertiser will have no superior. Take a generous sized space in HORTICULTURE. You'll find yourself in good company. ❀ ❀ ❀ ❀ ❀

During Recess

The Convention Games.

Following is an official revised list of the prizes to be competed for at Baltimore.

BOWLING FOR MEN

Team Bowling:

Whitden Cup—Team making highest total in 3 games.

Kasting Cup—Team making highest score in any one of the 3 games.

Bayersdorfer Cup—Team making highest score in first two games.

Michell (Phila.) Trophy—Team making second highest score in 3 games.

Henry Leahr (Balto.) Prize—A stick pin to each man on the highest team, total pins.

F. C. Bauer (Balto.) Cup—Man making highest number of strikes, team bowling.

Thos. H. Patterson (Balto.), One Dozen Fruit Knives—Man making highest total number of pins in the three games, team rolling.

W. W. Barnard Cup—Man making highest score on team from the greatest distance, total pins—team work.

W. C. McCaunce, Mirror—Man making second highest score, team rolling.

Mrs. M. J. Thomas (Balto.), Silver Pitcher—Most strikes made by a bowler in the 3 games.

W. J. Johnston (Balto.), Silver Bowl—For highest score in any one game, team rolling.

Pennock-Meehan Co. (Phila.)—\$5 to each man on team making second highest score in the 3 game, total pins.

M. Rice & Co. (Phila.), \$10—Man making second highest number of strikes in team rolling.

Hoseas Waterer, \$5—For man making second highest number of spares, team rolling.

Individual Rolling:—

The George Asmus Prize, \$25—For highest score total pins.

The Fred Strodtman (Balto.), Silver Cup—For second highest score, total pins.

Dreer Cup (Phila.), for 3rd highest score total pins—To man making highest number of pins in 2 first games or in individual rolling.

Special Event—To the individual, 50 years or over, making the highest score, total pins in 2 games. A case of whiskey.

Michell handbag—Highest score made by press representative in 2 games, total pins.

SHOOTING

The following have donated for the prizes to be awarded for shooting:

Michell & Co., silk umbrella; Ed Reid \$10; H. Brown \$10; Robt. L. Graham, \$20; R. Vincent, Jr., \$20.

There will be additional prizes forthcoming, when a proper distribution of all will be made.

Michigan Cut Flower Exchange Gives a River Party.

We all knew before hand that anything arranged by the Michigan Cut Flower Exchange is done right in every detail and this time they even went so far as to provide a good hot day so that we were still more glad to inhale the cool

breezes of our beautiful river. Over five hundred people, all florists and employes with families, beans and belles, accepted the hospitable generosity of the Michigan Cut Flower Exchange last Monday.

From out of town there were present Elmer D. Smith, Wm. Pierce, John Watson from Adrian; Mr. Miller, formerly from Philadelphia, now from Chicago; H. E. Philpott, president Chicago Florist Club; Otto Kruger, Wm. Peck and wife, Toledo, O.; Mr. Dixon and wife, Northville, Mich.; Mr. Bissinger, Lansing, Mich.

The boat left the dock about 2 o'clock and it was not long before young and old, employer and employe, were engaged in dancing. A short stop was made at Isle aux Peches then the sail extended through Lake St. Claire and turning about again went through the beautiful Detroit river to Lake Erie; spending over three hours in the most delightful manner.

While local meetings have become scarce owing to the hot weather, the

grounds of The Elm City Nursery Co. in New Haven, Conn., July 26th, for their annual summer outing. The day was perfect in every respect. The recent rains made verdure everywhere fresh and attractive. A special feature at the nursery which was a source of universal interest among the members is a collection of rare Japanese plants, which were personally selected last winter in Japan. After journeying through the nursery's fields of well-cultivated stock and comparing notes of mutual interest, the members took autos to the west-shore where they liberally feasted. Later after a short business session the members gave themselves over generally to the attractions of the shore. All agreed that this season's outing proved to be a most enjoyable one.

A Good Time at Washington.

Some 250 florists of the District of Columbia, Maryland and Virginia with their families and invited guests ac-

Connecticut Nurserymen's Association on Their Summer Outing at The Elm City Nursery Co.'s Grounds, New Haven, Conn., July 26th

question of having a fall show was discussed during this ride. It was remembered that the chief obstacle of renting a hall was practically solved through Mr. Danzer, who had secured the 20th Century Building for three days free of charge.

The nearness of the annual election of course brought a little politics and Michael Bloy was well indorsed. His natural capacity for hard effective work and fair dealing made him appear very desirable, so much more as we expect to entertain the rose and carnation societies.

Florists always know how to combine pleasure with business and it was not long before a plan became a fact whereby our friends of chrysanthemum growers, Elmer D. Smith of Adrian, was secured to read a paper on chrysanthemums in Chicago next October and a party of the local club will be there as his court of honor.

Connecticut Nurserymen's Association.

The Connecticut Nurserymen's Association met again this year on the

cepted the invitation of the Washington Florists' Club to attend Ladies' night on the lawn of the home of Wm. F. Gude. The lawn and summer house was gaily decorated with electric lights, Japanese lanterns and American flags and in the boxwood arbor, concealed from the guests, was a negro mandolin and guitar club who gave selections during the evening.

Mr. Gude for the club, welcomed the guests and introduced Richard Vincent, Jr., of White Marsh, who had kindly consented to lecture on the bulb culture of Holland. This lecture proved of great interest to all, illustrated as it was with colored pictures. He spoke on the growing, cutting, planting and maturing of the bulbs, showing how they were gathered and stored for market and their final disposal. Mr. Vincent's pictures also showed views taken of displays at various national exhibitions and conservatories in foreign countries. A hearty vote of thanks was tendered him on completion.

Due to the fact that things were

coming so thick and fast out of doors it was decided to postpone that part of the meeting which related to the actual business of the club. Due notice of the deferred meeting will be given later. An elaborate luncheon was served.

Among the guests were Mr. and Mrs. Richard Vincent, Jr., Wm. R. Smith, Wm. Bissett, Mr. and Mrs. Estabrook, Mr. and Mrs. Rhoades, Mr. Borsetti, Mr. and Mrs. Harrison Dingman, Mr. and Mrs. Wallace Streeter, Mr. A. Gude, Mrs. Brueninger and daughters, Mr. and Mrs. Charles Stevens and son.

Mr. and Mrs. Wm. F. Gude were warmly thanked for the hospitality shown and it was sure that each and every one spent a most enjoyable evening.

CLARENCE L. LINZ.

Westchester and Fairfield Horticultural Society.

The first annual outing and games held at Bonnie Brae Inn, New Rochelle, N. Y., Wednesday, July 26, proved to be a most delightful time for all. Weather ideal, fine grounds for our games, and a splendid dinner. Much credit is due to the committee of arrangements and T. J. Wade, manager of Bonnie Brae. Athletic contests results were as follows:

100 yard dash—1st, Wm. Whitton; 2nd, T. Atchison; 3rd, A. Possell.

Broad Jump—1st, Wm. Whitton; 2nd, A. Possell; 3rd, T. Stobo.

High Jump—1st, Wm. Whitton; 2nd, T. Stobo; 3rd, A. Patterson.

Hammer Throw—1st, A. Geddes; 2nd, Wm. Whitton; 3rd, T. Stobo.

Putting the Shot—1st, Wm. Whitton; 2nd, T. Atchison; 3rd, T. Stobo.

Potato Race—1st, A. Geddes; 2nd, A. Wyman; 3rd, A. Nichol.

Three Legged Race—1st, Wm. Whitton, Geo. Edmondson; 2nd, A. Nichol, W. Goodall; 3rd, A. Patterson, T. Atchison.

Mule Race—1st, Wm. Whitton; 2nd, A. Possell; 3rd, Wm. Goodall.

Pat Men's Race—1st, T. J. Wade; 2nd, Jas. Stuart.

Commercial Men's Race—1st, Geo. Edmondson; 2nd, Geo. Baldwin.

Boatball—Westchester vs. Fairfield Co.—Won by Westchester; score, 5-1.

Tug of War, Westchester vs. Fairfield Co.—Won by Fairfield County.

Tug of War, Commercial vs. Private Gardeners—Won by Private Gardeners.

There were many useful and valuable prizes for winners in all events. Both counties were well represented and amongst our visitors were C. H. Totty and M. C. Ebel of Madison, N. J., Wm. Scott, Elmsford, N. Y., Wm. Rickards, Geo. Edmondson, W. E. Marshall and Chas. McTaggart, New York.

J. B. MCARDLE.

Michell and Pennock-Meehan Ball Game.

On Saturday, July 29th, Pennock-Meehan boys journeyed to Ridley Park to beard the lion in his den, but the lion (which happened to be Michell's ball team) refused to have his spinach cut off but insisted on playing ring around the rosy with the P.-M. aggregation until they were unable to withstand the terrific onslaught of the bats by the Michell boys, although we must admit they were game and died fighting to the last ditch. (Red Doorn) Scott caught the game of his life, but had to bite the dust in the 9th inning. The score by innings was as follows:

1 2 3 4 5 6 7 8 9 R H E

Pennock-Meehan . . . 0 0 0 0 0 0 0 0 4 4
Michell 0 0 4 0 2 2 1 0 12 14 1

On Saturday afternoon, August 5th, Michells play W. K. Harris' at Darby, Pa.

New York Bowlers.

On Aug. 11 the last bowling of the season will take place and Capt. Chadwick will select his Baltimore team. The Pierson balls have been won by Shaw, Scott, Kakuda, Manda and Chadwick. Scores on Friday evening, July 28, were as follows:

Pierson 167 135 187 KAKUDA 146 155 176
Chadwick 175 153 180 MANDA 150 188 160
Shaw 150 115 144

Notes.

The Chicago Carnation Co.'s base ball team lost its first game Sunday, 19 to 16, the Washington street team of Joliet being the victors.

The Chicago florists are not neglecting to bowl. Their team for the convention is doing good work and is full of enthusiasm, which is half the game.

The Chicago Florists' Club picnic proved a success financially as well as socially, notwithstanding the rain, and at the regular meeting of the club, Aug. 3, the members heard a full report from the committee.

Walter J. Pilcher, J. J. Beneke and William C. Smith visited the Belleville florists last Wednesday. On their arrival they were taken by A. S. Halsted, president of the St. Clair Floral Co. in his automobile, to the plants of E. W. Guy, A. G. Fehr, Gust Grossart, West End Floral Park and the St. Clair Floral Co. The party reported that all the places were in tip-top shape for the fall and winter season. An automobile ride throughout the city seeing all the sights wound up at the Elks Club for a late dinner at the mercy of Mr. Halsted and Mr. Smith, who were the only elks in the party.

SOME NEW THINGS.

A Paper read by E. G. Hill before the Illinois State Florists' Association.

As the Rose has "right of way" by general consent I will begin by considering a few new varieties both European and American which have recently come under my notice.

Juliet (Wm. Paul & Son) is unquestionably the finest and most distinct of all new roses—it is a garden variety of strong growth, making heavy upright canes and has the good quality of flowering throughout the season. The color is a marvel of glistening yellow, crimson and pink. This variety should make not only a fine rose for the garden, but a beautiful market pot plant. It has a strong infusion of Austrian copper or Persian somewhere in its lineage.

Edward Mawley (McGredy). This magnificent rose was pronounced by all who saw it at the National Rose Show at Regent's Park as being the very finest of all the Hybrid Teas. It is a glowing velvety crimson of shapely form, and good texture. If this variety will force it will be a fine addition to our winter-flowering sorts. No rose of recent years has had such a warm reception as was accorded this variety by the English public. It was named for Mr. Edward Mawley, the eminent secretary of the National Society. It is worthy of trial under glass.

Rayon d'Or (Pernet) is one of the most wonderful advances in color among the recently introduced roses and as seen growing by the thousands at Lyons, France, in the raiser's gar-

den was a sight never to be forgotten. It is a distinct Pernet rose variety, distinct in habit, too, flowering with a brilliancy in its yellow and red color that it is hardly possible to describe. It is frequently marbled and lined with red. Mr. Pernet is justly proud of this production of his. It, however, belongs among the Hybrid Astringens and it remains to be seen whether or not it will hold its foliage in our climate.

Beauty de Lyon (Pernet) was the winner of the Paris gold medal last year and a notably strong growing hybrid. This and Juliet should, on account of their extraordinary vigor, make good garden varieties. The color is coral red, shading to yellow; a very strong heavy grower with ample foliage and a flower large, full and globular; a magnificent bedder.

Jonkeer J. L. Mock hails from Holland and is one of the strongest in the family; it outgrows every other variety on our benches, and is constantly sending up heavy bottom breaks, each topped with a glorious flower in two tones of color, fiery red within, the outside of petals silvery, rosy white. Of fine rounding form: one of the largest in size; a grand rose. Awarded eight prizes in Europe.

Miss Alice de Rothschild. This is one of the Alexander Dickson varieties and as viewed in the nurseries at Newtownards looked like a veritable dwarf Marechal Neil. This should make a fine bedding or garden rose in this particular line of color, nothing being in greater demand than a deep yellow rose of fine rounded form for the border.

Mrs. Aaron Ward is a rose that compels admiration; first of all it is a very free grower, producing very handsome glossy foliage in great profusion, which it holds grandly when bedded out, it is one of the freest varieties that we know, and throws good long canes readily; Admiral Ward, the greatest amateur rose-grower in the country, names it as one of the six best bedders in our trying American climate; in the greenhouse it is a marvel of beauty, for beside having great strength of constitution, beauty and profusion of foliage, it forces readily, is extremely free, can be cut very tight for shipment, and opens beautifully; the color is a deep orange yellow seen in no other rose and it develops into a large rosette-shaped flower, glowing orange in the center shading to a medium yellow on the edges; you all know of its popularity in the East; it will soon be found in every forcing establishment.

Another aspirant for favor in the yellow class is Robert Scott & Sons' Mealy, which is being accorded a very nice reception by the trade; it is notable for its freedom as a forcing variety, and for its good color. Yellow will soon become as popular among roses as among colored roses when once it is shown in its best form and size we can all imagine the day when Marechal Neil and Mme. Perle des Jardins, were the most popular of cut roses, and a dinner was lacking in elegance without them. Sunrise, Sunset and Joseph Hill would still be fine property for the cut-flower man if only they could be grown at a profit.

The Double Killarneys are awakening interest and will be found most

Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established

ORDER NOW FOR FALL DELIVERY

We grow all our Kentia's above 6 ft. sizes in cedar tubs made especially for us, avoiding breakage of pots in shipments and saving the cost of repotting. Our customers find when they cost us a great deal more than pots, we sell the plants for the same price. We ship these plants by the carload. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see our stock before placing your order.
20 minutes ride by rail; 100 trains every weekday; Railway Station Jenkintown.

useful for summer cutting owing to the additional petalage.

Here is one of the very curious incidents regarding the sporting of roses (or other plants). These sports very often appear simultaneously with different growers, as if a given space of time allowed the variation to work to completion. You will remember that the white form of Killarney appeared at several places about the same time; we found it on several of our plants the same year that it originated farther East, though none of our sports proved pure white.

Two years ago Richmond sported pink; not a very bright shade, but interesting, so we tried out a dozen plants of it; one of these pink Richmonds sported double, giving just twice as many petals as the average Richmond. Early this year, this double pink Richmond reverted back to the pure crimson scarlet, but retained the fullness of petals, so that we now have a finely doubled Richmond which held its form without dropping for full two weeks, and we hope to be able to fix this sport, believing that it will be valuable.

Orleans Rose. Here is what the market grower has been looking for—a dwarf Polyantha that promises to make an ideal pot rose—it is the showiest and prettiest of the pink "Baby" roses; a dainty little variety of beautifully rounded habit, huge bouquet of brilliant bloom, deep cerise with showy center of pure white, florets not crowded, but of beautiful arrangement. The color is irresistible; the plant grows like a weed, and the flowers are nearly "immortelle" in their lasting quality. We believe that they will outlast almost any other

rose in existence, with their stiff, paper-like texture.

This pretty little variety took Europe by storm, and will make a sensation as soon as shown in this country; I shall be greatly surprised if its introduction does not mark a new era in the pot culture of roses, and as if especially intended for a companion, is the inexpressibly lovely little Zelia Bourgeois, a pure white early flowering "Baby" that is as dense in its mass of snow color as a cherry tree in bloom, and of the utmost symmetry in habit.

Excelsa. A Wichuraiana with the same color as the popular Crimson Rambler. This is a veritable crimson or red-flowering Dorothy Perkins, and Mr. Walsh is entitled to great credit for having raised this charming novelty; one of its chief beauties is its glossy persistent foliage, combined with its high color.

Wm. Paul's Althea, Guillot's Marquise de Ganay, Pernet's St. Chaire, Lowe and Shawyer's Lady Hillingdon, Prince d'Arenberg (Souper and Notting), and Souv. de Gustave Prat are all decidedly out of the ordinary, with several others quite as good; it is a notable year for new roses. I realize that there are other aspirants for popular favor both at home and abroad, but I am speaking only of those with which I have had some personal experience.

I purposely refrain from mentioning our seedling, Rose Queen, which we are now disseminating, and also Sunburst, the French variety, which goes out next year, not because I could not say a great deal about them if I were to begin, for a man's seedling roses, and even his adopted novelties, be-

come very dear to his heart.

Following the Rose comes the Carnation. After the recent symposium in the trade papers, little is left to say, for they were sifted as the fine dust of the balance; among very recent novelties Pink Delight and Mrs. Ward seem absolutely sure of permanent place, Scarlet Glow wherever it can be grown with a strong stem, and Dorothy Gordon as a substitute for Rose Pink. It is not only a duty but a privilege to test the few offerings of the present year, as they have promise of outranking in their several colors, and we shall probably soon need substitutes to take the place of the four standards which are now so hard worked in every carnation establishment.

Wodenethe, is one of these aspirants for place, which will be sent out next year; it is probably the most perfect white carnation in existence and those who saw it in 1910 at Philadelphia and at the National Rose Show, will be ready to greet it with open arms when disseminated.

In Chrysanthemums we can hardly wait for autumn to roll around to see the Wells-Pockett and other accepted novelties display their splendors; it is one of the keenest pleasures of the floral year, and the long wait only whets the appetite.

Of last year's novelties which we are impatient to see again, are the magnificent Mrs. David Syme, R. F. Felton, Wells' Late Pink and Glacier. Strongly entrenched already in favor with the trade as money making "commercials" are Chadwick Improved, lovely in its purity of color; Chas. Razer, a grand white of perfect approved form for shipping; Canford

WE WILL EXHIBIT AT THE BALTIMORE CONVENTION

Dreers' Variegated Pineapples

ANANAS SATIVA VARIEGATA

We are the first to offer this most beautiful of all variegated foliage plants in quantity and at prices nearly as low as good Pandanus Veitchi can be purchased for.

You will make no mistake in giving these a trial; it will make a change and variation in your foliage plants which will be appreciated by your customers and which will prove a profitable investment to you.

4-inch pots, fine plants	\$0.60 each
5-inch pots, fine plants	1.00 each
6-inch pots, fine plants	1.50 each

We will also show a full line of Seasonable Dreer Specialties and our staff of salesmen will be in attendance and will give full information regarding same.

If you are passing through Philadelphia, stop off and visit our Rivoton and Riverview Nurseries; an inspection of both of these places is certain to prove both pleasant and profitable.

HENRY A. DREER, 714 CHESTNUT STREET Philadelphia, Pa.

Pink, the pretty early English variety, Elise Papworth, a fine all round white for every purpose; Heston White and Winter Cheer, clean cut and close clipped, perfect in color tone, to these will be added Golden Gem, round as a ball and compact, and the lovely new singles. What interest would be lost to the yearly procession should the 'mum family drop out'?

Among miscellaneous plants, Mr. Julius A. Peterson is to be warmly congratulated on his Lorraine Begonia Cincinnati. While surpassing the parent in beauty of habit and color, its splendid keeping qualities make a satisfactory house plant of wonderful effectiveness and durability, where the parent variety always gave concern for fear it might speedily "go down" on removal from the greenhouse; Cincinnati probably ranks as premier of the entire list of pot plants.

Wilhelm Pfitzer of Stuttgart has given us a new white gladiolus, Europa, which in all probability will rank with America in necessary qualifications for the American trade; this is bound to meet a hearty reception.

Then there is the comparatively new Heliotrope Centefleur; it is worth all the other varieties put together where a mass of glorious color and waves of fragrance are desired; compact and clean, this variety will give the heliotrope a new place as a garden plant.

Some cutflower grower will soon take up and grow successfully the lovely double Gypsophylla, one of the prettiest things that I saw abroad. I am sure that its dainty beauty would make a place for it; it adds grace and elegance to any bunch of flowers where it is used.

To Antoine Wintzer belongs the credit of producing the finest cannas in existence, excepting only King Humbert; his Venus was a revelation to every one who planted it, and now he has made a further record with Mrs. Alfred Conard, a lovely peach pink with petals as long as they are broad. The canna is no longer a foliage plant only, but is now a blooming bedder, producing the most stunning color effects procurable.

Nothing can excite more enthusiasm

among plantmen than the very excellent new hydrangeas raised by Mouillere and Lemoine; these varieties of the Hortensia type are certainly of interest to all who use this useful plant for pot culture. They are crosses between Hortensia, Otaksa Rosea and others of the class. There has been a long lapse of time between the old Hortensia and the present improvements. Bouquet Rose, Henri David, Mme. Monillere, Radiant, Mont Rose—these are a few of the ten or a dozen distinct improvements in this noted family of plants.

A striking and beautiful novelty seen at Bruges, Belgium, was the new Marguerite, Mrs. F. Sander; it looked much like a chaste and beautiful anemone-flowered chrysanthemum; it is a glistening, pure white flower produced on long stems. I can imagine no more useful plant either for the production of white flowers or as a pot plant. If it does as well in America as it was growing and flowering at Bruges it will certainly prove a most valuable commercial plant.

This is far from a complete list of novelty offerings for the year, but enough to engage the time and attention of the progressive florist for the present.

CONSERVATION.

The Situation.

President C. S. Harrison before the Nebraska Horticultural Society.

When the Creator turned this great land over to us it was a region of surpassing beauty. The whole country was landscaped on a most magnificent scale and with a far reaching forethought for the future. It was the patient work of ages to spread a thin layer of soil over the rocks and on the hills and mountain sides, and then fasten it there with trees, shrubs and grasses. Mighty rivers flowed to the sea fed by thousands of streams. These streams were carefully protected, forests, bushes and rank vegetation prevented the washing of the soil, while at the sources of all these rivulets there was the most careful planning to retain the waters. Dead leaves, decaying trees, mosses and the accumu-

lated deposits of the ages, all were like vast sponges to retain the waters so the streams would have an even flow. Mighty forests grew and decayed, and so as the centuries passed the land grew richer and richer.

How artistically all was arranged. There were often delightful parks in the forests, and when the woods edged upon the prairies there were tall trees in the background, shrubs to the front, then the flower sprinkled carpet of green. Go into the forests, the great temples of God. What massive columns upheld the dark green canopy. Look where you would in woodland, plain and mountain, the ages of the past had made preparations for the ages to come.

Graft and Greed.

Then came the two brothers, graft and greed. With no thought of care for the future. With no appreciation whatever of the plans of the Creator. They were ready to kill the finest horse if they could only get his hide. They would burn down a mansion if they could only get the nails. A careless government which today from its own natural resources could have had income enough for current expenses, allowed billions to be taken and destroyed. One of the most beautiful sights on earth is a splendid forest. One of the saddest spectacles is to see that same forest the prey of the ax and fire—those blackened stumps like the grave-stones of departed grandeur. If the lumbermen had planned for the most speedy and utter ruin he could not have prepared a more complete system. He took only half of the tree and left the rest to dry for the great tinder box. The fires came. All that dead rubbish was ready for them. Not only was the dead brush burned, but the age-long deposit of dead leaves, rotten logs and rich mold planned to feed the soil for the coming eons; all was destroyed and a garden of Eden became a blackened wilderness. How the ruin has spread! Within the memory of man the mighty forests of Indiana and Ohio were chopped down and burned. If left till today they would be worth more than all the crops grown there since their destruc-

PANSY—Boddington's "CHALLENGE"—All Colors

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-seeders, the Giant Striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said, "Why don't you call it Defiance?"

Trade pkt., 50c; 1/2-oz., 75c; 1-oz., \$1.50; 1/2-oz., \$2.75; oz., \$5.00

Giant White. Violet spot, the largest white.	.10	.50	1.50

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

tion. Take Arizona for instance. The forests have been cut from the mountains, the rubbish inviting the fires and the fires never miss an invitation. Greed drove in great flock and herds of sheep and cattle. They have destroyed the herbage which fastened the thin layer of earth to the rocks. The floods came and ripped the earth from the mountain sides and whirled avalanches of mud into the fertile valleys, often plowing out great gullies 20 and 30 feet deep through the rich soil and all hurried on to fill the river beds. Now when the floods come there is nothing to detain them and the people of Texas must suffer from the vandalism of Arizona, just as the people of our southern states must lose millions from the rapaciousness of northern lumbermen who for the dollar for today would mortgage the whole future of those who must suffer from their greed.

Go into Colorado and vandalism is there. The mountains are robbed of their beauty. The upland pastures are over-fed and you have desolation instead of beauty. A pioneer in the Rockies said, "I think we early settlers should have great credit in coming in here and starting things." I replied, "If you never had seen this country and had left it today as God made it, it would be worth fifty times as much as it is now."

Robbing the Land.

There are no richer lands on earth than the great prairies of the West and

here in God's richest garden there have been two sources of disaster. The first is cropping lands without remuneration, raising wheat year after year with no manure, till some of the richest farms of Minnesota are now so reduced they will hardly raise chicken feed. This system of waste applies to rich level lands. There is a double system applied to hillside lands robbing the soil and allowing it to wash. Stand by any of our streams after a heavy rain and you will see the very cream of our fields going to the Gulf of Mexico. It is waste, waste, everywhere. Most feeders will have their feed lots perched on some steep hillside if they can find such a place, so that the richest fertilizer the world produces can be utterly swept away without any trouble on their part, and they keep on growing 25 bushels of corn to the acre, when by saving the manure and plowing their land deep they might have 100 bushels. Our coal lands with their marvelous deposits have been well nigh given away. I have seen veins of coal 11 feet deep which the wise U. S. Government sold for \$10.00 per acre. Streams with waterfalls that were gold mines have been parted with for a song.

The Man of the Hour.

What wonder in the midst of all this ruin that "Great Heart" should arise. He looks on the past and then on the present, and then into the future, and he asks himself what will become of this nation 200 years from now. On

the ordering of Providence, when a tremendous crisis comes there is always a man to meet it. This time it was Gifford Pinchot, by education one of the best foresters the world has produced. A man of means he is ready to sacrifice thousands for the future. He might have made judicious investments in the great West, he knew so well, so he could have become a billionaire. He could have taken his chances in an unguarded moment and captured forests, water powers and coal lands. No man since the days of Robert Morris, who furnished the sinews of war for Washington and then died in a debtor's prison, has done more or made greater sacrifices than Mr. Pinchot. Though for the present he has lost his position he is yet a king, independent of throne or crown. Few men have shown such a fearless persistence in the face of the most determined opposition. There were thousands of men who had pet plans for the future. They wished to put their hands on the nation's wealth. Cattle men and sheep men, who for years had been allowed to ruin young forests and destroy pastures by over-feeding; these rose in arms and what a clamor they raised!

Rangers vs. Cowboys.

The cattle men wanted fires. Some of the cowboys had it worked down to a fine art. Here was a tract they wanted burned. Then might be caught. One takes a magnifying glass and sets it

(Continued on page 184)

BOBBINK & ATKINS

WORLD'S CHOICEST FLORIST AND NURSERY PRODUCTS.

We are growing in our greenhouses and in our 250 acre nursery a large variety of material constantly in demand by florists. Our Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

B. & A. SPECIALTIES.

PALMS, BAY TREES, BOXWOOD AND HARDY HERBACEOUS PLANTS, EVERGREENS, ROSES, RHODODENDRONS, VINES AND CLIMBERS, AUTUMN BULBS AND ROOTS, CONIFERS, PINES.

Florists are always welcome visitors to our nurseries. We are only a few minutes from New York City; Carlton Hill station is the second stop on Main Line of Erie Railroad.

LILY BULB NOTES.

Market Wharf certainly presented a scene of activity for a short time towards its "Daisy end" on Thursday morning last shortly after 7 o'clock. First of all came the Daisy from St. Davids loaded up or down, just as you choose to call it, with an extraordinary choice assortment of Liliun Harrisii bulbs from 5s. to beyond extras in size and in appearance, said never to have been surpassed. These bulbs were from St. Davids Island, where we understand some very good as well as very bad lilies have been raised this season, for parties at the West End. Some few weeks ago we asked one of the growers concerning the lily crop on St. David, for this season and he replied that it was awfully bad, but the bulbs sent this morning looked certainly good. *Regal variety, lily of the fountain, etc.*

Isaac Bunting, the London exporter, is shipping from his Japan ranch lily bulbs to the States for Von Zonneveld Bros. & Philippo packed in larger cases of four cubic feet and of heavier weight. This is a new method of packing and it will be interesting to know how the bulbs will stand the long journey. Small cases have been generally thought advisable owing to the danger of rot if too many bulbs were packed in one case.

Up to and including shipments to July 10, 1911, there were exactly 600 cases of lily bulbs shipped from Japan, principally to Europe, via Pacific ports.

The crop of Formosas is reported

to be short in small sizes and long on large sizes of 10 inches upward.

SEED TRADE NOTES.

Florence, S. C.—The Palmetto Nursery, T. De Witte House, proprietor, intend adding a seed department to their business.

Northfield, Minn.—The Northfield Seed Co. has purchased the nursery business of C. P. Nichols. Mr. Nichols will retain the flower and greenhouse departments.

Kansas City, Kan.—The Rudy-Patrick Seed Co. has been incorporated with a capital stock of \$40,000. Incorporators, Frank Rudy, Howard S. Patrick and John W. Miller.

Yonkers, N. Y. There is being erected for W. B. Thompson a range of houses which will embrace fruit, cut flowers and commercial plants. The genial superintendent, R. L. Cookman, piloted the writer over the grounds and pointed out several houses in course of construction. The plan includes an approach from a height by a succession of steps leading from the mansion now in course of erection and which will command a grand view of the Hudson river. The dome of the palm house located at the centre of the group will be 40 ft. high.

FALL BULBS

Send for Trade List

John Lewis Childs

Flowerfield - LONG ISLAND, N.Y.

There have been over one hundred varieties and grades of rice grown in Japan. The difference in quality is very great, but how much does your Grocer know about rice? Now if a salesman came to you to sell Mining Stock you would likely want to know something about the mine; where it was; how much per ton the raw material was worth; the cost of producing it at the market price, etc. But if a bulb salesman offered you Japan bulbs you would never think to ask him from what part of Japan they came from, how the fields look, or anything about them. Funny, isn't it? Well the fact is, not one out of ten know anything about it. With them "pigs is pigs" and "bulbs is bulbs" and the lower the selling price the better for them. However, there is a difference in lily bulbs and that difference has cost many a grower more than he realizes or cares to admit—and all is due to his anxiety to save a penny the wrong way. The best Giganteum produced today are labelled Horseshoe Brand. They are incidentally about the best in lily bulbs any man could buy. Don't believe what we say about them, because we know about them and you don't—so try them—that's the way to tell—and compare your profits. Write for prices.

Not How Cheap

Seed Trade

A young seedsman now visiting the great seed-growing establishments of Continental Europe for the first time, writing of his experiences, says: "We have not yet got all the good things in horticulture in the United States." True! but we are getting them, and we are getting them more and more rapidly with each succeeding year.

Fordhook is an example of the introduction of the European system of trials of varieties of flowers and vegetables. Our leading seedsmen and seed growers now make comprehensive trials of the principal kinds of seeds they sell or grow.

The Fordhook trials this season comprise, firstly, sweet peas, of which there is a most complete assortment, not only of the hundreds of varieties now cultivated, but of several growers' stocks of each variety, thus demonstrating their quality and purity of each; secondly, cabbages, savoy, Brussels sprouts, cauliflowers, broccolis, kales, kohlrabis and other brassicas in great variety, and from many sources. The lessons learned are well worth the pains taken, not only to the seedsmen and growers, but to their patrons; the selection and listing of the most desirable sorts and the selections of the best strains of these are of inestimable value. For instance, we note that the old pointed Jersey Wakefield cabbage is still unexcelled for earliness, but many of the stocks of it have become so degenerate that only by growing those of the different producers side by side may the seedsman be reasonably sure of supplying his customers with seed of high grade. The trial also brings to view new varieties of excellence like the Danish Early Market, which in point of earliness is a close second to the Jersey Wakefield, somewhat larger and quite ball-shaped; thirdly, lettuces occupy a large section of these trial grounds. The freak sorts

HENRY F. MICHELL CO., 518 Market St., Philadelphia, Pa.

are omitted, but no really good form in any of the numerous types of lettuces is absent.

The Fordhook trials include many kinds of vegetables and flowers in addition to those already mentioned. Such work is most encouraging horticulturally, for it insures the dissemination of improved sorts and the discarding of inferior ones.

Notes.

Young celery plants are almost impossible to be obtained in New York. What few stocks are available bring from \$7.00 to \$7.50 a thousand and even at these extraordinary figures orders cannot be filled.

Writing July 28th from Ogden, Utah, Howard M. Earl reports that he had not yet inspected the crops in that locality—having just arrived there after inspecting crops in New York State and Michigan. In the latter states, peas promise a very poor crop again this year.

Effects of the drought on the grain and cereal markets of the Central West were shown yesterday in the first transaction in Timothy seed shipped to St. Louis from Oreston, Ia. There were five bags in the shipment, consigned to the Eaton-McClelland Commission Company. It was sold on the floor of the Merchants' Exchange to the A. W. Schisler Grain Company of 810 North Fourth street, at \$15.33 per 100 pounds. Last year at this time the ruling price for Timothy seed was \$3.50 to \$4 for 100 pounds. The price yesterday is the highest on record at the St. Louis market.—St. Louis Globe Democrat, July 22.

IN MID-SUMMER

Yes, it is now mid-summer. For a few weeks to come you will have to be wide-awake to catch the little chunks of business that occasionally materialize in this low-tide period.

LET US HELP YOU

Whether mid-summer or any other season we are always "on our job" and can give you more and better goods than you can get for your money anywhere else. Our H. Bayersdorfer's novelty purchases in Europe this summer are beginning to arrive. "Are you on?" Write us a line and we'll send you a list. At same time try a few of our Preserved Natural Ferns, Magnolia and Cycas Leaves, etc. They never wilt. Once tried always wanted.

H. BAYERSDORFER & CO., 1129 ARCH STREET, PHILADELPHIA, PA.

CHICAGO NOTES.

Dynamite Explosion.

The Washington Park Conservatories suffered from an explosion of dynamite early Sunday morning, July 30th. The dynamite had been concealed in a clump of shrubbery and considerable damage was done to the glass and frame work of the greenhouse. Supt. Foster is unable to give any possible cause as there was no trouble with the help. The night watchman was fortunately at the farther end of the building and no one was hurt. The loss is estimated at \$200.

Trade Jottings.

The A. Henderson Co. have rented room 429 in the Atlas Block and took possession August 1st.

Frank A. Benthey has gone into partnership with Mr. Briscoe at Tipton, Ind., and the firm name is now Briscoe & Benthey.

Gus Canger has sold his retail business at 39 W. Randolph street to Gus Constantino. He will continue to operate the store at 29 E. Randolph.

Kroeschell Bros. are getting a car load of their boilers off to the Baltimore Convention. They have engaged 329 square feet of space and will show

a complete collection of all boilers adapted to greenhouse use.

The Foley Manufacturing Co. are extremely busy these days filling orders from the many florists who are building this season. A new catalogue is under way which when complete will contain much valuable information to those about to build.

N. J. Rupp of the J. C. Moninger Co. will attend the convention in the interest of his company. Their latest catalogue on greenhouse material is just ready for distribution and contains much valuable information, illustrated with cuts of their houses from New York to California.

Phil Eichling, for six years with Harry Rowe, the Palmer House florist, and Wm. Wadsworth, for many years with the Geo. Wittbold Co., have gone into the landscape business together. The new firm will be known as the Northwestern Nurseries with office at 1518 Chicago avenue, Evanston, Ill.

Our retailers in the extreme southern part of the city are having their full share of the trade this summer and keeping their stores up as attractively as their up-town competitors. Miss Keenan, who has charge of the store at 1306 E. 63rd street, has a particularly attractive window with an aquatic tank as a central feature. This week the water was clear with gold fish. Last week it was a lily pond, etc. Branches of green give the appearance of a woodland retreat.

Personal.

August Lange and family returned Monday from Colorado Springs, Colo.

W. H. Kidwell returned from his summer hotel at Eagle Lake, Mich., last Monday.

Miss C. Paradise of Vaughan & Sperry's left Saturday for two weeks at Bass Lake, Ind.

Miss Nettie Parker of the Chicago Carnation Co.'s office is spending two weeks on a lake trip.

Miss Harper of the E. H. Hunt office will have her outing at White Lake, Mich., with her sister.

Robt. Northam, manager for Geo. Reinberg, has returned with his family from two weeks at White Lake, Mich.

Miss A. Olsen, bookkeeper at A. Lange's, will have a long rest this summer, going with a party to spend six weeks at Pawpaw Lake, Mich.

A. I. Simmons has been kept busy attending to the wants of the soldiers at the National Military Tournament last week, where he has charge of the commissary department.

At the W. W. Barnard retail seed store on 5th avenue all the employees have had vacations. W. L. Rouse returned from Michigan, Monday, and Mr. Stewart, who was driven home by the heat last month, will try again in August. All the equipment for the new store on Madison street is being made and will be of the best. W. W. Barnard has just returned from an eastern trip.

Visitors for the week were H. E. Kidder of the Ionia Pottery Co. and mayor of the flourishing town; August Dressel, Crown Point, Ind.; Mr. Schefler, manager for E. T. Wanzer, Wheaton, Ill.; E. Welke, Milwaukee, Wis.; Mr. Metz, Odell, Ill.; H. Philippott, Winnepeg, Man.; D. P. King, Louisville, Ky.

INCORPORATED.

Columbus, O.—Northern Orchards Co., capital stock \$10,000.

Pawpaw, Mich.—Wolverine Co-operative Nursery Co., capital stock increased from \$15,000 to \$25,000.

Flower Market Reports.

BOSTON The business of the current week seems to have been generally satisfactory. Out-of-town trade has been disposed to take about all the stuff really fit for shipment. The two new roses—Radiance and Prince de Bulgarie (the latter misnamed Mrs. Taft by some people) are making an excellent record in this market. There is nothing here or elsewhere, however, in the rose line to equal the superb Carnots seen every day at Welch Bros., who have a corner on this stock. These flowers are worth traveling a long distance to see. *Lilium speciosum* is a good property just now, bringing all the way from \$1.50 to \$4.00 per 100. The best lily of the valley ever seen in this market or elsewhere is here now and worth more than the price at which it can be sold.

BUFFALO Flowers were not plentiful the past week though there was about enough of everything to go around. Roses were in good demand, also gladioli, asters, lilies and other material and the market was cleaned up daily. Asters are coming on a little better although mostly with short-stems and small blooms. Only a few choice blooms are seen. A good rain is badly needed for the later crops.

CHICAGO The summer trade hardly held up to the average of the month during the closing week in July. There was no special reason for it other than that the demand, which has been fully up to any other July and quite possibly in excess of it, relaxed a little. Shipping orders showed less difference than local trade. All kinds of stock have been benefited by the low temperature of the last half of the month and will be a help with August, which promises warmer weather again. The new month starts in with a good supply of early asters, but the quality is not up to former years and the stems are, in the main, short. A very small proportion are cut with twenty-four-inch stems, and by far the greater portion with one-half that length. Summer roses can now be said to be up to the average in quality and American Beauties are daily being cut with longer stems while the flower itself is very good. Gladioli are coming in in quantity and the best varieties sell well. Fancy ferns now bring \$1.50 per 1000.

DETROIT Local market conditions are unchanged and retailers are many times put to their wits end to know what to supply. Carnations and sweet peas, as many other summer flowers, are completely played out. Asters are coming a little better, but in small quantity with no large amounts in sight. Robt. Klagge is beginning to send in large numbers of roses among the very good La Detroit. Fred Breiteneyer is shipping very good Beauties. The carnation situation is unchanged, in fact it is getting too late now for occasional rains to improve the plants. On the other hand the outlook for chrysanthemums is very good.

ST. LOUIS Since we have had a few light rains and cool nights the cut stock is looking much better than it

ASTERS

The early and mid-season varieties are now in quantity, good sized flowers with long stems, splendid quality; pinks, purples and whites. Orders of any size can be taken care of on short notice. Shipments reach us daily about 8 a. m. This has been a trying season for Asters. Our growers have been particularly fortunate, and our quali-

ties are, therefore, above the average. The best values going! We take no credit for this. It is Fate.

\$1.00 to \$2.00 per hundred.
Extra choice \$3.00 per hundred.

has for several weeks and our wholesalers are in better humor. Roses are better. A good supply of white and pink Cochetts are now coming in daily. Carnations are very scarce and will be from now on until early in September. Asters are showing up well and are expected to be right plentiful from now on.

Gladioli are now becoming a glut and all the markets have plenty. Price is still up to \$8 per 100 for America. Tuberose stalks bring \$5 in 100 lots. Hydrangeas \$6.00. There are plenty of greens of all kinds except smilax and that had quite a big call last week.

Flower Market Reports

(Continued from page 177)

NEW YORK The noticeable features of the flower market this week are the great increase in quantity and advance in quality of gladioli and asters. The latter are very fine from some growers and bring prices accordingly. In the gladioli line the most interesting novelty is Kunderd's Glory, of which fine stock is being sent to J. K. Allen by Rowehl & Granz. The flowers are creamy in color, flushed with crimson and gold in the throat and the spikes are very heavy. The trade has taken well to this new comer. There is plenty of lily of the valley in market in all grades, but at present it lags. Lilies are also abundant and have receded from the high prices prevalent for a short period. Carnations are scarcely to be found. Roses are still small and find little demand. Beauties are fairly good but prices favor the buyer. In orchids very little good material is seen. Cattleya gigas is about finished up and good cattleyas will be scarce until about the first of September when the labiataes will begin to bloom. The fashionable retail quarters are deserted.

The consensus of **PHILADELPHIA** opinion seems to be that business was above the average last week. The most noticeable feature was the shortage of good stock. A great deal of the material arriving is very, very poor. This is especially the case with roses and carnations. The hot weather of the past three months has been exceedingly hard on these crops and they are now showing the effects of it more than ever. The most satisfactory item at present is the aster. Asters are improving rapidly and may be said to be the standby at present—where good stock is wanted in quantity. Gladioli are also a leading feature among outside stocks, although they are showing the effects of the weather considerably. Both these and asters are best where they are grown under an irrigation system. This method of watering is a paying investment in a dry summer like the present and probably also in even the ordinary season for this latitude. The Beauty market is in healthy condition. What few are coming in bring very good prices. Marylands are fairly good and are also plentiful. So are Killarneys. Nothing good can be said of carnations. They are small, lack substance, and keep very poorly. There is quite a variety of outdoor subjects arriving—sabbatias, rudbeckias, petunias and many others.

PERSONAL.

Professor C. S. Sargent, of the Arnold Arboretum starts this week on a trip to Colorado.

Mr. Stumpp, of Stumpp & Walter, New York, is expected home from his trip abroad next Monday.

David Welch, of Welch Bros., Boston, has returned from his brief visit to the old country greatly improved in health.

Arthur Smith has resigned his position with the People's Gardens of Washington, D. C., to take charge of the estate of George D. Horst at Reading, Pa., consisting of 400 acres.

The five-year-old son of O. W. D'Alcorn, of Congress Heights, D. C., narrowly escaped losing his left hand in a cutting machine. The wound was an ugly one and required the taking of quite a number of stitches before it could be closed.

Miss Frances L. Holmes, eighteen years of age, daughter of Eber Holmes the rose grower of Montrose, Mass., has just won a scholarship at Radcliffe College. She led her class in German all the past year and got credit in all classes.

Frederick W. Taylor of Colorado has been appointed director of agriculture of the Philippine Islands, to succeed George Nesom, who recently resigned. He will enter upon his new duties early in October, with headquarters in Manila.

Mr. Taylor's appointment is expected to mark the beginning of the application of scientific methods in land culture in the development of the Philippines.

Mr. Taylor was chief of the department of agriculture and horticulture at the St. Louis world's fair, the Pan-American exposition at Buffalo and the trans-Mississippi exposition at Omaha.

Visiting New York: S. S. Skidelsky, of Skidelsky & Irwin, Philadelphia, Pa.; F. H. Kramer, Washington, D. C.

St. Louis visitors—J. T. Farney of M. Rice & Co., Philadelphia and Julius Dilhoff of New York were calling on the trade in interest of their firms, also boosting the S. A. F. convention at Baltimore.

Visiting Boston—J. S. Wilson, Des Moines, Ia.; W. J. Zartman, Supt of Parks and M. J. Kennedy, Park Commissioner, Brooklyn, N. Y.; Byron Worthen, Supt. of Parks, Manchester, N. H.; Frank R. Pierson, Tarrytown, N. Y. W. Ewing, Montreal, P. Q.; A. Weisse, representing Sachs & Co., Quedlinburg, Germany. Mr. Weisse reports seeds very scarce, especially peas and spinach.

PHILADELPHIA NOTES.

Paul Berkowitz and family of Philadelphia, are spending their vacation at Atlantic City.

Harry Bayersdorfer returned from his annual European trip, on the Kaiserin Augusta Victoria, Saturday, July 29, looking the picture of robust health.

Maurice Fuld has just returned from a sojourn at Atlantic City. He reports this Philadelphia adjunct as becoming a favorite spot of late for our New York friends. Frank Traendly, W. A. Manda, and many others were seen disporting themselves on the beach clad in bathing suits.

Samuel S. Pennock has been enjoying himself at the expense of his callus recently with a bouquet of red berries sent him by some Boston wag. Some would claim they were Strawberry, some one thing, some another—and others gave it up. Then the gleeful Samuel would break one open and show they were Boston beans dyed red and stuck on a wire. The dog days are surely here when our florists have time for such foolishness.

Visitors: Mr. and Mrs. William Walker, Louisville, Ky.; Mr. Deans, of the Hollingsworth Floral Co., Atlanta, Ga.; W. J. Stewart, Boston, Mass.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

CONSERVATION.

so the focused rays next day would light on dry leaves and other combustibles. The sun does its work and the innocent cowboy proves an alibi, for he is fifty miles away. I met a range rider in the Rockies and had a long talk with him. He would say to stock owners, "You can put only so many head on this range and you must pay for it." "Not much, we have had this range and we are going to have it." He would tell them, "I represent the U. S. government. You cannot afford to have a war with 90,000,000 people." Often his life was threatened. All manner of trumped up charges were sent on to Washington and sometimes he had to face fire both front and rear. But those heroic men, like the mounted police of Canada, have convinced the ranchmen there is a law in the land and it must be obeyed.

In a terrible time like this, when most of our northwestern forests are tinder boxes, what could be done without our range riders and their system of fighting fires? Sometimes they are at it for 48 hours without let up. One man found two of them lying on the ground in the deep sleep of utter exhaustion. They lay as they fell and the ants were running over them. Perhaps these men took a little relaxation and then the cry goes up, "See those lazy fellows and the waste in the forest service." No figuring, you understand, of the waste of the fires and the ax. All manner of abuse was heaped on the chief forester, but there was a vision before him, one of ruin and desolation and he wrote, talked and pleaded till the tide turned and a great victory was won. A crisis came and issues involving hundreds of millions. The forester broke a piece of red tape and he must go. No matter that he stands for a great principle. No matter that he has given his means and his life to a great cause. But, thank God, the nation is fully aroused and our forestry system is established.

The People Aroused.

You can readily see the clashing of interests. Leading men in our Pacific Coast cities want the bars thrown down. The future may care for itself. They want the coal dug and the water powers to be exploited, and flocks and herds to have free range. It all makes business and we want business now. There never yet was a national park laid out or a forest reserve made, but what there was a tremendous protest. When the government made a reserve near Cass Lake, Minn., a howl long and deep went up. When we tried to have a park in the Wet Mountain valley and could have gotten a bill through Congress for one of the sublimest resorts, Colorado congressmen sat down on it. But slowly and surely the people are going to rule. This country is going to be saved. Not only conserved, but made more beautiful and attractive.

WASHINGTON NOTES.

There seems to have been quite a scarcity of cut flowers in the local market during the past week.

Mr. F. H. Kramer spent the early part of this week in New York to which city he went on business.

Work on the two new greenhouses of F. H. Kramer, together with quite a number of improvements to the

SITUATIONS WANTED

Scientific Farming, Fruit Growing, and other cultures. Gentlemen who own Farming Estates not on a paying basis should consult with the advertiser—stating acreage, etc.—who would undertake management on a commission basis, and make a big paying enterprise. Production estimates and values on one year's crops, and expenditures given for inspection. Apply Z. Z., care HORTICULTURE, 11 Hamilton Place, Boston.

A thoroughly practical Nursery and Seedsmen, and Fruit Specialist, would like an engagement either as a managing grower or as a salesman. Is also a specialist on grass seeds for golf links, lawns, or permanent agricultural pastures for hay or grazing purposes. Apply, J. J., care HORTICULTURE, 11 Hamilton Place, Boston.

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick, A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—One Furman Heater, seven sections, serial 3957, size 308, good condition. One Furman Heater, six sections, serial 5401, size 307. Needs one new section. Stront's, Biddeford, Me.

FOR SALE—Two water tube boilers, 100 H. P. each. Heine type; three tubular boilers, 66 inches by 38 feet; perfect condition and cheap. Armstrong Mfg. Co., Springfield, O.

FLORISTS' REFRIGERATOR—A show ice box at a bargain. W. W., care HORTICULTURE, Boston.

grounds in Anacostia, is progressing rapidly.

Leapley & Meyer, 905 G Street, N. W., have a very attractive window display. This consists of a rustic scene with a representation of the old bridge, the pond and the high bank of moss and stones at the rear. In the pond are the usual goldfish and turtles while on the bank is the "county jail" with "Jeff" looking out of the window and "Mutt" standing on the bridge viewing the scenery. This display causes a large number of the passers-by to stop in front of the window and should prove to be a good business-getter.

Work is progressing rapidly on the new undertaking of the Gude Bros., Co., on the old American Rose Company plant. One house, 50 by 450, is completed and planted with Radiance, Mrs. Taft and white and pink Killarney roses. Another house 125 by 250 is planted to asparagus plumosus. Three more houses are now under construction and these, when completed, will be planted to American Beauty roses, sweet peas, and carnations. The buildings are admirably situated on rising ground with a southeastern exposure. The Gude Bros. Co., expect to have about 100,000 square feet of glass on this new plant by October 15.

C. L. LINZ

Obituary.

Adam Berg.

Adam Berg, formerly a florist in Liberty, Ind., died in Hamilton, O., on July 16, aged 87 years.

Mrs. William H. Moon.

Mrs. William H. Moon, wife of the well-known nurseryman of Morrissville, Pa., died on July 22. She was a sister of Mrs. Walter P. Stokes.

Jeremiah Galbraith.

Jeremiah Galbraith, a landscape gardener for many years in New Rochelle, N. Y., died at his home on July 23, aged 76 years. He came to this country from Ireland when 26 years of age.

Alvah Coon.

This well known violet grower died of typhoid fever at his home in Rhinebeck, N. Y., aged 42 years. He had been ill for five weeks and was apparently recovering, when he had a relapse. He leaves a widow, one son and one daughter.

NEWS NOTES.

Manchester, Conn.—A 75 x 100 concrete storage warehouse is being erected by the C. R. Burr Nursery Co.

San Mateo, Calif.—A large water supply system is being erected on the property of the MacKorie-McLaren Co.

White Marsh, Md.—Lightning recently destroyed an acre of dahlias on the estate of R. Vincent, Jr., & Sons' Co.

Emeryville, Calif.—The greenhouses of William Kohler have been leased by T. Taniguchi who will use them for rose growing.

Yonkers, N. Y.—Harry Turner is superintendent at Greystone, the extensive estate of Sam Untemeyer. The grounds are most inviting. In the fine range of houses is a splendid lot of Celosia Pride of Castle Gould, the introduction of which has made the raiser famous.

Garrison, N. Y.—The beautiful grove of chestnuts at Castle Rock is threatened with extermination by a disease which has appeared beneath the bark and has up to the present baffled the efforts of the anxious Superintendent Wm. Ingalls to check it. Seven hundred trees were cut down during the winter and many more will follow. It has not affected any other species thus far on the whole sixteen hundred acres which are situated overlooking West Point and is surmounted with the handsome stone castle that is one of the sights of the Hudson.

Austin, Tex.—Commissioner Kone of the Department of Agriculture today issued permits to do business to the following nursery and florist concerns: J. F. Boyd, Nursery; W. G. Hegele, Stedman Fair and Isaac Garrison, Beaumont; Umholz & McCarty, Victoria; W. M. Malley, Port Lavaca; Mrs. S. A. Speer, Stowell; A. Middlehurst, Clark & Sanger, Victoria; C. J. Axelson, Bessie Weisinger and J. A. Larcomb, Beaumont; Mrs.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale and all soft bodied insects. An excellent cleanser for decorative stock.

Used as a spray you can rely upon it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material.

Prof. W. F. Massey, associate editor of the Market Growers Journal, replying to an inquirer for a remedy for black spot on roses, writes (July 1st, 1911):—"The Fungine advertised by the Aphine Company is worth trying on this disease. It is promising here as a fungicide."

\$2.00 per gallon, 75c. per quart.

A Greenhouse Suggestion

If a fifty foot house divided into two compartments will answer your purposes for the present, how about this one? Yes it is our iron frame construction and you can just as well have it with curved eaves if you want it. In fact, we believe the curved eave house, the way we build it, has advantages over this one, and that it is superior to other curved eave constructions. There's no lighter house built, that's sure, and for endurance—we'll just drop us a line and let us send you a catalog and explain exactly how our curved eave house is built, and then you won't question its endurance for a minute.

Then besides, you'll like our pleasant way of doing business.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 350 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Piersoni, 6-in. pots.....\$0.50 each
Nephrolepis Elegantissima, Piersoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each
Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

Farquhar's RARE LILIES FROM CHINA

Hardy, Beautiful, Fragrant. The Finest Novelties Extant

Lilium myriophyllum

AWARDED SILVER MEDAL BY MASSACHUSETTS HORTICULTURAL SOCIETY, JULY 15, 1911.

LILIUM MYRIOPHYLLUM, Mr. E. H. Wilson, the famous plant collector, collected for us the bulbs now offered, in North-western China. He considers this the finest of all lilies. It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink and with a beautiful shade of canary yellow at the centre, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the jasmine, and lacking the heavy oppressive odor of most lilies. Blooms out-of-doors early in July.

Orders looked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

LILIUM LEUCANTHEMUM The bulbs offered were also collected by Mr. Wilson. This is one of the strongest growing lilies frequently attaining a height of six to eight feet. The flowers vary in number from five to ten on a stalk, and in size and shape resembling *Lilium Harrisii*, greenish white shaded purple on the outside, and of the purest white within with a tint of citron in the centre. The flowers have a pleasing fragrance. This lily will undoubtedly be largely used for outdoor planting as well as for forcing. Many consider it the finest of all tubular-flowered lilies. It flowers somewhat later than *Lilium myriophyllum*, and being of larger growth, has a distinct place.

Orders looked now for October delivery. Bulbs each, \$1.50; dozen, \$15.00.

Summer Flowering Orchids

During the months of July and August the display of orchid bloom is very meagre as compared with that of the other ten months of the year; but as the demand for this class of cut flowers at this season is also small, enough good material can always be had to supply the demand.

Cattleyas, of course, take the lead all the year around.

STANHOPEA WARDII.

The early summer flowering varieties, such as *C. Mossae*, *C. Mendeli*, *C. Gaskelliana* and a few others have gone by and *C. Harrisoniae* took their place to be closely followed by the beautiful *C. gigas*, which will soon be at its best here. In some warm localities it will start to flower much earlier, but here it doesn't flower much before the middle of August and some of the plants can be held back until October by keeping them cool and dry. It would not be wise to try to hold them any longer than that, because *C. labiata* will be at its best by that time.

Cattleyas, however, are not the only good orchids to be had at this time of the year. Wherever a general collection of orchids are grown there will be found quite a number of useful as well as beautiful species in bloom during this dull season. Among the East India orchids some of the *Vandas* and *Aerides* and allied species flower at this time. *Aerides quinque-lobatum*, a native of the Philippine Islands is making a beautiful display here just now. The flowers are very sweet-scented, waxy white spotted purple, the sepals and petals tipped off with the same color. *Vanda Batemani*, also from the Philippines, is a strictly summer-flowering orchid, producing its lovely flowers on long stout stems from early July until September or still later. Would be excellent

for large assemblies as the flowers have great lasting qualities.

Cypripedium calceolatum and a number of hybrids and other species, together with the nearly allied *Selenipedium* in variety, tend to make things interesting and for cut flowers they are hard to beat. A number of *Epidendrum* flower nearly all summer and some of them—for instance, *E. praenaleatum*, *E. vitallinum*, *E. coelestia*, etc., are not to be despised, for the color and lasting qualities of most of them are all that can be desired. Where *Phalenopsis Aphrodite* and *Ph. amabilis* are grown in quantity a few of them will always be in bloom. *Ph. Luddemanniana* flowers during June and July and while not as good as the former, the flowers will last much longer either cut or on the plant.

Oncidium papilio and *O. Krameri*, better known as the Butterfly Orchids, keep producing their curious flowers at intervals nearly all summer and they are quite showy, being a bright yellow, blotched and mottled with chestnut brown.

This does not exhaust the list by any means, but it would be tiresome reading to mention them all. A few, however, I would like to draw attention to, which are very interesting and some very beautiful, but of little value as cut flowers for they will not last long after being cut.

Nearly all *Stanhopeas* flower during the summer months and all of them are beautiful in form and color and most of them fragrant; the construction of the flowers, particularly the lip, is wonderful and one wonders why nature goes to such extremes. The different species of *Catasetums*, *Cycloches*, *Mormodes* and allied species usually flower about this time and all are ex-

STANHOPEA IN BLOOM.

ceedingly interesting on account of their unusual habits and the peculiar formation of their flowers.

LIBRARY
RLE YERB
BOTANICAL
GARDEN

Water Lilies

In all gardens in public parks where water exists, aquatic plants should at all seasons of the year form one of the most interesting adjuncts, and though the majority of them are seen to the best advantage during the summer and fall months, there are many which, if planted with a knowledge of their capabilities, will produce very interesting effects during the winter months. Aquatic plants, of course, vary much in their likes and dislikes and considerable acquaintance is necessary with them to ensure success, but whether one has to deal with natural ponds or streams or artificially made pools, there is a very wide selection capable of being used for all purposes.

In the near future I hope to give a list of a variety of water plants for the benefit of those who may not have been able to see large collections for themselves, but all who have had opportunities of growing them will, I am sure, agree that the *Nymphaea* or water lily is the queen of aquatic plants. The native species have always been among the most highly admired of our natural flora and nothing could present a more beautiful spectacle than when they are seen growing with such great freedom in our rivers and streams.

During recent years, however, the hybridists have been busy with them and we have now a great variety to select from, some of which have been evolved by nurserymen in America, but the majority produced by the late M. Lefebvre Marliac of France. All Marliac's varieties are remarkable for their vigor, the great size of their flowers and their extreme hardness.

The best time to plant water lilies is from the middle of the end of May, but if one obtains them from a nurseryman it is advisable to pot them at the beginning of that month and either pot them up or place them in baskets in a mixture of heavy loam and cow manure, about equal parts, of the latter to four-fifths of the former, and stand them in a tub or tub of water for two or three weeks until signs of growth are evident. By that time they may be safely transferred to their permanent quarters, and nothing suits them better than a good stiff loam or heavy clay soil. How deep to plant them must of course be decided by the variety, but all of Marliac's varieties and similar sorts will rejoice in three feet of water, while the smaller-growing varieties will be satisfied with one foot to eighteen inches. Wicker baskets are the best thing I know of to plant them in as they grow them as soon as the plants have taken root and do not need any further attention—that is, if one is planting the small varieties, but the commoner kinds can be safely put in a bucket or other article which will sink them and the plants will naturally take root.

Water lilies grow best in still ponds where the water can be changed if necessary by an artificial outlet, but they will also succeed admirably in streams where the stream is slow, but they object to swiftly flowing water. When water lilies are naturally fast growing plants and can be easily propagated by removing a foot of the stem to which a crown is attached in the spring and planting as previously advised. With those that are planted in shallow water protection may sometimes be necessary in winter to prevent frost getting down to them, though it is not often that we are troubled with more than eighteen inches of ice.

A Lawn Problem

It is often a problem as to how to furnish grass under trees so as to have it attractive in summer, and it may be safely assumed that it is out of the question unless plenty of moisture is available. We have come to the conclusion that there is no drier spot than under a handsome tree on the lawn, the roots of which form a system of drainage that is perfect in that it breaks up the soil formation, as well as absorbs moisture by its thousands of growing rootlets. It was put forth at one time with some degree of authority that trees poisoned the soil and the condition of lawn grass under the same was used as evidence, but we found that in the effort last winter to nourish lawn trees by the application of a liberal dressing of ground bone, there are no traces of weakness but on the contrary the grass is wonderfully vigorous.

It may be that some soils do not need bone for we hear of poor results from its use at times, but where it agrees with the chemical composition there is no better way to rejuvenate. Where much water is used the roots of the grass are sometimes washed bare and weakness follows, a sure forerunner of weeds, especially where the natural manures are used as a rejuvenator. Where plenty of soil from the greenhouse benches is at hand as often happens at this time, it is well to mix plenty of bone with it and spread thinly over the lawns adding a sprinkling of grass seed at the same time. We do not screen it first, but sweep the lawns with a broom to brush it in and in this way all small stones are gathered up with other undesirable particles, and it is a revelation how little distances a load of soil will go when applied in this way.

Chemical fertilizers are good, but it always seems best to mix them with soil before spreading or the appearance of the lawn will be streaky after it begins to grow, owing to the difficulty of sowing evenly, and it must never be applied while the grass is damp as there is danger of injury if the fertilizer is easily soluble. Another source from whence good material can be obtained for lawns is the burnt rubbish heap. When enough has accumulated it should be screened because of the danger of nails, and if the sod needs leveling in places, roll the turf back far enough to take out the depression, fill up with burnt material, relay the sod and level up with a straight edge after tamping or rolling. This is best done in the fall months as early as possible after rains are frequent.

There has been much discussion about the use of white clover in lawn seeding, but there is no question that it makes the best lawn though some object to it on tennis courts because it makes them slippery at times, but for good appearance even in a dry season the clover holds out by remaining green longer because of its deep roots, spring and recovers from a drought quicker than the grass.

The summers seem to be getting dryer, and had it not been for the thunder showers this season we would have had no grass. A steady rain has not fallen since early last May, and the lawn question is ever with us, for, after the trees, even before the flowers, comes the lawn as a setting for the homes of those who live not in cities, and when one sees the thing well done it is oftentimes a source of envy.

Lake Forest, Ill.

Seasonable Notes on Culture of Florists' Stock

CARE OF ADIANTUMS

Beds of this fern root have been cut from and are now in a denuded condition, will require but very little water until the new fronds begin to show numerously. After a short period of rest and when they resume activity in frond growth, they will be greatly benefited by a mulch of from a half to an inch of two parts of cow manure that is well rotted, to one of good loam. The crowns soon work above the surface and require a top dressing after each crop. These efforts will build up strong crowns. When the beds are covered with a growth of 4 or 5 inches long, feeding can be given regularly of cow manure and soot. This gives the foliage a fine dark green color. Give them sufficient shade so they will not burn or lose their color. This shading should be gradually removed after this month, so that by the end of October they will have full sun. When you have a fine crop of fronds be very careful during cloudy or chilly weather not to water too much. It is safer to allow the soil to become rather dry and keep the surface well stirred so as not to endanger the crop of fronds. If you are bothered with snails lay bait of lettuce or cabbage leaves and look these over once or twice a day; also scatter lime about their haunts.

CHRYSANTHEMUMS

Plants that are destined to figure in the coming exhibitions should have their last shift sometime before the close of this month. A good compost to use is to one ordinary cart load of rose soil that contains at least one-third of cow manure add from one to two bushels of pulverized sheep manure, half a bushel of soot and about sixty pounds of fine ground bone. Mix this thoroughly before using. This will produce leaves, stems and flowers full of vigor. In potting be very careful to have the drainage perfect for without it you cannot have good growth. So that they have painstaking training and tying up to the very last day, so as to have them perfect in form. If you hope for any success with these plants, it is absolutely necessary to give an abundance of room on a bench not too far from the glass. When you see that they need moving do it at once. Give plenty of fresh air throughout the day and night, together with an abundance of moisture, maintained by watering the soil as they may need it, by syringing the plants several times daily and by wetting down walks, which induces an atmospheric humidity throughout the house that is congenial to their growth. Keep up a diligent fight against the black aphid.

ORCHIDS

Many species of dendrobiums such as *Dendrobium nobile*, *Wardianum*, *Jamesianum*, and others that will now be finishing up their growth should be removed to a cooler house that is very lightly shaded so as to prevent a second growth. Later you can give them a more airy, cool, dry and sunny quarters which will induce them to ripen up their growth. To avoid any unnecessary check, the change should be gradual. Very little water will be needed at the roots during this rest, but

give a gentle syringing over the plants on bright days, which will help to keep the canes in good condition. All cattleyas that have completed their growth should be placed at the shaded end of the house or where they can be given a low amount of air. The quantity of water should be lessened until only enough is given to keep the plants from shriveling. All those that are in active growth will require an abundance of water at the roots with a light syringing overhead two or three times a day. Damp the floors and benches.

PELLARGONIUMS

It is now time to prepare for the propagation of these show plants. Lay the old plants on their sides for the next two or three weeks and keep them almost dust dry. This will give several degrees of hardness to the wood which is to be used for cuttings. These can be put in the cutting bench and given a slight shade and kept in a moderate moist atmosphere. When rooted they can be potted into 2½-inch pots using good soil. If you wish to save the old plants cut all last year's growth hard back, leaving about an inch or two of the current year's growth and keep on the dry side until they show signs of breaking nicely. They can then be turned out of their pots and all the soil shaken off. Trim any straggling roots so that they can be placed in as small pots as possible using a light compost to pot them into. They should be given water sparingly at first until the pots become filled with roots, but at no time should they be given an excess of water at the roots, for they are very exacting as to this.

POINSETTIAS

Now is the time to put in a lot of cuttings for the filling of holiday receptacles, principally pans and fancy dishes. Keep the cuttings shaded and see that sand is kept moist, with light spray every day over the foliage and in about three weeks they will be ready for 2½-inch pots. The young plants should have frequent sprayings and be kept shaded until they take hold of the soil. When they are established give them a bench where they can have full sunshine with plenty of water and you will have plants with good foliage which are always salable. The earlier struck cuttings which are in 3 or 4 inch pots can now be planted out in a bench of five inches of a compost of two-thirds heavy turfy loam, to one-third of well rotted manure. As the nights get colder maintain a minimum temperature of 62 degrees at night.

ROMAN HYACINTHS

These bulbs are due to arrive now any time, so get a number of flats together as soon as possible. The top of each bulb should be, when planted, even with the surface of the soil. Make the soil around the bulbs moderately firm. Give the flats a good thorough watering before covering them with four inches of soil or whatever material you may use. Besides this first good watering, unless we have frequent rains, the beds containing the flats should have a good soaking once a week. When the bulbs are well rooted they can be brought into a good light house and at a temperature of 60 degrees they will be in flower in seven or eight weeks.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Cyclamen; Hardwooded Plants; Bouvardias; Geranium Cuttings; Marigolds; Roses.

NO. 7

Page and half page space, special rates on application.

The Society of American Florists assumes, **Vox populi** as has been well said, a grave responsibility in the matter of the election of a Secretary to follow Secretary Dörner who has declined to be a candidate for reelection this year. We are not those, however, who see danger in the time-honored method of selecting this important official and who would favor taking the privilege as now exercised away from the Society and vesting it in the Executive Board. Whatever individual views may be as to the wisdom or unwisdom of the Society's selections in the past, there **should** be no question that an Executive Board would have done any wiser or done any better and there is always a serious danger in any action calculated to widen the gap and lessen the element of personal fraternal relationship between members and officials, especially in an

organization unfixed as to locality and somewhat nomadic in its nature as is the case with the S. A. F. The enthusiasm born of rivalries in the selection of officers in a Society so constituted is always a powerful factor in inducing attendance at conventions and assuring presence at the sessions where such matters are decided. Of course, human nature is not infallible and grave mistakes are possible, but it is our honest belief that the rank and file of the S. A. F. members will compare favorably with those of any organization in the country in the matter of judgment and common sense in the management of their affairs and can be trusted.

HORTICULTURE has been doing what it could, as our readers are aware, to induce the florist who deals direct with the public to help push along into greater popularity the window-box idea and to encourage the more general use of this and similar decorative features in connection with city buildings—public and private. Properly fostered by the trade—who surely have the best of reasons for such industrious exploitation—this department of the florists' business might quickly be multiplied to many times its present volume. That there are many ways in which improvement can and should be made will be plain to anyone who will devote a little time to an inspection of the examples seen here and there in the windows, porches and balconies of hotels and residences. There is room for the exercise of better mechanical ability in the construction of the boxes themselves as to design, material and color, and above all as to practical fitness for the best welfare of growing plants. If the object were to kill off the plants as quickly as possible some of the so-called jardinières could not be better adapted to that end. We have known plantings of excellent material, well arranged and adequately cared for, to be ruined by the use of paint or other coating on the inside of the receptacle. Watertight tin boxes are a prolific cause of disappointment and unlined metal cases that get almost red hot in the summer sun are another. Florists should interest themselves in these things as well as in the furnishing of good plants of suitable kinds as in the case of failure the blame and discredit are sure to be laid at the florist's door no matter how well his own particular part has been done.

Vegetables Under Glass

CUCUMBERS

Plants started now and until the first of September should be in crop by early November and in full bearing by Thanksgiving. The soil for cucumbers should be a good turfy loam, but not too finely broken up, for when it is rougher it insures the freer passage of water better. A good compost to use is to three parts soil, use one part of some well decomposed manure. When raised benches are used (and I think these are the best where the pipes run underneath, thereby giving them bottom heat which is congenial to their growth), make hills by placing four or five shovelful of soil four feet apart, which is a better plan than to fill the benches full up. Some little time after planting the young plants will utilize these heaps of soil. Just as soon as

you see the roots working their way to the outside of the hills, more soil should be added. The compost that is supplied this way should be made richer than that first used. Cucumbers require a night temperature of from 60 to 65 degrees with a rise of 15 to 20 degrees during all bright days. As the nights get cooler and your house runs below 65 degrees it is best to have a gentle warmth run through the pipes. To have the house shut up without a little heat often produces a check or fungus and mildew. Ventilate carefully so that no cold draughts are caused. Increase your air gradually and reduce it the same way thus keeping an even temperature. Keep up a nice degree of moisture in the atmosphere by damping down the house two or three times a day.

LETTUCE

To have a crop of lettuce ready in November, sow your seed any time from now up to the 25th of this month. For this crop cold frames are better than placing them in a house, as the plants do better and are much more easily handled. You can make three or four sowings for frame work, at intervals of every ten days or two weeks, making the last sowing about the middle of September. This will give you lettuce up to the middle of December. For inside forcing you can sow any time from the 20th of September on. If sown by Sept. 20th your crop will come in about Christmas. It takes from three to three months and a half from sowing to maturity, according to weather conditions. Lettuce will not stand pushing, so when the nights get so that you can control the temperature keep a night temperature of from 40 to 45 degrees with a rise of from 10 to 20 degrees by day, according to the brightness or cloudiness of the weather. They do well in any good rich loam that has been mixed in the proportion of three parts soil to one part manure. The varieties to be grown will have to be selected according to what is in demand. Boston Market, Golden Queen and Glass House are suitable kinds to grow.

TOMATOES

This crop under glass is a growing industry. From early winter until early summer there is always a demand for good tomatoes. Now is the time to start for early winter, sowing the seed thinly in boxes. Keep shaded until they start to come up then keep as near the glass as possible. When they can be handled, pot off into 3-inch pots. As soon as these pots are filled with roots they can be planted. I think the single-stem method of training is the best. If the benches are three feet wide you can plant two rows, two feet apart in the rows. When the plants get from 12 to 18 inches high they will throw a number of side shoots which should be pinched off so as to concentrate all the strength of the plant into the one stem. Attend to tying up and training as they grow. Keep the house at 60 degrees at night as they require a uniform and high temperature to grow well. If you want a good set of fruit you should hand-pollinate every day. When the first two or three clusters of fruit are well developed you can start to give them some liquid manure, once or twice a week. Keep the atmosphere rather dry and also the soil, but when watering them do it good, and then let them go until they are covered all over again. They like a night temperature of from 58 to 62 degrees.

John J. M. Farrell

BALTIMORE

The Metropolis of the South

From Robert Manning's Sketch of the History of Horticulture in the United States we learn that "in 1823 Samuel and John Feast began cultivating trees, plants and vegetables in Baltimore, on the Frederick road, and were the first to offer plants for sale in the public markets of Baltimore."

In Downing's Horticulturist, Vol. 1, No. 1, July, 1846, we find the following note in connection with the account of the proceedings of the Massachusetts Horticultural Society on February 14, 1846:

"To Samuel Feast, Esq., of Baltimore, they have given the Society's Large Gold Medal as a special premium for that beautiful seedling Rose originated by him, the Queen of the Prairies, which they consider the type of a new class of Roses, and without a rival in this climate for pillars, arbors, etc." Another beautiful and popular rose by the same raiser was the Baltimore Belle.

Ever since those early pioneers laid the foundation, Maryland has more than held her own in the floral line. Whether it has been roses, camelias, chrysanthemums or other flowers, Maryland perfection has made many of these typical in excellence. Maryland roses grace the lawns of many States, and are admired by legions of flower lovers, as well as florists. Many beautiful roses have originated on Maryland soil, the result of intelligent, enthusiastic study and experiment made by nature students whose fame will live long after they are called to their eternal flower abode.

Among those who have produced roses of beauty and quality is John Cook of Baltimore. Some of his creations are Souvenir de Wootten, Admiral Schley, Marian Dingee, Cardinal, My Maryland, Radiance and others. Mr. James Pentland in his day was also quite a rose enthusiast, as well as an extensive grower of camelias. Among the roses Mr. Pentland produced and disseminated are George Peabody and Woodland Margaret. Edward Kress of Baltimore, is the latest addition to the rose originators. A number of handsome chrysanthemums have been raised by Baltimore florists. E. A. Seidewitz a few years ago introduced some fine seedlings, and Paul Binder, at one time gardener for Mr. Parr of Lutherville, Md., also raised some very creditable seedlings. Samuel Feast, James Pentland and Robt. J. Halliday were all great camelia fanciers and had large greenhouses exclusively devoted to their growing. Up to several years after the war, camelias in Baltimore were the style, and graced the bosom of the Baltimore belles in their evening parades on the fashionable avenues. In 1880 Mr. Halliday published a very thorough and practical treatise on the culture of the camelia. The carnation Genevieve

Lord was raised and introduced at Oakland, Md., by H. Weber & Sons.

The tendency to suburban villas has seemed to lessen the interest in greenhouses in the city. At one period Baltimore was famous for its conservatories attached to the residences of wealthy people. Not only were flowers raised, but immense quantities of magnificent hot house grapes were produced. In those days the old Horticultural Society had grand shows, and the display of hot house grapes made by Messrs. Wm. T. Walters, W. W. Spence, Wm. Fowler from Clifton (which was then the home of Johns Hopkins and is now Clifton Park), Geo. S. Brown, Jno. W. Garrett, W. H. Perot, Breckenridge, Raisin and others was remarkable.

Among the many fine estates in the vicinity of Baltimore now are the following: "Hampton," which has been in the Ridgely family for ages. The present owner is Captain John Ridgely. This estate originally comprised upwards of three thousand acres. It now has about one thousand acres. The residence is a fine example of Colonial architecture with two splendid fronts. There are many rare and beautiful trees, among them two splendid specimens of the Cedar of Lebanon. On the east side are three terraces, two of which are adorned with quaint boxwood borders within which the flowers are planted. "Uplands," the estate of Mrs. Henry Barton Jacobs, is a grand place with over forty acres in a wonderfully well-kept lawn. The entire tract comprises many hundred acres. There are magnificent oaks and many remarkable conifers. Mrs. Jacobs has many greenhouses and produces rare orchids in profusion. She is a very liberal contributor to the State horticultural shows, and "Uplands" exhibits of plants and flowers are always the attractive features.

The country place of Wm. Lanahan near the city is noted for its handsome lawn of thirty-five acres, the splendid big oak trees and varied assortment of flowering shrubs.

Gustav Lurman, near Catonsville, has a fine Colonial mansion and handsome grounds surrounding it. The garden style is strictly Colonial. The conifers are among the finest in the State.

Probably one of the handsomest horticultural displays on private property is that on the estate of Ex-Governor Warfield, and much credit is due Mr. Charles Wood, its gardener. Evergreens, arbor vitae, palms and various foliage plants are placed artistically around; a box hedge surrounds the garden, and in the center is a pool with rocks adorned with ferns and umbrella plants which are constantly covered with spray from the fountain which fills the pool. In the pond is a quantity of

"MARYLAND, MY MARYLAND."

There is no other land so fair
As Maryland—
So filled with friends, so free from care
As Maryland.
And none will ever seem to me
So good and beautiful to see;
For no place else can ever be—
Just Maryland, "My Maryland."

From year to year all days are glad
In Maryland.
'Tis only leaving makes hearts sad
In Maryland.
Her women—noblest are on earth.
Her men are of most sterling worth—
Faith, hope and loveliness gave birth
To Maryland, "My Maryland."

A land of milk and honey—God
Made Maryland;
The fairest sky the greenest sod
Gave Maryland.
Then said that henceforth it should be
From tyranny and famine free—
The home of hospitality
God's land, "My Maryland."

Go where you will, stay where you may,
In Maryland;
You'll wish forever there to stay.
In Maryland:
From North to South, from East to West,
Of all earth lands it is most blessed:
Tho' it were not, I'd love it best
It's Maryland, "My Maryland."

goldfish. The house is covered by a climbing rose planted fifty years or more ago by the first occupants of the estate. During the winter the garden will probably be covered with a portable conservatory, so made that it may be taken down again next summer. Mr. Wood has also artistically decorated with plants the roof of Governor Warfield's garage and this will prove to be one of the show places during the coming convention. A fountain is in the center of the roof.

FRUIT GROWING IN MARYLAND

Fruit growing in Maryland is a very important industry from which a very large revenue is realized. Comparing the size of the State with other States, Maryland would probably be classed as the greatest fruit growing State in the Union. No other State can equal the diversity of her fruit products, or excel them in appearance and delicious quality. From the mountain regions come magnificent apples, luscious peaches, and delicious pears, and the various small fruits. And these products are generally raised throughout the State, from mountain top to the ocean beach. Of course the varieties of apples, peaches and pears vary in kind in the many sections, as some varieties do better in certain sections.

In Southern Maryland, especially in the part known as the Eastern Shore, where it is declared the Garden of Eden was located, the climatic conditions are such that what might be classed as tropical fruits are profitably grown and of wonderful elegance. At one time in this section the peach orchards were conspicuous, and it was the fruit from these same orchards that years ago gave Maryland peaches a national reputation. War, yellow fever, and other conditional troubles came, causing neglect in the orchards, finally resulting in their being completely abandoned.

For years thereafter there was no interest manifested in fruit growing. The older people seemed discouraged and even the sons of the men who had been famous peach growers did not seem to have any desire to revive the business. A little later on the mountain lands of Western Maryland, especially in Washington county, began to develop into peach orchards. The experiment was a revelation. Today the available mountain slopes, the picturesque foothills and even down in the fertile valleys, all are covered with grand orchards.

Peaches were produced first, but now the apple is just as great a success. Today Washington county orchards remind one of the famous orange region at Riverside, California. Orchards here, there, everywhere you look. Not ordinary orchards, but those that are orderly, in straight precise rows, well-kept, every tree symmetrical, and with luxuriant dark green foliage that denotes perfection in health.

Washington county is said to have the largest continuous apple orchard in the world, nearly ten miles, owned

by one man, Mr. Nicodemus. In this section the past spring the acreage in new orchards was a record breaker. The number of trees count far up in the thousands. The prevailing method of putting in a new orchard is to plant apples and peaches alternately. By the time the apples come into profitable bearing, the peach trees have served their usefulness and are removed and an exclusive apple orchard results. New orchards in every county in the State were put out last spring. In the tide-water counties, in the near future, the peach will again become prominent, for there are many orchards that will commence to yield fruit next year.

The State horticultural exhibition last winter in Baltimore surprised everyone with the grand display of apples that had been grown in the State. It was also a greater surprise to see that quality apples of the same variety came from so many sections of the State. Apples from the eastern shore tide-

water counties came in for a liberal share of blue ribbon honors. This seemed strange as it had been concluded that it was quite impossible to raise apples there, because of the climatic conditions, etc. Theory alone caused these conclusions. Practical demonstration proved otherwise. Years ago Kent county was famous for the excellence and great variety of pears produced there. Capt. R. H. Emory was the pioneer pear raiser and expert authority on pears. His orchard production of both pears and peaches gave him a deserved reputation. After his death his son took charge of the orchards and has also been very successful.

The small fruit industry in Maryland is very extensive and a great revenue is derived from it. The eastern shore is the main section where the small fruits are extensively produced. Strawberries are shipped in great quantity to the eastern states. An idea of the magnitude of the strawberry "patches" can be gained when it is a fact that at one station, Marion, the station agent showed the writer that the average daily shipment

in the height of the season was twenty-five carloads of crated strawberries.

At Ridgely, Caroline County, last fall the Armour's of Chicago built an immense factory for making preserves. They pay the strawberry growers six cents a quart, return all boxes to the growers. Farmers are increasing their strawberry acreage and say selling thus at home with no losses of baskets or crates is proving more profitable than shipping. The factory can handle one hundred thousand quarts, or more, a day. Raspberries, blackberries and other bush fruits are grown and shipped to the markets. Growing cantaloupes is very extensively carried on in Wicomico County. There is one grower, near Salisbury, who often has over 100 acres in melons. His average shipment, when the season is on, is three refrigerator carloads daily. Boston, Pittsburgh and New York are their destination.

Nut growing is becoming quite an interesting feature in some sections of the State. Fine pecans, English walnuts, almonds, many varieties of hickory, black and white walnuts, Spanish and Italian chestnuts, etc. The chestnuts do well and come into quick bearing if grafted on the native chestnut trees. More tomatoes are grown in Maryland than in any other State.

BALTIMORE'S HOSPITALITY

Baltimore is a most hospitable city as has been experienced by members of the craft who have had opportunity to visit their fellow florists and nurserymen there. The American Carnation Society met in Baltimore in 1901 and the methodical well-trained manner in which all the details of business and entertainment were carried out was a surprise to the visitors.

On two occasions previously has Baltimore made an earnest effort to induce the S. A. F. to hold its convention there but in each instance failed to land the prize. In 1891 at Toronto, Washington and Baltimore were keen rivals for the 1892 convention and Washington won. In 1902, when Baltimore tried again, Milwaukee vanquished her. Yet when the Society met for the second time in Washington, in 1905, Baltimore's public spirit and large-hearted generosity overcame all thought of former disappointments and although the city was only beginning to recover from the appalling devastation of the great fire, Baltimore asked for and was granted by Washington the privilege of assisting in the entertainment of the visitors on one afternoon specially set apart for that purpose. How well the affair was carried out those who were fortunate enough to participate in that drive through the city and sail on the bay will never forget. And now after twenty years of patient waiting the Monumental City has attained her ambition and the National Society is to meet within her hospitable gates.

In the "Traveling Recollections," by Thomas Meehan in the Gardeners' Monthly for October, 1874, appears the following characteristic attestation to the old-time Baltimoreans' approval of the adage that "All work and no play makes Jack a dull boy:"

"Baltimore florists seem to have a better time of it than most of their brethren. The writer of these sketches made a number of calls, but this one was gone fishing, another was on a picnic down the river, and others 'were gone to New York,' 'to Boston,' 'to Philadelphia,' and various other places of which we have some recollections of having heard. We were, however, kindly permitted to run through the establishments by those in charge. It was pleasant to note that they were all generally prosperous, though they might probably be more so if they were all more alive to modern improvements."

BALTIMORE'S PARKS

Baltimore has a number of splendid parks, of which Druid Hill is the principal and the most famous. Thomas Meehan, in the article from which the foregoing quotation was made, has this to say of Druid Hill Park:

"Druid Hill Park is sure to be found 'at home,' though all other attractions are away. The best time to see this is towards evening, when the lights and shadows rapidly change away. The land is so rolling and so beautifully wooded, that this play of the shadows is particularly effective. Like most parks of any extent in American cities, this one is in connection with the city water works, which gives it the advantage of large sheets of water in the extensive reservoirs around which the most striking drives are led."

"The park is one of that style called natural, and of which people often boast that it is ready made from the hand of nature, needing nothing but a few roads and walks to make it a perfect specimen of landscape gardening. To be sure these places are oftener greater credits to the gardener's art, little though he may do in these cases to deserve credit, than many places wholly made. The defect in these natural parks is chiefly in the great sameness they present. A drive through a hundred acres is usually as good as if through a thousand. Hearing so much praise of the Druid Hill Park as one requiring no aid from the landscape gardener, we were prepared to expect much of the usual monotony. It is a pleasure to say, however, that circumstances have favored a great variety of scenes and peculiar features. The landscape gardener seems to have caught the spirit of change which the natural features present, and we think it more than likely that for a 'natural park,' Druid Hill will be made in time one of the best in the world."

LOOKING BACK

There is much that is historically interesting in Baltimore, but that part we shall not touch upon here other than to say that the subject of our cover illustration is one of the most notable objects in the city—the Washington monument, 163 feet in height, built entirely of marble and the first monument erected to the memory of Washington. As showing the progress made by Baltimore, in common with other American cities during the past sixty years, the following notes which we have copied from the Universal Gazeteer published in Boston in 1853, will no doubt interest our readers:

"The Baltimore and Ohio Railroad extends from the city to the Ohio River at Pittsburg, 300 miles. Many cars are already in operation upon the railroad. Some of them are drawn by horse power, some driven by steam and some by wind. The cars with sails go sometimes 25 miles an hour and can lie within 4 points of the wind. The whole distance from Baltimore to Pittsburg, when completed, will be traveled, according to estimation, by horse power in 30 hours, and by steam in 20. Baltimore has 80,625 inhabitants."

OUR NEXT ISSUE

will contain a full account of the proceedings at Baltimore up to Thursday noon, with description of the exhibition and other interesting convention news.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

Twenty-Seventh Annual Meeting and Exhibition, Fifth Regiment Armory, Baltimore, Maryland, August 15th, 16th, 17th and 18th, 1911

OFFICERS OF THE SOCIETY.

PRESIDENT—George Asmus, Chicago, Ill.

VICE-PRESIDENT—R. Vincent, Jr., White Marsh, Md.

SECRETARY, H. B. Dorner, Urbana, Ill.

TREASURER Wm. F. Kasting, Buffalo, N. Y.

Executive Board.

For One Year: W. J. Vesey, Eugene Dailledouze.

For Two Years: W. N. Rudd, Robert Craig.

Illinois (North) Fred Lautenschlager, Chicago.

Illinois (South) J. F. Ammann, Edwardsville.

Indiana Theo. Dorner, Latayette.

Iowa James S. Wilson, Des Moines.

Kentucky—H. G. Walker, Louisville.

Louisiana Harry Papworth, New Orleans.

Maine—William Miller, Bar Harbor.

Maryland—Chas. L. Seybold, Baltimore.

Massachusetts (East)—W. A. Hastings, Boston.

New York (East)—A. L. Miller, Brooklyn.

New York (West)—S. A. Anderson, Buffalo.

Ohio (North)—Frank A. Friedley, Rocky River.

Ohio (South)—C. E. Critchell, Cincinnati.

Pennsylvania (East)—S. S. Skidelsky, Philadelphia.

Pennsylvania (West)—W. J. Smith, Pittsburgh.

Rhode Island—L. J. Reuter, Westerly.

CONVENTION HEADQUARTERS, FIFTH REGIMENT ARMORY

For Three Years: E. Allan Perce, H. A. Bunyard.

Ex-Officio: F. R. Pierson.

State Vice-Presidents.

California—Edwin Lonsdale, Lompoc.

Connecticut—Wallace R. Pierson, Cromwell.

District of Columbia—Z. D. Blackstone, Washington.

Florida—C. D. Mills, Jacksonville.

Georgia—Daniel C. Horgan, Macon.

Massachusetts (West)—G. H. Sinclair, Holyoke.

Michigan (East) Norman A. Sullivan, Detroit.

Michigan (West)—Elmer D. Smith, Adrian.

Missouri—Fred H. Weber, St. Louis.

Mississippi—S. W. Crowell, Rich.

Nebraska—John J. Hess, Omaha.

New Hampshire—R. E. Hannaford, Portsmouth.

New Jersey—Ant. C. Zvolanek, Bound Brook.

Tennessee—C. L. Baum, Knoxville.

Texas—Eugene Corley, Dallas.

West Virginia—A. Langhans, Wheeling.

Wisconsin—J. E. Matthewson, Sheboygan.

Canada: Ontario—John Connon, Hamilton.

Manitoba—H. E. Philpott, Winnipeg.

Quebec—George A. Robinson, Montreal.

Alberta—A. M. Terrill, Calgary.

Botanist: Prof. J. F. Cowell, Botanic Gardens, Buffalo, N. Y.

Pathologist: Prof. H. H. Whetzel, Ithaca, N. Y.

Entomologist: Dr. S. A. Forbes, Urbana, Ill.

Washington Representative of the Society: William F. Gude, Washington, D. C.

Superintendent of Exhibition: "Mack" Richmond, Baltimore, Md.

Tariff and Legislative Committee.

GEORGE ASMUS.
President.

Robert Craig, Philadelphia, Pa.

J. K. M. L. Farquhar, Boston, Mass.

E. A. Stroud, Overbrook, Pa.

E. Allan Peirce, Waltham, Mass., Treas.

PROGRAM OF MEETINGS AND ENTERTAINMENTS.

Tuesday, August 15, 1911.

2.00 P. M.—"Address of Welcome," His Excellency, the Governor of Maryland; "Address of Welcome," His Honor, the Mayor of Baltimore. Response, Robert Craig. Address, President George Asmus. Reports of Officers, Committees, etc. Report of Committee on President's Address.

Discussion. Miscellaneous Business. Judging of Trade Exhibits.

7.30 P. M.—President's Reception. President Asmus wishes it distinctly understood that the reception will be informal and that the most comfortable costume will be the most appropriate.

Wednesday, August 16, 1911.

9.30 A. M.—Reciprocity with Canada on Floral Products. From the American Standpoint, Mr. P. Welsh. From the Canadian Standpoint, Mr. E. I. Mepsted. Discussion. Advisability of a Spring Meeting, Wm. F. Kasting.

10.30 A. M.—Selection of Next Meeting Place. Nomination of Officers for 1912. Report of Judges of Trade Exhibit. Annual Meeting Ladies' Society of American Florists.

2.30 P. M.—The Private Gardener, Wm. Duckham. Discussion. The National Flower Show, F. R. Pierson.

8.00 P. M.—Illustrated Lecture, "Ornamental Horticulture Abroad," J. K. M. L. Farquhar.

Thursday, August 17, 1911.

9.00 A. M.—Sectional Meetings. Florists' Telegraph Delivery. American Gladiolus Society. American Carnation Society. American Rose Society. National Sweet Pea Society. Florists' Hail Association.

11.00 A. M.—Election of Officers. Amendments to Constitution and By-Laws to be acted upon. To amend Article IV, Section 2 to read as follows:

Section 2. Fees and Assessments.—Any eligible person may become a member of the Society on the payment of \$5.00, and such payment shall cover the annual dues for the balance of the calendar year.

WILLIAM F. KASTING,
Treasurer.

RICHARD VINCENT, JR.,
Vice-President.

H. B. DORNER,
Secretary.

E. ALLAN PIERCE
Director.

The annual dues shall be \$3.00 per year, payable in advance on the first day of January. Any person may become a life member on payment of \$50.00 and be exempt from all further assessments.

Afternoon.—Bowling Contest and Other Sports.

Ladies' S. A. F. Entertainment.

10 A. M.—Bowling by Ladies' S. A. F. at the Garage. 12.30 P. M.—Trolley ride to the various suburban districts; luncheon en route on the grounds of the Baltimore Country Club. 8.30 P. M.—Reception at Belvedere Hotel.

Friday, August 18, 1911.

General Entertainment by Gardeners' and Florists' Club of Baltimore.

Steamer leaves at 10 A. M. for Tolchester Beach on the Chesapeake Bay, arriving at noon. Refreshments will be served on the steamer en route. The Games—Baseball, shooting, races and other sports will take place on arrival. 6 P. M.—Steamer will leave for a trip further down the bay, returning to Baltimore at 10 P. M. Supper will be served on the boat.

H. A. BUNYARD
Director.

F. R. PIERSON
Director-ex officio.

ROBERT CRAIG
Director.

TRANSPORTATION.

The Trunk Line Association has granted a rate of one and three-fifths (1 3-5) on the certificate plan. Tickets may be secured not earlier than August 11th and not later than August 16th, except from stations where it is possible to reach Baltimore by noon of August 17th when tickets may be secured on that date. Tickets will be good returning up to and including August 22d.

In securing your tickets purchase a regular full one-way first-class fare and be sure to request a certificate. No reduction in fare will be made unless a certificate be secured at the time of the purchase of the ticket.

For those living outside the district of the Trunk Line Association inquiry should be made of your local agent for rates to Eastern points. There are many rates in force during August and it is possible to travel at a much reduced fare.

Where members are desirous of join-

EUGENE DAILLEDOUZE
Director.

W. N. RUDD
Director.

W. J. VESEY
Director.

ing parties from the larger cities information concerning the trip may be secured by writing to the secretaries of the local florist organizations.

HOTELS.

List of the leading hotels in Baltimore, rates and location. These hotels are all on the European plan.

Hotel Belvedere, "Headquarters," Charles and Chase streets. Rooms, without bath, \$2.00 to \$4.00 per day. Rooms, with bath, \$3.00 to \$9.00 per day.

Hotel Rennert, Liberty and Saratoga streets. Rooms, without bath, \$1.50 to \$4.00 per day. Rooms, with bath, \$2.50 to \$6.00 per day.

Hotel Stafford, Mt. Vernon place. Rooms, without bath, \$2.00 to \$4.00 per day. Rooms, with bath, \$3.00 to \$7.00 per day.

Hotel Altamont (three squares from Convention Hall), Eutaw place and Lanvale street. Rooms, without bath, \$1.00 per day. Rooms, with bath, \$1.50 per day up.

New Howard, Howard, near Baltimore street. Rooms, without bath, \$1.50 to \$2.50 per day. Rooms, with bath, \$2.50 to \$3.50 per day.

AMERICAN GLADIOLUS SOCIETY.

Program of second annual meeting, Fifth Regiment Armory, Baltimore, Md., August 16 and 17, 1911:

Wednesday, August 16, 3.30 P. M.

Address of welcome, Mr. George Asmus, President S. A. F. and O. H. Reading minutes of last meeting. President's address. Financial secretary's report. Treasurer's report. Nominating committee's report. Report of committee on "What Constitutes a First Size of Saleable Bulb."

Thursday, August 17, 9 A. M.

Report of judges. Election of officers. Report of miscellaneous committees; bulletin, exhibition, etc. Report of committee on nomenclature. New business. Lecture, "Gladiolus Diseases," by Prof. Whetzel, or assistant from Cornell University, followed by discussion and reports from state committeemen on diseases.

Schedule of prizes for the Second Exhibition of Gladiolus Blooms to be held in connection with the S. A. F. Convention at Baltimore, Md., August 15-18, 1911.

Open Class.

- No. 1. Henry F. Michell Co. Silver cup for the best 25 spikes of new Gladiolus Kunderdi "Glory" exhibited in one vase.
- No. 2. Vaughan's Seed Store. Silver cup for the best and largest collection of blue shades in lots of 6 separate colors; not less than 25 spikes.
- No. 3. M. Crawford. 50 bulbs of Gladiolus "White Lady" for the best 6 spikes of any white variety.
- No. 4. Peter Henderson & Co. \$10 for the best 10 varieties not now on the market; 3 spikes each.
- No. 5. W. Atlee Burpee. \$10 for the best collection of 10 varieties; 6 spikes each.
- No. 6. E. E. Stewart. \$5 for the best vase of 12 spikes Gladiolus "Golden Queen."
- No. 7. E. E. Stewart. \$5 for the best vase of 12 spikes Gladiolus "President Taft."
- No. 8. B. F. White. \$5 for the best vase of new seedlings not less than 25 varieties, never before exhibited.
- No. 9. E. H. Cushman. \$5 for the best vase of 25 spikes of one white variety.
- No. 10. A. T. Boddington. \$5 for the best vase of any named yellow variety.
- No. 11. John Lewis Childs. \$10 for the best collection of Childs' varieties; 3 spikes each.
- No. 12. The Gardener's Chronicle. Challenge cup for the exhibit containing the largest number of standard named varieties, correctly labeled.
- No. 13. Stumpp & Walter Co. \$10 for the best collection of 15 varieties; 3 spikes each.
- No. 14. B. Hammond Tracy. Silver and glass vase for the best table decorated with Gladioli, the table to be laid for 6 covers.
- No. 15. N. L. Crawford. \$5 for the best center-piece for dining-table.
- No. 16. Frank Banning. \$10 for the best vase of Gladiolus "Niagara," 3 or more spikes.
- No. 17. H. H. Groff. \$10 for the best exhibit of Gladioli in white and light; dark; blue; and yellow hybrids, not more than 3 spikes of each variety and not less than one vase of each color section.
- No. 18. Rowehl & Granz. \$12 for 100 spikes Gladiolus "Augusta;" \$8, 2nd; \$5, 3rd.
- No. 19. A. E. Kunderd. \$10 and 100 bulbs Gladiolus Kunderdi "Glory" for the best display of above variety.
- No. 20. A. E. Kunderd. 100 bulbs of Kunderdi "Glory" for the best vase of 20 spikes of above variety; 50 bulbs for 2nd best vase.
- No. 21. Kelway & Son. Silver Medal. Best collection named varieties, Kelway's large flowered strain.

Amateur Class.

- No. 1. W. E. Kirchhoff Co. Gold medal for the best display of Gladiolus "Princeton."

No. 2. Montague Chamberlain. Silver cup for the best 6 named varieties, 1 spike each.

No. 3. John Lewis Childs. \$5 for the best vase of Gladiolus "America," not less than 12 spikes.

No. 4. A. T. Boddington. \$5 for the best collection of yellow named varieties exhibited by an amateur.

No. 5. J. M. Thorburn & Co. Silver cup for the best collection of Primulinus type and hybrids.

No. 6. L. Merton Gage. \$5 for the best 6 varieties of blue Gladiolus exhibited in one vase.

No. 7. A. E. Kunderd. 100 bulbs Gladiolus Kunderdi "Glory" for the best vase of 6 spikes of above variety; 50 bulbs of Kunderdi "Glory" for 2nd best vase.

No. 8. Arthur Cowee. \$5 for the best exhibit of 10 spikes each of a yellow variety, and a blue variety.

No. 9. Arthur Cowee. \$5 for the best exhibit of 10 spikes each of a red variety, white variety and a pink variety.

No. 10. Francis King. \$10 for the most harmonious and beautiful color arrangement of Gladiolus spikes, number of colors and quality to count; no less than 50 spikes.

Exhibits by express should be addressed to American Gladiolus Society, Fifth Regiment Armory, Baltimore, Md., express charges prepaid.

The judging on competitive exhibits will begin at 9 o'clock A. M., Wednesday (16th), and all exhibits must be staged by that time. Address all communications to L. Merton Gage, Sec'y, A. G. S., Fifth Regiment Armory, Baltimore, Md.

Don't forget your badge for 1911. No admittance to Exhibition Hall without it.

AMERICAN CARNATION SOCIETY.

There will be a meeting of the Board of Directors at the Convention Hall in Baltimore, at 9.00 A. M., Thursday, Aug. 17th. All members of the A. C. S. who happen to be in attendance at the S. A. F. Convention are invited to attend this meeting. There will be business of vital importance to come before this meeting, and a large attendance is desired.

The Secretary will be in attendance at the S. A. F. Convention, arriving in Baltimore on the 16th, ready to receive dues which have not been paid for the current year. Also contributions for the Dorner Memorial Fund. Considerable more funds are needed for this memorial, and every member who has not already contributed is urged to do so at once.

A. F. J. BAUR, Secretary.

Don't forget to ask for a certificate when buying your railroad ticket for Baltimore. Reduced fare not possible without it.

Dame Nature seems to be doing her best to get into attractive dress for the florists' reception next week. The showers of the past week throughout Maryland have proved very acceptable although they have caused considerable damage in some sections, washing away bridges, ruining roads and destroying out-of-door stock. Previous to this the drought was proving disastrous. In Baltimore and other places, the citizens were ordered not to waste any water. Such a restriction as this surely shows a grave condition and the florists will need some for the purposes of ablution at least.

THE BREEZE.

It started way up in the hill-tops,
That dear little rollicking breeze;
It swayed like a fairy the tree-tops
And flirted with millions of leaves.

Then rushing down into the valley,
It kissed all the loveliest flowers,
And lifting their heads to the cloudlets,
It whispered a promise of showers.

Over the boundless ocean,
It danced to the twinkle of stars,
And tossing the foam of the breakers,
Flung it high over the bars.

On thro' the gates of the city,
Where panted the weary and weak,
It swept like a blessing from heaven,
Fanning the hot, fevered cheek.

It whispered a tale of the hill and the vale;
It brought them a whiff of the sea;
It rocked them to sleep with a song of the deep—

A song of the flower and the bee.

Susan W. Clune, in *Boston Herald*.

INTERIOR VIEW OF S. A. F. EXHIBITION HALL, BALTIMORE, MD.

Seed Trade

Pea Situation Slightly Better.

There have been no radical changes in crop conditions during the past three or four weeks but the interval has served to bring the end more nearly in sight especially with reference to peas. The pea crop is now virtually made, and the only possible effect of weather would be to damage rather than to help the crop. From all information available, it looks at this time as if the crop would not be as bad as last year though it will be very short. In some districts conditions are fully as bad as last year, while in others they are much better, and while, of course, it is impossible to state what percentages will be delivered on contracts we would venture the opinion that these percentages, as a whole, will be materially better than a year ago.

Farmers' Alaskas and Cannery Sweet.

Last year the farmers of Wisconsin raised, approximately, from 40 to 50,000 bushels of what are known as "farmers' Alaskas," while it is estimated that the crop this year will not exceed 5000 bushels. This is not due to any material reduction in acreage, but to the climatic conditions at the time that peas were in bloom and most susceptible to the bad effects of intense hot weather. The 50,000 bushels of "farmers' Alaskas" which were grown last year went into consumption quite generally, principally being used by the canners. This year they will not have this source to draw against, and it would seem as if good pedigree seed should be worth fully as much and possibly may bring even higher prices than a year ago. The same may be said regarding what are known as canners' "sweet peas," the latter including Horsfords, Advancers, Admirals, Surprise and Prince of Wales. While other varieties than these are used in emergencies, these varieties comprise practically all that are used by the canning trade in years when they can be procured in sufficient quantity. The crop of canned peas will be rather lighter than last year, in fact, from all reports the crop will be decidedly lighter than a year ago, and if one may gauge the situation by prevailing prices on the canned product, the total pack will be the lightest ever harvested from the acreage planted. No doubt, the growers of sweet peas will be sending out their preliminary reports within the next few weeks and then we shall come nearer knowing the exact situation. The only guide the grower has at this time of the year is his field estimates, and it has been shown that these are a very uncertain guide this year. While the threshing returns have, in a few instances, been better than the estimates, as a rule, they have been disappointing and have reduced the estimates from one-half to one fold. One factor that has materially affected the pea crop, particularly in Wisconsin, has been the ravages of the pea louse. This pest made its appearance rather late in the season, but within the short time they had to work, several thousands of acres of the late planting were practically destroyed. One of the large Wisconsin

MICHELL'S

Giant Exhibition

PANSY

The "Distinctive" Florist Pansy

Gigantic in size, robust in texture, beautiful in form and gorgeous in coloring, are only a few of the descriptions we can give in this limited space.

Spring City, Pa.
The Giant Exhibition Pansies, seed of which I purchased of you last Fall, are now in bloom. I wish you could see them. The flowers are of the largest size and finest colors. I have grown Pansies for the last twenty years and thought I had the best, but I must say yours take the cake; they must be seen to be appreciated.
A. S. C.

30c per 1/2 trade pkt.; 50c per trade pkt.; 75c per 1/8 oz.; \$5.00 per oz.

WE CAN FURNISH ALSO ALL OTHER STRAINS OF PANSIES.

Write for our Wholesale July Catalogue, just out.

HENRY F. MICHELL CO., 518 Market St., Philadelphia, Pa.

packers is said to have lost about 700 acres due entirely to the louse.

Beans.

Beans are looking fairly well, but will not be a very heavy crop. Some of the growers are not expecting above one-half to two-thirds of the average yield, while others are looking for better results. There is not much chance for any material improvement in the bean crop, while a wet harvest may mean that the crop that matures may be reduced materially, while samples will be generally unsatisfactory. Should dry weather prevail during harvest, samples should be fine, and there will probably be beans enough to satisfy all ordinary requirements.

Corn.

Corn is still an uncertain factor in the crop situation, but we infer from reports received that early corn has suffered beyond all hope of improvement and the crop will be very light. Later varieties with favorable conditions from now on, will doubtless yield fair results, but there is always danger of early frost, and we can only hope that this may be delayed until after the crop is sufficiently matured to be past damage from any ordinary white frost. Hard, freezing weather would, of course, be very disastrous to corn even after it had matured enough to resist the ordinary early frosts.

Miscellaneous Crop Notes.

In the west the potato crop this year has been the poorest in 25 years. In many states there will hardly be enough produced to meet home requirements, and it looks as if there

will be a market in the west for considerable eastern grown stock this fall.

California crops, as a whole, are fairly satisfactory, and there has been no serious damage reported to any line of seeds grown on the Pacific Coast. We have not had any definite news as to the European situation, and do not think that actual conditions will be known for the next 30 or 60 days. In a general way, nearly all root crops will be light as has been reported in these columns from time to time. Actual figures, we are unable to give at this writing, but hope to be able to give something more definite within the next few weeks.

We are informed that the Batchelor Seed Store, of Utica, N. Y., is going out of business. Whether they will sell out to some other concern or simply close out the business, we have not been informed, but the fact that they are really going to close out is, we believe, definitely settled.

Florists and Seedsmen Sell Your Own Scratch or Poultry Food

We will make it for you under your own brand for
\$28.00 PER TON

Send to-day for sample 100 lb. bag, \$1.50. Mr. C. E. Jensen of Atlantic Co., N. J., on Oct. 27, 1910, writes as follows:—I want to state that your three grades of Poultry Food; Chick Starter, Developing Food and "Square Deal" Scratch or Poultry Food stands without an equal to day. They are perfect mixtures and sound in grain and a pleasure to handle.

PERSONAL.

M. Vanderleave, Lakeside, Mich., has accepted the position of gardener on the estate of E. K. Warren of Three Oaks.

L. Biellerman of Chicago called last week in the interest of his firm, L. Baumann & Co., and reports a successful trip.

Louis Geiger has accepted a position in the store of J. F. Wilcox & Son, Council Bluffs, Ia.

Ernest Sonderegger succeeds A. H. Luck as manager of his father's business in Beatrice, Neb.

John Strinecke, W. J. Pilcher and W. C. Smith took an automobile trip last week through St. Louis County to visit growers. They found them all in good shape, and that the recent rains had done a world of good to stock in the field.

Mr. and Mrs. Fred C. Weber, Jr., are enjoying the cool breezes among the mountains of Colorado.

The following St. Louis party left Sunday night for a trip east, to wind up at Baltimore: Mr. and Mrs. John

Connon, W. C. Young and Mr. and Mrs. Chas. Beyer. The rest of the St. Louis convention delegation will follow next week.

Henry M. Robinson, of H. M. Robinson & Co., Boston, has gone on a trip to Canada, including a visit to the Canadian Horticultural Association's Convention at Ottawa. Jos. Margolis of the same firm is off on his vacation.

John McKenzie of North Cambridge, Mass., is on a visit to his old home in Rosshire, Scotland. He expects to visit London and Belgium before he returns. Mr. McKenzie's greenhouses are in charge of his foreman, Charlie Sutherland. Miss Mary Gallagher, the popular clerk at his store, 1927 Massachusetts avenue, is looking after that part of the business.

A letter just received from A. Leuthy of Roslindale, Mass., who is now travelling in Europe, informs us that in Belgium as well as elsewhere he has found the weather very hot. He says that he finds the prices of azaleas fully as high as last year and some sorts in very short supply. But they are well budded and all stock looks well as a rule. From Belgium he was starting for Paris.

Chicago, Ill.—J. I. Salach has purchased the store of F. C. Sturvy, 1810 South Halstead street.

PERSONAL.

D. H. Eaton of Macomb, Ill., has gone to Sedalia, Mo., where he accepts a position as designer for the Archer Floral Co.

W. C. Collett, for many years manager of the A. C. Burrage property at Redlands, Cal., has taken the management of the City nurseries succeeding Sidney Hockridge, recently resigned.

Dr. B. T. Galloway, Chief of the Bureau of Plant Industry of the Department of Agriculture, has sold the farm at Springfield, Md., which he conducted, with the aid of his three sons, as a private experiment farm. Dr. Galloway intended to put into practice those things that he was endeavoring to teach the farmers but his health failed him, due to the extra work involved, which resulted in the sale of the farm.

Visitors in Philadelphia: H. L. Holmes, Harrisburg, Pa.; A. P. Nicklin, Pittsburg, Pa.; E. H. Flood, Atco, N. J.; Alphonse Pericat, Collingdale, Pa.

Visitors in Boston:—Walter Mott, representing Wm. Elliott & Sons, New York City; Miss Lizzie A. Dirwanger and Mrs. Annie Dirwanger Coyle, Portland, Me.; Otto H. R. Wiese, representing David Sachs, Quedlinburg, Germany; E. H. Chamberlain, New Bedford, Mass.; M. J. Leach, Pawtucket, R. I.; Arthur L. Deal, representing W. W. Johnson & Son, Boston, England.

NEW FLOWER STORES.

Attleboro, Mass.—A. W. Vose & Son.

Chicago, Ill.—M. B. Hirsch, Willard Theatre Building, Fifty-first street and Calumet avenue, to be known as the Willard Florist.

CINCINNATI PERSONALS.

Miss Louise Forbes will spend a few weeks with her sister at Chicago.

Mr. and Mrs. E. G. Gillett will soon leave for Michigan for a fortnight's stay.

Wm. Murphy and Tom Windram have gone to Snow Islands. Mr. Murphy went to Parkerburg, W. Va., last week to superintend the loading and shipping of a launch which he and his partner, Chas. Tigher had purchased for use at the lakes and was royally entertained by Mr. Dudley of that City.

Flower Market Reports.

Trade has been decidedly good in some lines of demand, especially the summer shipping trade to points north and on the coast. There is an enormous accumulation, however, of low grade flowers such as roses from young plants recently set out, asters, gladioli, etc. American Beauty of fairly good quality are in good supply but demand has fallen off very suddenly and it is the opinion of wholesalers that crops from points more or less distant are being at present diverted heavily in this direction which would indicate that outlets elsewhere are congested. Killarney roses are not selling proportionately as well as last year and it is in evidence that the trade are beginning to look with especial favor on those varieties which have shown points of superiority as "summer roses." Mrs. Taft (Prince de Bulgarie) and Radiance are among the popular newcomers in this line and the good old President Carnot is not losing a bit of its unique popularity. Kaiserin would be equally fortunate in the white class if only it did not bruise so readily. There are absolutely no buyers for the small flowers from stock in winter blooming rose houses. Very few carnations are seen and those are poor. In gladioli, Shakespeare, Lafayette and America hold the admiration of the trade beyond all others. In the main, however, gladioli in this market are unprecedentedly low in quality, due to the effects of dry weather. The worst

failure is the asters. The market places are clogged up with bushels of asters—small, twisted, half developed freaks, showing the terrible results of the roasting and drying up which they have suffered except where they happened to be planted in low wet ground. Of the latter there are only a few; the aster crop, as a whole, may be pronounced a dismal failure this year. Lilies and lily of the valley normal in all respects.

The first week in August CHICAGO was not a very satisfactory one to either the retail or the wholesale trade. There has been a decided falling off in the local demand, owing partly to the number

of people now out of the city, and also a diminishing of the shipping business. More out-of-door flowers, which are thriving as a result of the recent rains, are doubtless being used by flower lovers, and from now till frost comes the chances are that the demand will be lighter than in July, which was a particularly good month with most florists here. Asters are now here in quantity, and the first really long stems were seen this week. They were consigned to the J. A. Budlong Co., and were nearly three feet long. Indications are that the late crop will be all that can be desired. Carnations cut from the field plants are of course

Flower Market Reports

(Continued from page 215)

very short of stem, but many have fine color and good size. Roses are of all kinds and conditions, small ones predominating as usual at this season. There are some very satisfactory Beauties in the market, lily of the valley as good as ever for the season, and a fine lot of miscellaneous stock for variety. Golden Glow marks the passing of the first half of the summer. Tritoma seems to have lost its powers of endurance in this market and drops almost invariably the day after arrival. A profusion of lilies of many kinds helps with the window displays, and combined with green make an artistic effect. There is plenty of all kinds of green.

Business is only fair. **CINCINNATI** Flowers of all kinds are plentiful. Beauties, considering the season, could not be improved on. Tea roses are again coming in heavy crop and only the better grades move with any degree of regularity. Asters are becoming too numerous for the market demands. The majority of those received are of an inferior quality. There is an over abundant supply of gladioli, light and bright tints having the best call, the dark shade moving slowly. Longiflorum, auratum and speciosum lilies find a fair market. Green goods in ample supply.

The situation as it exists here is not noticeably different from what it has been in previous years except that asters, field carnations, gladioli and other things dependent largely on outdoor weather conditions run much lower in grade than ever before. The only real good stock in this line is that from growers who have used water unsparingly or have planted on land at water level. Quality runs low on very many specialties, particularly roses. While there is a reasonable demand for such occasional first class stuff as may be obtainable yet the conditions generally are those of mid-summer and there is nothing that can be done to change them. The main satisfaction lies in the fact that they cannot get any worse. There is practically no out of town shipping trade in this market and the little agitation which other centres enjoy in these otherwise indolent times is denied the New Yorker, who must look to his own home market for flower buyers or else commit hari kari.

For the first three days of last week, the market was all that could be desired. Then—every-

thing went to pieces. The demand in all lines seemed to vanish into thin air. On top of this latter situation stocks came piling in more than usual. Especially was this the case with the important summer crops such as asters and gladioli. These latter were unusually plentiful and when Saturday came there was a big unsold pile which went with difficulty. There was a lot of other outdoor stock: such as hydrangeas, golden glow, phlox, gaillardia and so forth. Consequently—there is no clapping of cymbals in our midst; but on the other hand we are not as yet altogether playing the Dead March in Saul. Our high hopes were shattered; but we are not quite yet in the Slough of Despond! American Beauty sold well—so did My Maryland—and Killarney is getting better. A pleasing novelty in pink roses has appeared—Prince de Bulgarie—from local sources. A fine summer rose of a pleasing silvery pink. All greens are too plentiful. Stephanotis is a refreshing novelty. Orchids are scarce and dear. Carnations are down and out. Gardenias are small but good and clean. Lilies good—never saw them better.

The market all through the last week was in excellent condition, all the wholesalers having plenty of stock of everything in season, and a glut was on in asters and gladioli, many more of these coming in from our local growers than the trade could handle, and the price went down, almost cut to half of the week previous. Asters are also low. Roses are coming better and sold low also. Long Beauties are very cheap. Carnations are scarce and will be for a time. The retail trade is very dull, and on many days it is the duller in years. They expect it to be so for this month at least.

Detroit.—During the early part of the week flowers were exceedingly scarce, but towards the end hot weather and lessened call brought about a great surplus in all lines.

CHICAGO NOTES.

A Progressive Place.

The Edgebrook Nurseries of The Geo. Wittbold Co. are well worth a trip of inspection to anyone interested in plants. Everywhere in the greenhouses are cement benches, even the high benches under the glass being of cement and all can be taken down and moved about at will. The regular benches are many of them "doubledecked." The lower one rests on feet that are short and wide at the bottom and the upper bench has four foot posts resting on the first bench. This arrangement greatly adds to the capacity of a house and affords a fine place for forcing and storing bulbs. The stock looked so uniformly good that it is hard to particularize but some *Dracena Massangeana*, *Cibotium Schiedeii*, and cycas were especially noted. A bed of 8000 thriving young *Asparagus plumosa* are worth mention. The eighty acres of nursery stock must be seen to be appreciated and it is a credit to Otto Wittbold who has had charge of it since the place was first started and who helped fell the timber which originally covered the ground.

Some Foley Greenhouses.

The Wm. E. Lynch Co. have their range of greenhouses on Harlem Ave. ready for glazing. The material was furnished by the Foley Manufacturing Co., with their channel iron gutters and maleable iron bar fasteners. 300 feet of continuous ventilation are secured by their apparatus. A similar plant by the Heller Bros. of New Castle, Ind., is now being erected, and all material for this is also furnished by the Foley Manufacturing Co. An extensive exhibit of greenhouse material has been shipped to Baltimore, and a greenhouse will be shown having all the latest Foley improvements, and if

In Summer Quiet Prepare for Fall Hustle

Middle of August already and time to think over the situation and plan for the best means of turning your flower product into its equivalent in cash next winter.

You want to deal with a house of long standing? One with a well established trade and good line of regular customers? One where best market values are upheld? Where prompt and trustworthy returns of sales are made? Where all obligations are met when due? All these you have a right to demand and we can fulfil them all. Have been doing it for many years and are doing it now.

YOU ARE INVITED

When going to or from the Convention to call and inspect our establishment, our facilities and methods. The oldest established cut flower commission house in the famous 28th Street District.

P. J. SMITH

Successor to JOHN I. RAYNOR

49 West 28th St., New York City

possible Phil. Foley will be in charge in person.

Trade News.

N. J. Rupp of the John C. Moninger Co. will attend the Baltimore Convention, as is his usual custom. There is no one better posted on the subject of right methods and right materials for making a good greenhouse plant than Mr. Rupp. Mr. McKee of the same firm states that florists generally are building a much better class of greenhouses than formerly. Their new catalog will be sent for the asking.

Frank Oechslin's new range of houses for palms and ferns is about completed, and will be planted by the time this is in print. They cover 125x130 square feet of ground, and are a great addition to his range, occupying a space nearer the entrance and with the cement walls and walks make a very neat appearance. The Foley Man-

ufacturing Co. furnished the material, and a Kroeschell boiler No. 12 was installed. Anyone interested in plants will be well repaid for a visit to this model establishment.

At the E. H. Hunt supply house new goods in all lines are coming in to take the place of the quantities that were moved out during their pre-inventory sale. A. F. Longren, salesman, who has just returned from a very successful trip thinks the conditions favorable to an active fall trade in all kinds of florists' supplies. A new man has been added to the force, R. H. Starbuck, who will take care of the western territory. A new wholesale catalog will be ready for distribution Sept. first, and should be in the hands of every florist.

Personal.

J. Starrett, the LaSalle Hotel florist is away receiving treatment for rheumatism.

James G. Hancock is calling on old

friends in Grand Rapids and other Michigan points this week.

Frank Pasternick has the sympathy of the trade in the loss of his mother whose death occurred last week.

Geo. Woodward who has been ill all summer following an operation is soon to take a vacation. He will spend some time in Lake Geneva, Wis., which, his friends hope, will go far toward his complete recovery.

C. N. Dickinson is combining business with pleasure at his summer home on Pelican Lake and writes that he has closed contracts for a good supply of Christmas green including berried stock.

Wm. Allen is now in charge of the conservatories in connection with the retail store of Schiller, the Florist, at 2221 West Madison street. Mr. Allen had several years of experience in the east when he first came from England, and has been with F. Oechslin the past year, so is very well fitted for the position.

All the newest kinds of FERNS in their natural and colored effects. IMPERIAL CHINA and TONEWARE in many novel and pleasing shapes.

All the best FOLIAGE for decorative purposes. CREPE FLOWERS of every suitable color and variety, combining flower effects which will prove interesting. Every article displayed will be sure to be a new one to you.

A large staff of salesmen there to show you about. Make our Exhibit Quarters your own. All are welcome.

H. BAYERSDORFER & CO.

1129 ARCH STREET, PHILA., PA.

SPEAKING OF PHILADELPHIA

While we have no wish to minimize the gigantic strides that many sections of the country have taken in horticulture during the past few years, and while we glory in the progress of these, our neighbors and friends, yet we think Philadelphia still holds her own as a horticultural center; distributing plants, seeds, bulbs and cut flowers to all parts of the world in ever increasing volume—and consequently our national trade journal, **HORTICULTURE**, must still take cognizance of our good standing. That being granted, we beg once more to introduce our time honored "Philadelphia Section," setting forth why the wide-awake tradesman should look to Philadelphia for a large part of his supplies. In plants and seeds for the florist's trade we believe Philadelphia still holds the premier position notwithstanding the great and growing claims of other sections of the country. A careful perusal of the following pages of reading and advertising will emphasize the point. In this section do not overlook Philadelphia's absolute pre-eminence in the matter of florists' supplies. She has the world's record in that connection and has held for many years.

ROBERT CRAIG COMPANY.

A Typical Philadelphia Horticulturist —When You Think of Philadelphia You Think of Craig.

A walk through Craig's new place at Norwood, Pa., shows the brilliant results of another year's enthusiastic and intelligent work. For years celebrated for crotons, they have this year outdone all former efforts. In addition to the old standard varieties, they have five hundred seedlings of their own raising, some of which will form a feature at the coming convention exhibition; 15,000 *Dracaena terminalis*! such a lot was certainly never before seen in this country. Also *Phoenix Roebelenii* in better form than we have ever seen it.

Ficus Chauvieri, a plant which is here being developed in quantity, is one which Mr. Craig thinks will be a great addition to the list of house plants on account of its beauty and durability.

The ferns at Norwood are particularly fine. From the quantity under way, *Neph. Bostoniensis* "Harrisii" is a favorite, a decided improvement over

the old Boston variety. This was first distributed by the late Wm. K. Harris and has proven even better than he predicted it would. *Nephrolepis Elegantiissima* "Improved" is another good one. For six or seven inch pots it is the best of all, but *Neph. Scholzei*, *Compacta* and *Todeaoides* are all grown in quantity, each being useful in its place. It would take too much space to name all the good things there. We say to readers of **HORTICULTURE**, go to see Norwood and you will be well repaid for the time taken. Extensive building improvements are underway.

Don't forget the old place at 49th and Market. Here's where they do things in quantity: 100,000 *Nephrolepis*, 30,000 *Cyclamen*, 30,000 *Crotons*, 10,000 *Pandanus Veitchii*, 50,000 *Poinsettias*, 20,000 *Lorraine Begonias* and 8000 *Glory of Cincinnati* being grown for Christmas. *Ficus paniculata* is again seen in quantity and as fine as ever before, but go see for yourself. The visit will repay you.

JOSEPH HEACOCK COMPANY.

An impromptu party of Philadelphians accepted the invitation of Senator Heacock to visit his company's new re-seeding plant, near Yardley, Pa.

HOUSE OF THE LONSDALE "LIGHT PINK LORRAINE" BEGONIA
at Robert Craig Co., Philadelphia.

Profit by the Progress of Others

Our Success, and consequent Progress is well known to all that deal with us, and they profit by their knowledge. Take advantage of the Best that is offered you. Investigate our Methods, and better your business opportunities.

Every year we strengthen our position, by better facilities and careful organization.

Why not take advantage of them for mutual profit?

THE LEO NIESSEN COMPANY

Wholesale Florists

1209 Arch Street, PHILADELPHIA

on the 2nd inst. Mr. Heacock and his close friend and neighbor, Thomas Logan, superintendent for Clement B. Newbold, joined the party at Jenkintown station, and from there on took them under personal supervision. At Redloft station the "all out" signal was given, and after a walk of about a mile the Heacock place—a farm of 58 acres—was reached. On the western side of this, is the big glass structure with its appropriate outbuildings, storage rooms, etc. The visitors were greatly interested in the arrangements in heating, pumping, etc. An artesian well 200 ft. deep gives a four-inch stream with steady flow, and no pumping into a tank is required. The greenhouses, 161 Earl & Burnham construction, covers about 45,000 square feet and is planted mainly with Killarney roses. A very few Richmonds are grown at one end. The establishment is reported to have shipped the best Killarney's reaching the Philadelphia market the past season, and to have secured the highest returns of this vicinity, which speaks well for Mr. Heacock, and for his able foreman, Robert Jackson. Following the greenhouse visit came a bonfire walk around the farm. The truck crops and the live stock showed up in fine condition. The cows, horses, chickens and geese were all of the latest pattern. The latter are so well trained that they will run from one end of the orchard to the other when they hear an apple fall. Under a grateful shade of spreading trees on the lawn, that refreshment were served by the host. A most pleasant and instructive afternoon was spent, for which Mr. Heacock deserved and received the thanks of the party.

LEO NIESSEN CO.—The steady growth of this firm is well known to all who are familiar with the cut flower commission business. Although a corporation, the business is conducted solely by Messrs. Leo Niessen, president, and Arthur A. Niessen, secretary and treasurer. From a most humble beginning their business has grown to such proportions that today it is considered one of the largest of its kind. By no means are they satisfied with what they have accomplished in their particular line, and their progressive spirit can readily be seen by the plans which are now under way, which will increase their facilities three-fold. A new building is to be erected in the heart of the city, which will rival any establishment of its kind in the country. It will have every possible advantage, such as a central location, up-to-date equipment, an abundance of daylight, and—what would seem most essential—the kind of management that insures continued growth and more success in the future. Unless the business principles of this firm are correct and of a high standard, it would have been impossible for them to have accomplished what they have.

BERGER BROS.—This firm, composed of Harry and John Berger, was established in the wholesale flower commission business in 1904 at 1220 Filbert street. They had been well trained to the florist trade before this, having been associated with their father, William Berger of Germantown. Their business has been a steady one from the start and they are looked upon as one of the most promising of the younger firms who have lately entered the ranks.

PENNOCK BROS.—This retail florist house was founded forty years ago by Abram L. Pennock. The location was then on 12th street between Market and Chestnut streets. In 1866 his brother, Joseph Liddon Pennock was admitted and the firm name became Pennock Bros., which it has remained ever since. On account of failing health J. L. Pennock retired and shortly thereafter Thomas Cartledge and John Westcott became partners. The present members of the firm are J. Liddon Pennock (a son of Abram L. Pennock) and A. B. Cartledge (a son of the late Thomas Cartledge). The store is located at 1514 Chestnut street and is a model for completeness and up-to-date equipment. Notwithstanding keen competition, brainy and aggressive rivalry, this old house holds its own, getting its full share of the creme-de-la-creme of the flower trade of Philadelphia.

GODFREY ASCHMANN.—In the florist business at 1012 Ontario street since 1886—previous to that he had been a jobbing gardener for seven years. His three sons—John, Howard, and Edward—are now associated with him in the business, which has grown to considerable proportions. Mr. Aschmann makes a specialty of flowering and foliage plants for Christmas and Easter—particularly begonias, azaleas, lilies, palms and araucarias. He does an extensive shipping trade, having worked this up by unique advertising methods through the trade papers. The glass area is estimated at 25,000 square feet. Much of the stock offered for sale is imported—Mr. Aschmann making frequent trips to Europe for the purpose of selecting the best bargains.

Quality Service Prices

Are essentials which you seldom receive together. Usually one or the other is sacrificed at the cost of the third. We have combined the **THREE**, so you are getting the Quality and Service without paying the Premium.

H. BAYERSDORFER & CO.

I like to see the drummer, he
As lifts the putting in it
With belated samples in his
And business on the floor
He jumps into a little place,
Pursues the buying man
In whetwind words presents his case
And then jumps out again

When he is on the job in fact
A candidate to beguile,
He takes the little town by storm
And holds it with his wiles
For when his samples are displayed
To the discerning eye
What can the gentleman in trade
Do but succumb and buy

As busy as a bundlebree,
As happy as a lark,
He works the town from A to Z
From morning until dark,
And everyone is filled with joy
When he gets off the track
And when he goes they say, "O! boy,
He sure to come again"

When it comes to Baltimore and Baltimore florists nobody is more at home or more welcome than Harry Bayersdorfer for, "lo, these many years" ever since the good old days of "Johnnie" Feast, "Bob" Halliday and "Jim" Pentland. In Mr. Harry or any one of the genial representatives of The Florists' Supply House of Philadelphia is exemplified the ideal type of persuasive salesman. They say that there is no florists' supply house of any extent in Baltimore. Why should there be so long as H. Bayersdorfer & Co. wave? And this is true of many other places as well. Nine hundred square feet of floor space has been secured for the big Bayersdorfer display at the Fifth Regt. Armory. Don't miss seeing it and having a talk with one of the merchant princes in attendance. You'll get an idea of the florists' sup-

AN INTERESTING RIBBON EXHIBIT.

The illustration shows an interesting exhibit of florists' ribbons, a branch of the business which in recent years has assumed large importance. To the experts in this line each flower has suggested some beautiful ribbon production, each one more beautiful than the last. Perseverance, taste and applica-

ply business and how essential it is to your trade in these hustling times.

EDWARD REID.

We have often had occasion to say a good word about this old established commission florist and we have not said half enough. Mr. Reid is one of the shrewdest of the craft, and has been an important factor in the flower trade of Philadelphia all his life. His early training was in the growing end of the business. Then came a period of commercial training on the road for the then great seed house of Z. D.

tion have enlarged the selection greatly, and the flower retailer can now find an immense variety of materials in charming shades of color. The above picture gives a glimpse of part of the display of the Pennock-Meehan Co., of Philadelphia, at the National Flower Show last March.

Forest Ely & Co. In addition to this comprehensive fundamental training, careful management, ample capital and up-to-date methods have lent Mr. Reid to the forefront. Mr. Reid has friends and customers everywhere, but especially does his prestige shine in the sunny south, where he is universally known and universally beloved. His slogan is "Quality and Service." And as an addendum to that he says "Prices"—meaning that while you get quality and service you pay no more than you would where these are lacking. Is it any wonder his business grows?

SWEET PEAS AT FORDHOOK, 1911.

When one wishes to get a line on the very latest developments in sweet peas it is best to go to headquarters. That is Fordhook, of course. The Burpee sweet pea expert has very kindly furnished us with some information about the most striking of the newer sorts which we have pleasure in passing along to our readers. George W. Kerr has lived among the sweet peas in the field for many years and knows them as a mother her children—so what he had to say in response to your interviewer's questions may be taken as authentic. On being asked what varieties were most promising for next season he said:

Among new sweet peas for next season the most outstanding are undoubtedly Vermillion Brilliant, Irish Belle, Margaret Madson, Rainbow, Pearl Gray and Margaret Atlee.

Vermillion Brilliant is, as the name implies, a glowing crimson-scarlet variety and I would unhesitatingly say it is easily the best and most distinct of its color, the flower being a decided self, that is the standard and wings being of the same shade of reddish crimson.

Irish Belle is a unique shade and might be termed a lavender self suffused throughout with rose. It is, however, a color most difficult to describe.

Margaret Madson is a beautiful pale blue or lavender of much the same color as Mrs. Geo. Higginson, Jr., a favorite grandiflora variety. This is undoubtedly a gem.

Margaret Atlee I consider one of the most beautiful varieties of sweet peas. The color is apricot on cream ground, the flowers being of immense size, quite a large proportion being produced with double or triple standards.

All the above were awarded certificates of merit by the National Sweet Pea Society at their recent show in Philadelphia, the first named variety, Vermillion Brilliant, receiving the silver cup offered by the Philadelphia North American for the best new variety not yet in commerce.

Of the varieties sent out last year those of outstanding merit are Stirling Stent undoubtedly the brightest and most glowing color in sweet peas. It might be described as a rich orange with suspicion of scarlet. It is early and a free flowerer and, strange to relate, it burns but very slightly even in the hottest suns.

Florence Nightingale is a clear lavender which might be described as Asta Ohn without the rosy suffusion on the standard. This is a variety that we are certain would hold its place as the standard lavender for many years to come.

Chas. Foster is quite new as to color scheme, the combination in this variety being most difficult to describe. The ground color is mauve through-

out on which we find pinkish suffusions and veinings. In some stages of growth it is rather washy in appearance and although it seems to have created quite a furore in England we do not think it will ever become very popular in America.

Earl Spencer is another very fine variety and approaches somewhat Stirling Stent but is not quite so glowing in color. Although said by many to be synonymous with the latter variety it is really quite distinct and is a most desirable sort.

Ethel Roosevelt although a striped variety has made quite a name for itself this season and has been much admired wherever grown. The striping, however, is so delicate that it has not the bizarre appearance of some of the heavier flaked varieties such as Gaiety, etc. Another name for this variety, by the way, is Mrs. Tegwell, the latter variety having been sent out this season by an English firm.

Arthur Green might be described as an immense Spencerized Duke of Clarence and there is certainly a place for this fine variety.

Edrom Beauty which was raised on the other side of the "pond" and sent out with most glowing recommendations we consider nothing better than a good stock of Helen Lewis.

Martha Washington has been renamed quite a number of times this season it having been sent out in England under the names of Marchioness of Tweedale, Eric Harvey and Paradise Apple Blossom. This variety pleased me exceedingly last season and I cannot say that I am disappointed with it this year as it is undoubtedly a chaste and dainty pea, the delicate rose markings on pure white ground making it a very attractive sort.

In blues we have this season made some wonderful additions in the Spencer class, the most outstanding varieties being May Farquhar, which might be termed a Lord Nelson—colored Spencer and Paradise Navy which approaches May Farquhar in color and may be more of a true blue shade.

I was greatly disappointed with Maud Holmes and Sunproof Crimson and after careful comparisons throughout the growing season I put them down as being similar to good American stocks of King Edward Spencer.

On being asked to give a list of the most distinct and best varieties of Spencers suitable either for exhibition or market work Mr. Kerr said he would unhesitatingly plump for Countess Spencer, Florence Morse Spencer, King Edward Spencer, Mrs. Routzahn; Helen Lewis, Geo. Herbert, Florence Nightingale, Primrose Spencer, White Spencer, Othello Spencer, Mrs. Hugh Dickson, W. T. Hutchins, Constance Oliver, Marie Corelli, Mrs. C. W. Breadmore, Dainty Spencer, Miriam Beaver and Stirling Stent. Of course, this is only a matter of individual taste and perhaps the next grower if asked to make his selection might suggest quite a number of alterations in this list.

The latter list should be made a careful note of by those who wish to avoid a too large list (and at the same time desire only the very best) as Mr. Kerr is in a position to know thoroughly the immense number of named varieties now catalogued.

G. C. W.

EVERGREEN SEED GARDENS,
TORRESDALE, PA.

Not quite two years old this place—the nursery department and trial grounds of the Michell Seed House of Philadelphia ranks among the most progressive and up-to-date establishments of its kind in the country.

Though well supplied now with modern dwellings, greenhouses, stables, storage houses, etc., and an unlimited number of frames the firm is planning to add several large houses to take care of their supply of hardy roses, which in the near future will be the leading feature of these gardens. An immense collection has been already planted with the intention of retaining them as a permanent attraction to which will be added each year's new introductions so that visitors will here find a most complete collection. The land and location seems to be very favorable for the cultivation of the rose. Eighteen men are at present employed here.

Fully 20 acres are devoted to the growing of perennials and in addition there are more than 500 frames which contain perennials in pots, and are equipped with the overhead watering system. Henry F. Michell Co. found the demand for perennials during the summer months so great, that the quantity provided for another year is tenfold.

On a spacious lawn facing the railroad are three colossal circular beds filled with cannas and salvias, the centre bed containing Mrs. Wallace, yellow, with King Humbert, red. Canna Mrs. Wallace is regarded as the best pure yellow for bedding. Directly behind the lawn are blocks of hardy phloxes, at least 50,000. The latest novelties are included, yet one cannot fail to be impressed with the pure white, Mrs. Jenkins, which is by far the best in its class.

Cannas are seen here by the acres, very effective for advertising purposes. Gladioli and dahlias are a new feature for these gardens this year. Particularly showy is Gladiolus "Kunderdi Glory." Dahlias are looking very promising, but are not yet in bloom.

A most interesting spot is the trial of novelties to which an immense stretch is given over. A good novelty is *Oenothera Americana*, a product of Luther Burbank. The immense flowers do not open until dusk. They are pure white in the evening, and beautiful pink in the morning. The new-colored salvias, white, yellow and salmon pink, are seen here to advantage.

A young nursery of shrubs has been started this spring, which includes a block of 100,000 California privets.

Philadelphia, Pa.—Mrs. Flora Shelley has purchased four acres of land at Highland Park and will erect a range of houses. Her property at Sixtieth and Pine streets has been sold.

“Spencer” TYPE OF Sweet Peas

Burpee's Special Re-Selected Stocks for 1911

“SPENCER” SWEET PEAS are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original COUNTESS SPENCER. We have grown “the original Beauty” and its many “sportive” children with painstaking care each season since. There are but few other growers who can supply an equal assortment of TRUE RE-SELECTED “SPENCERS” that are uniformly of such choice quality.

You should try sweet peas from fall sown seed and thus obtain a bountiful supply of the choicest flowers to offer for sale Decoration Day and during the June commencements.

You can buy so-called “Spencer” Sweet Peas at half our prices—but the result will be only disappointment—and when in flower you will surely admit that you would gladly have paid **EVEN DOUBLE OUR PRICES** to have had the **BURPEE—QUALITY** of the **TRUE SPENCER TYPE!**

	Per pkt.	Per oz.	Per ¼ lb.	Per lb.

W. ATLEE BURPEE & CO., Philadelphia

Great News For 1911

Introductory

The Baltimoreans promise to give the members of the S. A. F. one of the most successful conventions ever held. Those attending cannot but realize the wonderful value these conventions are, with their splendid lectures, interesting talks, discussions and trade exhibits. Aside from these, the value of the personal talks with the big men of our profession are often worth the trip. Always something to learn—their opinions on this subject or that, the merits of some of the new introductions in carnations, roses or other flowers, and how best to handle them. A novelty whether it is in the flower line or in some other branch of the business always proves interesting to everyone.

Our Exhibit

Our exhibit at Baltimore will be one of the finest ever staged, containing many things new in ribbons, supplies, and florists' accessories.

New Roses For 1912

In addition to these, we will have a splendid display of cut flowers, fresh each day, of the new roses, Double White Killarney and Killarney Queen, originated by The Bud-long Rose Co., and which are to be disseminated jointly by The S. S. Pennock-Meehan Co. and A. N. Pierson, Inc. (in the Spring of 1912.)

DOUBLE WHITE KILLARNEY with its stronger, more vigorous growth, larger and heavier flowers, double the petalage, and purer white is a tremendous improvement over White Killarney, and is sure to be a money maker to all who buy, not only for winter forcing, but for summer growing. We recommend it as being the best and grandest commercial White Rose today. As a summer rose, it is such an improvement over Kaiserin that there is no question about its replacing Kaiserin in that connection. At this writing it is three or four times as large as White Killarney.

KILLARNEY QUEEN is about three shades darker than Pink Killarney, and during dark and cloudy weather the color does not fade, but remains a bright, deep, rich pink. It is of very much more vigorous growth than Killarney, even a stronger grower than Double White Killarney. Flowers are about twice as large as Pink Killarney, about the same petalage, and borne on tremendously heavy long stems, larger and heavier foliage. Many consider this rose in the American Beauty class, its habit, growth, and size are so vigorous and far ahead of Pink Killarney.

Welcome to Visitors

We will be glad to have visitors make our exhibit their headquarters at any or all times during the Convention, where they will find Mr. Fancourt and his assistants glad to welcome them.

ATTRACTIVE THINGS IN FLORAL REQUISITES.

Adjustable Pot Covers

A number of the very latest new things in floral requisites as displayed by M. Rice & Co. are unavoidably delayed in this column on account of

M. RICE.

the photographs not being ready. We illustrate instead a few of the more popular staples at present, all of which may be included among the out-of-the-ordinary and many of them among the new and novel. Wedding outfits, shep-

herd's crooks and adjustable pot covers are among the former and will appeal to our readers from the good taste in their designing and their artistic finish. There is an improvement on the elastic adjustable pot cover, the waterproof crepe paper in two colors which has been so popular of late. The new pattern is more artistically frilled, shows off the colors better and is said to be no higher in price.

In the ribbon department special attention is being paid to the production of ribbons to match the popular roses. One of the happiest produced so far is the Killarney pattern. This has a light pink sheen on one side and a dark pink dull finish on the other, secured by shooting two colors of silk in the weave. A most charming effect when folded in natural arranging, and an exact match for the difficult flower. Similar effects are in evidence for Richmond, Beauty, Liberty and Maryland. There are also the contrasting shades for the same varieties carefully studied out. Another item is chenille cord and tassel with a twisted appearance that makes same particularly attractive.

Bridal scarfs in Venetian lace and in many filmy and artistic patterns are having a great run. Two yards long and varying in width from nine to twelve inches.

Miniature Panama hats are a specialty that pleases many. Can be used for favors and also for cluster flowers in corsage bouquets.

Shields for corsage bouquets are an artistic attempt to protect the dress and yet blend conspicuously with the

flowers. Some are made of paper, some of satin, the colors are violet, white and pink.

Lace bouquet holders are a French production. These are wavy and pleas-

B. ESCHNER.

ing and of light fluffy outline. The same proposition is also done in a line of chiffons, and the latter are quite unique and distinct from the lace patterns. The two ideas are a renaissance of the old-style bouquet holder shorn of its stiffness and meeting the

PHILA., PA.

more advanced artistic ideas of the present day. The chiffon folds droop so as to hide the mechanical work.

Prepared natural ferns are bewildering in variety and coloring. There are many new things in this department. The wild asparagus sprays in natural green are favorites, but a new device is to tip them scarlet and violet for Christmas trade. Ruscus wreaths are treated the same way and make a novel showing.

More trouble for the poor cypress grower. Some clever German has a new patented process and now you can't tell the preserved from the real

thing. Flexible, soft and willowy, just the right shade, and last forever.

Waxed paper is now offered in a lovely "Moire effect." It looks to me like a watered silk pattern of, say, birds-eye maple cross grain or some such wood. Silver white, violet, moss green, Nile green, light blue, pink. Not a cheap paper but splendid for fine trade and a high-class novelty.

Trouble again for the flower grower—an improved poinsettia. This time it has the foliage with it and has other perfection touches. Last, but not least, in the galaxy of 'novelties for 1911 come the baskets, and all lands have

contributed their quota. Patterns in endless varieties—all of them charming. Gypsy baskets, fern boxes, Beauty baskets, carnation baskets, many of them with handles near the ceiling. Bridge designs, pot holders, raffia conceits, in a bewildering array.

There are seen some excellent Swiss novelties in little butter tubs, water carriers, etc., in wooden ware, illustrated with a colored flower spray. The Italian baskets in pink, white and yellow in dainty and graceful weave make one think of a Venetian madrigal or a Neapolitan love song. The whole collection is very gay and graceful.

Wedding Outfit.

CRAIG QUALITY CROTONS

ARE BEST KNOWN AND KNOWN TO BE BEST

The above slogan could also apply to the many other Craig specialties. We are making new customers very fast and with our increased glass area, we are in a position to take good care of you. Eventually you will handle Craig Quality Stock. Why not now? Our many customers advertise our stock and our stock advertises us.

Our Convention Exhibit of Craig Quality Stock will far exceed anything in the past, and that's going some. We hope to meet many of our friends in Baltimore. We will be represented in the trade exhibition hall by Messrs. W. P. Craig, Duncan Macaw and Robt. A. Craig who will be happy to show you the finest exhibit of

FANCY CROTONS, IN MANY VARIETIES

WE WILL EXHIBIT AT THE BALTIMORE CONVENTION

Dreers' Variegated Pineapples

(ANANAS SATIVA VARIEGATA)

We are the first to offer this most beautiful of all variegated foliage plants in quantity and at prices nearly as low as good Pandanus Veitchi can be purchased for.

You will make no mistake in giving these a trial; it will make a change and variation in your foliage plants which will be appreciated by your customers and which will prove a profitable investment to you.

1-inch pots, fine plants

\$0.60 each

3-inch pots, fine plants

1.00 each

6-inch pots, fine plants

1.50 each

We will also show a full line of Seasonable Dreer Specialties and our staff of salesmen will be in attendance and will give full information regarding same.

If you are passing through Philadelphia, stop off and visit our Riverton and Riverview Nurseries; an inspection of both of these places is certain to prove both pleasant and profitable.

HENRY A. DREER, 714 CHESTNUT STREET Philadelphia, Pa.

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

At a meeting of the Executive Committee held in New York City at Traendly & Schenck's office, President Adolph Farenwald of Roslyn, Pa., presiding, the particular matter in question was the settlement of the payment of prizes awarded at the National Flower Show in Boston. There had been a variance of opinion in regard to the construction of the resolution passed at Rochester, N. Y., relative to the amount of money that was to be paid to the National Flower Show Committee, and until this had been settled the prizes had been held in abeyance. Vice-President Philip Breitmeyer advised, "I am in favor of a settlement rather than have any ill-feeling especially with the lot of men who have worked so hard to make the recent show a success. I would say pay up and forget. Let us go ahead with unity and kindness and do all the better in the future." The Executive Committee who were unable to attend sent proxies and the sense of all was the same, as was so admirably expressed by Mr. Breitmeyer.

A formal motion was put and carried as follows: "That the Treasurer of the American Rose Society pay to the order of the National Flower Show Committee the sum of five hundred and thirty-seven dollars, being the amount called for by the National Flower Show Committee in full settlement of all premiums due for awards made at the Spring Exhibition in Boston, March, 1911." Treasurer H. O. May, upon receiving the action of the meeting drew the cheque for \$537, and forwarded it to Treasurer E. Allan Peirce of the National Flower Show Committee and after this is paid, it leaves net in the treasury of the American Rose Society a larger sum than has been there before at this time of year.

At the coming convention in Baltimore, it is planned to have a meeting of the American Rose Society, to be as largely attended as possible, on

Thursday, August 17th, and at that time the question of the next Annual Exhibition to be held in Detroit as to date thereof, and the holding of the show jointly with the Carnation Society will be brought up.

The Rose Show in Boston, out of all the fine things placed on exhibition, was the most attractive to the masses of people who were there and at Detroit there would be every opportunity to exhibit to the people of both the United States and Canada and we want a good reciprocity show from everyone concerned, who can help to make it go.

BENJAMIN HAMMOND, Sec'y.
Fishkill-on-Hudson, N. Y.

FLORISTS' CLUB OF WASHINGTON.

The Florists' Club of Washington held their August business meeting in the store of Gude Bros. Co., E. C. Mayberry presiding. Among the communications received was a letter from Otto Seiger, Jr., of Springfield, Mass., asking for information as to the whereabouts of one Otto Suecker. The latter is unknown here but it may be that Mr. Suecker may be a member of some organization elsewhere.

A proposed driving regulation which contemplates an unobstructed view from sides, rear and front of all vehicles, is not considered desirable by local florists owing to the fact that they use covered wagons. This regulation would prove quite serious in winter.

A committee comprising Messrs. Otto Bauer, Harry Lewis and N. Hammer were appointed to look after the matter of transportation of the club members to the convention and to endeavor to get a goodly body together to attend at least on the first day. A low estimate would show 75 members will attend—this exclusive of the ladies. It is planned to have the Washington aggregation leave in a body at 1.00 P. M. over the Baltimore & Ohio R. R. Messrs. Bauer, Lewis and Hammer were also appointed to

the committee on membership for temporary duty. In the absence of Mr. Oehmler, Wm. F. Gude acted as secretary. CLARENCE L. LINZ.

WESTERN DAHLIA AND GLADIOLUS ASSOCIATION.

In response to a call sent out by a number of growers, an organization to be known as the Western Dahlia and Gladiolus Association, was formed in Chicago on August 5th. The object is to bring the growers together for profit as well as pleasure, and we trust will be of use in extending the popularity of the two flowers. There are two classes of members, active and associate; the latter are not responsible for the pushing of the organization, only so far as membership fee goes, but will be given all the privileges of the association except voting, and will be helped in every way possible in growing the flowers. This part is intended for the amateur and we trust to make a success of the program. It is also planned to issue a monthly bulletin as soon as arrangements can be perfected. Officers are as follows:

President, E. T. Barnes, Spencer, Indiana; vice-president, H. W. Koerner, Milwaukee, Wis.; secretary, E. S. Thompson, Benton Harbor, Mich.; treasurer, W. K. Fletcher, Des Moines, Iowa; directors, E. E. Stewart, Rives Junction, Mich., A. E. Kunderd, Goshen, Indiana, Chas. Parker, E. Pullman, Ill.; membership committee, N. L. Crawford, LaGrange, Indiana; publicity committee, Hon. Wm. Watson Woollen, Indianapolis.

It is intended to hold a show as soon as arrangements can be perfected and the sentiment now is in favor of Indianapolis, Indiana, sometime in September.

E. D. THOMPSON, Sec'y.

Mass., as the place for their convention of 1912.

W. H. Dunn, superintendent of parks of Kansas City, was elected president, and F. L. Mulford of Washington, D. C., was re-elected secretary and treasurer for the ensuing year.

Six vice-presidents elected include Charles E. Keith, Bridgeport, Conn.; James B. Shea, Boston, and F. C. Green, Providence, R. I.

SOCIETY OF AMERICAN FLORISTS.

Department of Plant Registration.

Public notice is hereby given that S. A. Anderson, of 440 Main street, Buffalo, N. Y., offers for registration the begonia described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description:—An improvement on the begonia Gloire de Lorraine. The yellow center is twice the size of that of the regular Lorraine; it is self branching; has five petals in the flower instead of four; it throws twice as many flowers as the Lorraine. Name, "Betty Anderson."

H. B. DORNER,
Secretary.

August 3, 1911.

CLUB AND SOCIETY NOTES.

The election of officers at the last Detroit Florists' Club meeting resulted as follows: President, Geo. Brown; vice-president, J. F. Sullivan; secretary, H. Schroeter; treasurer, Robert

Rahaley. Everybody is delighted to have J. F. Sullivan among the officers because his enthusiasm and earnestness in club work is much needed at this time. The annual outing to Bois Blanc Isle will be held Aug. 29th.

At the meeting of the Gardeners' and Florists' Club of Baltimore, last night (Aug. 7), there was the largest attendance of the year. A good number of new members was added to the roll. Chas. L. Seybold former superintendent of Carroll Park and F. C. Bauer returned yesterday from a European trip of several weeks.

The Retail Florists' Association of St. Louis meets on Monday night, August 14th. The great importance of this meeting should bring out a very large attendance. The meeting will be held at 8 o'clock in the Knights of Columbus Hall. (Why not hold it in Baltimore?—Ed.)

State Vice-President Fred H. Weber is rounding up quite a large delegation to represent St. Louis at the convention next week at Baltimore. He expects to list a few more at the club meeting this Thursday afternoon.

The fall flower show by the Horticultural Society at the Coliseum next November promises to be a good one. The same week the Chrysanthemum Society of America meets with us. O. G. Koenig, secretary of the society will be at the Convention to enlist entries for the show.

IN BANKRUPTCY.

Ukiah, Cal.—J. R. Banks filed a petition in insolvency on July 26. Liabilities \$3376, no assets.

MISSOURI'S FRUIT OUTLOOK.

The State Board of Horticulture is in receipt of special reports from correspondents in all of the counties of the state which show that the outlook for a good apple crop is still excellent. Taking the average condition of the entire state, the outlook for the apple crop has declined seven points, the present estimate being thirty per cent. of a full crop. The peach situation remains practically unchanged, the present estimate being 28.2 per cent. as against 29.2 per cent. a month ago. Since a large number of these reports are based upon seedling peaches, the estimate will have to be cut in half. The outlook for grapes is excellent, the average for the state being seventy-five to eighty per cent. Blackberries and similar fruits were almost a failure except in the southwestern counties.

There is some complaint of drought injury but it does not seem to be serious. Unless there are heavy rains apples will be smaller than usual but the color and quality will be unusually good. Fruit has dropped badly where trees were unsprayed and uncultivated. There is no rot but scab is prevalent.

Nearly all sections of the state have lately had rains so that the situation as regards apples certainly ought not to grow any worse, and it is believed that it will materially improve as additional moisture in the soil will cause the fruit to increase in size very rapidly. It now seems that nothing can prevent an apple crop which will be fully 200 per cent. greater than was harvested in the state last year.

Boddington's Quality Christmas and Winter-Flowering Sweet Peas

ALL true stocks of Winter Flowering Sweet Peas will be scarce this season, some varieties are a total failure, owing to the exceptional season in California this Spring. We can make immediate delivery of the varieties marked with a star (*), the balance we are expecting from our grower in California at any time. Our advice to intending planters is to order early.

A

Our stocks of Christmas-Flowering Sweet Peas have stood the test for years, and we can refer you to the largest growers of this increasingly popular flower, as to the truthness and quality of our seed, earliness of blooming period, and strength and habit of plants.

The following varieties are the "best by test" and include Zvolanek's and our own introductions, grown for seed from selected stocks by the leading California Growers and Specialists of Sweet Peas. Our output last year was nearly 6000 lbs. No kicks and plenty of testimonials as to quality, germination and truthness to type.

BODDINGTON'S QUALITY WINTER-FLOWERING SWEET PEAS

At the Exhibition and Convention of the National Sweet Pea Society of America, July 12th and 13th, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only

***BODDINGTON'S EXTRA EARLY CHRISTMAS WHITE SNOWBIRD.** An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz., 30 cts.; ¼ lb., 85 cts.; ½ lb., \$1.50; lb., \$2.50.

***BODDINGTON'S CHRISTMAS PINK.** This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August, flowers can be cut from Thanksgiving on during the Winter months. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***BODDINGTON'S CHRISTMAS WHITE.** A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; lb., \$1.50.

***BODDINGTON'S CANARY.** Similar to the above, but flowers of an exceptionally good yellow. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; lb., \$3.00.

All other varieties of Winter and Summer-flowering Sweet Peas supplied. Write for quotations.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

Obituary

August Sunderbruch.

August Sunderbruch, age 82, Cincinnati's oldest florist, passed peacefully away, Aug. 2d. He was born in Marl, Hanover, Germany, May 26, 1830. At 15 years of age he started his apprenticeship in the flower business receiving a thorough training in nursery and gardening. In the year 1845 he arrived in this country and came directly to Cincinnati. His first year here he taught botany in the Wesleyan Female College. The following year he secured employment as gardener for the Resors, laying out the beautiful estate of the late Ruben Resor. While employed there he married Miss Dorothy Klanke, to which union there were ten children born, three of whom still survive—William and Albert of this city and Mrs. Louis Helwig of Chicago. Mrs. Dorothy Sunderbruch passed away in the year 1874.

After leaving the Resors he went to work for Mr. McAvoy who conducted a nursery business where Eden Park now stands, at that time it was called Garden of Eden. Seeing an excellent opportunity for a greenhouse establishment in 1863 he purchased the land in Coryville (city) and built greenhouses which are still running today. He also opened up a retail establishment on W. 4th street. Being a man of sterling integrity and busi-

ness acumen he rapidly established a large and exclusive retail trade. In 1890 he retired from active business, turning the same over to the firm of A. Sunderbruch Sons, consisting of William and Albert Sunderbruch and Ed. A. Foster, a son-in-law.

He was buried on Friday, Aug. 4th. The numerous floral tributes showed the high esteem in which the deceased was held.

In 1886 he married Miss Christina Zeidler who still survives.

Samuel Frederick Miller.

The death is reported of Mr. Samuel Frederick Miller, a fruit grower and horticulturist who resided near Cavetown, Md. Mr. Miller was born in Germany seventy-five years ago, coming to this country when eighteen years of age. He is survived by a son and two daughters. The cause of death is given as complication of diseases.

Miss Minnie Johnson.

On July 25, Miss Minnie Johnson, of the firm of M. & L. Johnson, Dayton, Ohio, died at her home 915 North Main street. She was born in Dayton 1852, and spent her entire life there. The business was established by herself and sister in 1882, and was the first flower shop in Dayton. The business will be continued by Miss Lucy Johnson.

Edward McNally.

Edward McNally, nurseryman and florist, Anchorage, Ky., died after an

illness of several months. Mr. McNally came to this country from Dublin, Ireland, forty-five years ago and started in business in Anchorage. He is survived by his wife and four children.

Wm. B. May.

Wm. B. May died at the Hartford, Conn. Hospital, of heart disease on July 30, aged 76 years. He was for many years head gardener for James J. Goodwin, leaving a position as gardener at Kew Gardens, England, to accept the appointment.

Mrs. C. H. Woolsey.

After a long illness Mrs. C. H. Woolsey, wife of C. H. Woolsey, florist, of Rockford, Ill., died on July 31, aged 74 years. She was married to Mr. Woolsey in 1877, in the house in which she was born and which has always been her home.

James J. O'Leary.

James Joseph O'Leary died at the home of his parents, 40 Fanning street, Lowell, Mass., on August 5th, aged 21 years. He was associated with his father in the florist business. His parents and one sister survive him.

James L. Reynolds.

On July 26 James L. Reynolds, proprietor of the Bonnie Brae Nurseries, New Rochelle, N. Y., died at his home, of septic pneumonia. A widow, son and daughter survive him.

PANSY—Boddington's "CHALLENGE"—All Colors

This mixture contains all the finest Giant strains—of the leading Pansy Specialists in the world—the Giant self-colors, the Giant striped and margined, and the Giant blotched, etc., all carefully mixed in proportion—the finest that money can buy—the finest your money can buy. A florist who has grown it said, "Why don't you call it Defiance?"

Hybrid Rhododendrons

ORDER NOW FOR COMING SEASON

We offer the largest, most varied and most reliable stock in the world, of REALLY HARDY varieties.

Write for list of recommended sorts and prices.

We carry also a full line of other fancy nursery stock for the hardy garden.

JOHN WATERER & SON, Ltd.

American Nursery, BAGSHOT, ENGLAND

ORCHIDS

We beg to recommend to prospective buyers our fine, large and varied stock of Orchids, samples of which we will have at the Convention of the S. A. F., in Baltimore, Md., Aug. 15-18. Your call and inspection is cordially invited.

LAGER & HURRELL
SUMMIT, N. J.

NEWS NOTES.

Chicago, Ill.—A. Briet has sold his property and greenhouses, 7455 Ridge avenue, to his brother-in-law, Michael Kloss.

Elmira, N. Y.—Fire recently damaged the establishment of H. N. Hoffman, nurseryman and florist, to the extent of about \$20,000.

Springfield, Ohio—Charles W. Unglaub has sold the greenhouses on West Mulberry street to C. Pearl Bethard, of the Ferncliff Floral Co.

Peoria, Ill.—One of the greenhouses of Cole Bros., 1621 Perry street, collapsed on July 30, cause being given as old age. No one was hurt and the house was empty of stock.

Bridgeport, Conn.—Frank C. Foehrenbach, formerly employed by Jas. E. Beach, intends to go into business for himself growing carnations and pot plants. He is now building one greenhouse.

Mainville, R. I.—The Thayer greenhouses have been purchased by Thos. T. Booth, formerly foreman for Vose & Son, Cumberland Hill. He intends to grow a general line of stock and expects to erect another house soon.

Redlands, Cal.—A new establishment to be known as the Hockridge Nurseries will be opened here by Sidney Hockridge as soon as a suitable store can be secured. Mr. Hockridge was formerly with the City Nurseries.

Milwaukee, Wis.—The C. C. Pollworth Co. have leased the building at the northeast corner of Oneida and Market streets for a term of ten years. The building is being remodeled, and a conservatory and show room erected in the rear.

Highland Mills, N. Y.—George Percy has purchased the greenhouses and property of Mrs. George A. Merritt. Wright and Lynch, who have been running them under the name of G. A. Merritt & Co., have rented them from Mr. Percy.

Martinsburg, W. Va.—The Cherry Hill Orchards, to carry on all kinds of agricultural and horticultural operations, general nursery business, etc. Capital stock \$50,000. Incorporators, Alex. Clohan, L. H. Thompson, H. J. Thompson, R. S. Thompson and Clarence E. Martin.

¶ All bulbs of quality must bear a price in proportion to the skill, time, expense and risk attending their cultivation and distribution. Those bulbs termed dear are usually, when justly estimated, the cheapest; they are cultivated with much less profit than those usually termed cheap. The business of supplying bulbs cheaply and not attending to that excellence of quality necessary to eventual success, is the most frequent and certain cause of business decadence among bulb houses throughout the world. It cost more to produce ten Giganteum of superior quality than it does twenty of common calibre. Real good Giganteum must be planted very deep in the soil and well fertilized and cultivated. It takes much longer and costs much more, but the bulbs are worth all it costs to those who know bulb values. Horseshoe Brand Giganteum are today the best we know of and we can recommend them to the most exacting growers of lily bulbs in the world. The cost to you is exactly in proportion to what you pay for—they are a-la-carte Giganteum. Write for prices—they are the kind your business requires.

Not How Cheap
But How Good

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

**We think we can make it to your advantage to do so, as regards
both quality and price**

THE stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000
7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000
9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Piersoni, 6-inch pots \$0.50 each
Nephrolepis Elegantissima, Piersoni, Bostoniensis, and Harrisii, heavy 8-inch plants, \$1 to \$1.50 each
Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-inch plants \$2.50 each

In writing to Advertisers kindly mention Horticulture

During Recess

New York Bowlers.

At the practice game last Friday evening several of the old timers were there and the captain furnished an interesting paper on "How to Bowl Over 200," with illustrations. New York ought to make itself felt at Baltimore. The scores:

Nugent	117	125	Shaw	108	111	136
Bella	111	144	Kaloda	154	162	184
Dodan	114	129	Maude	188	160	176
Hoot	155	140	Young	140	129	115
Scott	132	153	Clawick	216	222	171

Final games of the season, August 11th.

Michell vs. Harris.

The Michell nine have been stopped in their mad career for the championship. They journeyed out to Darby, Pa., on the 5th and met their Waterloo in the shape of the W. K. Harris twirlers—and got trimmed 14 to 9. Their excuse is that they were short three players on account of vacations and had to put in green subs. The next game will be with the Wm. Henry Maule team at Andalusia, in connection with the first annual picnic of the Michell employees.

Notes.

A final tryout between the Chicago bowlers took place Tuesday. The Convention men played the Stay-at-Homes but too late for us to report results.

The North Shore Horticultural Society will hold a picnic at Tuck's Point, West Manchester, Mass., on Aug. 30. A programme of sports has been arranged for the day.

The H. F. Michell Co. employees hold their first annual picnic at the Michell Trial Grounds at Andalusia today, August 12th. Two special trolley cars leave 5th and Market street at 1 P. M. A ball game with the Drexel boys and much other fun and frolic. Refreshments will be served.

The Kentucky Society of Florists, Louisville, Ky., held their picnic at Stower's Grove, on July 27. The affair was a great success, about 200 people attending. W. H. Leeming was chairman of the picnic committee, and J. B.

Stuessy master of ceremonies. Outdoor games of all sorts were played.

A card from a swell restaurant in New York, just received, bears the inscription: At the round table J. Austin Shaw, J. S. Wilson, L. C. Bobbink, Mrs. J. A. Shaw, Mrs. L. C. Bobbink, Duella M. Wilson. Brother Wilson has now been cast long enough to get the Iowa hay seed shook out of his locks. He appears to have been in the right kind of company to finish the job.

WASHINGTON NOTES.

President Taft and a number of prominent American and foreign diplomats have been invited to attend the national conservation congress at its third meeting to be held in Kansas City, Mo., September 25 to 27, and to speak on the subject of the conservation of the natural resources of this country for which purpose the congress will be held.

Frederick H. Kramer and William F. Gude have been appointed members of the general committee which will have charge of the convention of the National German-American Alliance to be held at the Hotel Willard, October 6. Mr. Gude will also have charge of the decorations. It is expected that 300 delegates representing some 2,000,000 German-American citizens will attend.

With a view to the increased efficiency on the part of their employees, as well as from a moral standpoint the local florists have promised to lend their aid toward at least the partial elimination of the cigarette habit and to this end have tentatively agreed to discourage the use of cigarettes by all employees and to refuse to hire or employ any boys addicted to this habit. J. H. Small & Sons, have been prominently mentioned in this connection and all of the others, practically, are falling into line with Dr. Harvey W. Wiley of the Agricultural Department, at the head.

It is reported that the Bureau of Insular Affairs is experiencing some little difficulty in obtaining capable and efficient men, experienced in their respective lines, for service in the Philippine Islands. There will be two examinations held September 6 and 7, one of them being for agricultural in-

structors, the other for a geologist. It is further reported that there are, at the present time, twelve vacancies in the position of agriculture chemist and that there will be an additional number within the next few months. The position pays from \$1200 to \$1400 per year, with transportation, etc.

The local florists and members of the Florists' Club of Washington are somewhat disappointed over the fact that the program of the convention at Baltimore will not permit of some time being given over to a visit to this city during the convention period, but any of attending members who may desire to come en route either to Baltimore or their homes may be assured that a hearty welcome awaits them. Such members are invited to make their headquarters at Gude Bros. store, 1214 F Street, N. W., to have their mail addressed there and to otherwise make use of the premises.

The local police and those of other nearby cities, have been asked to endeavor to locate one Caskin A. Abeele, a Belgian florist, who came here on July 10, with a view to securing a suitable site for a florists' shop, but of whom nothing has since been heard. He left Brooklyn, N. Y., with some \$2000 in cash and several checks in his pocket, leaving his wife and child behind to await the time until he could properly provide a home for them here. Abeele is described as being 28 years of age; about 5 feet, 8 inches in height; black hair and mustache; black eyes, full lips, wore black clothes and a straw hat. Mrs. Abeele, who speaks but little English, informed the police that the habits of her husband were excellent and that there seemed to be no cause for his disappearance other than possibly foul play.

CLARENCE L. LINZ.

DETROIT NOTES.

Tony Schmidt, successor to R. O. Kohler, is very well pleased with the way business has started.

Carey & Leff is a new firm of retailers who will open a store on Woodward Ave., near Peterbore St.

Mr. Walter Taepke and wife have returned from a trip to the Thousand Islands and the St. Lawrence River.

Richard March has bought the place of Phil. Hildebrand, 56 Clippert St., consisting of four houses, 18 x 100, dwelling and barn.

Murray Patterson was married on August 2 to Miss Minnie Foot in Scotland. The happy couple will return home on the S. S. Mauretania, leaving Liverpool on Aug. 12.

THE EXULTANT GLADIOLUS.

I note with great interest that at a recent banquet given by President Taft to Admiral Togo, held in the State Dining Room at Washington, the tables were decorated with red and white gladioli. The reporter makes the usual mistake of calling them gladiolus. Every admirer of this beautiful flower will no doubt be very much gratified to see it find a place of such great prominence at the Executive Mansion. We hope the time will come when the white gladiolus will know enough about the flower's spell and pronounce the name correctly.

S. E. SPENCER

SEED TRADE NOTES.

Carrot, beet, parsnip and celery seed are reported to be very scarce in Europe.

San Antonio, Tex.—The United States Seed Co. is about to move to Memphis, Tenn.

Humboldt, Ill.—J. O. Toland is building a 28 x 60, two-story and basement building to replace his old seed house.

Beatrice, Neb.—A. H. Luck, formerly manager for Carl Sonderbregger, has resigned and purchased an interest in his uncle's seed and nursery business in Fairbault, Minn.

Arthur L. Deal, son of the managing director of W. W. Johnson & Son, Boston, England, arrived in New York last week on his first business trip to America and can be addressed at the Hotel Imperial, New York City. His specialties are peas, turnips and rutabagas.

Don't forget to ask for a certificate when buying your railroad ticket for Baltimore. Reduced fare not possible without it.

Grate Bars

For Horizontal and Upright Boilers

We have been in the foundry business for nearly half a century. Consequently we have a large variety of patterns for grate bars. We carry in stock a large number of regular parts and make a specialty of prompt deliveries. We use iron in our mixtures best suited for furnace work, and our grates last longer and give better satisfaction on that account.

Mahoney, Tupper, Double Bar and Circular

We carry stock sizes of the Mahoney and Tupper grates up to 50 in. long; these grates are all 6 ft. wide, 2 in. thick, 50% air space, and weigh 50 lbs. to square foot.

The Double Bar Grate is 3 in. wide, each bar is 1 1/2 in. wide, 2 in. thick, and weigh about 45 lbs. per square foot.

The Circular Grate is made in all diameters from 12 to 50 in.

IF you want your greenhouse benches to last
you want to lessen repair expenses
you want an up-to-date plant

THEN USE CEMENT BENCHES

You can easily make them yourselves. Others are doing so right along. We furnish the molds, and tell you just how to do it. No expensive labor to hire—you do the work.

Send for booklet and be convinced.

E. H. HUNT, 131 N. Wabash Ave., Chicago, Ill.

What the Users say

Kroeschell Boiler Durable

"In 1891 we bought one of your No. 12 boilers to take the place of four smaller boilers of another make. Your boiler has done the entire work to the highest satisfaction, SAVING LABOR and about ONE THIRD OF THE FUEL. We used to burn before. We had that boiler up to 1901, that is 12 years, having no repairs on it whatever, except one set of tubes we put in in 1900. Last fall we installed one of your No. 14 boilers, having enlarged our plant. It takes care of 35,000 sq. ft. of glass very easy. When firing we keep the ash door open only about one inch. We think your No. 14 boiler could easily take care of 40,000 sq. ft. of glass."

Ohio "The Second Mother of Presidents" Builds L and B Greenhouses

This one, erected on the outskirts of Cincinnati for J. C. Hoven, is one of our somewhat recent, ornamental Iron Frame ranges. C. F. Skjoldager is Superintendent.

Last year the work room caught fire and was completely destroyed. Only very slight damage, however, was done to the greenhouse which emphasizes indestructibility as one of the strong arguments in favor of our Iron Frame construction. It is as nearly fire withstanding as it is possible to make a practical growing house. It also successfully withstands the destructive conditions of moisture and dryness such as all greenhouses are subject to. It is the house of greatest endurance and highest efficiency. The safe and sure house to build. Send for catalog.

Virginia, until the election of President Taft, held the record of furnishing six out of the twenty-seven presidents. But now, Ohio, with an equal number, disputes Virginia's claim as, "The Mother of Presidents."

GREENHOUSES

NOT those heavy, short lived wooden ones—no, not that kind, but fine light, enduring Iron Frame Houses that will grow the very best plants possible. Houses you won't have to spend a cent on for repairs, aside from painting, for years to come. Houses built right, ventilated right, and heated right—houses backed by over a quarter of a century of experience.

If you want your house to have curved eaves, we will gladly build it that way—in fact, rather prefer to. Send for our catalog. It is a conclusive bit of evidence.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 350 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Pierisoni, 6-in. pots.....\$0.50 each

Nephrolepis Elegantissima, Pierisoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each

Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

F. R. PIERSON COMPANY, Tarrytown-on-Hudson,
NEW YORK

GERANIUMS....

We have no hesitation in claiming that our collection of Standard American Geraniums is pre-eminent among such collections in the country, as far as only distinct and useful varieties are concerned. It is the result of the most careful selection from hundreds of varieties, from the finest European and American introductions, and comprises only those sorts which years of experience have taught us are the very best in their several different classes, and which can be depended on to produce the most satisfactory results, and which represents the highest standard of development yet obtained in its special class of color.

In keeping our stock up to this high standard we are continuously adding some of the newer introductions and discarding some of the old sorts which have been superseded by others which are more beautiful in form, greater in substance, more expansive in color, more satisfactory in growth.

We have prepared to propagate these in large quantities, having added thousands of plants to our already large stock. If you can use them in large quantities write us and we will be able to make you special price.

We are booking orders for DAHLIA & CANNA roots for fall delivery. Send for List.

Cynoches chlorochilon or Swan's Neck Orchid

The genus *Cynoches* is perhaps the most interesting and perplexing of all the Orchid Genera. When buying plants out of bloom one never knows what he is getting and the appearance of the first flowers, whether male or female, is always awaited with great interest and a certain amount of speculation. The plant figured here was received last fall from Julius Roehrs Co., of Rutherford, N. J., under the name of *Cynoches chlorochilon* carrying a raceme of male flowers at the time. A plant of apparently the same thing is figured in their catalogue with a raceme of male flowers under that name and on the foregoing page one with female flowers. On looking up the record of the species, however, I find that the two sexes of *C. chlorochilon* do not show much diversity except in the female having a short stout column with a pair of triangular wings.

There seems to be something wrong somewhere and I have a suspicion that all the figures represent *Cynoches maculatum*, a good figure of this with both sexes, appeared in the *Orchid Review*, Vol. XVII, p. 273. The plant figured here is now producing two more racemes from the same bulb, but it is too early to say what sex they will represent, most likely again all male flowers, for female flowers of this section of *Cynoches* are rarely produced under cultivation. *Cynoches maculatum* was described by Lindley in 1840 from plants bearing male flowers and these have appeared very often since, but the female flowers of this species were not known, or at least not recorded, until 1909, or nearly 70 years after the first male flowers appeared. The diversity in the two sexes of some of the species is very great and it is no wonder that plants of the same species are often sold and grown under different and erroneous names.

CULTURE

Cynoches need a very decided rest after flowering in a temperature of about 55 to 60 degrees. Very little water is required after the bulbs have finished and the flowers faded; just enough to prevent shrivelling until the new growths appear in late winter or early spring, when the amount should be gradually increased, being careful not to let any water lodge in the new growth or they will be very apt to rot off. From this time on they will also require a warmer temperature and when in full growth one can't get it too hot for them, providing the atmosphere is moist at the same time. When well rooted and the new pseudo bulb commences to swell they will enjoy an occasional dip in weak liquid manure, say once or twice a week, but it must not be overdone, lest the roots might decay.

Shade just enough during the growing season to prevent scorching of the leaves. After growth is completed and the leaves commence to turn yellow, give full sun, plenty of fresh air, and very little water. *Osmunda* fibre is the best potting material for them. Use small receptacles, preferably common flower pots or pans, and suspend near the glass in a warm house in order to give them the full benefit of the light and heat. Under these conditions they will grow and flower freely.

THE BUTTERFLY ORCHID

Two species of *Oncidium*, namely, *Oncidium Papilio* and *O. Kramerianum*, go by the above name. Both are nearly allied, the former being, perhaps, the best of the two, having larger and better colored flowers produced on longer and more slender stems. Both of them have beautifully mottled leaves and handsome yellow flowers which are barred and mottled with chestnut

CYNOCHEs CHLOROCHILON

brown and produced at intervals from the very tip of the long slender scape.

Oncidium Kramerianum can easily be distinguished from *O. Papilio* by the swollen joints or nodes of the flower scapes and the more distinct mottling of the leaves. Both species will thrive under the same treatment. They do best in small baskets, using a little *Osmunda* fibre for the roots to run in, suspended in a sunny position in the warm or East India house where the temperature rarely goes below 60 degrees. They should never be allowed to get very dry as they are nearly always on the move, either growing or flowering or both. There is a plant of *O. Papilio* here with seven flower scapes which are in bloom nearly all summer and sometimes way into the winter, each scape producing its flowers at intervals of from one to three weeks. A few plants of these interesting orchids should be in every collection.

This is Baltimore's week and right well has she made use of its privileges and its obligations. And the horticultural interests of our country are advanced and enriched by the splendid success of this notable event, the spirit of progress with which it was imbued and the inspiration generated, in which not only those who were in attendance but the stay-aways are beneficiaries. As to those who stayed away, who are in the habit of staying away from these enthusiastic gatherings, we are truly sorry for them. There are many who from one circumstance or another are obliged to be absent, but there are thousands who ought to support the Society with their presence and their influence, who can if they wish, but who do not. Some of you who think you have no time to waste on such things, who find your own business demands all your time, who "haven't taken a vacation in twenty years," might take to heart the admonition in the Philadelphia Telegraph:

"Imagine the good time your widow is going to have some day on the money you have saved."

Window Boxes

Mr. Editor:—Your editorial in last week's issue of *HORTICULTURE*, captioned "Blamed anyway," relating to window boxes is timely and to the point. In a recent editorial you called attention to the fact that window boxes are not so popular in Philadelphia as they used to be. There must be some cause for this and it is up to the growers of window box plants to find the cause and apply the remedy. A properly filled and properly attended window box is decidedly ornamental; while a poorly filled and cared for box is an eyesore. That the construction of the box or receptacle is "prolific cause of failure" is a point that should be emphasized and no florist should allow a box or plant receptacle of any kind to be filled on his establishment unless it is all right. A case of this kind, with which, fortunately, I had nothing to do, was called to my attention this season. A large factory in New York had a lot of window boxes made in its own shop, painted them green outside (which was all right) and smeared them with white lead inside (which was wrong). No holes were made in the bottoms of the boxes. Thousands of suitable plants were bought and planted in those boxes by men who call themselves gardeners. The plants promptly started to dwindle and die and the dealer who supplied the plants was blamed. They refilled those boxes using the same soil and with the same result. Again the dealer is blamed. "Blamed anyway." A failure on so large a scale as this is sure to be noticed and deter others from attempting window box decoration. How the florist can "butt in," seeing those people do all their own work is more than I can see.

If the editorial referred to was published in the monthly magazines or daily papers it would reach a class who ought to be posted on such things.

Seasonable Notes on Culture of Florists' Stock

CYCLAMEN

Give your earliest batch of these plants their last shift now. Plants coming out of 4-inch pots should have a 6-inch pot and those from a 3-inch pot will go into a 5-inch pot, and so on according to the vigor of the plants. For a compost use a moderately firm sod that is fairly well decayed three parts, well rotted cow manure two parts, leaf-mold one part, and some clean sand to make the whole porous. See that each pot has a fair amount of drainage. Continue to treat them with care so they will not receive any severe check from either too much water or the want of it. Give the plants a daily syringing overhead and underneath for this is a prime requisite. Keep the material on which the pots stand and the atmosphere moist by wetting between the pots as it cools the air and refreshes the plants. Where you have your cyclamens in frames let them remain here for another month as the conditions suit them here better than in a house any earlier. When they are removed to the house see that they have a position as near the glass as possible, and if each plant is stood on an inverted pot a better circulation of air will get all around the plants. Give frequent fumigations so as to keep them clean.

CARE OF HARDWOODED PLANTS

Don't overlook your azaleas. Just as soon as they begin to crowd one another give them more room. Give the pots a mulch of rather fresh cow manure for it will help them greatly in the formation of flower buds and, later on, the flowers themselves. See that they are well supplied with water as the neglect of water always does serious damage. All such plants as ericas, epacris and genistas should be faithfully attended to right along. Watering two and three times a day is often necessary to keep them moist at the roots. It is even advisable to examine them by taking one or two out of their pots to ascertain whether they are getting too little or too much water. Ericas and epacris must not be suffered to get too much water at the roots now. If heavy rains seem likely lay them on their sides. They can remain outside until the middle of September. To risk them out later than this is not advisable. Genistas should be making excellent growth now. Be sure and use the hose freely on these plants so as not to let red spider spoil the foliage.

BOUVARDIAS

All strong growths should be pinched back, and all the weak growth that they made while in small pots should be cut out, for only the strong growth that comes from the root should be saved. They should be lifted the last of this month or the first week in September and they will take hold of the soil better than at a later date. They will do well on a bench of five inches of soil in a house that runs anywhere from 58 to 65 degrees at night. After they are either benched or potted, spray them several times a day and keep up a good atmospheric moisture by damping down the walks and walls—which will keep them from wilting so bad. For the first eight days some shading will be very favorable to their well doing. By giving them the proper syringing you will be able to keep off the attacks of both the red spider

and mealy bug. When the beds or pots get full of roots they will be greatly benefited with manure-water once or twice a week.

GERANIUM CUTTINGS

From now until October if we have no cutting frost, geranium cuttings can be taken. Cuttings taken during September and later are less liable to loss from damping than those that are inserted from now up to the tenth of September, as the cool nights help to harden up the wood. Trim your cuttings up well, leaving only the small leaves on the top of each cutting. To leave more only means endless trouble later on in picking them off, as they always get in a decayed condition. All the cuttings that are put in from now until the tenth of September should give a good cutting during January, which can be rooted in a gentle heat and grown on. After the cuttings are put in keep them moderately moist until they are rooted, when they can be kept much drier until they are potted off. This treatment causes them to make a mass of fine fibrous roots. When they are potted up avoid using any green manure in your compost. Manure, if used, should be thoroughly decayed, so that it will crumble up very easily. A good compost is a mixture of three-fourths of new soil to one-fourth of some very old manure and a 5-inch pot of fine bone meal to every barrow-load of the above mixture.

MARGUERITES

The stock plants should by this time have broken away and made some fine succulent cuttings. So look over the plants and secure cuttings of from two to three inches long and strip off a few of the lower leaves with a good clean cut at the bottom. This is all that is necessary to make a good cutting which will easily root in any ordinary propagating bench. As soon as these are rooted they should be potted off and not allowed to make too long roots before being taken out of the sand, for they will feel the check less. Use a 2½ or 3-inch pot with any good heavy loam, to which an addition of one-fourth of well-rotted cow manure has been added. These young plants should have at all times the fullest light and ventilation in abundance. By keeping these potted along they will make nice plants in 6 or 7-inch pots for next Easter.

ROSES

Watering and syringing should be carefully attended to now. The half-doing of these essentials causes all kinds of trouble. Syringing improperly done only allows red spider to get a good foothold. When the nights get longer and cooler do all your watering and damping down before three o'clock in the afternoon, for all roses that have heavy and luxuriant foliage always collect abundant moisture which leaves the foliage dripping during the night and is very favorable to black spot. From now on most nights will call for a little fire heat. This along with a little ventilation is a very helpful factor in rose culture. Keep on tying as your plants may need it, for you can then do syringing better and it also lets the light and air around each plant. Use all caution to restrict mildew.

Mr. Farrell's next notes will be on the following: Carnations for Pot Culture; Cinerarias; Gloxinias and Tuberous Begonias; Orchids; Peonies; Paper White Narcissus.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

A Well Attended Convention and Splendid Trade Display

Chicago the Next Meeting Place

Officers Elected

PRESIDENT—R. VINCENT, JR., White Marsh, Md.

VICE-PRESIDENT—AUGUST POEHLMANN, Chicago, Ill.

SECRETARY—JOHN YOUNG, New York, N. Y.

TREASURER—WILLIAM F. KASTING, Buffalo, N. Y.

The meeting hall in the Fifth Regiment Armory, Baltimore, was well filled when at 2.30 P. M., on Tuesday, August 15, President Graham of the Gardeners' and Florists' Club of Baltimore called the meeting to order and opened the preliminary proceedings of the 27th annual S. A. F. Convention by introducing as the representative of the state of Maryland, Hon. M. Winslow Williams, Secretary of State, who in most cordial terms voiced the welcome of the state to the visitors and paid a graceful tribute to the elevating influences of the florists' calling. Mr. Graham then introduced Mayor James H. Preston, who in vigorous fashion presented the compliments of the city to her guests, and told them briefly about Baltimore's parks, manufactures, harbor and public works.

Robert Craig responded for the visitors. He said that florists always feel at home in Baltimore, and unstintingly praised the always ready hospitality which characterizes her citizens. Mentioning the horticultural history of the city he paid a high tribute to John Cook, whose productions in roses had attained world-wide fame, and extended on behalf of the society warm congratulations on the successful opening of this great event.

Mr. Graham next presented President George Asmus, who after the uproarious applause had subsided proceeded to read his address as follows:

PRESIDENT'S ADDRESS.

Ladies and Gentlemen, Members of the Society of American Florists and Ornamental Horticulturists:—

It is with great pleasure I address you on this occasion, the twenty-seventh annual meeting of our society. Although being the first time this city has been chosen for a meeting place, it is not the first time we are guests of our brethren in Baltimore, for the memory has been ever dear to us of that splendid afternoon and evening's entertainment on Friday, August 18, 1905, when as a fitting climax to an enjoyable and profitable meeting in the city of Washington we were welcomed here in true southern spirit and now we are here again to partially pay that debt of gratitude, even as a victorious army returns from the scene of con-

flict. In the six years that have passed we have to our credit many victories won by legislation and arbitration for the general good of our profession and those engaged in it. We also have a much larger sum of money in our treasury, a greatly increased membership roll and two great successful national flower shows to look back upon.

The one thing that stands out prominent in connection with the show held in Boston last March was the bringing together of the different societies for the display of their productions and the opportunity of attending the different meetings at one expense of time and travel. This has been one of my great desires for a number of years. The great growth of our business has necessitated the specializing of many of our large growers and with them it was a case of "Not that I love you less, Brutus, but that I love Caesar more," meaning that their greater interests were in one of the special societies, but we have solved that problem and never again must we meet separately. Ours is one cause for the good of all. Our national shows have come to stay and to that end we should organize at once. The shows should be held once every two years. It is true that the first shows took a longer period of preparation, but that time was used in careful consideration of premium lists, finances and other details which gave us the experience we needed.

The national show should always be held in the spring. Fall shows are not new and are covered in nearly all large cities and in this connection I wish to state that I am pleased that many local societies and Florists' Clubs are following the example of the national society. Now if we wish to profit by the experience in past shows we must always have as men at the head some of those who have assisted in previous shows and as briefly as possible I will outline my plan for your consideration.

Permanent Show Committee.

I would suggest a permanent National Flower Show Committee, say of six, to be appointed, two for six years, two for four years and two for two years and every other year the president to appoint the members for the

six-year term. Thus there would always be on the committee four members of at least two shows' experience. These committeemen should be as representative as possible of the different societies taking part in the show. The chairman of this committee could be elected by the committee or appointed by the president after the location of the show had been decided upon, as it would be of great advantage to have the chairman close at hand. These exhibitions properly conducted show but little chance for loss and therefore I would suggest that 50 per cent guarantee be assumed by the society and 50 per cent, as in the past, by personal subscription.

Trade exhibitions and the selling of space as inaugurated at Boston proved wise and should be continued, and the checking of receipts and disbursements should be done by our officers, as we have a system that has always proved adequate for that purpose and officials that are paid for that work. The great good done by such exhibitions cannot easily be conceived. The standing it gives the trade and the general promotion of horticulture is apparent when the vast throngs that visit the shows and the newspapers' publicity given them are considered. There are no doubt some of you who will differ with me and say that the shows should be conducted outside the society, but I say no. We have found the way to cement our different lines into one general interest. The meetings and the organization of this society have made this possible and we must not take this healthy young child from the mother organization. Our national charter was given us, too, for the development and advancement of floriculture and horticulture in all its branches and we are coming very near complying with that in these exhibitions.

The charter, constitution and by-laws should be printed with the proceedings every year, and it would be well to print therewith proposed amendments to the constitution and by-laws.

Conventions and Trade Exhibits.

It has been my experience that immediately after the selection of a city for the convention the coming year, inquiries are instituted as to what

part of the expense the society will have to assume, and I think that a by-law should be passed that would cover this matter in a general way. The officers of our society awakened to the fact a few years ago that our membership was not developing in proportion to the expense which we incurred, and about the same time we also discovered that one of our largest assets, the trade exhibition, was being used as a big joy fund, and in several instances there was enough left, although we all had participated in considerable joy, to fatten the treasury of the local organization.

The necessity of stringent rules for the proper conducting, the charging and rating and the responsibility was apparent, and the rules to manage and maintain that part of conventions were adopted, and the results of that action are just beginning to be felt. By referring to the report of the Rochester meeting it will be found that over \$1,500.00 was added to the treasury after paying all expenses. Thus when we accept invitations from cities that as an inducement give us concessions such as hall rent, etc. free, it is of great assistance. This beautiful building has been granted to us by the Baltimore brethren on behalf of the business men of the city on those conditions. Then the three principal things for us to consider in the selection of the next place of meeting are: the offering of the hall, the advantage to our trade exhibitors and the opportunity for increase in membership.

The society has no financial inducements to offer any city soliciting the convention. It long has asked that lavish entertainment be done away with, as there is always one enjoyment, greater than any other, that of meeting your fellow in trade and exchanging ideas. The amount of business we have to do sometimes suffers by the entertainments. I can see the day not far distant when the fourth day on the programme will have to be devoted to business sessions. Very often debates and discussions on subjects important to everyone are shortened for lack of time, and several of our important committees have complained, that after a large amount of work and the preparation of a lengthy report, that the matter is hastily rushed through and much that might be gained by discussions is lost.

I do not wish to be understood as against all entertainment. There never need be any fear of that! The danger, if any, lies in each city trying to outdo the other.

Convention Shows.

At the convention in Cincinnati two years ago a resolution was adopted to hold a cut flower and plant exhibition in connection with the trade exhibition. This was attempted at Rochester last summer by the Rochester florists who, with the aid of exhibitors by trades people, made a creditable showing. I am pleased to note that the members of the American Gladiolus Society are with us as a body, and it is just such exhibits as this that will make the exhibitions possible.

The Board of Directors has proposed as one way to promote the plant and flower exhibition at the convention, to allow the local people at certain times to admit the public at a reasonable admission, the money thus obtained to help defray the expense of music, decorations, etc.

Rules 1 and 2, as adopted by the Executive Board, should I think be added to our Constitution and By-laws and are as follows:

1. The society shall control all the features of the trade exhibition.

2. There shall be appointed annually at the winter meeting of the Executive Board a superintendent of exhibits and an advisory committee of three. Said superintendent shall have general charge of all details of the annual exhibition. He shall receive all applications for space and assign the same in the order in which they are received by him. He shall furnish the society, through the secretary thereof, a list of the exhibitors and exhibits by 1.00 P. M. on the day of opening the convention. He shall also furnish the secretary with a list of novelties and new devices submitted for awards, said list to be for the use of the judges.

He shall make no expenditure exceeding \$10 in amount without the consent of the advisory committee. He shall keep full detailed records of receipts and expenditures and other matters of importance relating to the exhibition. Immediately after the close of the convention he shall make a complete report, which, after having been audited and approved by the advisory committee, shall be forwarded with the records of the exhibition to the secretary. All money collected by him shall be forwarded from time to time, without undue delay, to the secretary. All bills incurred shall be endorsed by him and submitted to the advisory committee for approval, after which they shall be sent to the secretary for payment by the treasurer of the society.

The advisory committee shall act as an advisory and audit board, subject to instructions of the Executive Board, and in case of disagreement between them and the superintendent their decision shall be final except it be reviewed by the Executive Board.

My reason for this is that it has taken years of work to bring this feature up to its present standard and a matter in which the revenue involved is so large in comparison with the total amount of dues received, should be under the control of the society proper. The details should be left as they now are, in the control of the Board, as minor changes are very often necessary.

Membership.

This is one of the great problems that confronts us, and in proportion to the growth of all branches of our business, it suffers by comparison. Reasons and theories have been advanced but when the benefits derived are considered it seems incredible. True, we are slowly and steadily growing. Our secretary's report will show that we made a fine gain during the national show at Boston, and the results of recent efforts with which you are familiar through the literature received will also be given you, but when our tariff and legislation committees go before bodies of whom we are asking our rights, they immediately want to know who we are, and whom we represent, and our membership of only eleven hundred does not signify that we are as strong as we should be to obtain proper recognition. By carefully examining the secretary's reports we find that our gains in mem-

bership are almost entirely at conventions or national flower shows and in some cities where we had reason to expect the largest increase we were disappointed, and for the reason, we have discovered, that the open hand of hospitality was so far reaching. The craft in general has been invited, regardless of their being attached to any organization. Just so long as they were florists they were feted and treated, and went away happy but forgot the magnitude of hospitality offered them through the members of the society and the society itself.

We have been so liberal that we thought it would be terrible if, when a florist came to the outer doors of the tabernacle and asked for admission, we would ask him if he was a member, but does not the work of you gentlemen for the past 26 years in their interests demand support? Aye, and so for several years past we have asked that in consideration for his membership we shall pin upon his bosom the highest token of honor, the leaf and emblem of our national organization, which grants the right to our festive occasions and business meetings. Not to be severe with those that are paying for space in our trade exhibitions we have granted them the privilege, by personal recognition, of bringing into the building our brothers in the trade, and we have always hoped and trusted that before they retired they would join in our ranks—this has helped us gain some members and it will continue to do so just as long as we adhere to this policy.

A natural increase in membership also comes from the convention being held in new localities where the society has not held its meetings for several years, and in the selection for the place for the next meeting, this should be given due consideration.

The Elections.

I am now going to voice the sentiments expressed by several of my predecessors and say that the president of our society ought to have had experience on the Executive Board to make him better fitted for the office. I am also in favor of the election of the Board of Directors by the society. I think that the selection of the men to perform the important work of the Board would be better left to the discretion of a number of men, rather than to the several presidents. On the contrary with the offices of secretary and treasurer, their work has to be scrutinized by the Board, who are also the instigators of a large proportion of their work. If perchance the offices were not satisfactorily filled, and satisfactorily means judiciously, promptly, correctly and obediently, there is no immediate redemption. Their official capacity is better known to the Board to whom are entrusted the welfare of the society and the greater proportion of our serious questions, therefore why not this?

Trade Exhibits and Officers.

In conducting the trade exhibit it has been the custom to hire a superintendent and as a recompense allow him 10 per cent of the gross amount derived from the rentals of space, which for several years past have amounted to from \$225.00 to \$250.00, and on several occasions an additional \$50.00 has been allowed as expense outside of the ordinary requirements.

There have always been a number of other items such as stenographer, bookkeeper and miscellaneous expenses, which approximately, from the reports of the last several years, amount to between \$100.00 and \$600.00.

Each year the office accounts and records are kept differently and I know of no time when any of the incidentals connected with this office were ever used for another year, which all means some outlay. Now we are all very nearly agreed that the secretary's salary is hardly enough to recompense a man such as is necessary to properly perform the important duties connected with this office for his entire time. Our membership is not increasing rapidly enough to increase this salary. Now then the same conditions exist concerning the office of superintendent of trade exhibits. We can not employ one for long enough a period at the amount usually earned, for he must have other employment at the same time and perhaps that something else in his own business or his employer's; therefore we have two important positions partially, when we could have them wholly filled, at a reasonable increase.

Now, why not combine the duties of the two; they both are clerical in their way, and both at a certain time need the undivided attention of one man? The duties of the superintendent of trade exhibit are mostly correspondence, except for a short period before the exhibition and then the secretary should be giving his undivided time for the good of our organization and should be in the city where the convention is to be held, assisting, as a paid official, the many willing volunteers who are giving their time, without recompense, toward preparing for the grand welcomes that have greeted us in the past and in this city at this time. This is my solution of obtaining that for which we have been striving, the undivided time of a secretary and superintendent of trade exhibits.

It can easily be seen that both offices can be combined and the duties be competently and judiciously performed. The secretary has all the advantage of his office to secure new business, and the combining of the two offices does not entail any more expense than we have been under during the past two or three years, but it means better results. The amount of salary I have in view at the present time is \$1500 per year and if the work increases as it should under proper supervision, our income will increase, and the time is not far distant when \$2000 a year should be our secretary's salary. He would be the proper man for secretary of the national flower shows,—his statistics and experience would make him the natural choice—his salary and the duties of his office ought to make his presence a necessity on such occasions.

Separate Section Meetings.

The adoption of this suggestion of President Valentine was one of the good things that cannot be praised too highly, and is conducive to great good both to the different societies as well as to our own. Buildings such as this in which we are meeting are particularly adapted, with the different regimental rooms available. I have always been a believer in the necessity of these societies and of their being able to better carry out their specific

work than can be done in our general meetings. They do not conflict, but assist, and every organization pertaining to horticulture, whether a Florists' Club, Horticultural Society, Gardeners' Association or any other specific in its character, formed to promote its own interests, and at the same time the interests of horticulture, should have the encouragement and support of our society. Perhaps some plan could be developed whereby each one of these organizations, when they could show a certain number of their membership in our Society, would be entitled to a representation on our Board of Directors. This would help make our Board representative of all interests and be an inducement for them to get their members into the National organization, thus materially increasing our membership.

The Outlook.

The last year has been one upon which we can look back with much satisfaction, for while business in a great many other lines has not been up to standard and a great feeling of unrest has prevailed among some of them, we, generally speaking, have no complaint and the outlook for a continuance is most promising. There have been fears of over-production among the conservative, but this has not developed, and these fears must have passed away, judging from the large number of buildings being erected or contracted for at present. Some of the building concerns say that this year promises to be the heaviest in their history.

In conclusion I wish to state that I have refrained from touching on many subjects of importance to the Society, but they are in the hands of carefully selected committees, whose familiarity with their work will give to you far better recommendations than I could, and their reports will be presented in due time at this convention.

SECRETARY'S REPORT.

Secretary H. B. Dorner then read his report as follows:

I have the pleasure of presenting today the secretary's report for the 27th annual convention of this, one of the finest national organizations in the country. It has been a pleasure to follow the work of the organization for the year. While the Society has not made the progress that was really possible, there are things that will help to make us more proud of our organization.

The National Flower Show.

Perhaps the most important event of the year has been the National Flower Show. All who were there will agree that it was the finest flower show ever held in this country. Many of the exhibitions were beyond expectation and all were worthy of the trip to see them. A full report will be given later by the committee through whose efforts such a show was made possible.

Condition of the Finances.

The finances of the Society are gradually improving. The permanent or Life Membership fund has been increased since the last convention by the sum of \$1,261.65. This amount was derived from the fees taken for Life Memberships and interests ac-

cruing during the year. The fund has now reached the sum of \$9,700.15. Of this amount \$7,500.00 is invested in the form of two loans secured by mortgages on properties located at Fort Wayne, Indiana. These securities bear interest at 5 per cent.

Membership.

The membership has also been steadily increasing. At the end of 1909 the membership of the Society was 995. At the end of 1910 this was raised to 1073 with the prospects that it will be much increased during the present year. The paid-up membership up to August 10th is 1055, or just 18 less than at the end of 1910. 175 of the members on last year's roll have as yet failed to pay their dues but a number will do so before the year is over.

New Members.

One hundred and fifty seven new members have already been taken in during the year. This is more than twice the number that were added up to the same date last year. At the suggestion of the President letters were sent out to all the members making an appeal for increased membership. The appeal was in the form of a request that each member make an attempt to secure at least one new member. The names of all members sending in applications are to be included in the printed report. Up to date 19 of the numbered application blanks, which were sent out with the letters, have been returned. The following members sent in one or more applications:—

E. A. Peirce.....	12
Morris Goldenson.....	3
S. Wallace Tilton.....	1
Peter Flanagan.....	1
R. Vincent, Jr.....	1
Wm. F. Kasting.....	3
R. A. Vincent.....	3
H. G. Berning.....	2
Joseph Traudt.....	1
I. S. Hendrickson.....	1
P. L. Larson.....	1
Robt. Halliday.....	10
James D. Hooper.....	2
Geo. Asmus.....	1
John Miesem.....	1
Jos. Manda.....	3
T. P. Langhaus.....	1
F. E. Brockman.....	1
Matt Thau.....	1
Florists' Tel. Del.....	6

The following vice-presidents were also active and have sent in many new names:

Conn.—W. R. Pierson.....	4
Iowa—Jas. S. Wilson.....	1
Mass. (East)—W. A. Hastings.....	14
Mass. (West)—G. H. Sinclair.....	1
Mo.—Fred H. Weber.....	6
Penn. (East)—S. S. Skidelsky.....	1
Rhode Island—L. J. Reuter.....	2
Wis.—J. E. Mathewson.....	2
Alberta, Canada—A. M. Terrill.....	1

Few realize that by a little concerted effort on the part of the members, the membership can easily be doubled. It is to be hoped that the method suggested by Pres. Asmus will be continued from year to year and that the members will make a greater effort to aid the Society in this manner.

Life Members.

Of the new members added to our roll, five have come in as life members. In addition to these, 15 old members have also become life members, making a total of 20 for the current year. This now gives the Society 272 life members.

Ind.	1,500.00
Ind. Savings Bank	1,243.99
Ind. State Bank	632.10
Ind. Bank	580.73
	<u>\$9,956.82</u>

advocate of the city a "spelled der," whose eloquence has rarely been equaled in the society's history. Ballot resulted in a tie, ninety-seven for each city. A new ballot was taken at the afternoon session and amid much excitement Chicago was chosen receiving one hundred and forty-five to one hundred and forty-two.

Nomination of Officers.

The nomination of officers resulted as follows:

Presidents, R. Vincent, Jr. and John Farquhar.

Vice-Presidents, H. E. Philpott and August Pochlmann.

Secretaries, John Young and David Rust.

Treasurer, W. F. Kasting.

WEDNESDAY AFTERNOON'S SESSION.

At the afternoon session, William Duckham read a thoughtful paper on the Private Gardener. F. R. Pierson then read his final report as chairman of the National Flower Show Committee:

Report of National Flower Show Committee.

The second National Flower Show opened its doors to the public in Mechanics' Building Boston, March 25, 1911, continuing until Sunday, April 2d. The formal opening took place on the evening of March 25th, on which occasion we were honored by the presence of Governor Foss of Massachusetts, Mayor Fitzgerald of Boston, Congressman Samuel McCall and others, who addressed the large and distinguished audience gathered in Paul Revere Hall, contributing greatly to the interest and eclat of the opening of the exhibition. The weather was unseasonably cold at the time of the opening, but in spite of this drawback, I think I can modestly say that no previous exhibition ever held in this country approached this one in its scope and magnificence. The large attendance of the trade from all over the country, at a busy season of the year, and especially the large local attendance, was most gratifying.

You are all aware of the success of this show from a horticultural standpoint, and I am sure you will be pleased to know that it was not only a horticultural success, but a financial success as well. The number of paid admissions 38,945 amounted to \$18,982.00. At the first national flower show the number of paid admissions was 29,790, amounting to \$17,791.00. This by way of comparison; although at the first show 75 cents was charged for admission while at Boston 50 cents was considered the highest fee. It was practicable to charge, on account of the fact that the Massachusetts Horticultural Society had been in the habit of giving exceedingly fine shows practically free. The amount distributed for cash prizes was \$8,913.10, at Chicago, \$5,147.00 was paid out for premiums. The total receipts, including the amount received from the guarantors, was \$39,027.87, for which amount after deducting all expenses and refunding to the guarantors the amount paid by them, there was left a gross profit of \$3,655.46.

We were most fortunate in securing the services of Chester I. Campbell as manager, who, because of his experi-

ence in carrying on large exhibitions, particularly in Boston, was able to effect many economies which otherwise would have been impossible, and who was a great aid to the efficient work of the committee. Mr. Campbell, according to the arrangement made with him, was to receive, in lieu of salary and office expenses in the preliminary work of organization, securing the trade exhibits, etc., a percentage from the rental of floor space, and, in addition, one-third of the gross profits, if any. In view of the uncertainty as to whether this show could be made a financial success, this was considered a very safe, conservative and advantageous arrangement, as it obviated incurring any large fixed charges, and practically made Mr. Campbell a partner in the enterprise. After paying Mr. Campbell one-third of the gross profits, according to the agreement, and returning to the guarantors a ten per cent. dividend, there was a net profit of \$1,450.97 remaining for the Society of American Florists and Ornamental Horticulturists.

The preliminary work of organization was mapped out by representatives from the Massachusetts Horticultural Society, the Gardeners' and Florists' Club, and the two Boston cut flower markets, in connection with the National Flower Show Committee. After the preliminary work of organization was in hand, on account of the immense amount of work involved in the work preparatory to so large an undertaking, and the fact that the members of the National Flower Show Committee were so widely separated, it was deemed wise to entrust the detail work to a small local executive committee. Accordingly, such committee was appointed, styled the Board of Control, consisting of John K. M. L. Farquhar, Thomas Roland, Patrick Welch, and E. Allan Peirce, with myself as chairman.

No one who has not had experience can realize the amount of work necessary to execute an undertaking of this magnitude; and I take this occasion to express my appreciation of the splendid services rendered by the gentlemen named, to whom, because of their indefatigable labor in connection with the show, from the very beginning to the end no little credit is due for the success of the exhibition. I shall long remember my pleasant association with them in carrying on the work, which was absolutely harmonious throughout. I wish also to state that the services of the Board of Control and of the National Flower Show Committee were given entirely gratuitously. No one received any remuneration in the way of salary, and each one paid his own traveling expenses, hotel bills, and all other expenses.

One of the most pleasing features of the show was the hearty co-operation of the various horticultural societies; and it was largely due to their co-operation that the show was the success that it proved to be. We had the united support of the American Carnation Society, the American Rose Society, the National Sweet Pea Society, the National Gladiolus Society, the National Association of Gardeners, the Massachusetts Horticultural Society, the Massachusetts State Board of Agriculture, the Gardeners' and Florists' Club of Boston and other allied horticultural interests in the vicinity of Boston.

In preparing the premium lists, the Carnation Society, the Rose Society, the Sweet Pea Society and the National Association of Gardeners were asked to prepare their own schedules. The care and thought with which these—as well as the general schedule—were prepared, is best evidenced by the fact that over eighty per cent. of the premiums offered were won. This gave each society control practically over its own particular interest, and tended to harmony and good-fellowship. It was the carrying out to a logical sequence the idea of home rule. It proved in a practical, logical way that it is not impossible to have all the auxiliary societies united in one harmonious whole; and I think that the getting together of the different societies in making one grand show has demonstrated the fact that in horticulture, as well as other matters, "In union there is strength."

Undoubtedly, it is impracticable to repeat these flower shows annually. A work of this magnitude involves so much labor and expense that a national flower show should probably be held not oftener than once in three years, and in different parts of the country, alternating between eastern and western cities. There is no doubt but the educational benefits derived from these shows are great. The attendance at Chicago and at Boston proves that the public is interested in horticulture. Our summer conventions do not meet this need; they are more particularly intended to carry on the work of the society and to promote its social and immediate business interests; whereas, a national flower show, held in the spring, and once in about every three years, can be made of particular interest to the general public and a great educational factor in horticulture.

I am glad that the success of this second National Flower Show has demonstrated to the Rose Society and the Carnation Society the advantages to be derived from a combined exhibition. The success of the Boston Spring Show has resulted in the Rose and Carnation Societies getting together to hold their next annual show in Detroit, and we hope that this work so well begun will be carried forward along these lines, as we believe it is a move in the right direction.

A very pleasing feature of the exhibition I must not omit to mention—was the presence of our English friends, who made it a point to time their visit at the time of the Flower Show, contributing much to the pleasure of the occasion.

We wish to acknowledge our indebtedness to the Gardeners' and Florists' Club and to the ladies of Boston for the cordiality of the hospitality extended by them. The trade exhibit was exceedingly large and comprehensive, and added no small part to the success of the general result, and the committee believes that these exhibitors found themselves fully repaid for the expense and time involved. In addition to the cash prizes awarded, there was a large number of silver cups donated by many generous friends; also a number of S. A. F. and O. H. medals and certificates of merit. Besides these, the Massachusetts Horticultural Society, through its own committee, awarded numerous gold and silver medals in recognition of superior culture and

ment, and we wish to express to this society our appreciation of its liberality in this matter.

A summary of the report of the treasurer, E. Allan Peirce, follows:

Treasurer's Report.

RECEIPTS

Guarantors fund	\$9,860.00
\$8.00 paid admissions	18,982.00
Spice sold	6,803.76
Prize fund advertising	1,820.89
American Rose Society	537.00
American Carnation Society	525.00
National Sweet Pea Society	134.25
Cash donations for Sweet Pea	
Prizes	75.00
National Association of Gardeners	105.00
Mass. State Board of Agriculture	50.00
Boston Flower Exchange	100.00
Interest	34.97

\$39,027.87

DISBURSEMENTS.

Returned Guarantors	
Fund	\$9,860.00
Mechanics building	
rental	5,835.39

General expenses	594.54
Programme expenses	1,062.23
Prizes awarded	8,013.10

\$35,372.41

Gross profit..... \$3,655.46

DIVISION OF PROFITS.

C. I. Campbell, 1-3 as per contract	\$1,218.49
Guarantors 10% dividend	986.00
S. A. F. & O. H. net profit	1,450.97

\$3,655.46

A unanimous vote of thanks was given the committee. It was voted, on recommendation of the committee, that profits from both national shows be added to the permanent fund.

Dr. S. A. Forbes then read his report as entomologist.

Mr. Farquhar's illustrated lecture, scheduled for Wednesday evening, was postponed until Thursday evening on account of a mistake in providing lantern equipment.

THURSDAY MORNING'S SESSION.

The chief business of the morning's session was balloting for officers which resulted in A. F. & O. H. being elected great officers and the various members of the part of the supporters of the various candidates.

Committee on Final Resolutions.

The committee on final resolutions, consisting of E. H. Hamilton and W. J. Johnson, reported as follows:

Advertising, W. J. Johnson, Hotels, F. C. Baur; Badges, James Hamilton; Decorating, J. L. Towner. Ladies' Reception, Mrs. Isaac H. Moss.

We also tender our heartfelt thanks to State Attorney Williams, the representative of his excellency Governor Crotchers, and to his Honor Mayor Preston.

We further desire to place on record an appreciation of the various supply houses who made attractive displays at the convention and sent their representatives here.

Also to the advertisers in the souvenir program and the lay and technical press for reports of our meeting. We note with pleasure the rather unusual feature of the general display of banners and other decorations of welcome throughout the CITY OF BALTIMORE.

ELECTION OF OFFICERS.

Total vote, 385.

President, R. Vincent, Jr., 215; J. K. M. L. Farquhar, 170.
Vice-President, August Poehlmann, 217; H. E. Philpott, 167.

JOHN YOUNG
Secretary-Elect.

Secretary, John Young, 228; David Rust, 155.

Treasurer, Wm. F. Kasting, 355.

Change of date for conventions was defeated.

THE RING.

The great American citizenship who stay at home on election days and then kick at the choice made at the polls are duplicated by the bunch in fraternal organizations who hug the hot fire-place on cold nights and

Did you ever stop to figure what growl at 'the ring'?

The men who do the work, who visit the committees, who arrange the stunts and split your sides with laughter, who dig down deep when occasion demands it, and who always ready for help, either mental, physical or financial.

That's the ring—more power to

ANNUAL MEETING OF THE LADIES' S. A. F.

The annual meeting of the L. S. A. F. was held at the Hotel Belvedere in Baltimore, Md., on August 16, 1911. Meeting was called to order by the President, Mrs. J. V. Phillips of N. Y. A pleasant address of welcome was given by Mrs. R. Vincent, Jr., of White Marsh, Md. Response was made by Mrs. B. Hammond Tracy of Wenham, Mass. A short address of welcome was then given by the president.

The official minutes were read and approved. The yearly record showed that there were 273 members on roll. The treasurer's report was as follows:

Total receipts	\$629.72
Total expenditures	341.01

Balance \$288.71

Nomination of officers then took place.

For President, Mrs. E. V. Boone, Md., 30 votes; Mrs. Julius Roehrs, Jr., N. J., 27 votes. For 1st Vice-President, Mrs. R. Wittman of West Hoboken, N. J., was the only nominee, and therefore received it. For 2nd Vice-President, Miss Perle B. Fulmer of Des Moines, Iowa, being the only nominee, received it. For Treasurer, Mrs. A. M. Herr, of Lancaster, Pa., as the only nominee, received the office. For Secretary, Mrs. Chas. H. Maynard, of Detroit, Mich., as the only nominee, received the office.

The meeting adjourned after the new President took the chair, at 11.45 A. M.

JOINT MEETING.

The joint meeting of Rose, Carnation and Sweet Pea Societies considered the question of a union meeting and exhibition next year at Detroit. It was a long and very lively meeting. The Carnation Societies stood out for January, and others favored March, but the Carnation people carried their point, and January tenth was finally chosen.

FLORISTS' HAIL ASSOCIATION.

The Florists' Hail Association at their annual meeting re-elected old officers. H. H. Ritter was elected Director for two years.

LADIES' BOWLING.

At the ladies' bowling match Thursday forenoon Mrs. Frank Traendly won the seventy-five dollar silver cup.

TWO FINE GLADIOLUS NOVELTIES.

We have had the pleasure of testing out the qualities of Frank Banning's two gladiolus novelties, Niagara and Panama. Niagara is a wonderfully lustrous white and canary flower with a bit of pink touching in the throat. It is a good traveller and the Boston trade like it. Panama is said to be a seedling from America. It has much of the character of its illustrious parent but the color is clearer, more of the pure, pleasing pink and less of the magenta tint.

The Lenox (Mass.) Horticultural Society has voted to omit its show of annual and perennial flowers this year on account of the unfavorable season.

THE EXHIBITION

Baltimore certainly gave the S. A. F., as promised, the finest exhibition hall ever provided for their annual convention. The vast floor space at their disposal permitted a very effective and systematic arrangement of the tables, with abundant room to spare for aisles, etc., which was greatly appreciated by both the exhibitors and the visitors. All departments were well filled. Space will permit of but brief mention at present.

Isaac H. Moss, Covington, Md., clean well grown hardy conifers.

Bobbink & Atkins, Rutherford, N. J., large group of hardy evergreens, palms and ferns.

Henry A. Dreer, Philadelphia, Pa., kentias, araucarias, ferns and general decorative plant stock, flowers of double fringed petunia and gladiolus, bulbs and garden sundries.

Joseph A. Manda, W. Orange, N. J., newly imported cactaceas.

Fred Lapp, Rossville, Pa., cannas.

Vaughan's Seed Store, display of bulbs and garden sundries.

J. H. Peterson, Cincinnati, O., pandanus and ferns.

Knight & Struck, New York, hard wooded plants.

J. G. Harrison & Sons, Berlin, Md., evergreen and deciduous shrubs, fruit of new peach tree.

Lager & Burdell, Summit, N. J., group of orchids in flower and fresh imported cactaceas.

Conard & Jones Co., West Grove, Pa., shrubs and cannas.

H. Eichholz, Waynesboro, Pa., carnation Christmas cheer.

Carrillo & Baldwin, Mamaroneck, N. Y., begonias.

Julius Roehrs Co., Rutherford, N. J., kentias, bays and crotons.

Chas. Elde, New Orleans, La., Phoenix Roebelia.

Joseph Henneck Co., Wyncote, Pa., kentias and ferns.

Storrs & Harrison Co., Painesville, O., decorative plants in variety.

Jackson & Perkins Co., Newark, N. Y., general nursery stock.

W. A. Manda, W. Orange, N. J., evergreens, ferns, orchids, anthuriums, etc.

Jacob Thoman & Sons, pure white seedling gladiolus.

F. R. Benson Co., Tarrytown, N. Y., very fine and extensive collection of all the types of Neprolepis and a general line of forcing bulbs.

Aphire Mfg. Co., Madison, N. J., Aphano and Fungine.

Griffith & Turner Co., Baltimore, seeds, men's sundries, seeds and implements.

Lemon Oil Co., insecticide.

H. F. Mitchell Co., Philadelphia, Pa., seeds, men's sundries, bulbs and implements; a very large display.

Robert Craig Co., Philadelphia, Pa., magnificent display of crotons, palms, begonias, cyclamen, etc. This collection contained 64 new seedling crotons.

Hubert Bulb Co., American grown forcing bulbs.

R. Vincent, Jr. & Sons Co., White Marsh, Md., display of hardy garden flowers.

J. B. Hutchinson, Haddonfield, N. J., table of new gladioli grown for Wilhelm Pützer, Stuttgart, Germany.

C. Keur & Sons, Hillegom, Holland, Dutch bulbs.

Stump & Walter Co., New York, forcing bulbs and sundries.

R. Hammond Tracy, Wenham, Mass., display of gladioli.

Arthur Cowee, Berlin, N. Y., beautiful display of gladioli.

John Lewis Childs, Floral Park, N. Y., superb collection of named gladioli, Canna Eliottiana and Lycopodium squamigerum.

S. S. Pennek-Meehan Co., Phila., ribbons in great variety, corsage pins, etc., a splendid display.

Cleveland Florists' Exchange, Cleveland, O., artificial flowers.

M. Adler, New York, pins.

Reed & Keller, New York, florists' supplies, wire designs, etc., a very large display.

M. Rice & Co., Phila., Pa., novelties in florists' supplies.

Wm. J. Reis & Co., Phila., folding paper boxes.

Non Breakable Flower Vase Co., Washington, D. C., flower vases.

S. A. Wedder, decorated pottery.
Lish & Co., New York, florists' ribbons.
H. Bayersdofer & Co., Phila., florists' requisites, imported china ware, preserved flowers and foliage, a very extensive exhibit.

L. P. Lord, Minneapolis, Minn., frost-proof plant boxes.

Jos. G. Neddinger, Phila., florist supplies, artificial flowers, etc.

Williams Florist Supply House, Utica, N. Y., "Easy" Carnation Pie.

Schloss Bros., New York, ribbon novelties, chiffons, etc.

Roseville Pottery Co., Zanesville, O., jaranumers and decorated pottery.

F. B. Crosby, Catonsville, Md., paper pots for vegetable plant starters.

W. H. Elverson Pottery Co., New Brighton, Pa., standard flower pots, greatly varied assortment, neatly arranged.

J. Bolgiano & Son, Baltimore, general assortment, tools, seeds, etc., seed separating machinery.

Thousen Chemical Co., Baltimore, remedies for fungous diseases; large case of the photographic transparencies.

A. H. Hews & Co., North Cambridge, Mass., flower pots in variety.

Jones The Holly Wreath Man, Milton, Del., laurel and magnolia foliage, etc.

Shaw Fern Co., Pittsfield, Mass., hardy ferns.

Cusker City Machine Co., Richmond, Ind., ventilating apparatus.

Plant & Land Food Co., compost mixing machine.

W. H. Elverson Pottery Co., New Brighton, Pa., lawn vases and greenhouse pots.

Wilmer Cape & Co., flower pots.

O. F. Zorn Co., Phila., "Shadevine".

McDonald Publishing Service, Harrisburg, Pa., horticultural literature, etc.

A. T. De la Mare Printing & Publishing Co., New York, horticultural literature.

Means & Thatcher, Boston, paint and putty.

Revere Rubber Co., Boston, rubber hose, spray nozzles, etc.

Lord & Burdham Co., New York, sectional boilers and model of greenhouse.

E. S. Radiator Corporation, greenhouse boilers.

Hitchings & Co., New York, sectional boilers and greenhouse fittings.

American Blower Co., "Detroit" Return Trap.

Krieschell Bros. Co., Chicago, hot water boiler, piping, shading and dumping grate.

Foley Manufacturing Co., Chicago, section of greenhouse structure and ventilating apparatus.

American Auxiliary Heating Co., Boston, Castle Automatic Circulator.

Morehead Mfg. Co., Detroit, condenser traps.

King Construction Co., No. Tonawanda, N. Y., photographs of King greenhouses.

John B. Adt, Peerless boilers.

John C. Moninger & Co., Chicago, greenhouse building material.

Wm. Moll, Ideal Tilting Return Steam Trap and Bate Evaporators.

Lemuel Ball, Wisconsining, Phila., kentias.

Chas. D. Ball, Holmesburg, Phila., palms.

Report of Judges on Novelties.

Werthelmer Bros., Werbro, Corsage Shields and Corsagettes; honorable mention.

Celestial funeral ribbons, hollyberry chiffon and novelty Christmas ribbons; highly commended.

Schloss Bros., Waterproof stem protectors; honorable mention. Satin rose and clover leaf Jacquard ribbons; highly commended.

M. Rice & Co., Philadelphia. Prepared oxen leaves, new process; honorable mention.

H. Bayersdofer & Co., Wheat sheaves, new styles for display of flowers with stems in water; honorable mention.

Mirror basket; honorable mention. Ornamental grasses for fern dishes and wreaths; honorable mention.

Fred Lapp, Rossville, Md., Seedling cuttings; honorable mention.

Lyon & Co., folding wire pedestals highly commended; featherweight pliable corsage shield, honorable mention.

Robert Craig Co., sixty three seedling crotons, honorable mention.

Ed Amerpohl, handy delivery box, highly commended.

George M. Garland Co., improved lock joint and post socket and drip conductor, honorable mention.

AMERICAN GLADIOLUS SOCIETY.

The American Gladiolus Society met and re-elected the old officers. They passed a vote of thanks to the S. A. F. for use of meeting place, and to the trade papers for publicity, and to Prof. Beal for services rendered. A lecture was delivered by Prof. Whetzel on Gladiolus Diseases.

List of prizes and awards:

Open Class.

No. 1. Henry F. Mitchell Co., Silver cup for the best 25 spikes of new Gladiolus Kunderdi "Glory" exhibited in one vase. John W. Pepper, gardener W. Robinson, Jenkinstown, Pa.

No. 2. M. Crawford, 50 bulbs of Gladiolus "White Lady" for the best 6 spikes of any white variety. Jacob Thoman & Son, Rochester, N. Y.

No. 3. Peter Henderson & Co., \$10 for the best 10 varieties not now on the market; 3 spikes each. J. W. Koerner, Milwaukee, Wis.

No. 4. W. Atlee Burpee, \$10 for the best collection of 10 varieties; 6 spikes each. John Lewis Childs, Floral Park.

No. 5. E. E. Stewart, \$5 for the best vase of 12 spikes Gladiolus "Golden Queen." R. Hammond Tracy, Wenham, Mass.

No. 6. B. F. White, \$5 for the best vase of new seedlings, not less than 25 varieties, never before exhibited. H. W. Koerner, Milwaukee, Wis.

No. 7. E. H. Cushman, \$5 for the best vase of 25 spikes of one white variety. Jacob Thoman & Son, Rochester, N. Y.

No. 8. A. T. Boddington, \$5 for the best of any named yellow variety. John Lewis Childs.

No. 9. John Lewis Childs, \$10 for the best collection of Childs varieties; 3 spikes each.

No. 10. The Gardeners' Chronicle, Challenge cup for the exhibit containing the largest number of standard named varieties, correctly labeled. John Lewis Childs.

No. 11. Stump & Walter Co., \$10 for the best collection of 15 varieties; 3 spikes each. John Lewis Childs.

No. 12. N. L. Crawford, \$5 for the best centerpiece for dining table. Mrs. B. Hammond Tracy, Wenham, Mass.

No. 13. Frank Banning, \$10 for the best vase of Gladiolus "Niagara," 3 or more spikes. R. Hammond Tracy.

No. 14. H. H. Groff, \$10 for the best exhibit of Gladioli in white and light, dark, blue and yellow hybrids; not more than 3 spikes of each variety and not less than one vase of each color section. H. W. Koerner.

No. 15. Rowell & Graetz, \$12 for best 100 spikes Gladiolus "Augusta"; \$8, 2d; \$5, 3d. R. Hammond Tracy.

No. 16. A. E. Kunderd, \$10 and 100 bulbs Gladiolus Kunderdi "Glory" for the best display of above variety. J. W. Pepper, gardener W. Robinson, Jenkinstown, Pa.

No. 17. A. E. Kunderd, 100 bulbs of Kunderdi "Glory" for the best vase of 20 spikes of above variety; 50 bulbs for 2d best vase. Vaughan's Seed Store.

Amateur Class.

No. 1. Montague Chamberlain, Silver cup for the best 6 named varieties; 1 spike each. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

No. 2. John Lewis Childs, \$5 for the best vase of Gladiolus "America," not less than 12 spikes. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

No. 3. A. T. Boddington, \$5 for the best collection of yellow named varieties, exhibited by an amateur. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

No. 4. J. M. Thorburn & Co., Silver cup for the best collection of Primulinus type and hybrids. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

No. 5. A. E. Kunderd, 100 bulbs Gladiolus Kunderdi "Glory" for the best vase of 3 spikes of above variety. 50 bulbs of Kunderdi "Glory" for 2d best vase. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

No. 6. Arthur Cowee, \$5 for the best exhibit of 10 spikes each of a yellow variety and a blue variety. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

No. 7. Arthur Cowee, \$5 for the best exhibit of 10 spikes each of a red variety, white variety and a pink variety. T. A. Havemeyer, gardener Albert Lahodny, Glen Head, L. I., N. Y.

REPORT ON SCHOOL GARDENING BY THE S. A. F. COMMITTEE.

At the Annual Convention of the Society of American Florists held in the city of Washington, August 18th, 1892, that is nineteen years ago, Mr. Robert Farquhar of Boston read a paper on "Floriculture for Children," as a means of increasing and diffusing a knowledge of flowers. He stated, at that time, "I think the members of this society should make a united effort to have the claims of Floriculture and all kindred subjects for children recognized in all public schools. I feel sure that a large majority of the teachers would give their hearty support to wisely planned efforts in this direction." A broader or better suggestion is seldom made than was this. Since that time, the School Garden idea has become national. Last year your committee made an exhaustive examination as to what was being done in this direction in the various states of the American Union, and made a report in some detail.

When the committee was reappointed, the work of School Gardening was known to be so extensive that just what the committee could accomplish was not clear, but a special suggestive circular was issued and sent far and wide over the country and the various responses that came back would be, in volume, beyond limit to reproduce.

As a sample of what this important work is accomplishing we may give a few examples. First, the greatest attention and the most extensive advertising of the movement is being done in the large cities, but in the smaller towns comparatively little is being done. Various states are giving pre-eminence to instruction in Primary Agricultural knowledge, notably New York state, who now requires of each of the School Commissioners to be able to pass an examination which covers a fundamental knowledge of Agriculture.

In New Jersey, particularly in the region of Orange, the work of developing the instinct of cultivation is carried on most admirably. In that suburban district to the city of New York, the neatness and beauty attached to so many homes is such that it may be accepted as a model for many another district of the same general character. At Hastings, Mich., a little town of about 3500 people, much interest is taken in this work, many waste places having been made beautiful and attractive, and many a home has been improved by the work done there. Last year one little girl raised 160 heads of cabbage from a package of seeds costing a penny. In Worcester, Mass., great work has been done along this line, and William D. Ross, the seedsman of that city, was one of the pioneers in starting School Gardens, and for several years gave away seeds absolutely free, and this started a movement that has borne rich results.

At Lancaster, Pa., the florists there deserve much credit for helping along the movement. Twenty thousand shade trees were recently given out to the school children and most of them were planted. Such work as this is what makes the city beautiful. At Amherst, Mass., a novel illustration of object teaching was done by Dr. Beales, Prof. Emeritus of the Michigan Agricultural College, who started as a part of the School Garden a weed garden patch, so that the children

could learn to distinguish destructive and undesirable vegetation. In Buffalo, our friend, Prof. Cowell, has in many a way urged and helped along the work. Buffalo is a city where so many people enjoy a bit of ground with their homes that the work there has telling effect, and the Superintendent of Public Schools, writing to Mr. Kasting, recently said: "I wish to assure you of my interest in the matter and my desire to confer further with you relative to its advancement." In a crowded city like New York window boxes play a most important part of instruction. Cedar Rapids, that thrifty city of Iowa, is where the necessity for systematic training in School Garden work is not yet fully appreciated, although our friends, Messrs. I. N. Kramer & Son, florists, have done their best to start up the work. Cleveland has probably done more systematic work in teaching children gardening than any other place, and the Home Garden Association of that city, because of its untiring work gives a constant impetus, for from "School Gardening" it is only a step to "Home Gardening" and this is the achievement to be desired:

"To make the waste places of the city beautiful and useful.

"To give knowledge of gardening for pleasure and profit.

"To train city children in the cultivation of the soil.

"To draw attention to the importance of work on the land."

In all this work how far it is best to go in providing tools and all seeds free is a question. It is doubtful if you cannot go too far in public distribution of seeds. The idea that the government is going to furnish everything is not a wise course to develop true independence of character.

The United States Government has given attention to this study, and the Bulletins that have been issued, particularly one by Mr. L. C. Corbett, Horticulturist of the Bureau of Plant Industry is one of great value to a teacher, because children usually are not originators; they are followers, and the teacher must know, to be successful, how to be able to do things, and this Bulletin, the "School Garden," is particularly well fitted for that purpose. Miss Susan C. Sipe, who delivered before the convention of the S. A. F. when held in Washington an interesting talk upon this subject, has prepared a descriptive pamphlet which is issued by the Office of Experiment Stations in Washington, upon School Gardening and Nature Study in English Schools, with illustrations, and surely it would seem that England is the land of the "Home Garden." Our friend, Dick J. Crosby of the Agricultural Department, has also sent out a Bulletin known as "Farmers' Bulletin 408." There is not a rural school teacher, but what may read that Bulletin to the utmost advantage. Prof. Galloway, Chief of the Bureau of Plant Industry, lends a hand upon School Gardens in general, and in his excellent pamphlet issued in 1905, entitled "School Gardens," covers the ways of getting at this work that is exceedingly instructive.

In the city of Poughkeepsie, N. Y., Principal William L. Wildy says: "I am directing the work for the Poughkeepsie Garden School in Eastman's Park. We have 200 children making gardens there now. This is the third year for the garden. I am also direct-

ing the work for the School Garden Association of New York City. We have under way five gardens in connection with the public schools. They are known as "Model Gardens." With these five gardens we have about 200 children interested in the work. I find them very good workers and expect to have very good gardens there."

At Fishkill-on-Hudson, N. Y., the academic pupils mapped out and named the trees and shrubs growing upon the grounds to the number of 94, as the result of the botanical work and instruction which they received in the school, and in this same school district the present year there are 111 children, ranging from 8 years to 17, who are members of the "Home Garden Brigade." This work wherever it is carried on results in improving the streets.

In Springfield, Ohio, we find that Christian Binnig and John M. Good, representing the Springfield Florists' Club, presented to the members of the Board of Education a plan to beautify the yards around the public school buildings and they took hold of the work there with much earnestness. Here is a point that we wish to dwell upon. There is listed in the Florists' Directory as many as 6000 florists scattered through the United States, aside from the nurserymen. The work that is possible to be done by these men in each of their towns is very considerable and in any effort for public improvement it never rests simply with the man who has large means, but local florists can do just as these people at Springfield have done, make the suggestion to their local Board of Trustees, and very few but what would see beneficial results from their efforts.

This work is now almost world wide among the leading people. In Ceylon, the Royal Botanical Gardens in their reports state: "The School Garden introduced into Ceylon about ten years ago has come to stay. Every year more and more schools are taking up this line of work and there are not wanting indications that before long most schools will have School Gardens attached to them." In Austria over 9000 gardens are cultivated in connection with the Austrian schools, the pupils receiving there expert tuition in Horticulture.

In Scotland, the prize garden is said to be at Drumwhindle, and the finest in Great Britain. The garden measures one-quarter of an acre, and is enclosed on two sides by the school play grounds. At the two corners of the garden are neatly constructed rookeries. In the first border all the plants growing therein were prominently named by signs of white letters on a piece of grain stained wood. Around the walls were roses, apples, plums and cherries. The work in this garden was confined chiefly to the pupils over twelve years of age. This garden is so well kept up that it is almost a museum of itself, but the work is done by the children.

To show the extent of this School Garden work in further detail would be tiresome for the work goes on throughout the United States, but enough has been said to illustrate the importance given to this subject from a practical economic view.

Benjamin Hammond, chairman; C. B. Whitnall, Milwaukee, Wis., Michael Barker, Chicago, Ill., Wm. R. Smith, Washington, D. C., C. L. Seybold, Baltimore, Md.

THE FLORISTS' HALL ASSOCIATION OF AMERICA.

Secretary's Report for Year Ending August 1st, 1911.

The insurance on glass effective at present date, in The Florists' Hall Association, sub divided by States, is stated below.

	Single thick glass.	Double thick glass.	Single thick glass. Extra one-half.	Double thick glass. Extra one-half.	Single thick glass. Extra whole.	Double thick glass. Extra whole.	Losses paid Aug. 1, 1910 to Aug. 1, 1911

The above is equivalent to an insurance upon 35,663,440 square feet of glass. The total receipts for the year ending Aug. 1, 1911, and including last year's balance, as per Treasurer's report, have been \$53,378.87.

The total expenditures, as per Treasurer's report have been \$43,132.08.

The cash balance on hand is \$10,246.79, of which \$8,700.60 belongs to the Emergency Fund and \$1,546.19 to the Reserve Fund.

The Reserve Fund now amounts to \$26,046.19, of which \$24,500 is invested in excellent securities and \$1,546.19 cash in hands of the Treasurer.

The amount of interest collected on Reserve Fund investments for the year is \$1,035.00. The amount of interest collected on bank deposits for the year has been \$181.13.

Losses representing a breakage of 219,231 square feet of single thick glass and 144,395 square feet of double thick glass, have been paid during the year.

1,650 losses have been adjusted since the organization of the F. H. A., involving a total expenditure of more than \$217,000.00.

Summary of Treasurer's Report.

Dr.	
To balance on hand August 1, 1910.....	\$1,585.45
To total receipts for year ending August 1, 1911.....	51,793.42
	\$53,378.87
Cr.	
By losses paid August 1, 1910 to August 1, 1911.....	\$30,661.24
By expenses	3,470.84
By investments	3,000.00
Miscellaneous	6,000.00
By balance on hand.....	10,246.79
	\$53,378.87

Signed, JOSEPH HEACOCK, Treasurer.

I have this day compared the accounts of Secretary and Treasurer of the Florists' Hall Association and found them to be correct, and the securities belonging to the reserve fund are intact and are deposited with the Jenkintown National Bank.

ALBERT M. HERR, Auditing Director

ST. LOUIS NOTES.

Charlie Schoenle and Geo. H. Angermueller have been spending a week fishing.

J. M. Nichols, president of the St. Louis Seed Co., is up north with his family for the summer.

Fred W. Pape, on South Pennsylvania avenue, has a new touring car and will take it with him on his vacation trip this month.

A. T. Grirsa, late of the Tinsley Seed Co., will leave soon to take

charge of the seed department of the Nebraska Seed Co. at Omaha.

President-elect Windler, W. C. Smith and J. J. Beneke have charge of the Chicago trip of the Club for October 5. Quite a large number will make the trip.

Henry C. Ostertag, of the firm of Ostertag Bros., was severely bitten by a dog last week. The bite was considered serious, but he is now on the road to recovery.

Guy M. Reyburn, of A. Henderson

The number of members is 1,616. The only halllites of The Association are a few small losses which are unadjusted. The following table shows losses reported to the Secretary for the past twenty-four years and number of claims paid.

STATES.

	No. of halllites from June 1, 1887, to Aug. 1, 1911.	No. of losses paid from June 1, 1887, to Aug. 1, 1911.	No. of halllites during year ending Aug. 1, 1911.	No. of losses paid during year ending Aug. 1, 1911.

The feature of the year was a gigantic halllitem which was destructive from Webster Grove, Mo., to Edwardsville, Ill., and which damaged greenhouse structures over a space of three miles wide by forty miles long.

Baltimore, Md., and Staunton, Va., were also visited by storms of exceptional severity.

Notwithstanding the levy of two Assessments during the past year the increase in amount of glass insured is about 1,000,000 sq. ft. over last year's report.

JOHN G. ESLER, Secretary.

& Co., Chicago, and H. Rowoldt, of Kyle & Foerster, Chicago, were visitors last week, the former on a business trip and the latter on his way south for a vacation.

The Apple Growers will meet in St. Louis this month, 22-23. At a meeting of the executive board which met last week at the Planters Hotel, a program which will be quite interesting was mapped out.

The new building being erected for C. C. Sanders at 623 Clara avenue, was nearly completed when it collapsed on Wednesday and killed a workman. Mr. Sanders says the loss will fall on the contractor, but it will put them back two months.

The Edgebrook Greenhouses and Nurseries

CLUBS AND SOCIETIES

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held an interesting meeting on Thursday afternoon last week, this being the meeting when the yearly election of officers takes place. The attendance was not as good as expected for this occasion. The president not being present, Vice-President Frank Weber filled the chair.

The election of officers for the ensuing year being in order, there was only one nominee for president, Robert J. Windler, and his election was made unanimous; for vice-president there were two candidates, F. Venemann and C. E. DeWeber. Mr. Venemann was elected on the first ballot. For the offices of secretary and treasurer Messrs. Beneke and Smith had no opposition and were the unanimous choice of the members. J. F. Ammann and F. A. Weber were the candidates for a three term trustee, and after several ballots Mr. Weber was elected. For the one year term W. C. Young and C. C. Sanders were the candidates and W. C. Young was elected. The above set of officers should prove a hustling crew and pilot the good ship through a successful year.

A communication was read from the Chicago Florists' Club inviting the club members to meet with them on Thursday, October 5th, which was accepted and quite a few expressed themselves as wishing to make the trip. State Vice-President Weber of

the S. A. F., made a neat talk telling the members all about the Baltimore trip. The trustees were given a vote of thanks for the successful outing they gave the members last month. The meeting then adjourned.

CHICAGO FLORISTS' CLUB.

As usual this summer the attendance was good and two visitors C. C. Pollworth of Milwaukee and C. De Weber of St. Louis were present and the former elected to membership, regular rules being suspended for that purpose.

Report of the picnic committee was made by its chairman A. Zeck. Fifty dollars was appropriated by the club toward the Baltimore expenses of the bowling team which consists of Geo. Asmus, John Zeck, C. W. McKellar, W. Wolf and P. Olsem.

It was voted to extend invitations to the Detroit Florists' Club and the Milwaukee Florists' Club to visit the Chicago Club Oct. 5, when Elmer D. Smith will read a paper on chrysanthemums. A chrysanthemum show will also be held at the November meeting and an invitation sent to the Chrysanthemum Society of America to appoint the judges. A vase of Gladiolus Kunderdi Glory was exhibited by Walter Scott of La Grange, Ill.

RAILWAY GARDENING ASSOCIATION.

The fifth annual meeting of this association is being held this week at

Chicago. Headquarters, Kaiserhof Hotel.

President, Patrick Foy, Norfolk & Western R. R., 61 Fourth avenue, N. E. Roanoke, Va.

Vice-President, J. E. Smith, Pennsylvania R. R., Ridley Park, Pa.

Secretary and Treasurer, J. S. Butterfield, Missouri Pacific-Iron Mountain R. R., Lee's Summit, Mo.

Executive Committee: A. V. Smith, Pennsylvania R. R., Ridley Park, Pa.; F. W. Vail, Central of New Jersey R. R., Dunellen, N. J.; H. A. Bode, Illinois Central R. R., Champaign, Ill.

The following program has been received:

Tuesday, August 15, 10.00 A. M., Words of Welcome, Michael Barker. Reports of officers. Papers will be read as follows: "Uniformity in Railroad Gardening and How to Bring It About," E. A. Richardson, Boston & Albany R. R.; "Interesting Railroads in Beautifying Their Station Grounds," N. S. Dunlop, Canadian Pacific R. R.; "Fences, Including Hedges; Where to Use; Material, Maintenance," etc., Joseph Carson, Pennsylvania R. R.

1.30 P. M. to 5.00 P. M., Inspection Tour of Chicago Parks. 8.00 P. M., papers will be read as follows: "Sodding and Seeding Lawns, Comparative Value, Best Time to Do It, Material," R. J. Rice, Michigan Central R. R.; "The Gardener's Jurisdiction: How Far Beyond the Park Fence Should It Extend?" R. W. Hutchinson, Pennsylvania R. R.; "How Best to Prevent Stock from Trespassing on Our Grounds," C. W. Elching, Queen & Crescent R. R.

Wednesday, August 16, 10.00 A. M., "Hardy Herbaceous Perennials in Landscape Work," W. H. Waite, Western Springs, Ill.; "Plants for Permanent Effect, Extent of Their Use, Varieties," Geo. E. Kessler, St. Louis & San Francisco R. R.; "Should Railroad Companies Purchase or Grow Their Stock?" F. W. Vail, Central of New Jersey R. R.; "Treating Cuts and Banks to Prevent Washing and Sliding," H. S. Moulder, Illinois Central R. R.; "Fertilizers," J. A. Byrne, Baltimore & Ohio R. R.; "Maintaining Parks During Drought," J. E. Smith, Pennsylvania R. R. Open dis-

Dreer's Variegated Pineapples

(ANANAS SATIVA VARIEGATA)

We are the first to offer this most beautiful of all variegated foliage plants in quantity and at prices nearly as low as good Pandanus Veitchii can be purchased for.

You will make no mistake in giving these a trial; it will make a change and variation in your foliage plants which will be appreciated by your customers and which will prove a profitable investment to you.

cussion on all subjects. 1:30 P. M. to 5:00 P. M., Inspection Burlington Railroad Station Grounds and Vaughan's Nurseries and Greenhouses, Western Springs, Illinois. 8:00 P. M., Selection of Next Meeting Place, Election of Officers, Miscellaneous.

Thursday and Friday, August 17 and 18, Sightseeing at the discretion of visitors.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

At the regular meeting held Friday evening, Aug. 11, at Stamford, Conn., there was the usual large attendance. The society has received many prizes for competition at the first annual exhibition to be held in Stamford Nov. 3-4, and an exhibition committee are busy with final schedule, which will soon be ready. Outing committee made final report and all who attended expressed themselves as well pleased with the good work done by the committee to make the affair a success. The judges awarded cultural certificates to James Stuart for Amarrillia Belladonna and Ewen Mackenzie for Muscat of Alexandria grapes. A vote of thanks was given to M. J. Quirk for sweet peas, A. Whitlaw for asters, Carrillo & Baldwin for Cattleya Dowiana, E. Blondin for cucumber North Pole, A. Peterson for tomato

Liberty, J. B. Andrew for ornamental pomegranate and P. W. Popp for basket of flowers.

J. B. McARDLE, Sec'y.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular monthly meeting of the Nassau County Horticultural Society was held in Pembroke Hall, Wednesday evening, Aug. 9th. President Tress occupied the chair and there was a good attendance. Messrs. Ashworth, McNenery and Walker were appointed judges of the monthly exhibits and their decisions were as follows: Society Prize, 12 asters, any color, 1st, Geo. Barton; 6 lilies, 1st, Geo. Barton; 12 gladiolus, 1st, Paul Reul. J. Ingram, Special, for 4 vases of asters, 1st, Geo. Barton. A Certificate of Culture was awarded to James Emslie for a dish of peaches.

The outing committee reported that all arrangements were satisfactory for the annual outing which will be held at Karatsonyi's Hotel, Glenwood, Aug. 17. Mr. Holloway of the executive read the schedule prepared for the Dahlia Show, to be held Sept. 27, which was adopted. The society has received a presentation of 500 vases

donated by Mrs. C. L. Bucknall, Mrs. Wm. Beard, Mrs. Arthur Gibbs, Mrs. H. L. Pratt and Mrs. F. S. Smithers. A letter was read from Stump & Walter, offering a silver cup for the fall show, also a letter from Hitchings & Co., offering a prize. A list of the other special prizes and their donors was also read. A letter was read stating that Mr. James H. Yale wishes to lecture at the next meeting, also Mr. J. Hoff on the value and utility of Alphonso Humus. The Rev. J. W. Gamnick was elected a life member exempt of dues. The society's prize in September will be for the best melon, 12 potatoes and 6 ears of corn.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The Gardeners' and Florists' Club of Boston will hold its next field day with B. Hammond Tracy, Wenham, Mass., on Saturday, Aug. 26, to inspect the Cedar Acres gladioli fields. Members and friends are asked to take electric car leaving Scollay Square, Boston, at 12:30 o'clock. A cordial invitation is given to all interested friends who are not club members, including ladies, to attend.

Obituary

John Birnie.

It was sad, sad news and almost unbelievable, that came with lightning suddenness to the hundreds of happy convention visitors at Baltimore when announcement was made of the death of one of their number, on Tuesday evening, as they were just beginning to gather for the president's reception. John Birnie, whom they had been talking to and who, a few minutes before, they had seen at the supper table, dead! It was only too true, and there were tears in many eyes and deep sorrow on all sides. Mr. Birnie, who had been complaining some of not feeling well all through the day was stricken as he sat at the table with his wife in the dining room of the Hotel Belvedere. He was assisted to his room, where he expired in a few minutes. Apoplexy was said to be the cause.

John Birnie was a native of Buchan, Aberdeenshire, Scotland. He came to this country as a trained gardener. One of his first places was with the late W. J. Palmer in Buffalo. Then he went to West Hoboken, N. J., where he has long been known as a skillful and prosperous plant grower. He was active in the New York plant market and an earnest worker in the effort to have adequate accommodations sup-

plied by the city for the marketing of plants. In the New York Florists' Club he was a useful, loyal member, and he has been a regular attendant at the S. A. F. conventions for many

JOHN BIRNIE

years. Personally John Birnie was respected and beloved as few men are. He was whole souled, generous, brilliant in intellect—a fine type of manly character. He was a most interesting writer, good debater and all around genial companion.

The body was taken to West Hoboken, N. J., on Wednesday.

Members of the New York Florists' Club and others formed a procession and escorted the body from the Hotel Belvedere to the station Wednesday morning. The National Society and Baltimore and New York clubs sent beautiful floral tokens. Mr. and Mrs. John Donaldson accompanied Mrs. Birnie home to West Hoboken. The casket was opened at the station and each member in passing dropped in a rose. A special meeting of the New York Florist Club was held Tuesday night at which Messrs. Totty, Bunnard and Sheridan were appointed a committee on obituary resolution.

A Friend's Tribute.

The heart has gone clean out of me. I can't talk. My dear, kind, good John Birnie—that I was just jesting with but a minute ago. It cannot be. I cannot believe he is gone. And yet they assure me that this wonderful big heart has ceased to beat. I refuse to believe it, and yet I must—and in my grief I want to do all kinds of insane things. From now on, count the world a lonesome place for thousands of warm-hearted friends and admirers of John Birnie. He was one of the loveliest personalities I ever knew, and one of the wisest and wittiest. I am inconsolable. I can say no more now.

GEORGE C. WATSON.

C. L. Sieber.

Charles Louis Sieber died at Pontchatoula, La., on August 1. He had

Boddington's Quality Christmas and Winter-Flowering Sweet Peas

A L. true stocks of Winter-Flowering Sweet Peas will be scarce this season, some varieties are a total failure, owing to the exceptional season in California this Spring. We can make immediate delivery of the varieties marked with a star (*), the balance we are expecting from our grower in California at any time. Our advice to intending planters is to order early.

Our stocks of Christmas-Flowering Sweet Peas have stood the test for years, and we can refer you to the largest growers of this increasingly popular flower, as to the truthness and quality of our seed, earliness of blooming period, and strength and habit of plants.

The following varieties are the "best by test" and include Zvolanek's and our own introductions, grown for seed from selected stocks by the leading California Growers and Specialists of Sweet Peas. Our output last year was nearly 6000 lbs. No kicks and plenty of testimonials as to quality, germination and truthness to type.

BODDINGTON'S QUALITY WINTER-FLOWERING SWEET PEAS

At the Exhibition and Convention of the National Sweet Pea Society of America, July 12th and 13th, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only

***BODDINGTON'S EXTRA EARLY CHRISTMAS WHITE SNOWBIRD.** An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz., 30 cts.; ¼ lb., 85 cts.; ½ lb., \$1.50; lb., \$2.50.

***BODDINGTON'S CHRISTMAS PINK.** This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August, flowers can be out from Thanksgiving on during the Winter months. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***BODDINGTON'S CHRISTMAS WHITE.** A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; lb., \$1.50.

***BODDINGTON'S CANARY.** Similar to the above, but flowers of an exceptionally good yellow. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; lb., \$3.00.

***BODDINGTON'S FLAMINGO.** Color scarlet; free-flowering and early. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00.

***Christmas Meteor.** Scarlet; fine open red flower. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

Christmas Captain. Blue and purple. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Florence Denzer.** Pure white. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; lb., \$1.50.

Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Le Marquis.** This is the same color as Princess of Wales, violet; has very large flowers. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Miss Helen M. Gould.** White, open flower; standard lilac, marbled. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Miss Josey Reilly.** Lilac; very large flowers. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. E. Wild.** Carmine or dark pink. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. Alex Wallace.** Very scarce. Lavender. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00.

***Mrs. William Sim.** Salmon-pink. Crop failed.

***Mrs. George Lewis.** Large, pure white wavy flower. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. W. W. Smalley.** Satiny pink. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; lb., \$3.00.

***Mrs. F. J. Delansky.** Daybreak pink. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. Chas. H. Totty.** Sky-blue; late. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. Zvolanek.** Blue, variegated; good for variety. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00.

Wallace. Very fine lavender, a grand florists' variety. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00.

***Watchung.** Pure white. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Wm. J. Stewart.** Blue self. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

All other varieties of Winter and Summer-flowering Sweet Peas supplied. Write for quotations.

Raised by one of the best New England growers. Good, strong, healthy plants. Free from stem rot or other disease. Packed in strong, light, slatted crates; shipped direct from grower, and guaranteed to arrive in good condition. Plants reserved as orders are received for the following varieties:

DOROTHY GORDON, PINK DELIGHT, and WHITE ENCHANTRESS, \$8.00 per 100, \$75.00 per 1000

ENCHANTRESS, WHITE PERFECTION, and WINSOR, \$7.00 per 100, \$60.00 per 1000. Send us your order at once. Call or write.

followed the florist business for many years, coming here from Germany. He was a member of the New Orleans Horticultural Society, a delegation from which attended the funeral.

James H. O'Malley.

On July 27, James H. O'Malley, gardener and florist in Scranton, Pa., died suddenly. He was born in Ireland 56 years ago and came to Scranton when 16. His wife, two daughters and three sons survive him.

Rudolph Forst.

Rudolph Forst died at his home in Millvale, Pa., on August 3. He was a

member of the firm of Wollerman & Forst, wholesale florists of Gibsonia, Pa.

Samuel S. Crissey.

Samuel S. Crissey died in Fredonia, N. Y., on July 28, aged 78 years. He was for a number of years in the nursery business.

M. L. Bonham.

M. L. Bonham, nurseryman and florist, Clinton, Mo., died recently of heart trouble.

CINCINNATI NOTES.

C. E. Critchell, Al. Horning, Wm. Solomon, Al. Heckman and R. C. Witterstaetter composed the party that are attending the convention, and will also represent Cincinnati in the bowling tournament.

Mr. and Mrs. Gus Adrian, the Misses Clare and Laura Murphy, Miss Cora Pearson, Mrs. and Miss Windram composed a party that left Monday for the Snows, Mich., for a two weeks' visit, joining Mr. Wm. Murphy and Thos. Thomas who have been camping there for the past week.

Heacock's Palms and Ferns

Home Grown, Strong, Clean and Well Established

ORDER NOW FOR FALL DELIVERY

We grow all our Kentias, above 6-in. sizes, in cedar tubs made especially for us, avoiding breakage of pots in shipments and giving better satisfaction to our customers; and while they cost us a great deal more than pots, we sell the plants for the same money. We order these tubs by the carload. With more glass, our stock is much larger than ever before.

When in Philadelphia, call and see our stock before placing your order.

20 minutes ride by rail; 100 trains every weekday; Railway Station Jenkintown.

Joseph Heacock Company,

Wyncote, Pa. Railway Station, Jenkintown.

WASHINGTON NOTES.

The roses at the National Capital have been better this summer than ever before owing to the fact that some of the larger growers have devoted several houses to summer stock exclusively. American Beauties, off new plants, have been coming in in fine shape since the first of August and the supply is well equal to the demand for all ordinary purposes. "My Maryland," "Enchanter," "Kaiserin," "Killarney," "Brides," "Bridesmaids" and "Ivory" are in good form for this season of the year. Carnations have been fairly plentiful and really good considering the terrific heat, but now the larger growers are throwing them out to make room for the outdoor plants. China asters are doing better this year than ever before. They are being grown to single stem two and three feet long with four-inch flowers. They are filling in the space until chrysanthemum time a few weeks hence.

Mr. Otto A. C. Oehmler, secretary of the Washington Florists' Club, is spending the month with Mrs. Oehmler and their child, at Colonial Beach.

J. H. Small & Sons furnished practically all the cut flowers and decorative plants used in connection with the entertainments tendered Admiral Count Togo of the Japanese Navy during his recent visit to Washington.

Superintendent Lanham who has charge of the trees and parkings of this city reports that, as a result of a successful war against the caterpillar and the tussock moth, the 100,000 shade trees of Washington are in better condition this year than ever before. This year a 450 gallon sprink-

ler, loaded with arsenate of lead, was brought into operation, with excellent results.

Edward M. Harris, Sr., and Prof. George M. Perdue, both of Cumberland, Md., last year discovered a new species of goldenrod growing in the vicinity of "Devil's Slide," near Cumberland, and for this Mr. Harris has been honored by having the plant named after him—Solidago Harrisii. This plant grows and blooms much earlier than the ordinary goldenrod, but it usually attains a growth of only one foot.

CLARENCE L. LINZ.

PERSONAL.

Frank Hill, gardener to F. A. Sayles, Pawtucket, R. I., is very proud of the fine conifers that adorn this fine place and which by care in planting have survived this dry season. His method is to fill each hole about one-half with soil and puddle well around the roots giving plenty of water, then finish with top soil. By following this plan he has not lost one tree.

Having failed in her mission to find her husband, Caskin A. Abeele, who came to Washington a month ago to establish a florist business, Mrs. Jennie Abeele is again at her home in Flatbush, N. Y. With her six-weeks-old baby she returned to New York yesterday afternoon. According to the story she told the police, her husband, after selling his greenhouse on Long Island, left her when her baby was six weeks old, saying he was going to Washington. He had with him, she said, nearly \$2000. The police are making a search for Abeele.—Washington Times.

bush is labeled and entered in a catalogue, a copy of which is given to those who may be interested.

Mr. Louis C. C. Krieger, well known to florists throughout the country by reason of his work for the United States Agricultural Department, is visiting in this city. Mr. Krieger who is an artist, is at present located in Cambridge, Mass., where he is engaged in illustrating the work on the cryptogamic flora of the United States which is being prepared by Dr. W. G. Farlow, the famous Harvard botanist.

¶ The other day I visited a small town not far from New York to see what business might be done. I concluded to visit the oldest establishment first and when I arrived there an old disgruntled dis-budder came out of the house, cleaning his teeth via the vacuum method; said he had bought for 20 years from one house and calculated they were good enough for him, besides he used Callas since the Harrisii had gone wrong. I asked him if any other florist in town grew bulbs and he said there was only one other and he was a young snip who knew nothing about the business, and used no lilies that he knew of. So of course, I knew the young fellow must be of some account since the old man had belittled him. Sure enough, I found the young fellow up and busy. He had more business about him in a minute than the old man in a day and after a five minute conversation he bought what he needed and went about his work. Before I left I asked him about the old man and was told that he was a reliable man who bought some bulbs and was advised to see him. I thought to myself what a difference in humanity and between the old and the young in business, but said nothing. The old fellow is a throw-back from the Black Ages—and will never amount to a row of pins. The Good Shepherd knows we don't want any Horseshoe Brand boxes around his back yard, but the younger man we want and we will keep his trade for he is worthy of respect and business confidence.—Ward.

Not How Cheap
But How Good

Ralph M. Ward & Co.

12 West Broadway
NEW YORK CITY

During Recess

Michell Co.'s Outing.

The Henry F. Michell Company gave their employees and friends the first annual outing and athletic meet on Saturday, August 12th.

Four special trolley cars were engaged to convey the party to the Evergreen Gardens, at Andalusia, Pa., where the outing was held. Upon arriving at the Gardens the official photographs were taken, after which the entire party of over 200 marched to the flagpole to take part in the flag raising, and with uncovered heads sang the National Anthem.

Athletic contests were next on the list. Young and old men and the women took part. Much amusement was afforded by the various races and other contests.

To end the sports a baseball game was played by the representative teams of Henry A. Dreer and Henry F. Michell. This was the most exciting part of the day's program. The game was nip and tuck up to the seventh inning, when the Michell boys got in their usual batting rally and scored 9 runs in one inning, making it a walk-over of the easiest kind, the final score being 19 to 2. Score by innings as follows:

	1	2	3	4	5	6	7	8	9	R	H	E
Dreer.	0	0	0	1	0	1	0	0	2	3	2	
Michell.	1	0	1	0	1	2	9	5	0	19	21	1

Umpires: Roth and Bettz.

After the game refreshments were served on the lawn and needless to say everybody did justice to the eats. Then, to wind up the festivities, the young people enjoyed themselves at the dance which was given in the spacious new building which will be used as a storehouse this fall.

At eight o'clock the outing was brought to a close and all went home extremely tired and well satisfied that they had had the time of their lives.

The Michell ball team has one open date this season, which is September 4th, and would like to arrange a game with one of the out-of-town seed houses, preferably New York or Boston, for the inter-city seed championship.

New York vs. Astoria.

On Friday evening, Aug. 11, these two teams met on Thumm's alleys, New York, with the following results, Astoria winning all four games:

Astoria.												
Danielson	195	151	137	269

Total	600	662	626	765								

The Lenox Horticultural Society will hold their annual field day in Tanglewood grove on the shores of Stockbridge Bowl, on Wednesday, August 23. If it is rainy, it will be held the following day. There will be an attractive program of sports in-

cluding a baseball match between two teams composed of association men, foot races, 100 and 200 yard dashes, putting the 16 pound shot, hammer throwing, pole vaulting and high jumping and hop-step-and-a-jump contests. The committee in charge is Robert Grinnod, George Instone, Sidney Whitney, Oliver Lines and William Hooker.

C. S. HARRISON AND CONSERVATION.

Taking the last sentence of Mr. Harrison's good and wholesome address (p. 184, Hort., Aug. 5th), viz.: "This country is going to be saved. Not only conserved but made more beautiful and attractive." I should like to ask Mr. Harrison how he believes this is to be done. It is one thing to have ideals and another thing to put these ideals in force. The minute you start to do the latter you run up against vested interests with the whole of the law and the prophets behind them. What would Mr. Harrison propose as a first step? Would he be willing to have all our laws relating to land owning, land selling or land holding revised and begin on a new deal, namely that fundamentally land is not a salable commodity, any more than the atmosphere or the running waters? All of these natural resources are rentable, but only one (the law) has been heretofore considered a salable commodity. Should we make land rentable only and not salable? Gifford Pinchot has the right idea, but what is he going to do if the "grab-balls" with all the bad laws on their side are in power at Washington? This is a tough proposition. I would like to hear from Mr. Harrison as to how we are to get back to the right idea, and how the public are to hold what little they still have without a fight. France, Germany, Great Britain and Seattle are all struggling with this question these many years. Vancouver, B. C., seems to have managed it. I am glad to read the reverend gentleman's confident slogan, and hope he will respond to this neighborly inquiry. GEORGE C. WATSON.

PERSONAL.

Albert Henderson, gardener to Nicolas Hubuyer, New Haven, Conn., succeeded Chris Mickelovitz, who recently passed away after a service of twenty-five years at that establishment.

Wm. Robertson, formerly head gardener to Levi P. Morton, Rhinebeck-on-Hudson, has accepted a similar position with Wm. Maxwell, Rockville, Conn., and is making plans for a thorough rearrangement of the gardens.

David Lumsden has been promoted by the board of trustees of the New Hampshire State Agricultural College from the position of assistant in floriculture to instructor in floriculture and landscape gardening. Another honor has come to Mr. Lumsden through President R. L. Watts of the Vegetable Growers' Association, who has appointed him vice-president of that body for New Hampshire.

Visitors in Boston: Mr. Bates, of the King Construction Company, New York; Walter Dawson, Philadelphia, Pa.

Seed Trade

A dispatch from Los Angeles, dated Aug. 8th, indicates that sweet peas are less than half a crop.

Madison, Wis.—The L. L. Olds Seed Co. has filed an amendment increasing its capital from \$50,000 to \$100,000.

Grand Junction, Colo.—W. L. Burgess, formerly of Forkston, Pa., has purchased the interest of W. Rozzelle in the Grand Junction Seed Co. It is intended to increase facilities and enlarge the business.

DETROIT NOTES.

George Brown was twice smiled upon by Dame Fortune last week. On Monday he was re-elected president of the local club. A couple of days later a bouncing little boy arrived at his place.

J. F. Sullivan also is congratulated by the boys, his faithful wife having gone through several operations and arrived at a stage where complete recovery is certain. We have persuaded him to take the vice-presidency.

Louis Charvatte, the young hustler, is rejoicing over completing and planting three fine new houses.

CHICAGO NOTES.

Live Florists in a Live Town.

Jas. G. Hancock of F. Oechslein's, returned from a week's vacation Sunday. While in Grand Rapids, Mich., he found Henry Smith building four greenhouses 30x150 feet, with concrete walls and posts and pecky cypress benches.

Will Hanna of the Grand Rapids Floral Co., is preparing to build two houses 30x150 feet this fall, to be used for forcing vegetables.

Crabb and Hunter of Grand Rapids, Mich., are rapidly taking down their houses on the Madison Ave., site recently purchased by the city for a play ground and moving them to the Reed's Lake place. Eli Cross has an exceptionally fine stock of chrysanthemums, violets, carnations and roses.

Mr. Hancock met many old friends at the joint meeting of the Mich., State Horticultural Society and Grand River Valley Horticultural Society which met at the residence of Henry Smith, Grand Rapids, on Saturday.

IN MID-SUMMER

Yes, it is now mid-summer. For a few weeks to come you will have to be wide-awake to catch the little chunks of business that occasionally materialize in this low-tide period.

LET US HELP YOU

Whether mid-summer or any other season we are always "on our job" and can give you more and better goods than you can get for your money anywhere else. Our H. Bayersdorfer's novelty purchases in Europe this summer are beginning to arrive. "Are you on?" Write us a line and we'll send you a list. At same time try a few of our Preserved Natural Ferns, Magnolia and Cycas Leaves, etc. They never wilt. Once tried always wanted.

H. BAYERSDORFER & CO., 1129 ARCH STREET, PHILADELPHIA, PA.

ity of stock is still being cut from them. This firm is showing celosia among other variations of the regular line this week.

F. Oechslin is moving his office equipment into the new room. It is large, light and will be in keeping with his greatly improved place. The new range is about finished and already is full of plants. Visitors are always welcome.

Hoerber Bros. have their houses at Des Plaines all planted and in fine shape. They are cutting good stock from their young rose plants. They are among the latest to take up this business but they are rapidly getting to the front in results.

No one in the trade can remember such a glut in gladioli as exists at this time. There are no quotable prices even on the best stock this week.

Personal.

John Michelson has had a vacation spending it in Southern Illinois.

Miss Nettie Parker returned from two weeks at Whitchall and Saugatuck, Mich.

F. Paszkiet is back at work after two weeks spent in restful short trips about the state.

Michael Frick who is attending the convention will visit New York before returning.

A letter from E. E. Peiser received at the store states that he is at Duluth, Minn.

Henry Winter and Gus Allen returned Monday from a week at Fort Washington Wis.

Flower Market Reports.

BOSTON

The condition of the market both as regards selling and quality of flowers does not shape up as well as usual at this time of year. Hot weather is the cry and apology for the condition of the stock. There are plenty of small roses but they are hard to move, even the street fakir fighting shy of them. Good roses sell well when they can be had. Carnations are not even seen in the market while asters are not as plentiful as other years and those that do come in are not up to standard due to causes already stated. Gladioli are plentiful as are also lily of the valley.

For the past two weeks **BUFFALO** trade has been irregular, at times not enough of a certain line could be obtained and at other times too many. Home grown gladioli are now had in quantity, and some choice Americas, May and Augusta are had. There being too many of the ordinary mixed varieties they have dragged along to some extent. Asters of the late varieties are making their appearance, though not in large quantities. There are plenty of roses mostly shorts, and select stock sells rapidly. Lily of the Valley has had a good demand, and excellent stock to be had. Plenty of greens.

A normal August condition prevails, with the exception that an unlimited supply of gladioli is flooding the market. All kinds are sharing the same fate some days, while the best varieties are of course sold first when there can be said to be any demand. On Saturday, August 12, a large lot of the choicest kinds sold at ridiculously low prices, one wholesaler reporting a sale of 2000 of his best stock at 1½ cents each. Roses from new plants are not very large, but otherwise quality is excellent. Carnations from the field are short and full of buds, but help out when this flower is needed. Some very good blooms are still being cut from old stock. The supply of lilies is still larger than can be handled to advantage. Asters are now coming on fairly long stems, and though not specially large are fair in size. Among the more unusual stock this week was seen celosia in several varieties. Plenty of green is to be had and is fully appreciated by those who try for seasonable window decorations.

Business for the week **CINCINNATI** ending Aug. 12th was fairly satisfactory.

All kinds of flowers were to be had in quantity. The supply of Beauties is in excess of present requirements, while the quality was never better for this time of the year. Tea roses too are of very good quality, but receipts are too heavy to realize anywhere near quoted price, the greater part of the sales being made via the job lot route. A limited number of Enchantress and white Enchantress with a fair bloom and stem, cut from old stock, are still coming in and sell readily. Carnations from the field move slowly. Gladioli are coming in in unlimited numbers, the better grades bringing a fair price while the poorer ones drag, a good many finding an outlet by way of the ash barrel. Good asters are few and far between, while the market is well

A MAGNIFICENT LOT OF

FIELD GROWN CARNATION PLANTS

Stock selected and grown especially for us. We wish to call particular attention to the Mrs. C. W. Ward plants, which are in extra fine shape. Our guarantee goes with every carnation plant we send out, thus insuring to you the very best of quality and satisfaction.

supplied with mediums of poor quality. Liliun Longiflorum and Auratum are in fair supply and clean up nicely. The receipts of green goods is ample for all requirements.

Roses and Gladioli continue to arrive in large quantities. It requires a good deal of skill on the part of the wholesalers to dispose of the goods to

Flower Market Reports

(Continued from page 1)

the advantage of all. Asters are also coming in better and more of them, still their inferior quality as compared to former seasons ought to give Gladioli a better show than last year. Many retailers report the booking of wedding decorations for next September, indicating quite an activity in early fall weddings.

Trading last week

PHILADELPHIA was rather lifeless and on the

whole did not compare favorably with the week before. There was a distinct falling off in volume, and there were few if any bright spots to make the situation cheerful. Asters show no improvement in quality. Usually by this date we have fine Crego's and Vick's Upright and Branching but none of these have materialized so far. Even the quantity of the regular stock has fallen off. Low prices prevail. Gladioli have also diminished in volume, and while they sell fairly well the prices are anything but satisfactory. In the rose market the American Beauty is still by far the best value. Some very superior stock is coming in from the cooler climate of down east; very good as to size and stem and excellent deep color. Still, even these feel the effect of the sluggish market, and are not going out any too briskly. Marylands are pretty good; so are Killarneys. It is rather a remarkable thing that pink roses are going off better than white while it is mid-August when there is little going on except memorial work. But so it is. White roses have been very sluggish for the week. There are not so many white Killarneys but there are plenty of good Kaiserins. Practically nothing doing in carnations. We used to have some good outside flowers about now. This seems to have been abandoned and appears to be a mistake on the part of the growers. Orchids are off crop and there is great difficulty in filling what few orders are coming in. Lily of the Valley, Gardenias, and Easter Lilies are in fair demand and are of excellent quality. Ferns and all kinds of greens too plentiful.

The wholesale market as well as the retail business is mighty dull just now. The market is crowded with all kinds of stock and a great deal is going to waste for want of demand. Roses are selling at cheap prices. Carnations are still small and short-stemmed. A correct price on asters is hard to get, as any old price

" " & Spruce (100 bchs).....	10.00	to 20.00	10.00	to 20.00

will buy. A few hundred gladioli and single tuberosa stalks are in the same boat. The hot weather has returned and the business seems duller than ever. The retailers say that only funeral work keeps them alive nowadays. The market is also over-crowded with a lot of small out-door stock which is hard to dispose of at any price, this state of affairs, plenty of stock and no business is likely to continue throughout the month.

PHILADELPHIA NOTES.

Mr. Strohlein of Dreer's is now in Europe. He left August 8th on the Kaiser Wilhelm II. Expected back home end of September.

B. Eschner and a corps of able assistants did themselves proud at the convention for our great Philadelphia supply house, M. Rice & Co.

The sympathy of the trade is with Frank L. Polites—suffering from a broken shoulder. The accident occurred July 28th, at a children's picnic. Mr. Polites broke the fall for some children, in a swing which proved insecure; but in doing so got the worst of it himself. On the 14th inst. he was reported to be on the mend all right.

Clarence Watson, of the Leo Niessen Co., has returned from his vacation at Wildwood, N. J., and Bucks Co., Pa., looking invigorated and fit. Mr. Watson has had some bad spells in recent years. Fine instruments are easily deranged, unless they get exquisite care. The tuneful little fiddle is in tune again. Glory be.

"Mac," an unknown correspondent of one of our more or less esteemed contemporaries says the "Bard of Philadelphia" (whoever he may be), made a sermon on locality and cabbage! On the contrary, one writer talked of locality and brains. Who ever heard of brains in a cabbage. And as for the "Bard of Philadelphia"—our dear friend Wm. K. Harris went to his last reward in 1910—and he has had no

successor. He never had a rival. If "Mac" can't distinguish the difference between brains and cabbage, he is a fit subject for Dr. Wiley. Or, shall we leave him to the tender mercies of McCabe! The "Mac's" seem to be in the Dutch class this August.

Arthur Niessen and Clarence Watson represented the Leo Niessen Co. at the Baltimore convention.

The glass manufacturers and dealers are still bemoaning low prices. This amusing card emanating from the office of E. H. Flood greeted us in the mails the other morning, and shows clearly the state of mind they are in at present:

"Count that day lost
Whose low descending sun
Saw prices shot to hell—
And business done for fun."

They all wait that prices have gone to the bow-wows, and that there are no profits in the business any more. And you may go bail, as Tom Daly says—"You may go bail, they make the tale wid fanciful adornin." By all means let us have higher prices for glass; then we won't build so much and maybe there will be less competition for the cut flower market.

Visitors: E. A. Seidewitz, Baltimore, Md.; Daniel E. Gorman, Williamsport, Pa.; Mr. McCallum, McCallum Co., Pittsburg, Pa.; Philip Breitmeyer, Detroit, Mich.; Percy Barnard, Northbrook, Pa.; I. B. Coles, Woodstown, N. J.

INCORPORATED.

New York, N. Y.—Leikens, florists and nurserymen, capital \$15,000. Incorporators, Jerome C. Leikens, Nathan Schwab, John B. Coppola, all of New York.

Ashtabula, O.—The Tong & Weeks Co., capital stock \$20,000. This is a consolidation of Ashtabula Greenhouse Co. and Tong & Weeks. H. Tong will take charge of the greenhouses and De Forest Weeks will take charge of the store.

PUBLICATIONS RECEIVED.

Vines and How to Grow Them. By William C. McCollum—This is still another addition to the Garden Library. Like the foregoing it is profusely illustrated, and is thoroughly practical in its contents. Not only hardy garden climbers are included but greenhouse climbers as well. It

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick, A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—Two water tube boilers, 100 H. P. each, Heine type; three tubular boilers, 66 inches by 18 feet; perfect condition and cheap. Armstrong Mfg. Co., Springfield, O.

is a very interesting book of over 300 pages and should be included in every florists' library.

Chrysanthemums and How to Grow Them, by I. L. Powell.—The fact that the book has been written by this proficient grower and prize winning champion of the exhibition table will be a sufficient guarantee of its value as a guide to anyone aiming for success as a chrysanthemum grower. It is a complete manual, covering all phases of instruction for either private or commercial growing. It is a notable addition to The Garden Library. The publishers could not have selected a more acceptable authority to prepare the work.

Garden Planning, by W. S. Rogers—Especially designed to help the maker of small gardens in fitting his desires to the situation and conditions. It deals with principles as well as practice and is illustrated with a wealth of sketches and plans. While intended primarily for the amateur it is safe to say that few gardeners or florists there are who cannot learn something from this book which they do not know and is worth the knowing, especially in the present rapid growth of public appreciation for garden art. Useful lists of plants for various garden purposes are appended.

The foregoing three additions to the Garden Library series are published by Doubleday, Page & Co., at the uniform price of \$1.10. Copies can be supplied by HORTICULTURE at publisher's price.

A. H. Hews & Co., flower pot manufacturers, have erected another clay storage shed this summer at North Cambridge, Mass., 52x190 ft. and 30 ft. high. This company uses nearly 10,000 tons of clay each year in the manufacture of flower pots.

ARTSTONE FLOWER VASES AND SUN DIALS

Artstone Vases do not, like iron, become soot in mid-summer to burn the plants. Artstone is indestructible from exposure, will not rust, and will gradually disappear and decay.

Flowers, like gems require appropriate settings. The artistic beauty of these creations attracts admiration and lends a touch of quiet elegance to the surroundings.

They serve to enhance the beauty of the lawn or porch wonderfully.

Popular also for Cemetery decoration. Bird Baths and Sun Dials made to order.

NEWS NOTES.

Hartford, Conn.—To make room for other buildings the Francis greenhouses are being torn down.

Greenland, N. H.—A. W. Clough will raise carnations this year in the houses he has previously used for cucumbers.

Washington, D. C.—The S. S. Pen-nock-Meehan Co. has purchased at 1216 H street a lot 24x100 on which a modern store building will be erected.

Baraboo, Wis.—Property at the corner of Eighth and East streets has been purchased by Ernest Ross, formerly with Wm. Peck. He will erect greenhouses and boiler house on this property.

Concord, N. H.—Fenncroft Farm, owned by H. B. Whitney & Sons, florists, was wrecked by a heavy storm on July 31. Extensive greenhouses, a barn, the ell of the house, trees, etc., were demolished.

Jacksonville, Fla.—C. L. Bragg has purchased the landscape department of C. D. Mills, florist. Mr. Bragg has been connected with "Mills the Florist" for two years, having charge of the landscape department.

Groton, Conn.—Following along the lines laid down by his predecessor, Thos. W. Head, Supt. Flesher is making the charming estate of Morton F. Plant most attractive to the large crowds that visit this place during the summer season.

FULL SIZE
No 2

R. A. C. Smith of Belle Haven, Conn., Had Us Build This Beautiful Range Right By His Residence. S. A. Ford is the Superintendent.

ALTHOUGH the photo can scarce do it justice, you can see it is highly ornamental and must be a large one. And it is. The two houses between the Palm House and work room are curved away, while the large wing house is curvilinear which make a highly pleasing combination.

What a difference in this and the houses that used to be built that were so cumbersome and unattractive that they had to be located in an out of the way place. The English you know are in the habit of attaching theirs directly to their residence. We have built some that way up in Montreal. One particularly fine one was

for Hon. Montague Allen. If you think it would interest your employer, will gladly send him a photograph.

And how are the prospects for building or making any additions? Would our catalog—the 100 page one—be any help to you? Glad to send it along.

GERANIUMS....

We have no hesitation in claiming that our collection of Standard Varieties stands preeminent among such collections in the country, as far as only distinct and useful varieties are concerned. It is the result of the most careful selection from hundreds of varieties, from the foremost European and American introducers, and comprises only those sorts which years of experience have taught us are the very best in their several different classes, and which can be depended on to produce the most satisfactory results, and which represents the highest standard of development yet obtained in its special class or color.

In keeping our list up to this high standard we are continually adding many of the newer introductions and discarding some of the old sorts which have been favorites but are now superseded by others which are more beautiful in form, greater in substance, more exquisite in color, more satisfactory in growth.

We have prepared to propagate these in large quantities, having added thousands of plants to our already large stock. If you can use them in large quantities write us and we may be able to make you special price.

We are booking orders for DAHLIA & CANNA roots for fall delivery. Send for List.

Seasonable Notes on Culture of Florists' Stock

CARNATIONS FOR POT CULTURE

Retard plant growers who intend to grow pot carnations for winter plant trade, should have the stock potted up not later than the last week in September, as they will lift any time before this date better than after it. Use a good fibrous soil and about one-third of manure, the whole thoroughly broken up and mixed and a sprinkling of bonemeal added. After the plants are potted their transfer to the house can be delayed until quite late in October. Keep them in a frame and you will have healthier, stouter, more compact and finer plants to take in later. All pinching back should be discontinued by the end of this month. See that they have an abundance of air night and day, with careful watering and light and frequent syringing, as all that will be needed to encourage a healthy pot plant. Give them a fumigating once a week, as a preventive for fly and thrips.

CINERARIAS

To have a fine batch of cinerarias in full bloom by next Easter sow now without delay. See that you get the best strain of seed, for it certainly is a single waste of time, money, space and labor to invest in a cheap and poor grade of seed. Sow the seed in pans that are well drained and filled with a soil composed of three parts loam and two of leaf-mold, with a good sprinkling of sand. Sift the mixture fine for the top layer. See that the soil in the pans is pressed moderately firm, and on this sow the seeds evenly but not too thickly, and then just cover with fine soil and press slightly. Keep moist and under heavy shading, to be made lighter when the plants are up. When the young plants are big enough to handle—that is when they have made their third or fourth leaf—prick them out two inches apart in flats. Before they get crowded in these flats pot into $2\frac{1}{2}$ or 3-inch pots using the same mixture, only add a little cow manure and let it be more lumpy at each shift. Keep these plants out as late in the fall as possible, guarding them, however, against frosts, and when this becomes difficult to do remove them to a cool house and place them as near the glass as possible.

GLOXINIAS AND TUBEROUS BEGONIAS

As these plants go out of flower they should be started on their season of rest. Place them in a house where there is no shade and maintain a free circulation of air to help them to ripen up their growth. Continue to water but not quite so often, until the leaves have died down and then the soil should be allowed to become quite dry and the pots placed under a bench where there is no drip and just enough of water given to keep the tubers from shriveling. Gloxinias generally winter best this way if kept in a temperature of about 50 degrees. Where this is not convenient the tubers can be stored in flats of dry sand. This is the best way to

winter tuberous begonias to preserve them from the air, otherwise they will shrivel and thereby receive serious injury.

ORCHIDS

Laelia anceps will soon be sending up their flower scapes and should not be allowed to suffer from too much drought at the roots. Plants that are needed for early flowering should be gradually exposed to full sunlight as they really thrive better when thus exposed by the middle of September. Those that are desired for later blooming can be retarded by giving them a bright but lightly shaded house that is kept cool, and where the atmosphere is light and drier, but under such conditions it is not advisable to encourage a too dry atmosphere if you want to sustain your plants in good health. This retarding can be done with common sense without any injury.

Oncidium varicosum will now, or soon should, be showing flower spikes. Remove part of your permanent shading so as to give more light and sun. Do it gradually or your plants will suffer by too quick exposure to the sun. By October they will stand full sun. By placing some plants in an intermediate temperature of about 60 degrees at night with a rise to 70 or 75 degrees with sun, as desired, a succession of bloom can be kept up for some time. This is a fine orchid to grow, with its large graceful panicles of bright yellow bloom, which are excellent as cut flowers.

PEONIES

If you have in view the making of a new peony plantation, the sooner it is taken in hand the better. The most fertile plot of ground should not be considered too good for this purpose. To get the best results the land should be trenched to the depth of at least two feet, followed by the incorporation of large quantities of stable manure. When planting a permanent bed for future cutting, they should be set four feet apart each way, but if planting with the intention of division of the roots for selling, $2\frac{1}{2}$ to 3 feet apart each way will do. See that the roots are set deep enough to insure the crowns being 3 or 4 inches below the surface of the soil. It is best to have all your planting done before the end of September as it gives the plants a chance to make good root growth while the weather is warm.

PAPER WHITE NARCISSUS

To grow these bulbs so they will be at their best it is well to allow at least an inch between each bulb. Use flats that are 3 or 4 inches deep and fill with a good loam that has about one-third of well rotted manure. Place them in a cold frame for the next six weeks. They can then be brought into a house of about 45 to 50 degrees at night in October and allowed to come along slowly. Give a bench where they will get all the sun that is going. After giving this cool treatment until they have made lots of roots, they can then be given a couple of weeks in a higher temperature so as to bring the flowers out. If they are cut when about four or five flowers of the trusses are open they will last from four to six days.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Nephrolepis, Euphorbia Jacquinellana; Lilium candidum; Next Year's Cyclamen Stock; Pruning Compost; Transplanting Evergreens.

The S. A. F. Convention is always a most prolific developer of ideas for anyone who attentively follows the proceedings and the Baltimore affair just closed is no exception to the rule, judging from the critical comments, approving or otherwise, that find expression on every opportunity since. It would indeed be a colorless and unprofitable convention where no difference of opinion and consequent warm discussion on points at variance did not materialize. As to the final educational effect, however, on those concerned, Mark Twain's advice might be pertinent for some of us to give heed to. He said, "We should be careful to get out of an experience only the wisdom that is in it and stop there, lest we be like the cat that sits down on a hot stove-lid. She will never sit down on a hot stove-lid again, and that is well; but also she will never sit down on a cold one any more."

It has been maintained by some, since the Baltimore experience, that the S. A. F. method of conducting elections is defective and rather slipshod; that its system of balloting is "Australian" only in name, the fundamental principle of the Australian ballot, viz., secrecy and freedom from dictation, being ignored. Whether this is so, to a detrimental extent, and whether the protection against partizan supervision which is accorded the voter in civic affairs might wisely be extended to the S. A. F. voter; whether ballot peddling and solicitors should be excluded from the hall; whether some restriction should be placed on the voting privileges of members joining the Society on the day of nomination or election; whether "spell-binder" oratory for the purpose of influencing a vote should be regulated;—all these and many similar questions are being brought forward and this is an excellent thing for the Society as it indicates a lively interest in its affairs on the part of the membership, without which no organization can attain its best usefulness.

We doubt whether there ever has been an election in the S. A. F. conducted with equal zeal for favored candidates, where the spirit of respectful cordiality and freedom from animosity was so pronounced as at Baltimore last week. Although hotly contested for the several posts of honor no ill feeling was engendered and we do not doubt that the new officials will assume their respective posts of duty with the sincere support of those who opposed as well as those who favored their selection. It has been asserted that no two minds have ever yet been found of which it could be said that there was unanimity of opinion on all questions presented for their consideration. Simple and primitive indeed must be the topic and few its details if, even in a single instance, any two interested parties can be brought to think exactly alike. But it is possible for each and all to be actuated by the same loyal impulse to help in every possible way to promote the prosperity of the Society and broaden and enhance its influence. On methods and on men for leaders there must always be diversity of views and this is healthy for the organization so long as it is kept within tolerant and friendly bounds.

Obituary

Herman Goertyhain.

Herman Goertyhain, florist, of Fair Oaks, California, died at his home on August 13, aged 65 years. Four sons survive him.

Tracey Bolles.

Tracey Bolles, Valley Creek, Wis., was killed by a freight train at Oak Park on August 13. He was formerly employed by Holm & Olson, florists, of St. Paul.

George Hedtler.

George Hedtler, 1419 Wrightwood avenue, Chicago, Ill., died on August 21, as the result of being overcome by the heat while at work in the greenhouse of Joseph Lange, on Aug. 14.

Joseph Bock.

Joseph Bock, florist, Burlington, Iowa, died on August 7 of typhoid fever. He was born in Germany in 1846, coming to this country in 1867. For twenty-two years he was a nurseryman and florist.

Fred C. Chapman.

Fred C. Chapman, pioneer florist of Grand Rapids, Mich., died on August 17 at his home on Madison square. Mr. Chapman was born in Stamford, England, coming to Grand Rapids in 1880. He established the first greenhouses in the city, which were located on the site of the greenhouses of Crabb & Hunter. He continued to be one of the successful florists of the city up to the time he retired, about eight years ago. He is survived by a widow and one son.

William Bryant.

The death is reported at Jamestown, R. I., of Mr. William Bryant, a member of the firm of Bryant & Whiting Co., a fertilizer firm located on Curtis Bay, Md. Mr. Bryant was stricken some time ago with malaria, but feeling a little better decided to go to his father's summer home at Jamestown. Here the malaria turned into typhoid which proved fatal. He was 36 years of age, and is survived by a widow and one daughter, who are at present traveling in Europe. Burial took place last Sunday at Alexandria, Va.

John Flood.

John Flood, Woburn, Mass., passed away on August 23, aged about 40 years. Mr. Flood was born in London, England, and was employed in the seed department of James Vietch & Sons, for whom his father was foreman. About twelve years ago he was employed by Peter Henderson, New York, from there going to R. & J. Farquhar & Co., Boston, Mass. After leaving there he was employed on the estate of Joseph H. White of Brookline, Mass., under James Wheeler, going from there to Buffalo and spending three years in that city. He then located a business of his own in Dedham, Mass., which he maintained for about three years. One year ago he bought the David Fisher property in Montvale. Mr. Flood had been ailing for about three months, the result of an attack of the grippe, a relapse caus-

ing his sudden death. The time of the funeral could not be learned before HORTICULTURE went to press.

Joseph R. Freeman.

Again it becomes our painful duty to record the passing away on August 22 of a well-beloved member of the horticultural craft, J. R. Freeman, of Washington.

Mr. Freeman was born in England sixty-two years ago. He came to Washington when fourteen years of age, at first working for the late John Saul. He remained with Mr. Saul for several years, when he was married to Miss Mary E. Weaver, of Washington. With his wife, Mr. Freeman moved to Baltimore, where they remained for two years, at which time they came back to Washington. Mr. Freeman then established himself in the florist business, which he continued until his death. His first business was located at Thirteenth and E streets, near Pennsylvania avenue. About 15 years ago Mr. Freeman removed to 612 Thirteenth street, his last location.

JOSEPH R. FREEMAN.

The cause of death is given as Bright's disease.

Few men have been more blessed with neighborly and companionable traits than J. R. Freeman. To his friends and they were legion he was the embodiment of open-handed hospitality. He was prosperous in business and was widely known and respected among the business men of Washington. He was a life member of the Society of American Florists and served as its vice-president in 1905. At the convention in Washington that year he was nominated for president but declined the honor. At the convention in Rochester last year he seconded the nomination of Baltimore and urged the selection of that city as the meeting place for 1911. He was also a member of the Florists' Club of Washington, a large delegation from which attended the funeral.

Mr. Freeman is survived by his wife, three sons, J. W., J. S., and William E. Freeman; and one daughter, Catherine Elizabeth Freeman, all of Washington.

BRITISH HORTICULTURE.

A Thousand Pound Sweet Pea Prize.

The Crystal Palace was lately the scene of the big sweet pea show, organized by the "Daily Mail." This newspaper and its associated journals have for weeks given the competition a "boom," for it is not often the amateur grower has a chance of winning a thousand pounds first prize. Entries poured in from all parts of the kingdom, and the judges had a difficult task in picking out the best blooms, which were eventually staged, and formed the largest exhibition of sweet peas seen in this country. The blooms all had to be sent through the post, thus giving the entire body of exhibitors the same chance. Much ingenuity was displayed in endeavoring to secure the transit of the blooms in a fresh condition. The heated state of the glass building caused the flowers to fade, and on the second day a very poor display was made. The drought has been very trying to most of the growers this season. There was only one trade exhibitor, W. J. Unwin, who showed an interesting assortment of some of his leading introductions. The first prize was won by Mrs. J. H. Fraser, a minister's wife, of Sprouston, Kelso, Scotland, and by a strange coincidence her husband won the third prize. The judging was done with numbers, so that the judges were not aware of the relationship of the two successful exhibitors. The second prize went to the Isle of Wight.

The National Carnation and Picotee Society.

There were several absentees from the usual exhibitors at the annual show of the National Carnation and Picotee Society, owing to the unfavorable season. James Douglas, of Great Bookham, Surrey, carried off the first prize in several classes, as well as the Cartwright Challenge Cup, in the open classes, also the Society's cup for the highest aggregate number of points in the first division of the schedule. Among the new seedlings was a crimson self-colored, Mrs. F. J. Johnson, shown by Arthur R. Brown, Ltd., of King's Norton. Hayward Mathias showed Ariel, a new yellow ground picotee, with a light pink edge. Each of these received a first prize in their special class.

W. J. H. Adsett,

We are advised that a swindler operating under the name of Chris. Meyer has been working in and around Madison, N. J., and our readers are hereby warned so that they may be prepared for him.

He has evidently worked at the florist business as he can talk glibly enough regarding the different varieties of roses and carnations. He has victimized several of the tradesmen of Madison by the use of small forged checks, claiming a long acquaintance with a number of prominent growers.

He is of medium height, with dark hair, and gains attention by claiming to be an Elk of a Virginian Lodge, so florists would be well advised to see the card of any man looking for favors under the plea that he is an Elk

SOCIETY OF AMERICAN FLORISTS AND
ORNAMENTAL HORTICULTURISTS

The Convention Story Completed

CONCLUDING SESSION.

At 1.00 P. M. the ballot counting not being completed an adjournment was taken until 6.00 P. M., at which time President Asmus resumed the session, and called for report of Committee on State Vice-Presidents, which was read, and on motion approved, and a vote of thanks extended to the different State Vice-Presidents.

Report of Committee on State Vice-Presidents.

Your Committee has received the twenty-six reports of the Vice-Presidents of the various states, and find the detail of the same to show no falling off or lack of interest in the work of the Society of American Florists; and we in justice to the excellent showing made by the reports recommend that a vote of thanks be extended to the Vice-Presidents and that the reports be accepted and printed.

Benjamin Hammond, Joseph Heacock, P.
Welch, Committee.

President Asmus referred to the sad occurrence of the taking away by death of one of the oldest and most beloved members, Mr. John Birnie, and announced that he had named a suitable committee to prepare resolutions appropriate to the occasion, which he now desired the Secretary to read, requesting all to remain standing meanwhile as a token of respect to the departed brother.

The convention arose while the report of the committee was read in a feeling manner by Secretary Dorner:

Report on Death of John Birnie.

Your committee respectfully report the following resolutions upon the death of our deceased brother, John Birnie:

Whereas We the Society of American Florists and Ornamental Horticulturists assembled in the city of Baltimore on the occasion of the Twenty-seventh Annual Convention have been grievously touched by the sudden death of our fellow craftsman John Birnie; therefore

Be it Re-olved, That we, the members of the S A F A O H feel keenly the loss of one so well beloved, one who has been an ardent representative of our profession in advancing all its interests; and be it therefore further,

Resolved: That we present this resolution as a token of our sympathy and sincere affection for him, and condole with his family in this their sudden and sad bereavement, and that we submit to them a copy of these resolutions, and forward in the name of our Society a suitable floral tribute.

Respectfully submitted,
Walter T. Sherman, J. C. Vaughan, Rich-
ard Vincent, Jr., J. Otto Thilow, Com-
mittee

The report was unanimously adopted by a rising vote, the convention, at the suggestion of President Asmus, remaining standing for an interval of time in silence.

Parcels Post Urged.

F. R. Pierson was recognized by the chair to present the following resolution which he stated was to give further effect to the good work done by Washington representative, W. F. Gude.

W. R. R. H. As we well know, not that the railroad companies express companies are operating on the railway lines of the United States have been the last of the country, a watered stock were still

ing their charging the public extortionate rates on the small package business carried by them, and

Whereas, The mail service of this country if developed as it should be would act as a regulator of express rates and reduce them to a reasonable figure; and

Whereas, The express companies seeing the handwriting on the wall and realizing that the intelligent merchants and others of the country have become enlightened to the true state of the conditions existing have been through their lobby for years fermenting opposition to the establishment of a parcels post such as other countries who compete with us enjoy; and have enlisted in such opposition various retail trades and others who think that a parcels post would help the mail order houses and department stores, whereas in fact it would stimulate the entire commerce of the country, and the loss to retailers would be offset a thousand times in the general increased prosperity; and

Whereas, The express companies and others have scattered broadcast the idea that the postoffice department would be run at a loss were the post office business increased through the establishment of a parcels post, whereas on the contrary its revenues would be greatly increased provided proper rates of charge for the railway service enforced, and

Whereas, In every foreign country communication by mail is so much appreciated that the people of Germany and other countries have advantages in a parcels post such as we have never had here, therefore,

Resolved, That our representatives in Congress be personally written to or communicated with by each and every one of our membership throughout this United States and urged to enact a parcels post at the earliest possible moment that shall place our citizens on a footing with foreigners, and that shall furnish an effective regulator of express rates in this country to the end that the entire manufacturing and commercial business of the country may be stimulated and our domestic commerce increased beyond present conceptions of its volume. The need for a parcels post is urgent and pressing and Congress can serve the country in no other way more effectively at this time.

On motion the foregoing were
unanimously adopted.

On motion it was ordered that the Committee on Tariff and Legislation be instructed to draft a letter pertaining to the resolution adopted with regard to the parcels post, a copy of the same to be sent to each member of the S. A. F.

In the absence of Prof. H. H. Whetzel, Plant Pathologist, his report was read by title and on motion ordered printed in full in the proceedings of the Society.

Report on Trade Exhibit.

Through Secretary Dorner, the Superintendent of Trade Exhibit, Mack Richmond, reported that the amount received from sale of space amounted to \$3,796.00, which statement was greeted with applause.

No Increase in Life Membership.

The amendment to the constitution proposed with reference to annual dues, initiation fees and life membership, was next considered, and was lost by a rising vote.

W. N. Rudd presented the following:

Report of Auditing Committee on National Flower Show.

We, your Committee appointed for audit of the National Flower Show report, hereby certify that we have examined and checked the same so far as was feasible, and are confident it is correct. The mass of detail is so great that a close item by item check was impossible in the time at our disposal.

We recommend that the report be accepted. W. N. RUDD, Chairman.

On motion, the report was received and adopted.

BALTIMORE CONVENTION TRADE EXHIBITION

Apprentices and Nursery Section

BALTIMORE CONVENTION TRADE EXHIBITION
Florists' Supply and Floral Section.

Election Returns.

P. Welch read the report of the tellers of election, as reported by telegraph in our issue of last week.

On motion of Mr. Farquhar the vote for Mr. Vincent for President for the ensuing year was made unanimous. Mr. Farquhar returning his acknowledgments to the friends who had voted for him and for the interest manifested in the election, but rejoicing in the success of the winning candidate. Similar action was taken regarding the election of Mr. Poehlmann as Vice-President on motion of Mr. Philpott.

Mr. Hammond presented the report of the Committee on School Gardens and requested that it be read by title and ordered printed in the Proceedings, which was on motion duly authorized, and so ordered.

The following report submitted by Mr. Farquhar was read and on motion referred to the discretion of the Executive Committee with power to act, viz.:

Report of Committee on Life Membership Badge.

"Your committee has given much thought to the subject of a badge that would be emblematic, artistic and convenient to represent life-membership in the S. A. F. & O. H.,

Your Committee recommends that the badge be round in form, that the present leaf emblem of the Society appear in relief on the surface with the letters S. A. F. placed obliquely across the leaf, and the words, "Life Member" on the ground, around the upper side, that is over the leaf.

The accompanying sketch shows in a general way the design our Committee recommends."

President Asmus announced that he had appointed as Committee on Recommendations in President's address the following: P. Welch, F. R. Pierson, W. N. Rudd, W. F. Kasting, F. H. Traendly.

The report of this committee was presented verbally by Mr. Rudd, and was adopted by rising and unanimous vote.

The report of the Committee on Final Resolutions as reported in last week's issue was now read, and on motion unanimously adopted, and three cheers and a tiger were enthusiastically given for Baltimore.

On motion of Mr. Hill, the convention adjourned sine die.

Additional Exhibitors.

The following were omitted from our report of exhibitors at Baltimore last week:

The Advance Co., Richmond, Ind. improved ventilating apparatus.
Godfrey Aschmann, Phila., decorative plants.
Gem City Boiler Co., Dayton, O., heating apparatus.
Pennock Meehan Co., Phila., Double White Killarney rose.
A. N. Pierson, Cromwell, Conn., Killarney and Killarney Queen roses.
R. & J. Farquhar & Co., Boston, Lilium leucanthemum.

THE BOWLING.

The arrangements for the sporting events in connection with the Baltimore convention were excellent. The bowling took place on Thursday—ladies in forenoon and gentlemen in afternoon—on the alleys of the Garage. The prizes awarded were as follows:

Rolling cup, Mrs. George H. Cooke, of Washington; Boos cup, Mrs. George C. Shelden, of Washington; Bologna carving set, Mrs. Frank H. Traendly, of New York; Gaversdorfer ale troher, Mrs. Charles McKellar, of Chicago; Stewart & Co., cut glass vase, Mrs. F. C. Bowers, of Baltimore; Hochschild, Kohn & Co., cup, Mrs. Frank H. Traendly, of New York.

As a resting and sightseeing trip around the city after their exertion of bowling, the ladies were given a trolley ride through the suburbs of the northern and northwestern sections. The trip ended with a reception at the Maryland Country Club.

As will be seen by the following scores, Washington was "high liner" and put some of the most confident teams to rout.

BALTIMORE CONVENTION TRADE EXHIBITION
PHILADELPHIA SECTION.

Whodlin cup, team making highest total in 3 games, Washington.

Kasting cup, team making highest total in any one of 3 games, Washington.

Bayersdofer cup, team making highest total in first 2 games, Washington.

Mitchell trophy, team making second highest total in first 2 games, Cleveland.

Linnaea Com., \$5 for each man on third highest team, Philadelphia.

H. Lehr, stick pin, for each man on highest team, 3 games, Washington.

T. C. Bauer cup, for man making most spares, 3 games, Peter Olsem, Chicago.

T. H. Patterson, 1 doz. fruit knives for man making most total pins, 3 games, McLennan, Washington, D. C.

W. W. Barnard cup, for individual on team making highest score from distance, total pins, 3 games, Peter Olsem, Chicago.

W. C. McCance, mirror, for man, highest total, 3 games, McLennan.

Mrs. M. E. Thomas, silver pitcher, most strikes, 3 games, Elker, Washington, D. C.

W. J. Johnson, silver bowl, for highest individual score in any one of 3 games, Elker.

Pennock-Meehan Co., \$5, for each man on team making 2nd highest score, total pins, 3 games, Cleveland.

M. Rice & Co., \$10, for man making 2nd highest number of strikes in 3 games, McLennan.

Hosna Waterer, \$5 for man 2nd highest number of spares, 3 games, Dodds.

The teams that comprised the bowling test were Washington, Cleveland, Philadelphia, Baltimore, New York, Buffalo, Cincinnati and Chicago and winning teams were in order named.

Individual Rolling.

Geo. Asmus prize, \$25, highest score, total pins, 361—Guerth; Fred Strootman cup, second highest score, 344 Kessier; Dreer cup, 3rd highest score, 343 Patrick Welsh; Ladies' Comm. carving set, 4th highest score, 326—Michael Bloy; Mrs. Chrester, salad fork, fifth highest score, 324—Brown; W. S. Norris, salad spoon, 6th highest score, 315—Boone; clock, 7th—Wilson; umbrella, 8th, 312—Lehr; vase, 9th, 309—Guttman; box cigars, 10th four were tied and was divided.

BALTIMORE'S DAY.

Friday, August 18, was Baltimore's Day. At 10 a. m. as per schedule the visitors and their hosts were assembled at the Light street dock and amid much good nature and felicitations the two steamers, Annapolis and F. C. Latrobe set sail for the two-hour trip down the bay to Tolchester Beach. As before, the open-handed consideration for the inner man which characterizes the Baltimorean was turned loose and nobody was permitted to go either hungry or thirsty. Much interest attached to Fort McHenry, where the Stars and Stripes were first raised and other interesting points en route.

Arriving at the landing at Tolchester Beach the procession wended its way to the lawn in front of the pavilion where, it had been whispered, an interesting event was to transpire. And so it did, as J. K. M. L. Farquhar of Boston stepped into the open space and calling for President George Asmus of Chicago, addressed him in words eloquent with appreciative praise for the excellent manner in which he had met the heavy responsibilities of his office, his capacity for organization and ability in presiding over his Society and presented him on behalf of the assembled members a beautiful solid silver service in a mahogany case. President Asmus responded with words full of heartfelt appreciation and promised a good time and a notable convention in his home town next year. President-elect Vincent, being called upon, responded gratefully for the honor that had been conferred upon him. Then came the games.

Shooting.

The shooting results were as follows:

First prize, T. C. Stevenson; Second E. W. Stevenson; Third, H. M. Altick; Fourth, E. R. Shaw; Fifth, H. Brown; Sixth, G. Anderson; Seventh, Charles Seybold; Eighth, G. Lutz; Ninth, F. Marquart; Tenth, H. Blackstone; Highest average, 50 birds, T. C. Stevenson.

Following the shooting contest a baseball game between the Baltimore members of the organization and the visitors was begun, but at the ending of the fifth inning, when the score stood 4 to 0 in favor of the visitors, the game was called on account of the storm, which was rapidly approaching. The ball players had hardly left the field before the rain began to fall in torrents. Crowds flocked to the shelter of the houses, and those who were standing on the piers sought the friendly covering afforded by the two vessels at the docks. The storm lasted for about half an hour.

Other Games.

The winners of the other games, which took place in the afternoon, were:

Men's Running Race—For men 25 years and over. First, Harry Wagner, of Baltimore; second, W. Stauffel, of Baltimore.

Young Men's Running Race—Ward Perry, of Baltimore.

Fat Men's Race—J. Schocks, of Baltimore.

Married Women's Race—Mrs. William Robertson, of Washington.

man in the party. The ballots were collected, and after counting them it was found that Robert Halliday had been unanimously chosen. Mr. Halliday, though pleased, was not in the least flattered, and as the crowd gathered around him to see the sealed package, containing the prize, opened, they were greatly disappointed when Mr. Halliday stated that he would not open the package until some time next day.

AMERICAN GLADIOLUS SOCIETY.

At the session of this Society on Wednesday, August 16, in addition to the proceedings as recorded in our last week's issue, the following business was transacted. The committee on recommendations in President's address, Messrs. Vaughan, Crawford and Cowee, advised the appointment of I. S. Hendrickson, Arthur Cowee and Carl Cropp, with the secretary ex-officio, as a board of registry of new varieties with power to make trials, etc., subject to the approval of the executive committee, also authorizing the expenditure of \$50 for dies for a society medal.

Treasurer Fuld's report showed cash on hand \$230.37, and Financial Secretary Youell reported that there were membership and advertising accounts still due the Society of \$345.

It was voted that the American Gladiolus Society adopt the following

THE SHOOTING TOURNAMENT

Boys' Potato Race—R. Thaw, of Govans-town.

Girls' Potato Race—First prize, \$2.50, Miss Grace Erdman, of Baltimore; second prize, \$1.50, Miss Helen Richmann of Baltimore; third prize, \$1, Miss Fannie Lachner, of Baltimore.

Single Ladies' Race—Miss May Dodds, of Washington.

At 5.30 the delegates congregated at the end of the pier and after a short address by Mr. Vincent, a handsome silver loving cup was presented to Robert L. Graham, president of the Baltimore Gardeners' and Florists' Club. The presentation was a complete surprise to Mr. Graham and he acknowledged his appreciation by a short response. On one side of the cup was engraved the words:

To Robert L. Graham, from every member of the Gardeners and Florists' Club of Baltimore, as a token of their highest esteem and regard.

On the reverse side were the words:

Presented during the S. A. F. & O. H. Convention, Baltimore, August, 1911.

The party then boarded the steamer. Supper was served on the upper decks. Almost side by side the two vessels steamed up the bay, and at 9.30 o'clock the passengers were landed at the pier.

Just before landing a vote was cast for a prize to go to the handsomest

as a general standard for grading bulbs. First size bulbs, 1½ inches and up; second size bulbs, 1¼ inches to 1½ inches.

At the session on Thursday Mr. Fitzpatrick of Cornell University gave a lecture and report of investigation of gladiolus diseases. The election of officers resulted as follows: President, I. S. Hendrickson; vice-president, E. H. Cushman; corresponding secretary, L. Merton Gage, financial secretary, H. Youell; treasurer, Wm. Sperling; executive committee, Arthur Cowee, T. Boddington, F. W. Fengar; nomenclature committee, Arthur Cowee, Leonard Joerg, Professor Beal.

The nomenclature committee recommended and it was adopted that a committee be appointed by the president to secure or have printed a suitable color chart for the use of the members of the Society to be referred to the executive committee for approval and adoption, which shall if deemed advisable by the committee be copyrighted and sold to those wishing it.

The following committees were announced by President Hendrickson:

Membership—J. B. Hutchinson, Ralph Cushman, Geo. W. Parsons.

Boddington's Quality Christmas and Winter-Flowering Sweet Peas

ALL true stocks of Winter-Flowering Sweet Peas will be scarce this season. Some varieties are a total failure, owing to the exceptional season in California this Spring. We can make immediate delivery of the varieties marked with a star (*), the balance we are expecting from our grower in California at any time. Our advice to intending planters is to order early.

Our stocks of Christmas-Flowering Sweet Peas have stood the test for years, and we can refer you to the largest growers of this increasingly popular flower, as to the trueness and quality of our seed, earliness of blooming period, and strength and habit of plants.

The following varieties are the "best by test" and include Zvolanek's and our own introductions, grown for seed from selected stocks by the leading California Growers and Specialists of Sweet Peas. Our output last year was nearly 6000 lbs. No kinks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S QUALITY WINTER-FLOWERING SWEET PEAS

At the Exhibition and Convention of the National Sweet Pea Society of America, July 12th and 13th, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only

***BODDINGTON'S EXTRA EARLY CHRISTMAS WHITE SNOWBIRD.** An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz., 30 cts.; ¼ lb., 85 cts.; ½ lb., \$1.50; lb., \$2.50.

***BODDINGTON'S CHRISTMAS PINK.** This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August, flowers can be cut from Thanksgiving on during the Winter months. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***BODDINGTON'S CHRISTMAS WHITE.** A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; lb., \$1.50.

***BODDINGTON'S CANARY.** Similar to the above, but flowers of an exceptionally good yellow. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; lb., \$3.00.

***BODDINGTON'S FLAMINGO.** Color scarlet; free-flowering and early. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00.

***Christmas Meteor.** Scarlet; fine open red flower. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Christmas Captain.** Blue and purple. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Florence Denzer.** Pure white. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; lb., \$1.50.

***Le Marquis.** This is the same color as Princess of Wales, violet; has very large flowers. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Miss Helen M. Gould.** White, open flower; standard lilac, marbled. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Miss Josey Reilly.** Lilac; very large flowers. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. E. Wild.** Carmine or dark pink. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. George Lewis.** Large, pure white waxy flower. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. W. W. Smalley.** Satiny pink. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; lb., \$3.00.

***Mrs. F. J. Delansky.** Daybreak pink. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. Chas. H. Totty.** Sky-blue; late. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Mrs. Zvolanek.** Blue, variegated; good for variety. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; lb., \$5.00.

***Watchung.** Pure white. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

***Wm. J. Stewart.** Blue self. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; lb., \$2.00.

All other varieties of Winter and Summer-flowering Sweet Peas supplied. Write for quotations.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

Exhibition—H. Youell, B. Hammond Tracy, L. Merton Gage, J. B. McArdle.

Press and Bulletin—L. Merton Gage, H. Youell, Montague Chamberlain, J. C. Vaughan, M. Crawford.

Mr. Cowee announced that through his efforts the State of New York had given the Society the sum of \$1,000 to be used in the work at the trial grounds at Ithaca. Mr. Cowee was given a rousing vote of thanks.

Address of President Hendrickson.

Ladies and Gentlemen, Members and Friends of the American Gladiolus Society:

The first year of the American Gladiolus Society is past and gone to make history either good, poor or indifferent which, I will not attempt to pass judgment on. However, one year is hardly long enough to really accomplish much in what seems to me to be the two most important lines of work, namely: thorough trials of all varieties on the market, and creating interest in and love for our favorite flower. While million of bulbs are sold each year it is surprising to find how many people there are in the country who are not familiar or acquainted with gladioli at all, and only comparatively few people have any idea of the splendor and glory of the finer varieties that have been

brought out and introduced during the past ten years, but a beginning has been made as the reports of the different committees will show. From a membership of 137 a year ago we have increased to 172. This increase we think is remarkable, considering the number of horticultural societies scattered all over the country.

Our special meeting held in Boston at the time of the National Flower Show was well attended and much interest was manifested in the discussions. The attempt for an exhibit of cut blooms was a failure, as it was found to be about four weeks too early. The present exhibit will speak for itself. We are indebted to the officers and directors of the S. A. F. and O. H. for the free use of the room in which the competitive exhibits are staged.

We have issued three bulletins during the year which have been a little more than self-supporting. Personal observation during the present summer convinces me more than ever that there is work for this society to do, as there seems to be a craze at the present time for applying names to varieties. This is to be commended when the variety named has some merit, but when names are applied to varieties that are inferior to varieties that have been in existence for years, it seems time to call a halt. Then again there is no doubt whatever that a lot of varieties are being renamed by growers who are not familiar with

existing varieties. It seems to me that a great deal of this confusion could be avoided if our society could establish a bureau of registration where all new varieties could be submitted and passed upon before they are recognized as new varieties by the trade. I think it would also be interesting if we could establish a list of 100 best varieties, and it might be well to establish a discard list to eliminate some of the kinds that have been superseded by later seedlings. I believe we can create a great deal of interest among local horticultural societies if the American Gladiolus Society would adopt some medal to be offered through the local societies for best exhibits of gladiolus blooms. A uniform medal could be made without a great deal of cost to our society, and I think it would accomplish much in the spread of interest.

In conclusion I wish to express my appreciation of the honor in being the first president of the American Gladiolus Society. I bespeak the same loyal support of the membership to my successor in office, and predict a very useful and successful future for this society.

The Columbus Florists' Association of Columbus, Ohio, enjoyed an outing at Heilmann's Park on August 12. Before leaving the park a parade of several of the central streets was made in autos and at the park a picnic dinner and games were enjoyed.

PLANTATION OF LONGIFLORUM GIGANTEUM LILIES, JAPAN.

When Ralph M. Ward of New York received cable advice of the flood in Japan which destroyed thousands of homes in and about the bulb district, he cabled the flood sufferers 2000 yen as a donation. The growers affected appreciated this kindness so much that they decided to get along without

using the money as a relief, and established among themselves what they call the Flood Donation Commemoration Fund, and used the funds in buying up the very finest Giganteum seed bulbs produced in the Kingdom. The above photograph shows the results of the first year's planting and cultivation and demonstrates that an ex-

ceedingly high quality can be produced from the right planting stock. Their intentions are to supply Mr. Ward, beginning in 1912, with a grade of Giganteum superior to anything produced. The money is used entirely to promote quality, and the growers have their heart and soul devoted to the cause.

PERSONAL.

Frank Fillmore of St. Louis, had charge of the floral booth at the Royal Aquarium festival at Priestess Park, all of the last week.

Charles Schenck, of Traendly & Schenck, New York, returned from his European trip on Tuesday, August 14, looking much benefited by the voyage.

Many were the inquiries at the convention for Col. W. W. Castle of Boston, who, in recent conventions, has made so many warm friends among the members by his unique personality, and all were full of sympathy when they learned of his serious illness, lasting ever since last Easter—with many wishes expressed for his speedy return to good health.

On his return from Baltimore, J. K. M. L. Farquhar of Boston received a telegram inviting him to address the Lenox (Mass.) Garden Club on Tuesday afternoon, August 22, which he did at the parlors of Hon. Jos. H. Choate, Stockbridge, and in the evening of the same day attended the

meeting of the Lenox Horticultural Society, thus finishing up a most strenuous ten days.

Mr. H. A. Barnard, representing Stuart Low & Co., Bush Hill Park, Enfield, England, is due to arrive in New York soon on another American trip, and may be addressed at the Hotel Albert, 11th street and University place, New York.

Visitors in New York: P. Welch, A. E. Thatcher and J. K. M. L. Farquhar, Boston; John Canning, Ardsley, N. Y.; M. Barker, Chicago; C. C. Pollworth, Milwaukee; H. E. Philpott, Winnipeg, and others en route to and from the Baltimore convention.

Boston visitor: J. Nash of Moore, Hentz & Nash, New York.

CLUBS AND SOCIETIES

NEWPORT HORTICULTURAL SOCIETY.

After some hesitancy, due to the uncertainty of the annual state appropriation, this society has finally decided to hold its autumn show on Sept. 16, 17 and 18. The schedule, which was completed at the regular meeting on August 22d, includes a wide variety of plants, flowers, fruit, vegetables and table decorations. Premiums in the regular classes are offered under unfavorable conditions, but the special prizes offered as follows are likely to make an excellent showing.

R. L. Breckman, for table decorations, \$50; Mrs. W. S. Wells, collections of flowering plants, \$50; Mrs. T. J. Emery, table decorations by professional florists, \$30; Mrs. H. D. Auchincloss, vases of outdoor flowers, \$25; Mrs. R. Goulet, table paints, \$50; Richards Bros., table decorations, silver cup; Mrs. E. J. Bernard, table decorations, \$25; Henry A. Dineen, hardy perennial flowers, silver cup; Stump & Weller, collection of vegetables, silver cup; R. & J. Farquhar & Co., collections of cactus dahlias by commercial growers, \$25; John Lewis Childs, collection of gladioli, \$10.

The committee of arrangements are John P. Hammond, Andrew L. Dorward and William Grey, who are fully expected to have something new about the placing of exhibits. At the above stated meeting William Grey had on exhibition some handsome peony flowered dahlias for which he was awarded a cultural certificate. The society has now decided to hold its annual ball on the evening of Sept. 20th, and the following are a committee of arrangements to carry out the work. President Andrew S. Meikle, Wm. F. Smith, John T. Allan, J. Robertson and William Mackay. The show and ball will be in Masonic Hall.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Considering everything, weather conditions, etc., the summer exhibition at Boston last Saturday and Sunday was very creditable. Phloxes, asters and gladioli were the most prominent features of the floral display and of these there were many exhibitors. Most interesting to the plantsman, however, were the novelties shown by R. & J. Farquhar & Co., which included three new clematis, *Clematis*, *albusutolia* and *Kaiser*, a new delphinium and a large group of *Lilium tomentosa*. The fruit and vegetable displays were also very fine. Outside of the regular novelties special awards were made as follows:

Special medal Montague Chamberlain for clematis *Ranah*.

Honorable mention R. & J. Farquhar & Co. for collection of lilies.

First class certificate Montague Chamberlain for *Gladiolus Niagara*, Geo. Page for *Gladiolus kinderli* "Glory," W. P. Lothrop, for seedling decorative dahlia "Lothrop seedling," R. & J. Farquhar & Co. for *Viola cornuta purpurea*.

SOCIETY OF AMERICAN FLORISTS. Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the *Begonia*, "Betty Anderson," by S. A. Anderson, of Buffalo, N. Y., becomes complete.

H. B. DORNER, Secretary.

August 24, 1911.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The club will hold a field day at Cedar Acres, Wenham, Mass., on Saturday, August 26, 1911, to inspect the gladiolus fields of B. Hammond Tracy, whose name and fame as a grower of gladioli is too well known to require any further mention.

A cordial invitation is extended to any outside the club who would like to make what will be a very enjoyable trip; ladies are specially invited to attend.

A special electric car will leave Scollay Sq. opposite Quincy House, Boston, at 12.30 o'clock. Running time to Wenham is 1 3/4 hours.

W. N. CRAIG, Sec.

CLUB AND SOCIETY NOTES.

At a special meeting of the North Shore Horticultural Society it was voted not to hold its summer show, similar action having been taken in regard to its June show owing to the season not having been favorable to the culture of flowers. The chrysanthemum show probably will be held in the autumn at Manchester, Mass.

The St. Louis Retail Florists' Association held its meeting on the night of Aug. 14. The attendance was surprisingly large and a great deal of important business was transacted. A mail vote was taken among the local retailers for early closing, and 42 responded, of which 36 were in favor of closing early. Theo. Miller was appointed chairman of the legislative committee, to act with a committee appointed by the Florist Club to pull through the bill now before the house of delegates to stop "crepe pulling." Next meeting Monday, Sept. 12th, at 8 P. M.

INCORPORATED.

Rochester, N. Y.—McGlennon & Kirby Co., general plant nursery business, capital stock \$50,000. Incorporators, J. S. McGlennon, Rochester; T. Kirby, Brighton; O. J. Whitney, Oswego.

Madison, Wis.—The Capital City Greenhouse Co., incorporators, Fred Rentschler, George Rentschler, Albert Meyer and Jacob Kolb. This was formerly the Capital City Greenhouse. Fred Rentschler, proprietor. They are building a range of houses for roses and carnations and will use the old range on Williamson street for plant culture. Other additions and improvements will be made.

E. S. MILLER

Wading River, N. Y.

Assuming for the sake of argument that Horseshoe Brand Lily bulbs cost 20 per cent more than common brands of no special source and the bulb cost is from 10 to 20 per cent of the selling value of the flowers; don't you think it is much safer to pay the difference for Horseshoe Brand? If you can get one more flower from five bulbs it will more than pay you the difference in bulb cost, not considering at all the chance you take in buying goods of doubtful value. So after all it is more economical by far to pay 20 per cent more for a brand which will net you one more flower in five bulbs; and the possibilities are actually much greater, while the liability for loss is much less. Furthermore Horseshoe Brand bulbs do not always cost 20 per cent more than other brands, even no more in some cases, and if anyone doubts the real value of the brand, all we ask them to do is to try them and keep a record of results. It's the record most growers fail to keep and after the season is over they seldom know whose goods are the best—merely have a jumbled idea that they obtained so many flowers from so many bulbs—that's all. Lily bulbs in the fields are generally sold a-la-Carte—you get just what you pay for and not more, so it's best to pay the fair price and get the cream of the crop.

Seed Trade

In a letter from W. Atlee Burpee, who is now in Europe, we learn that the only countries in Europe that have decent seed crops are Holland and Denmark; England, France and Germany are in a terrible condition. Mr. Burpee says that he saw field after field of Bush beans in Germany in which most of the plants were absolutely burned up, and the few plants having green leaves did not carry a single pod. Mangel and Sugar Beets by the hundreds of acres will yield from 1½ to 2 cwt. per acre. Spinach also is almost a total failure there, while asters, unless they have rains immediately, will yield practically no seed. Potatoes and grains are also so poor that it is really a question of how the farmers can live. In England the grass is all burned up and there is practically no pasture for the cows, while peas are worse than last year. He states that it was really a satisfaction to get over to Ireland where they have had rains and where the grass is green.

European seed trade reports as they come to hand through New York importing houses are very depressing. In many sorts of seed it is no longer a question of percentage of yield, but whether or not the crop is a total failure.

The hot and dry weather in Belgium has also had a disastrous effect on all florists' plants, particularly azaleas, which are undersized and stunted, and the situation is very critical with prospects most discouraging. The weather continues very hot and the shortage of water has almost ruined some growers, who will have great difficulty in filling contracts as to sizes and varieties ordered. Vander Cruyssen and Simon Mardner are among the varieties most seriously affected.

A large German grower of lilacs states that, in consequence of the unprecedented heat and killing drought, unprecedented in 77 years, pot lilacs generally have suffered severely, the foliage being burnt and the flower buds being stunted and imperfect, so that the flowers must of necessity be crippled. Lily of the valley, also, has sustained a serious set-back and reports from week to week are more and more depressing. Many large fields are more or less shrivelled up, and this year's crop will be short, with superior quality decidedly scarce.

From Japan we learn that the Longiflorum Giganteum crop seems to be a failure, there being many very pessimistic reports from many growing districts. "Thunder shower rotting," "plant louse," "withers," etc., are blamed for the trouble. We hope, however, that this may prove to be overdrawn as is the case each year with one or two such crops. Time will tell.

A Correction.

The United States Seed Co. write us that we were incorrectly informed as to their moving to Memphis. The fact that they were successors of the Plant Seed Co., of St. Louis, in the garden seed department, made it necessary to have a chief wholesale distributing

GROUP AT THE OUTING OF THE H. F. MICHELL CO.'S EMPLOYEES.

The Dreer ball team on the right and Michell team on left of picture.

point farther north and Memphis was decided on. The Memphis office will be the business headquarters, although they are a Texas corporation.

WASHINGTON NOTES.

It is reported that the bureau of plant industry of the Agricultural Department has entered into negotiations for the construction of a nine-story building in the southwest section of the city in which to transact its rapidly growing business. While the report is believed to be true, it has not been verified.

A circular letter is soon to be sent to each of the ladies who would be eligible to membership, asking their opinion as to the advisability of the formation of a ladies' auxiliary of the Washington Florists' Club. President Mayberry is of the opinion that such an organization, besides aiding in the entertainment of the ladies, would prove a large benefit to the club itself.

Quite a number of the clerks of the local stores are availing themselves of the vacation season to hie themselves to various places away from the city to forget the trials and tribulations of their work. The following employees of Gude Bros., are reported thus enjoying themselves: Miss Nellie Bruening, for more than ten years in charge of the office, is at Atlantic City; Charles Scarboro is in Bucks County, Pa., and Walter Hawley is at Hoosick Falls, N. Y.

There is now pending before Congress, a bill looking towards the taxation of vaults located beneath sidewalks and streets which are occupying public space. This is causing considerable consternation among merchants in all lines. The Chamber of Commerce is taking the matter up with a view to protesting against its passage, and several of the florists have proffered their aid. Z. D. Blackstone is strongly opposed to such a tax, and W. F. Gude states he will fill up the vault rather than pay for it. Congress will probably adjourn before

pushing the bill through this session, but as it was drafted by the Commissioners of the District, the matter will be taken up with them.

Two deaths were reported in the city within a week, that of William Radtke and J. H. Copeland, both gardeners. The case of the former was a particularly sad one in that Mr. Radtke and his wife had planned an outing for the day on which his dead body was discovered. It seems that Mrs. Radtke had gone to bed leaving her husband to complete the preparations for the outing. Upon awakening in the morning she was startled to find him missing. A search found him sitting upon a chair in the kitchen, dead, with gas pouring out from a disconnected tube of a gas stove. His death was accidental. J. H. Copeland died at his home in Arlington, Va., at the age of sixty-five years, on August 13.

PARK GARDENING.

Read before the Florists' Club of Philadelphia, August 1st, by Xavier E. E. Schmitt.

To cover the subject of park gardening or park ornamentation would require a much more exhaustive essay than the time allotted me would permit, for in no sphere in which the gardener or superintendent is interested, is there a greater opportunity for diversity, from a horticultural standpoint.

In years gone by the park was a portion of territory set aside for the admiration of the passer-by and rarely was it permissible to divert from the paths or roads and commit the sin of walking on the grass or even to step near some shrub or plant to make close inspection. Fortunately the rank and file of the public who are sufficiently interested in our public parks and pleasure grounds are now accorded every opportunity to make a study of plants and trees to their satisfaction, which has been a great uplift to the public at large, because of the educational feature as well as recreation.

In view of this tendency and desiring to interest the public in our parks we must cater to their wants, or rather introduce new features in floral effects to make our parks and pleasure grounds inviting. Much is being done to use every available space in the heart of the cities in establishing recreation parks and breathing spots for those who will avail themselves of the privilege of using that which the authorities feel have become essential factors for the welfare and comfort of its citizens.

Park ornamental gardening has been for many years a set form, i. e. carpet bedding of high coloring, long lines of strong contrast, and this continues to be a leading feature which the visitors admire as the chief attraction. Unfortunately we cannot vary much in the

plants used as only certain varieties can be used for this work to advantage, but we can change the design and have variety, even though the species are used from year to year.

A greater tendency has been of late years to resort more to narrow strips or borders of unique design in scroll work, and to eliminate large beds of special designs. This from two points of view is an advantage, first lessening the number of plants in the work and second, the narrow scrolls or strips are easier kept in shape. Evergreens are playing a very important part in cluster beds even for color—*Retinosporas*, *Piceas*, *Juniperus*, *Biotas*, *Buxus*, *Pinus*, *Taxus* and *Thuyas* (both pyramidal and bush forms) in particular, as they are not only effective for color, but are also interesting in decided character and form. We count these beds as special features along drives, and when properly grouped, they become beautiful with age and symmetrical growth. Shrubbery of every known variety can be and is used to great advantage. Where trees are not grouped enough to form effect, the shrubs are used for a period with the best results, although they demand much care (and attention) to prevent their growing wildly and with injury to themselves.

Interesting and varying features are being adopted in many parks, as far as planting and care is concerned. I refer to the plan of beds, round, oval, diamond, or star-shaped planted with flowering or foliage plants, along the walks and drives on either side, and which are not duplicated except in one or two instances where formality leaves no other course; i. e. whatever is planted in one bed is not duplicated throughout the grounds; this not only becomes interesting in itself but is one of the strongest means of education. For this purpose every variety of annuals and perennials can be used to advantage. I will here name only a few of the

leading classes: *Delphiniums*, *Paeonies*, *Asters*, *Iris*, *Hollyhocks*, *Rudbeckias*, *Hemerocallis*, *Phlox*, *Campanulas*, *Helianthus*, etc., also *Rhododendron* and *Azalea* groups. We are constantly receiving inquiries from park visitors, asking when certain plants are at their best. This proves to a great degree that the public are becoming observing and in many cases these inquiries come from those who have their own private places with gardeners in charge.

Where conservatories are a part of the park features much can be done in periodical exhibitions of under glass stock, which will keep up the visiting during the entire year.

We must not lose sight of the fact that the parks' most valuable resource and asset is the tree; what would it be without the variation of these towering monarchs in their charming color throughout the year? The gardener or superintendent is an artist indeed who judiciously plants the trees for future effects and in such variety and variation that they will group artistically and enhance their charm as they advance in size with age. Proper planting with open views into the distance lures the pedestrian and those in vehicles to all parts of the grounds. With each year's planting we study the weak points and endeavor to overcome them for the succeeding year. Sometimes our plans are thwarted because of extraordinary seasons of either moisture or drought, or even some new or pernicious insect which proves almost beyond control. In all work of park gardening it must be borne in mind that the most important duty is that of timely preparation for the next season. In Fairmount Park we are equipped with glass, forcing houses frames, pits, etc. Failure in producing the required quantity of any one variety of plants often upsets plans seriously, hence the importance of having a supply beyond our actual needs. We grow for the total bedding

CHICAGO NOTES.

Labor-Saving Device.

C. N. Dickinson, Mgr. of the E. H. Hunt Co., 131 N. Wabash Ave., is to-day showing his friends a little piece of mechanism which he calls the Fisher Plant Clip. It is simple in construction with nothing to break or get out of order and holds on to the vines with the grip of a bull dog. By actual test, with the aid of the clip two men tied as many carnation plants in one hour as two men tied in ten hours without it. The only difference required is in the outer lengthwise wires of the benches which should be of a little heavier wire than usual. Watch next week's paper for advertisement telling all about it and prices. The E. H. Hunt Co. is the oldest florists' supply house in Chicago and their manufacturing it is a guarantee of its worth. Ready for this fall.

probably was in the nature of a monetary loss to the Chicago florists. Hundreds of thousands of visitors were here but they were on the lake front and not buying flowers. Some of the retailers had their windows arranged so as to harmonize with the special idea of the week and J. Mangel was particularly successful in producing a monoplane. He also received the order from the Aviation Association for a floral piece to be sent to the family of St. Croix Johnson, who lost his life Aug. 15 when flying at the Chicago meet. Harry Hunter executed the work. It was a thing of beauty and a credit to the designer.

Homeward Bound.

An enthusiastic lot of florists are arriving day by day, each one reporting the Baltimore convention a great success. Michael Pink of Kennicott Bros. was one of the first to return. A card from A. T. Pyfer, states that his party are homeward bound and now the stay-at-homes will have their sorrows intensified by the tales of hospitality, etc., sure to follow.

Trade Jottings.

W. F. Vlk has added new wall cases and shelving to his retail store at 51st street and Ashland avenue. Mrs. Vlk, who had a serious case of blood poisoning is gaining slowly.

P. M. Bryant, Sec'y of the E. H. Hunt Co., left on Monday for a trip to Northern Wisconsin. He predicts the new Elastic-Lyke putty will be a great success, for the trial orders are being followed now by large ones.

A. Meyer, who specializes in asters, says the weather this season has not been favorable to the crop. Short stems and many imperfect blooms are complained of. A new house of modern construction is being added this year.

The Geo. Wittbold Co. of Enghenbrook are cutting their first dahlias this

week. Otto Wittbold says the supply of kentias and cycas are unusually fine this year, the conditions seemingly being just right to make them at their best. Gladioli are coming slower which he, as well as all other growers, appreciate.

Personal.

Mrs. E. H. Horton, for many years bookkeeper for Bassett & Washburn, has just returned from a much needed rest.

Paul Bloom is so far recovered that he is able to spend a portion of his time in the store again, which is being thoroughly overhauled.

Mr. and Mrs. H. C. Willbrandt of The Globe Greenhouses, West Madison street, have just returned from a two-weeks' auto trip. They covered over 3000 miles without a single mishap and report a very enjoyable time.

Mr. and Mrs. George Walther, 6th street, who have been in California for the past six weeks, returned Saturday. Mr. Walther is fond in his praises of the Pacific coast, but says Chicago is good enough for the man who has an established business here.

Henry Wiers of T. A. Badlong's wholesale store at Torch Lake, Wis. Next week (this) Zappa will leave for a post in Michigan. Miss Russell who has not been with this firm long enough to entitle her to a vacation, is entertaining her friend Miss Butler at St. Louis, Mo.

Charlotte Mechelsen has had an extended vacation in Michigan, and is all ready for the opening of the fall season. Miss Mechelsen's retail store at 47th street and Grand Blvd. has been made attractive during the past

season, which, by the way, is never very dull here. Miss Elizabeth Mechelsen who has assisted in the store the past year has now returned to Keokuk, Ia.

Visitors: Arthur Newell, Kansas City, Mo.; Mr. and Mrs. J. S. Wilson, Des Moines, Ia.; P. A. McDonald, Logansport, Ind.; Walter Coles, Kokoma, Ind.; Paul Paliz, Little Rock, Ark.; Mr. Blackman, Evansville, Ind.; Mr. Schwartz, of Lehmaier, Schwartz & Co., New York; Claud Wisely, Wiseley Greenhouses, Murphysboro, Ill.

Flower Market Reports.

Summer trade has kept **BOSTON** up pretty well in this market for a time, but at present the increased cut of asters, gladioli, etc., has overloaded the wholesale places and caused a slump from the prices that have prevailed of late. Asters are so plentiful that it is not possible to find an outlet for them except at cut rates. Nobody can find fault with the quality which is all right. Gladioli of the Shakespeare, Lafayette, Mrs. King and America type are selling fairly well, but the influx of heavy invoices of mixed gladioli from outside sources at very low figures makes it impossible to realize adequate prices for these excellent and popular varieties. Roses are at the lowest round of the ladder. As a rule they have been good excepting the small flowers from young plantations, and these it is not possible to dispose of, even the street fakits shunning them. The newer varieties or roses, especially Prince de Bulgarie and Lady Hillingdon seem to have struck the popular fancy and are selling well. Other things normal for the season.

A dull week has passed:

BUFFALO nothing doing from Monday to Friday, and then

Saturday being only a fair clean-up day. From the wholesaler's point of view, it was the quietest of the summer season. Stock accumulated early in the week, and when unloading day came, which is looked for on Friday and Saturday, the largest portion remained with them. Gladioli are very plentiful, especially in the mixed colors, and seem to remain long. Only a part of the fancy varieties move to advantage. The winding up of the early crop of asters brought in everything that had a stem, and there were plenty. Only a few choice branching are had, but the week coming will bring them in better quantity and quality. There is an over supply of short roses, especially white and pink Killarney, which are mildewed and hard to dispose of. There are some good summer roses, and Maryland in the extra and fancy grades, and readily. It is hoped that market conditions will improve the coming week.

The glut in gladioli that

CHICAGO prevailed last week

has passed off, and

with the lesser quantity comes a little increase in the demand, but that there can really be said to be a demand for anything, but it comes nearer to it than any time last season when business was practically at a standstill. All attention was on the flowers, and the aviation field held more attractions than social events, so aside from a few funeral orders there was no use for flowers, and most of the retailers might as well have closed their doors and followed the crowds. Dahlias are coming in now, the first ones appearing this week. Asters are still holding most of the space on the counters, and on many of them no price prevails. Of the best roses sales

Flower Market Reports

(Continued from page 314)

NEW YORK The past week has been one of the dull-est of the season. Everything is stagnant, and the Baltimore Convention might as well have extended over another week, so far as the wholesalers' absence from the seat of trade is concerned. Roses are perhaps the most humiliated and humiliating item in the list. They are decidedly bad, and nobody wants them. American Beauty is the only exception, and in that respect it is but spasmodic. Asters and gladioli clog the wholesale channels, and are not worth the cost of sending them to market, the flowers being small and unfinished, a result of the abnormal weather conditions prevailing hitherto. Hydrangeas are being sent in in large quantities, also tritomas and other hardy garden material, all of which has an uphill struggle to get recognition in these dull times. The situation just now is simply a patient wait for a seasonable improvement to develop.

PHILADELPHIA There was very little improvement in local trading last week. The market seems to be at its lowest ebb. The wholesale houses had the blues until a little rift came in the clouds in the shape of outside orders. These latter gave a welcome fillip to the general situation and relieved it somewhat. But on the whole it was a poor week, and we see no medals on any part of it. The great flower at present is, of course, the aster. There are some good ones now. We saw some beauties for the first time this year at Pennock Bros. We were told that they were grown by William Didden, and we can well believe it, as we had the opportunity this time last year of seeing what he could do. In spots, there are some other grades of asters that are pretty good. They are improving. In regard to gladioli; these although on the wane now as to quantity are still coming in of excellent quality, and meet with ready sale. The rose market remains about as last reported. The "Rhode Island Reds," which term means eastern-grown American Beauty, hold their own pretty well, and while in rather small supply, still seem enough to fill the bill, and there is no appreciable change in prices. The Kaiserin market has improved. Some very fine stock is coming in at present. Maryland is a little

off, and pink Killarney has the advantage most distinctly for the time being. Most other stocks normal. Orchids very scarce; a few good Cattleya Harrisoni—and that is all.

ST. LOUIS Business has picked up somewhat, and the local retailers have bought considerable stock during the last week, but daily consignments have been so heavy in asters, roses, gladioli and tuberoses spikes that there is plenty left over. As to prices for the various grades and varieties we can only say that they have been very low. Tuberoses of the single ever-blooming type are coming in in large lots and are down to \$1.00 per hundred spikes, while ten days ago they brought \$3.00 to \$4.00 per hundred.

AUCTION SALE OF MARKET STALLS

The Boston Flower Exchange, 1 C. Park St., will hold its annual sale of choice of stalls on Saturday morning, September 2. Don't forget this important event. See advertisement.

The Boston Co-Operative Flower Market, 2 Park St., will hold its sale at the same time.

NEWS NOTES.

Kansas City, Mo.—Sam Murray is putting in new boilers and getting his place in readiness for a good winter's business. Miss Mary Hayden, his popular store manager, is enjoying a two months' vacation.

San Francisco, Cal.—The Pacific Coast Horticultural Society, an organization composed of florists, nurserymen and gardeners, in San Francisco, has inaugurated a movement closing all florist shops at noon, beginning Sunday, August 13. The movement is meeting with general favor.

PHILADELPHIA NOTES.

A sensation of the trade display for many florists was the exhibit of M. Rice & Co. of their new prepared cypas leaves. It is difficult to tell this from the natural. Absolutely distinct from the painted leaves. The process is a German patent which the firm controls in the U. S., and was appropriately awarded "Honorable Mention Certificate" by the S. A. F.

A stag party was arranged on Tuesday in honor of Will Currie of Milwaukee, by John Westcott. Some went by auto, some went by train. H. H. Battles, John Burton, Daniel Donoghue, Dr. Lane, Robert Craig and others were in it. The objective point, of course, was the bungalow on Barnegat Bay. It was the old Isle of Pines crowd. Westcott, Donoghue, Craig, Lane, and as special compliment to Will Currie, Mr. Burton gave the guest and as many of the party as possible the delight of seeing Jersey by auto.

Visitors: Victor Bergman of Weinhoeber Co., Chicago, Ill.; Wm. C. Young, St. Louis, Mo.; D. Carmichael of J. M. McCullough's Sons, Cincinnati, O.; W. G. Van Nanne, Brooklyn, N. Y.; Charles L. In writing to Advertisers kindly mention Horticulture

Aphine

The Insecticide that kills plant Lice of every species.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft-bodied insects. An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

FOR SALE BY SEEDSMEN.

Send for name of nearest selling agent. Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country.

Aphine and Fungine can be used in house or field.

A Tryout Greenhouse

We call it a "tryout" because the owner has rather extensive ideas of the size of house he will eventually have, but he had us build this small one for him as a tryout to prove to himself that a greenhouse gives all the fun and satisfaction we say it does. It is so located and arranged that it can be enlarged economically and lose none of its attractiveness. A plan that is planned ahead, as it were.

Perhaps you would like a tryout house?

If you write us at once we will send you a catalog by return mail and by a little extra effort your house ought to be ready for use this winter.

Hitchings & Company

Spring and Louisa Streets, Elizabeth, N. J.

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Piersoni, 6-in. pots.....\$0.50 each

Nephrolepis Elegantissima, Piersoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each

Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

Seasonable Notes on Culture of Florists' Stock

NEPHROLEPIS

It is now time to work up bench-grown *Nephrolepis* into salable form, by lifting them and potting into 5 or 6-inch pots, using a soil that has a liberal addition of animal manure. A good compost is three parts fibrous loam, two of leaf mold and one of well-rotted and sifted cow manure. See that the pots are well cleaned and have good drainage. After they are potted they should be placed under a good shading for a week or more, and then gradually inured to the full light. Plants that are in pots and are fairly well re-bound should undergo their last shift for the season as ferns make their finest growth in the next two months. Exercise care in watering these ferns, particularly during periods of abnormal weather condition that we are bound to meet. See that they do not get too crowded. They should be set far enough apart to have every one of the overhanging fronds fully exposed to the light.

EUPHORBIA JACQUINIAEFLORA

Cuttings that were rooted during April or May and grown on by frequent shifts can now be planted out on a bench in fibrous loam three parts and well-rotted manure two parts, and, if the soil is heavy, add about one-fifth of sand, for they are very impatient of stagnant moisture at the roots. Plant them about ten inches apart and give them a syringing every good day, but at the same time be very careful not to over-water. Those that are intended for pot culture should be given a light bench now, so as to insure a good break and later on to give both color and substance to the flowers. When the flowers become apparent at the axils of the leaves the plants should have some manure water about once a week which will enlarge the bracts in size and develop highly their coloring. If the sprays are cut around the holidays, you can have another cut by April.

LILIUM CANDIDUM

These bulbs should be potted up as soon as they are received because leaf and roots are often made while they are in transit. They can be either potted singly into 6-inch pots or three to five bulbs can be put into an 8 or 10-inch pot. Give them a good watering after they are planted, but afterwards let them dry out before giving any more water, as the bulbs will rot if given too much water at first. The best place to stand the pots is in a frame on some coal ashes, where they can remain until cool weather arrives with sufficient severity to firm the soil in the pots. After this a covering will be desirable so as not to allow the pots to break. *Candidums* do not force well until after the middle of January, so it is well not to attempt it before this date.

NEXT YEAR'S CYCLAMEN STOCK

Now is the proper time to make a liberal sowing in red, pink and white which seem to be the colors most in demand. Make up a compost of equal parts of well-decayed fibrous loam and leaf-mold, with enough of sand to make it porous. Wide shallow pans are the best to use. Whether pans or flats are used see that they are well drained. Fill up to within 1¼ inch of the rim and press the material moderately firm. On this place about half an inch of the sifted mixture and make the surface smooth. Now sow the seeds as evenly over it as possible

and then press the seed into the soil. Sift a little covering of the fine mixture over this and give a watering. Place them where there is a moderate and evenly maintained bottom heat. When the little seedlings are coming up they will need a nice light bench or shelf close to the glass, in a house of from 60 to 65 degrees steady heat, with a moist atmosphere. These conditions will materially hasten their growth during the first part of the winter. Give ventilation in all good weather, but be careful and avoid draughts or extremes in temperature. As your fire heat is increased see that the atmosphere does not become too dry, as the young plants like plenty of atmospheric moisture.

PROVIDING COMPOST

Don't spare expense in having a sufficient quantity of sod, manure, and sand for now is the most propitious time of the year for the composting and storing of all bench and potting soils. There is nothing better than the top three inches of a rich pasture. This should be piled up in long moderately high and flat topped heaps, put up in layers of six inches in thickness and then spread three inches of good cow manure in alternate layers. If this work is done within the next few weeks you will have a chance to chop it down and fork it over which will not only thoroughly mix it, but will help to further a perfect and uniform decomposition by the intermixture of the different parts and exposing it more to hard freezing during the winter. Success with all kinds of greenhouse plants depends to a considerable extent on the kind and condition of the compost in which they are grown. So now prepare,—be one of the fortunate ones when the spring comes, by making prudent and ample provision for the need of another season.

TRANSPLANTING EVERGREENS

Any florist who has a call for small evergreens for the holiday trade should procure them and pot them up now for this will give them a couple of months in advance of cold weather to make new roots in the meantime which will add greatly to the assurance of their well doing. After they are potted up stand them in a rather shady place for a week or ten days, until they start new root action; then they will stand the sun. With attention to watering and other care they should be in good condition for the holiday trade. A good assortment to pot up are *retinosporas*, *arbutus*, *junipers*, *box* and *plums*. *Enonymus*, *laurel*, *mahonia*, and others of the broad-leaved section are also good.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Care of Carnations; Crotons; Deciduous Foliaged Plants; Making a Perennial Border; *Phloxes*; *Primulas*.

Aerides quinquevulnerum

Our cover illustration shows a well-grown plant of this beautiful *Pogon* summer-flowering orchid. The plant pictured was grown by M. J. Pope, Naugatuck, Conn. The flowers are wax-like, white, tipped with deep rose on sepal and petals, fragrant and borne on pendant racemes a foot or more in length. For decorative purposes this orchid has few equals. It is of very easy culture, its main requirements being heat, shade and atmospheric moisture. Sixty-five degrees minimum in winter will suit it.

Thanks

Our readers will pardon us, we hope, should we appear to be a bit vain-glorious over the many commendatory words that have been expressed, verbally or by letter, regarding our Special Baltimore Convention Number, for its contents and make up, and in approval of our editorial and other features in the succeeding issues. We did feel rather proud of our convention issue and particularly as to the amount of advertising it carried—larger than in any previous convention number, and it is doubly gratifying to realize that our work has not gone unnoticed by our readers. We take this means of expressing once for all, our appreciation and gratitude for the many kindly compliments that have come to us.

Soliloquy

And now we come to September. How full of suggestiveness and inspiration is that word, September! It tells us that now the tide has turned and business activity is once again under way. The recreation season has gone; the hustle season is right ahead. Conventions, outings, the Arcadian days of seashore and mountain all must now take their place on the tablets of memory and the duties preparatory to a successful prosecution of our work loom up before us. In imagination we seem already to sniff the frosty nights, the sulphured atmosphere of the closed-up rose house, the pungent odor of tobacco smoked ranges. We scent, not far off, the reminiscent fragrance of chrysanthemums, which carries the thoughts back to bygone years as no other fragrance ever does and the whiff of sweetness from "the first bunch of violets in the market," which, by the way seldom has anything else to commend it. There isn't so much nowadays, is there, as there used to be in the distinction of being the *best* on deck with violets or any other crop? The *best*—"there all the honor lies."

Advice

Back to our text. Are you fully equipped for every normal demand your business may make in the season now opening? Any one who went to Baltimore and saw that unparalleled exhibition of material and outfit for every department of the trade could not fail to return home with a full-charged mind as to what he must needs do and what he must have if he expects to keep abreast of the progressive elements of the rapidly developing horticultural industries of this country. Why not follow up the inspiration now by getting busy with HORTICULTURE's advertising pages? Next to the exhibition, in suggestive value to the wideawake grower or dealer, are the contents of these advertising columns. They present the offerings of the leading houses in their respective lines and they vitally concern you if you are not a "dead one." With a discreet and observant business man who watches the advertisements instead of buying haphazard from the first man that comes along, one dollar has the power of two.

Autumn Flowering Clematis

The numerous species and varieties of clematis which contain many of our most beautiful climbing shrubs and ornamental herbaceous plants are deserving of much extended cultivation in gardens, and by a careful selection one is able to extend their flowering over a period of several months. Those which flower at this season of the year are specially valuable as few other climbers are in bloom and they add greatly to the brightness of the garden, and few plants are so accommodating or require less attention. In their natural habitat all the varieties mentioned below are found growing over old trees or climbing over logs or undergrowth, and when allowed to grow naturally in such a position they are undoubtedly grown to the best advantage. But they are also well adapted for clothing pergolas, buildings, etc., though some attention in the way of support is necessary. Very fine effects may be produced by planting groups of them in various parts of the pleasure grounds, and in the stumps or branches are provided for them to climb over they form a beautiful natural tangle. They are also very desirable for clothing banks and walls in company with vines and other climbing plants. As soon as it is customary to propagate the large-flowered varieties of the Japanese and tangutense sections by cutting, this is not necessary with the varieties I advocate here for late summer and fall flowering. All these seed freely, or may be readily increased by cuttings inserted during the summer. If by seed they should be sown as soon as ripe in a gentle heat and the young seedlings pricked off as soon as large enough to handle.

Much interest has been taken in this class of plants during recent years by the magnificent varieties added to our gardens by Mr. Wilson through his journeys in Central and Western China, and among those which have already flowered and proved their hardiness are some of our finest climbing plants. *Clematis montana rubens* is probably unsurpassed by any other climber in cultivation. Another hardy variety from Western China is *C. tangutica*, which has solitary yellow flowers produced very freely on long stems. Attached to the seeds are long silky filaments which give the plant a very attractive appearance and it is not less beautiful when in seed than in flower. *C. campanulata*, a native of South Western Europe, is one of the latest to blossom, not being at its best till the last week in August. It is a very free grower and entirely clothed with clusters of creamy white flowers. *C. apiifolia*, a native of China and Japan, and *C. integrifolia*, much resemble each other as they both have creamy white flowers produced in abundance all along the current season's growth. Both of these are very handsome and desirable plants for all purposes.

C. paniculata, also a native of Japan, has always been one of our favorite climbers here, and at this season of the year it has few equals. The pure white flowers contrast effectively with the dark green foliage and when allowed to grow and ramble at will it has few equals.

C. serratifolia, from Korea, is somewhat similar to the yellow *tangutica*, but the flowers are smaller, not so rich in color, and the appendages to the seeds are not so showy. It is, however, a very desirable plant for this season of the year.

Arthur. E. Thatcher

Rust (?) on Tomatoes

The question asked by one of your subscribers concerning rust on tomatoes is more or less difficult to answer as we have no true rust on tomatoes. The disease he refers to is probably known by some other name. In the absence of any specimens to identify we are at a loss to know just what he refers to. He may refer to a leaf blight caused by a species of *Septoria* which is rather serious further south and in the middle west. This disease is characterized by a spotting of the leaf, first appearing on the lower leaves and gradually working upwards. It often affects the plant quite severely, giving it a more or less scabby or rusted appearance. Experiments made by the Illinois station and outlined in Bulletin No. 144 show that this trouble can be materially reduced by repeated sprayings with Bordeaux mixture.

Another disease of foliage is known as salt or mildew, and this is also more common to plants in the south than in the north. It is caused by a fungus which appears on the under surface of the leaf and does not cause any considerable damage to the plant. It is sometimes washed off by rain or any use in controlling mildew.

Another disease is caused by a fungus and is called Fusarium and this has caused losses with tomato crops further south the last year at least. This Fusarium blight is often associated with the leaf blight previously referred to in the south, and has done an enormous amount of damage to the crops in that region. No effective remedy for Fusarium has been found so far as I know. We have found this trouble on tomatoes in this state during the past summer, but they have not been seriously affected.

G. E. Stone

Amherst, Mass.

(Bulletin No. 138 of the Mass. Agricultural Experiment Station, by Dr. George E. Stone, issued June, 1911, gives full information as to Fusario Disease and other control. Requests for bulletin should be addressed to the Agricultural Experiment Station, Amherst, Mass.—Ed.)

Early Flowering Gladioli

Early Flowering Gladioli.

Dear Sir:—Regarding earliness of gladioli—having on trial about two hundred of the very best productions of the world's leading specialists, Europe, America, etc., and a large lot of our own hybrids, gives us a very fine chance for comparison of relative merits.

Lancaster's Precocious sort, Pleaide, came into bloom 61 days from planting our own earliest fully as large as Princess of Wales, etc., and a few days later than very early sorts. We have a strain of earlies which were started April 17, coming up from July 1st; bulbs mostly 1½ in. to 1 in. Planted in March, all these earliest sorts would open in last week in June, especially from large bulbs. We have a strain of White Childsii that are very fine that are nearly as early as above. In tendency flowers equal to Europe. We have in sight 25 lbs. or more seed all h. p. from the very finest blooms. These ought to yield some wonderful sorts.

Yours,

Conrad Dorer, Co.

B. B. Betscher

CLUBS AND SOCIETIES

HORTICULTURAL SOCIETY OF
NEW YORK.

The New York Horticultural Society held the last of their summer flower shows for this season in the Museum Building at the New York Botanical Garden on August 26 and 27. The highest commendations are due the growers of gladioli: not merely for the excellence of the blooms, but for the manner in which they support these large and small flower shows. In the class for largest and best collection of named gladioli, John Lewis Childs won first with 56 vases, the most attractive varieties being Aline, Alaska, Nezinecott, Rosella, LaGraden and Princeps. Arthur Cowee came second with 18 vases of fine flowers, among which shone out Cracker Jack, Peace, LaLuna, Rosella, Afterglow and California. For best 12 varieties A. Lahodny was awarded first. The most prominent were Evolution, White Lady, Leo Erron, Mrs. F. King, LaLuna, Wild Rose, Dora Kraus, Princeps, St. Louis and I. S. Hendrickson. Second prize went to P. W. Papp. On 25 spikes of any white variety, first prize was easily captured by "Rochester White," sent by Jacob Thomann & Sons, Rochester, N. Y., and from its appearance here we classify it as the best for general florists' use. Second went to John Lewis Childs for vase of Aline. Best 25 spikes of any pink variety went to Fascination, grown by E. S. Miller, Wading, River, N. Y.; second to John Lewis Childs with Wm. Falconer. In the class for non-commercial growers A. Lahodny won all the first prizes. In the class for largest and best collection of named varieties he staged about 75 vases of splendid flowers in almost as many varieties. P. W. Papp was second with some pretty but smaller flowered sorts. On six spikes of any white variety Mr. Lahodny won first with Reve de la Arzon, and in pink he got first with Panama. E. S. Miller, in a special class, exhibited a collection of 20 vases in as many varieties of seedlings, among the most beautiful of which were 143, a yellow, which we considered the best of its color at the show; 41, deep red maroon; 144, deep crimson; 17, light Burgundy; 59, mauve with claret throat; 88, white with violet stripe. We must not forget his splendid red variety, "Stromboli." Frank Bauning, Kinsman, Ohio, exhibited a vase of that grand new pink, Panama. We were informed that it arrived a little too late to compete in the class calling for pink and in consequence lost that award. In the water lily section Wm. Tricker won all honors, showing 25 varieties of nymphaeas. His Nymphaeas were elegant, as usual. Mr. Tricker also exhibited a pretty collection of tea roses, also special displays in aquatic and semi-aquatic flora.

Mr. George V. Nash delivered a most interesting illustrated lecture on "Evergreens and Their Uses in the Landscape" in the lecture hall before an appreciative audience.

FLORISTS' CLUB OF WASHINGTON.

The florists of Washington last week were called upon to perform a

very sad duty, that of escorting the body of their friend, Joseph R. Freeman, to his last resting place. At a special meeting of the club, called on the 23d, the following resolution was adopted:

Whereas, death has robbed the Florists' Club of one of its charter members who has for years been an active and loyal supporter of our body—a man of integrity, a citizen of standing and probity, one of the former presidents of the organization and a friend ever ready in time of need; therefore, be it

Resolved, by the Florists' Club of Washington, D. C., in special session assembled, that we mourn the loss of Joseph R. Freeman and tender to his bereaved family our sincere sympathy in their days of affliction, be it further

Resolved, That these resolutions be inscribed upon our minutes, a copy furnished the family of our late member, and that our organization attend the funeral services in a body.

Perhaps no florist in this part of the country was as popular and well liked as was Mr. Freeman. Every florist of this city who was in town and many florists who are located outside of the city attended the funeral and each one of them felt that they had indeed lost a dear friend. The S. A. F. & O. H. was represented by Mr. Wm. F. Gude its National representative.

CONNECTICUT HORTICULTURAL
SOCIETY.

At the meeting of this Society on the evening of August 25, the coming dahlia show was discussed and preparations pushed along.

President John F. Huss spoke entertainingly of his trip through the West, after attendance at the annual convention of the American Society of Park Superintendents. Mr. Huss was away sixteen days. His description of Minneapolis and other cities declared them beautiful. Minneapolis, one of the greatest cities in the West, now has green lawns, possesses three very attractive lakes, and a fine residential section. Thousands of boats bearing illumination by night present a fairyland which Mr. Huss likened to Lake Lucerne in Switzerland. Mr. Huss went to Omaha from Minneapolis, and from Omaha to Kansas City, which has a park 100 miles square. Then he saw Denver and the Garden of the Gods, and Pike's Peak. So beautiful was the verdure that he was impelled to remove his hat. Mines, irrigation and broad corn fields entered into his description.

Geo. W. Smith and J. A. Webber were appointed to draw up and present resolutions on the death of Wm. B. May, a life member of the Society.

CHICAGO CLUB'S SILVER ANNI-
VERSARY.

The Chicago Florists' Club will soon be twenty-five years old, having been organized Nov. 3, 1886, soon after it was decided to have the third S. A. F. convention held there. This will make the meeting of the S. A. F. here next year also a 25th anniversary. No steps have been taken yet by the Chicago Florists' Club to celebrate its silver anniversary, but it has planned for a chrysanthemum show at its regular meeting in November and no doubt something appropriate to the day will be added.

CHRYSANTHEMUM SOCIETY OF
AMERICA.

The following special prizes are offered for the Annual Exhibition of the Chrysanthemum Society of America to be held in conjunction with the St. Louis Horticultural Society St. Louis, Mo., November, 7, 8, 9, 10, 11, 1911.

Chrysanthemum Society of America Prize—Best 10 chrysanthemum blooms of any one variety, silver cup.

Jerome Jones Prize—10 blooms chrysanthemum "Mrs. Jerome Jones," first, \$15; second, \$10.

Elmer D. Smith Prize—12 blooms chrysanthemums in 12 varieties, introductions of 1910 and 1911, shown in separate vases, not less than 12-inch stem, first, \$15; second, \$10.

William Wells Prize—3 blooms chrysanthemum Mrs. G. C. Kelly, first, gold medal; second, silver medal; third bronze medal.

William Wells Single Chrysanthemum Prize—6 sprays of single chrysanthemum Miss Hilda Wells, first, gold medal; second, silver medal; third, bronze medal.

Chas. H. Totty Prize—6 blooms chrysanthemum F. E. Nash, first, \$15; second, \$10.

Henry A. Dreer Prize—6 blooms yellow seedling chrysanthemums of American origin, \$10.

Philip J. Foley Prize—6 blooms white seedling chrysanthemums of American origin, \$10.

J. C. Vaughan Prize—10 blooms pink chrysanthemums of American origin, silver cup.

Peter Henderson Prize—6 blooms crimson or bronze seedling chrysanthemums of American origin, \$10.

Lord & Burdham Prize—10 blooms any color chrysanthemums never before exhibited in this country, gold medal or cash \$20. Open to all American or imported varieties.

E. G. Hill Prize No. 1—10 blooms chrysanthemum, Emberta, \$10.

E. G. Hill Prize No. 2—10 blooms chrysanthemum, Wells Late Pink, \$10.

E. G. Hill Prize No. 3—10 blooms chrysanthemum, Golden Gem, \$10.

Fitchings Prize—30 blooms chrysanthemums, 6 varieties, 5 blooms each, not less than 18 inch stem, silver cup.

WISCONSIN STATE HORTICULTURAL
SOCIETY.

The summer meeting of the Wisconsin State Horticultural Society, held at Oshkosh on Wednesday and Thursday, was attended by about 100 members and visitors. William Toole of Baraboo read a paper on "Amateur Floral Decorations," and Marcia Howlett of Oshkosh one on "Flowers for the Farmer." H. Hampson and A. Martini, professional gardeners from Lake Geneva, read papers on "Lilies" and "Roses." C. L. Richardson of Stanley gave a review of how state laws affect members of the society. The work done by the University of Wisconsin in the line of horticulture was outlined by Profs. Moore, Sanders and Jones.

Dr. Victor Kutchin of Green Lake talked on "Conservation of Bird Life," and Sydney Telis of Chicago spoke on "Play and Playgrounds."

There was a large and creditable exhibition of fruit, vegetables and flowers. J. P. Roe of Oshkosh took the largest number of first premiums on fruits and flowers. There was a tie between Mr. Roe and Robert Mehlman. Mrs. D. D. Howlett stood next in number of first premiums. In vegetables, N. A. Rasmusen of Oshkosh took by far the greatest number of first premiums, next to him being C. P. Phillipson, also of Oshkosh.

F. R. PIERSON CO.'S TABLE OF NEPHROLEPIS BOSTONIENSIS VARIETIES AT BALTIMORE.

CLUB AND SOCIETY NOTES.

The Newport Horticultural Society will hold its annual fall show Sept. 16-18 at Newport, R. I.

The annual show of the New England Dahlia Society will be given Sept. 15-17 at Horticultural Hall, Boston.

The dahlia show of the New Haven County Horticultural Society is scheduled for Sept. 13, at New Haven, Conn.

The September meeting of the Albany Florists' Club will take place at the residence of Patrick Hyde, 480 Hudson Avenue, on Sept. 7th.

The New York Florists' Club will hold its opening meeting of the season on Monday evening, Sept. 11th. Baltimore experiences will no doubt make the session interesting.

Boston has been selected by two associations as their meeting place for next year, namely, the American Association of Nurserymen, who will meet in Boston in June, and the American Association of Park Superintendents, who meet in August.

The Apple Growers' Convention met in St. Louis last week at the Planters' Hotel. The meeting was well attended. L. A. Goodman, secretary of the Missouri Horticultural Society and Richard Dalton, president of the Mis-

souri State Board of Horticulture addressed the meeting. All the old officers were reelected. J. W. Stanton of Richview, Ill., and J. C. Wilson of Columbia, Mo., are president and secretary of the Congress.

The premium list and rules governing the exhibit of farm crops of the Boston Chamber of Commerce Industrial and Educational Exposition, to be held at Horticultural Hall, Boston, on Oct. 2 to 28, 1911, has been issued, and copies can be had on application to Chas. M. Cox or Harry F. Hall, subcommittee on agricultural exhibits, Chamber of Commerce, Boston, Mass.

With regard to the entire exhibit, special attention will be given to its educational possibilities. To accomplish this the co-operation of the various agricultural colleges and experiment stations has been invited, and there will be exhibits, for example, of the various plant diseases and insect enemies, the most approved methods of pruning, trimming trees, spraying, etc. There will be a series of free lectures or talks on various farming topics by men of eminence whose names will be announced later.

THE BALTIMORE SOUVENIR.

Philip B. Welsh, secretary of the Gardeners' and Florists' Club of Baltimore announces that any member of the S. A. F. and O. H. who has not received a copy of the Baltimore Souvenir Program may obtain one by writing to him. His address is Glenn Morris, Balto Co., Md.

A VISIT TO CEDAR ACRES.

On Saturday, August 26, members of the Gardeners' and Florists' Club of Boston and of the North Shore Horticultural Society to the number of fifty visited the gladiolus fields of B. Hammond Tracy at Cedar Acres, Mass. They found the fields and a display of cut blooms in excellent condition. There were many promising seedlings that came in for admiration and as for such named varieties as Daybreak, luminous salmon pink; Sanguine, vermilion scarlet; Niagara, creamy yellow; Elizabeth Kurtz, white flushed with pink; Dawn, glowing salmon pink; Mrs. Francis King, vermilion; Princess Sanderson, white; Harvard, crimson, and a host of other beauties, it is doubtful if they have ever been seen to better advantage, soil and culture seeming to be ideal.

After going over the fields and through the packing rooms, where all varieties were staged under name, a buffet lunch was served and some appreciative speeches made, after which some of the flowers were distributed to the visitors and a return home made by special car.

SEE!!

There are some good offers this week in the "Buyers' Directory" section of this paper. Field grown carnations, decorative plants, ferns, etc., are offered by firms of high standing and you should not overlook this seasonable opportunity to stock up with profit yielding material.

During Recess

Tuxedo Horticultural Society.

This Society held their outing and clambake at Hillburn, N. Y., on Wednesday, August 23rd. The ideal weather brought out a large number of gardeners and friends, who were conveyed in stages, the distance being about ten miles.

After some refreshment the boys' and girls' races, single and married ladies' race, single ladies' three-legged race, married and single men's races, high jump, broad jump, and 100-yard dash were well contested, furnishing plenty of fun for the spectators.

The clambake was then served under the shade of the trees. A great reception was given to Karl D. Schaefer, the first president of the Society, who just arrived and was received by President D. S. Miller and other officers of the Society. After the group had been photographed the second part of the program was started. A football match between the married and single men with Charles McTaggart of Marshall & Co., and J. Muller of Julius Roehrs as umpires, was won by the single men. In the fat men's race, the first heat was a tie between

Tuxedo Horticultural Society and Their Friends.

men, was postponed for a future day, but a little bout between picked nines was indulged in and it was amateur ball to the mark.

Other events and winners were as follows:

100 yard dash—Sangster, Walter, Reichert.
Men's race, over forty—Allard, Streit, McCarthy.

Boys' race—Hegel, Goser, Mortz, Zimmerman.

Ladies' race—Mrs. Buechie, Miss Gearing, Mrs. Pittman.

High jump—Tobin, L. Neubeck, Jr.
Putting shot—Kreamer, Galley, Streit.

3-legged race—Tobin and Walter, Zimmerman and Kepp.

was held Thursday afternoon, August 17, at Karatsonyi's Hotel, Glenwood, N. Y., and was attended by about a hundred members and their families. The afternoon was devoted to sports. At six o'clock P. M., the company adjourned to the hotel for dinner. During the dinner the Burnett boys gave some selections on the piano and violin. After dinner the prizes were awarded to the winners. In addition to the prizes given by the Society \$10.00 was donated by Mr. Yale of the Alphano Humus Co.

List of Winners.

100 yard race, men over 40—1st, A. McKenzie; 2nd, J. W. Everett.

100 yard race, men under 40—1st, G. Edmondson; 2nd, L. Westlake.

3-legged race—1st, H. Box and H. Jones; 2nd, J. McDonald and J. Davis.

100 yard race, boys over 10—1st, L. McKenzie; 2nd, R. Burnett.

50 yard race, boys under 10—1st, G. Trepress; 2nd, A. Johnstone; 3rd, W. Adams.

High jump—1st, G. Finlayson; 2nd, G. Edmondson.

Broad jump—1st, J. F. Johnstone; 2nd, J. Andrews.

Hop, skip and jump—1st, J. F. Johnstone; 2nd, D. McKenzie.

Shot put—1st, A. McKenzie; 2nd, J. McDonald.

200 yard race—1st, G. Edmondson; 2nd, E. Westlake; 3rd, F. Finlayson.

Tug of war, married vs. single—Married men won.

Bowling match, men—1st, G. Ashworth; 2nd, S. J. Trepress.

Fat men's race—1st, W. Adams; 2nd, S. J. Trepress.

50 yard race, ladies over 40—1st, Mrs. J. Elmslie.

50 yard race, ladies under 40—1st, Mrs. S. Trepress; 2nd, Mrs. Price.

50 yard race, girls over 14—1st, M. McKenzie; 2nd, R. Trepress.

50 yard race, girls under 14—1st, E. McKenzie; 2nd, E. Everett; 3rd, E. McGovern.

50 yard race, married ladies—1st, Mrs. Elmslie; 2nd, Mrs. McDonald; 3rd, Mrs. Edmondson.

Ball throwing, ladies—1st, Mrs. Price; 2nd, Miss R. Trepress.

Bowling contest, ladies—1st, Mrs. Price.

Bowling contest, boys—1st, L. McKenzie.

Little children's race—1st, Mary Elmslie; 2nd, Willie Adams; 3rd, Rose Adams; 4th, Vera Ashworth.

Rooster chase—Bird caught and won by Mrs. McQueen.

Children's Race—Tuxedo Horticultural Society.

James McMachen and D. S. Miller, but in the second Miller succeeded in getting in first, Charles McTaggart being third. Several races for children followed, all receiving prizes. The tug-of-war was a great feature in which the married men simply walked away with the single fellows. The result of this victory encouraged the married women to challenge the single women and following their husband's example pulled the young ladies all over the field. This was the Society's first clambake and it was a great success.

A. FISCHER, Secretary.

Buffalo Florists' Club Outing.

The annual outing and picnic was held at Erie Beach on Thursday last and as a "Basket Picnic" it proved a success. In former years it has been the custom to hold a banquet or dinner at the end of the day but as there has been frequent protests on this form from year to year, the committee had decided a change as a tryout. It was a success considering the very inclement weather, a drizzling rain beginning early in the day and ceasing at 3.30 in ample time to run off the events on the long programme. A picnic is never complete without the children and it was partly Children's day.

The ball game, Growers vs. Store-

Ladies' hobble—Miss Christie, Mrs. Buechie, Mrs. Nosack.
Tug of war—Growers won.
Children's flag race—The four Rosen-granz girls.

Relay race—Sangster, Walter, Tobin.

Refreshments were served in the Stadium and President McClure was on a constant outlook for the comfort of the fair sex. The programme ended with dancing in the Grand Casino ball room. The committee is to be congratulated for having made this outing a success.

E. C. B.

Nassau County Horticultural Society.

The Annual outing of this society

Married Ladies' Race—Tuxedo Horticultural Society.

THE PRIVATE GARDENER.

A paper read by Wm. Duckham before the S. A. F. and O. H. at Baltimore.

I was much surprised and pleased to receive from your secretary an invitation to read a paper on the subject of the "Gardener." I am also glad to note that your society has honored my profession—the first time, I believe, in the history of your organization that it has been directly and distinctly recognized. This may partly account for the lack of interest of the gardener in your society and his failure to become a member in large numbers. Not to my knowledge has there been a general appeal to the gardeners to join the S. A. F. & O. H.

For some reason or other only a few gardeners hold membership in the S. A. F. & O. H., although the idea prevailing in the minds of some, that they are not wanted, is erroneous. Fundamentally our Society is a trade organization, and the mere addition of "Ornamental Horticulturists" to the Society's title has added very little and few members.

The national flower shows held in the past have been well supported by the gardener and these exhibits have been much appreciated by your Society. These exhibitions should be well supported by every one in the allied trades and professions in which we are so much interested and I trust that many such exhibitions will be held in the future.

The relation between the private gardener and the florist is of the very nearest, and easily traced, for you have only to look in any direction and you will find some of the most successful florists of this country who have graduated from the ranks of the private gardener. It is not my intention to enumerate or name all of them any more than it is to omit any names, but a few come to my mind who started their career as private gardeners and such training as they then received is admitted by them to have always been a help to them in their business.

Their names as they come to me at this time are J. N. May, E. G. Hill, J. K. M. L. Farquhar, Thomas Roland, Peter Fisher, F. L. Atkins, A. T. Bodington, C. H. Totty, and unless I am mistaken the late Peter Henderson started his career as a private gardener and perhaps gave more and better advice to young men than any one else, and many today, whether florist or gardener, owe to him a large measure of their success and all over this broad land his influence is still felt.

The private gardener has done his part in the development and advancement of this country, both by his work directly and indirectly, for any estate he has charge over his work comes directly to his employer and the majority of them take a keen delight in having his place well kept, growing and producing flowers, vegetables and fruits, and to have all this a little better than his neighbor. Then again where there are such places of this

NEW HARDY VINES.

The accompanying illustration shows a collection of Chinese ornamental vines in pots, grown at Aldenham House, England, by E. Beckett, gar-

dener to Hon. Vicary Gibbs, from seeds collected by E. H. Wilson on the Arnold Arboretum's first expedition to China, and presented by Professor C. S. Sargent.

kind the community in general and the trade benefits by it. I have never yet heard anyone say that he did not love the flowers, no matter how much he might dislike some other things, and while those who cannot have a large garden, do try, and do have, and imitate those of larger proportions, therefore I claim the work of the gardener has a most refining and broadening influence in every locality, and has done much towards making this a better land, and a better world.

As much as the private gardener has done for horticulture there remains much he could do and I refer to the most interesting branch of hybridizing. Some has been done I admit, but in my opinion he has neglected his opportunities. The cause of all this I am unable to explain, but it occurs to me the most of it can be laid to lack of interest or indifference, for surely a number of gardeners have the time and convenience, for it cannot be said he doesn't know how. There might have been some excuse for this twenty or thirty years ago, but conditions then and now are very much changed. I don't mean by this that gardeners are any better today, but there are very many more large estates where opportunity presents itself that were not in evidence at that time, and I urge the gardeners to give this more consideration and do your part towards the advancement of horticulture.

One has not to look far to see what can be done. For example, the roses raised by M. H. Walsh in the past few years have startled the world. I am unable to say how much time and thought Mr. Walsh devoted to this work, but if he spent his whole life he would feel well repaid in giving the world varieties of roses that otherwise might never have been born, and all honor to the man who raised *Excelsa*, *Delight*, *Lady Gay* and *Hiawatha*, etc., and who at this time I believe to be in the ranks of the private gardener. Then let us take courage and set our

minds to doing something that will be a joy and pleasure to others as well as to ourselves.

Novelties or something new always attract the gardener and you will find him among the first to try or test these, no matter whether flower, vegetable or plant, he is ever eager to secure them and when one stops to consider, it seems inexplicable, the lack of interest or utter indifference, that it appears almost criminal, then let us create or at least try and improve some flower or plant over what we found it.

Since the gardener has become better known and more generally appreciated by his employer a mutual feeling has sprung up between the two. This is true in a great many ways and is as it should be, and comes as the first aid to our social and moral status. In our profession, let the man who has the opportunity, show by precept and example to the less informed, and particularly to the young man under his charge, that moral influence so necessary for the upbuilding of our honored calling. For they are the men who will be called upon to carry on the work where we are compelled to lay it down. Whether he be florist or gardener let us beware that we grasp more of our opportunities and take our stand where we rightfully belong.

The need of the tin 's seems to be a scheme or scope of operation in which all interests should unite for horticultural advancement. A national society such as we have, urged to the extent of founding and maintaining a garden after the manner of the Royal Horticultural Society of England, at Wisley, and previously at Chiswick, gardens that for over fifty years have done excellent work such as we need to have in this country.

Instead of pleading with the state legislatures for appropriations and greenhouses at state experiment stations, could not more and better work of this kind be done in a garden be-

longing to our Society with a staff of practical men, and consider what a training school for young men such a garden would be and the beneficial results that would follow as efficient well trained men became available for positions in private or commercial places. Our ranks are being constantly recruited by importations from Europe, because of the degree of efficiency these recruits possess. We lack the facilities to give our young men practical training in a manner that appeals to them with the assurance of an endorsement upon proved competency; this would also be a substantial aid to material advancement.

The working staff of the Royal Horticultural Society's garden is largely composed of students who, for a small remuneration, work and study with facilities not to be had in the ordinary private and commercial place. Perhaps the best testimony of the efficiency of the Royal Horticultural Society's work along these lines is that it has been continuous for over fifty years, that the trials of fruits, vegetables and flowers conducted therein have been most beneficial to horticulture and a large number of the R. H. S. men hold positions of prominence in all parts of the world and one of them is a director of the S. A. F. at this time and another prominently mentioned for your presidency.

This it seems to me at some future time could be started in some good and practical way by the members of this splendid organization and men would be willing to finance such a project, and there are plenty of them in the S. A. F., and it would greatly help the florist and gardener in the ever increasing and perplexing question of securing efficient help.

Some may say while there are plenty of men coming from the other side what is the use of all this, but it must be remembered that a good deal of chaff gets in with the wheat.

I have failed to know the reason so few gardeners are members of the S. A. F., whether because each locality has its own local society that they think by being a member it is all that is necessary and feel content with local conditions, but its effects are soon evident and instead of broadening his usefulness, narrows it and soon becomes dormant. If it were possible for all the societies to amalgamate with the S. A. F., and I see no reason for not doing so, then I believe our local societies would also be incorporated with the above and then perhaps the gardeners would become a part of the S. A. F., as in my opinion they should be.

Several attempts have already been made, I believe, to form a gardeners' society and one has been organized, but with what degree of success I do not know, any more than I believe the time to be opportune for such a consolidation of florists and gardeners for the mutual and best interests of all, and one that would make of our S. A. F. such a national organization that would easily become the greatest of its kind in the world.

In conclusion I might say that I shall do all in my power to advance the interests of your society, and will also endeavor to interest as many of my profession as possible and explain to them the broadness and scope of your organization and the good work it is carrying on.

Obituary

Mrs. Jane Buxton.

Mrs. Jane Buxton, widow of R. A. Buxton, who carried on the Riverside Greenhouses at Bridgeton, R. I., died suddenly on Aug. 16, aged 69 years.

Archibald Smith.

Mr. Archibald Smith, seed merchant, Oxford, who suffered for some years from heart trouble, has passed away at the age of 51 years. He was a native of Stranraer, Scotland, and received his early training in his father's nurseries and seed business there. He filled several important positions in the seed trade in the United States, prior to taking over the Oxford business.—From the British Horticultural Trades Journal, Aug. 16.

Mr. Smith will be best remembered on this side of the water from his long connection with the firm of Joseph Breck & Sons of Boston, where he was for many years manager of their seed department.

Joseph Schmidt.

Joseph Schmidt, one of Harrisburg's veteran florists, died on August 23. His death was due to old age, although he had been ill for some time.

Mr. Schmidt was born at Heidick, Germany, April 12, 1827. He came to this country in 1860, and lived in Philadelphia for five years, after which he came to Harrisburg, Pa., where after working for some years for other people, he went into business for himself. He retired from active business in 1901, when he turned over all his interests to his son Charles. Mr. Schmidt was widely known throughout the state and for twelve years served as superintendent of the floral department of the State Agricultural Society. Mr. Schmidt is survived by his wife, two sons and a daughter, and several grandchildren.

A CARD OF THANKS.

Mrs. John Birnie and family wish to extend their heartfelt thanks to all their friends; to the members of the New York Florists' Club; members of the Baltimore Gardeners' and Florists' Club; members of the Florists' Club of Washington, and the Society of American Florists and Ornamental Horticulturists for their kind words of sympathy, and also for their beautiful floral offerings upon the death of the beloved husband and father, in their sad bereavement.

Mrs. JOHN BIRNIE AND FAMILY.

NEWS NOTES.

Waltham, Mass.—Neil Bros., of Dorchester, have leased the greenhouses of R. E. Lassman.

Manchester, N. C.—J. Van Lindley Nursery Co. have purchased an additional tract of five or six hundred acres of land for development as an apple nursery.

Waltham, Mass.—Edward P. Smith has sold the Kidder greenhouses on Worcester lane to Harvey Whittemore, son of Henry Whittemore, former superintendent of schools in this city. It is understood that Mr. Whittemore is to improve the property and engage extensively in the florist business.

PHILADELPHIA NOTES.

The Pennock-Meehan Co. announce that they will close at noon, Labor Day, Sept. 4th.

Charles Henry Fox is now located in his new store, Broad below Walnut, and unique and clever ideas are in progress of development. In the chaos of painters and paper hangers it would be unfair to describe the embryos at present. We can tell better about them when completed.

Pennock Bros. have completed an enlargement of their office facilities which is not only an elegant addition to their store but will also allow a much needed expansion for the long legs of the head of the firm, A. B. Cartledge, and room for "enlargensis of the coco" of his modest bookkeeper and cashier, Ben Starkey.

H. H. Battles and the Century Flower Shop, considered among the leaders of the retail flower dealers of the country, have an attractive feature at present in the shape of an oval hanging basket filled with ferns and other foliage plants, several of which are suspended on the store front as a decorative feature. We are told that these have had a very good run. M. Rice & Co. offer these baskets and Mr. Eschner says they have taken so well that they have just opened up their third shipment for the season.

August 11, 1911.

M. Rice & Co., Philadelphia, Pa.

Gentlemen:—Kindly send us your Katalog of Florists' Supplies and Ribbons, including Pot Covers, Baskets, etc., as we wish to keep "up-to-date" and have come to the conclusion that we can ONLY do so through you.

Yours respectfully,

This comes from a prominent house in the far west. Isn't it nice to get "patuonthebackos" like that! Of course HORTICULTURE helped to secure it.

The feature at the club meeting, Tuesday, September 4th, will be a resume of the recent convention. The speakers have been selected by J. Otto Thilow, chairman of the committee and a very interesting symposium will no doubt result. Volunteers who may wish to interject their personal opinions will be respectfully recognized by the president. At least we hope so. But of course there is a limit—and such bowling experts as your scribe (with a grievance) will be barred. Take notice that he has been officially declared no newspaper man and barred accordingly from the bowling competition. James Ivera Donlan and J. Austin Shaw were apparently the only "newspaper men" in the United States according to the Baltimore standard. What does friend Dela Mare think of that?

Visitors: Mr. and Mrs. J. S. Simmers and children, Toronto, Ont.; J. N. King, Norristown, Pa.; Kent Bros., Newark, O.; Mrs. Dondore and Lou Dondore, Lancaster, Pa.; J. S. Stuesser, Louisville, Ky.; W. W. Randall, Chicago, Ill.

Boddington's Quality Christmas and Winter-Flowering Sweet Peas

ALL true stocks of Winter-Flowering Sweet Peas will be scarce this season. Some varieties are a total failure, owing to the exceptional season in California this Spring. We can make immediate delivery of the varieties marked with a star (*), the balance we are expecting from our grower in California at any time. Our advice to intending planters is to order early.

Our stocks of Christmas-Flowering Sweet Peas have stood the test for years, and we can refer you to the largest growers of this increasingly popular flower, as to the trueness and quality of our seed, earliness of blooming period, and strength and habit of plants.

The following varieties are the "best by test" and include Zvolanek's and our own introductions, grown for seed from selected stocks by the leading California Growers and Specialists of Sweet Peas. Our output last year was nearly 6000 lbs. No kicks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S QUALITY WINTER-FLOWERING SWEET PEAS

At the Exhibition and Convention of the National Sweet Pea Society of America, July 12th and 13th, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only

***BODDINGTON'S EXTRA EARLY CHRISTMAS WHITE SNOWBIRD.** An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz., 30 cts.; ¼ lb., 85 cts.; ½ lb., \$1.50; 1 lb., \$2.50.

***BODDINGTON'S CHRISTMAS PINK.** This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August flowers can be out from Thanksgiving on during the Winter months. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***BODDINGTON'S CHRISTMAS WHITE.** A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; 1 lb., \$1.50.

***BODDINGTON'S CANARY.** Similar to the above, but flowers of an exceptionally good yellow. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; 1 lb., \$3.00.

***BODDINGTON'S FLAMINGO.** Color scarlet; free-flowering and early. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

Christmas Meteor. Scarlet; fine open red flower. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

Christmas Captain. Blue and purple. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Florence Denzer.** Pure white. Oz., 15 cts.; ¼ lb., 50 cts.; ½ lb., 85 cts.; 1 lb., \$1.50.

Le Marquis. This is the same color as Princess of Wales, violet; has very large flowers. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Miss Helen M. Gould.** White, open flower; standard lilac, marbled. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Miss Josey Reilly.** Lilac; very large flowers. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Mrs. E. Wild.** Carmine or dark pink. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Mrs. George Lewis.** Large, pure white wavy flower. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

Mrs. W. W. Smalley. Satiny pink. Oz., 35 cts.; ¼ lb., \$1.00; ½ lb., \$1.75; 1 lb., \$3.00.

Mrs. F. J. Delansky. Daybreak pink. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Mrs. Chas. H. Totty.** Sky-blue; late. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

Mrs. Zvolanek. Blue, variegated; good for variety. Oz., 50 cts.; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

***Watchung.** Pure white. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

***Wm. J. Stewart.** Blue self. Oz., 25 cts.; ¼ lb., 75 cts.; ½ lb., \$1.25; 1 lb., \$2.00.

All other varieties of Winter and Summer-flowering Sweet Peas supplied. Write for quotations.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK

PERSONAL.

Martin E. Tuohy, florist, of South Boston, is spending his vacation at Oak Bluffs, Mass.

A. Leuthy, of Roslindale, Mass., returned last Monday from Europe on the French Line steamship.

Julius Heurlein of Blue Hill Nurseries, Quincy, Mass., returned from Europe on the Mauretania, August 19.

Mr. and Mrs. A. N. Kinsman, of Austin, Texas, have returned from a month's motor tour through the west, having traveled over 3,000 miles.

A. C. Canferd of Springfield, Ill., visited the St. Louis wholesale houses one day last week and was a guest of Mr. DeWeber who showed his fine place in the county.

H. Leroy Sawyer, who for the past six years has been in Jacksonville, Fla., will return to Clinton, Mass., this fall and be associated with his father, Frank P. Sawyer, in the florist business. Mr. Sawyer is recovering from a serious illness of typhoid fever.

F. W. Bruning, H. Berning, F. Gorry, J. Cannon and C. Beyer with their ladies have returned home from the Convention much pleased with their trip. The St. Louis delegation was small but we expect to make up next year and send a large delegation to Chicago.

E. H. Wilson and wife and daughter arrived at Boston on August 25, having come from England on the Minnewaska of the Atlantic Transport Line to N. Y. They had been

booked for Boston direct by the White Star Zeeland but her sailing was cancelled on account of the strike in Liverpool.

President-Elect Robert J. Windler of the St. Louis Florist Club and well-known local retailer, will be married on September 6th at Chicago to Miss Amy Zender, daughter of Adam Zender, one of the well-known florists of that city. His brother Frank, of the Druth force, will accompany him on his trip. A reception will be tendered the happy couple on their return to St.

Louis where they will make their home.

New York visitors:—W. R. Thornhill, gardener to Aug. Hemenway, Readville, Mass.; J. G. Dugaid, gardener to H. S. Hunnewell, Wellesley, Mass.

Visitors in Boston—J. Ivera Donlan and M. B. Faxon, New York City; U. G. Scollay, Brooklyn, N. Y. Thomas Griffin, of the Harry Payne Whitney Estate, Westbury, N. Y., and brother, Julius Dilloff, representing Schloss Bros., New York.

BANNING'S NEW GLADIOLUS NIAGARA.

The Edgebrook Greenhouses and Nurseries of THE GEO. WITTBOLD CO. Fine Ferns, Palms, and Nursery Stock

We solicit the shipping trade and have a full stock especially adapted to the needs of **FLORISTS and NURSERYMEN**
EDGEBROOK, CHICAGO, ILL., on Chicago, Milwaukee and St. Paul Railway

Asparagus Plumosus, Boston Ferns, Dracaena Fragrans, English Ivy, Ferns, Jerusalem Cherries, Kentias, Latania Berbonica, Phoenix Reclinata, Solanum Aculeatissimum.

For sizes and prices see advertisement in Buyers' Directory Section, this issue, under **Decorative Plants.**

We now have **80 acres of Nurseries and 70,000 square feet of glass at Edgebrook** which is well stocked with a full line of seasonable plants.

PARK GARDENING.

Read before the Florists' Club of Philadelphia, August 1st, by Xavier E. E. Schmitt.

(Continued from page 309)

It has been our aim to have as much variety as possible and we find that oftentimes a small group gives a great deal of pleasure to the public, if of things that are not met with in the ordinary lines of the trade. Orchids come in for a lot of inquiry as most people have in mind only cattleyas and a few cypripediums as orchids and it is a revelation when they see some small-flowered or curious orchid in bloom.

The planting commences with pansies and daisies and a few other spring flowering plants about April 10th which is about the earliest with us that planting can be done, followed by geraniums in the middle of May, and by the beginning of June all kinds can be planted. Then in the fall we plant the tulips just as fast as we can so that they can make some roots before the ground freezes over. We plant May-flowering tulips in groups among shrubbery, also in colors in beds along with singles, making a succession which is very pleasing and prolongs the season. They are useful where they are succeeded by foliage beds. In fact I always advocate the planting of bulbs of all kinds as such handsome effects can be obtained for such a small outlay.

For a number of years we have been paying attention to cacti and other succulents, (of which we have about 500 species and hybrids) and keep a large set of beds for them with a designed ground cover devoted to these during the summer and fall. It is remarkable to note the number of visitors who come to inspect these. They are odd, grotesque and most decidedly peculiar as plants, all visitors will spend some time admiring them.

We also give some attention to aquatic plants among which the following stand out preeminently—Nymphaea, hardy and tender ones combined; the stately Nelumbiums, the two Victorias and many other minor aquatic plants are used. Centennial Lake is one of the handsomest in the park, where can be seen *N. odorata* by

the thousands the surface of the water fairly covered with floating stars.

One class of plants which I will touch on before closing is the Rambling Roses, which are used over unsightly cliffs and embankments where undesirable trespassing in the latter as well as beautifying in both can be obtained. It would be a grand sight to come across what had previously been an unsightly wall of rocks to find them transformed with draping of beautiful green followed by a sheet of blooms later on and in the fall covered by brilliant clusters of fruit which will last nearly all winter. Among these I would mention Lady Gay, Dorothy Perkins, Gardenia, Evergreen Gem and in fact, all the Wichuraiana hybrids and many others.

I believe from an educational point of view the Public Park and its system has much to do in the education of

the people. Many schools in and around our city visit the park very frequently by entire classes accompanied by their teachers to study plant life from nature, also a great number come from afar to study it and to admire. They imbibe civic pride, and adopt as nearly as means will permit, better conditions surrounding their own homes,—the most frequent visitors are that class of people. On the other hand, opening the whole park to the public and allowing the freedom of every part of the grounds for public use (with us there are only a few places where people are not allowed on the grass) is the strongest health feature and one which the parks alone afford. Park gardening requires many-sided abilities, which when practiced by the up-to-date gardener gives to the visitors from other cities impressions deep and lasting.

LARGEST IRON FRAME CARNATION HOUSE ON LONG ISLAND, 55x400 FT.

Owned by A. Cockerott, Northport, L. I. The Big Kroeschell Boiler Exhibited at Baltimore Will Heat This House.

BRITISH HORTICULTURE.

Secret Commissions.

At one time the pernicious habit of seedsmen granting commissions to gardeners, according to the extent of the orders placed with them, was largely in vogue in this country. Even the firms opposed to this unsatisfactory method of business-getting were obliged to fall into line with their competitors. The passing of the Prevention of Corruption Act largely put a stop to this system, the Nurserymen's Trade Society using their influence to secure the carrying out of the stringent provisions of the measure. That the illicit form of trading still exists in a smaller degree is now proved by a letter which has lately been issued by Mr. R. M. Leonard, the Secretary of the Secret Commissions and Bribery Prevention League, who has been instructed by his committee to warn people against the practice of certain foreign firms who are in the habit of offering British gardeners a secret commission. "One catalogue, for which I have to thank an honest gardener," Mr. Leonard states "has the words written upon an inside page in pencil, '5 per cent. discount for head gardeners.' Another firm, which exports bulbs, has just written to a gardener asking for his private address. Illustrations of such practices might easily be multiplied, but the object of this letter is to put those who employ gardeners on their guard, as some of the offending firms have neither agents nor travelers in this country; and the Prevention of Corruption Act, which prevents British firms from giving secret commissions affords no remedy in such cases." It is to be hoped that this timely reminder will be effectual in checking this mischievous evasion of a necessary law.

Experiments in Tobacco Growing.

Some interesting experiments have been carried out at the South Eastern Agricultural College at Wye, Kent, with a view to testing the possibility of growing tobacco for insecticidal purposes. These trials demonstrated conclusively that tobacco can be grown to maturity in this country, and that with a suitable variety and a good soil a satisfactory crop can be obtained. Of the two species of tobacco commonly grown for smoking purposes 20 varieties were tested, the seed being obtained from the United States, the Transvaal, India, Italy, and Ireland. An ordinary garden frame consisting of three "lights" and resting on a hot-bed was found a suitable form of seed-bed. The season's results show that an average yield may be expected of from 1,600 to 2,000 pounds dry tobacco leaves, excluding the stalks. Allowing 4 per cent. of nicotine, this works out at 64 to 80 pounds nicotine per acre. The best method of extraction is still being investigated, but soaking the cut up leaves in water is quite effective in extracting the greater portion of the nicotine.

W. J. H. Adsett,

CATALOGUES RECEIVED.

A. Dessert, Chenonceaux, France.—Peony Novelties for 1911, Suzette and Marquis C. Lagergren.

W. E. Marshall & Co., New York City.—Bulb Catalogue for Autumn, 1911. Tells all about "Marshall's Matchless."

Ellwanger & Barry, Rochester, N. Y.—Peonies, Irises, Phloxes, Bulbs. A compact list of choice varieties of these specialties.

Stumpp & Walter Co., New York.—Bulbs for Autumn Planting, 1911. Covers in sepia, with attractive view of Cottage and Darwin Tulips.

Peter Henderson & Co., New York City—Autumn Catalogue for 1911. Real Dutch in cover illustrations and decidedly effective and pretty. Lavishly illustrated.

Harrison's Nurseries, Berlin, Md.—Trade List of Standard Trees, Plants and Shrubs. Unique and attractive in makeup, with orange and black border around the pages. As to the contents—"Harrison's" is well-known to the trade.

Wood Brothers, Fishkill, N. Y.—Trade List for 1911. Here is an excellent offer of roses—the popular forcing varieties—own-root and grafted stock, standard varieties of carnations, chrysanthemums, cannas, poinsettias and begonias. They send out good stock from that high table land in Dutchess County.

R. & J. Farquhar & Co., Boston, Mass.—Autumn Catalogue. A splendid bulb list, profusely illustrated on coated paper. The first cover page shows the "Dutch Garden" at the National Flower Show of 1911 in dark green tints. On the back is a handsome group of Darwin tulips, named varieties.

Arthur T. Boddington, New York City—Florists' Bulbs and Seeds for Forcing and Planting, Summer and Autumn, 1911. The "seal of quality" in gold is the principal cover adornment of this well-balanced and very comprehensive catalogue. Prices quoted per 100 and 1000 and the bulb growers will find them very interesting.

NEWS NOTES.

Atlanta, Ga.—The McMillan Seed Company has moved into new and larger quarters at 27 South Broad St. This firm began business in Atlanta in 1877 when the company was established by the father of J. C. McMillan, the present manager and has developed a large trade throughout the south.

It is reported that a move is on foot to organize the vegetable forcing greenhouse establishments in northeastern Ohio, with Youngstown as a selling centre, to control market prices on the product. The combination, if such does exist, has been carried on with great secrecy and many denials of the newspaper rumors are made.

In olden times every man carried a sword, which was necessary for purposes of honor and self-preservation. When a man wanted to show another his intentions were peaceable he extended his right hand, signifying he was at the mercy of the other by giving up his fighting arm. If the other reciprocated he, too, extended his fighting arm and they grasped hands as a token of mutual trust and friendship. Now there are various kinds of handshakes—some vigorous, denoting strength, much of the mediocre kind, as though it was more a duty than a voluntary salute; but the limit is the fish-hand—have you ever held one? Well, it feels like you were handling the entrails of a chicken—a sort of a slimy-where-are-you feeling, that leaves with you the impression that the poor fellow was weaned too soon—a sort of human pancake batter. Now, good, sound, solid lily bulbs are like a good, sound, solid handshake—not made in a biscuit mould, but by nature good stuff: but the other kind are just like the fish-hand. Shake hands with the Horseshoe Brand bulbs—it's worth your while to try them.

Seed Trade

The Bean Crop.

With the exception of beans and corn, seed crops are now practically made for this year, although it may be some weeks before accurate information as to the percentages of the various items which will be delivered on contracts can be given. Beans are almost matured but there are some late plantings which will require some ten days or two weeks more to fully reach maturity. Any beans remaining green after the 15th of September will be in "cold storage" and never will mature. We believe that barring a wet harvest there will be beans enough to meet all requirements and samples should be fine. It is possible that two or three of the more fancy varieties will be somewhat short, but taken as a whole there will be no famine in beans this year.

Corn, Peas and Root Crops.

We have heretofore, reported early varieties of sweet corn as being in poor condition, all indications pointing to a short crop. Of medium early and late varieties, there will probably be fair crops, especially, should frost hold off until past the middle of September. It cannot be denied that corn is late, and a severe frost within the next two weeks would probably cause very serious damage. With reference to garden beets, mangels, carrots and root crops in general, we can only repeat what we have previously said, that there will be a severe shortage in nearly all lines but cannot give any more definite information at this writing. We hope to be able to say something more next week. Under pressure from their customers, a few growers of peas have sent out estimates of what they expect to deliver on contracts, but such estimates are not very reliable and when final deliveries are made, they are likely to show a difference of from 10 to 20 per cent. either way and possibly even more.

About Contract Deliveries.

It is of course, excusable in buyers to want to learn as early as possible what will be delivered on their contracts. At the same time, they should realize that any estimate furnished at this date can be little more than a guess, and is based entirely on field estimates which vary as to results from ten to forty per cent. Should the growers' figures be too high and he finds he cannot deliver the percentages named in his preliminary estimates, the buyer is liable to feel that he has been misled or that the grower is not giving him a square deal. On the other hand, if he underestimates and delivers a larger percentage, it is sometimes unsatisfactory, as the buyer will say that he has covered his shortage based on the preliminary estimates. We believe it is the duty of growers to inform their customers of the general progress of crops in which they are interested but when it comes down to estimating percentages, it is quite another matter, and growers are fully justified in declining to give figures until they can do so with actual knowledge of what their crops are going to yield. This is an old story and one that is gone over every year and probably will be an annual incident in the business until buyers learn to re-

strain their impatience and give the growers time to learn something definite about their crops.

Crop Report From Holland.

The 1911 Crop Report from Sluis & Groot, Enkhuizen, Holland, gives the following information:

The winter was very mild so that all perennials could stand it well, but a continuous drought caused trouble and many remained weak. In spring we got a heavy frost which, although not so fatal as in other parts of Europe, has also done much harm. Radish, cress, mustard, turnips and cauliflower, which at first seemed to be totally lost, gradually recovered themselves, and those annuals that were wholly destroyed could be re-sown. After this we got very favorable weather which, with the nice rain in June, did much good to crops that were yet looking very poor, and restored them, so that generally speaking the stand, though not brilliant, may be called satisfactory.

Beans Dwarf.—Average stand, suffered much from drought, may recover.

Beans Running.—Stand under middling, partly threatened by disease and only a small crop expected.

Beans English.—Very much damaged by lice, and the yield will be under middling.

Beets.—Stand is general unsatisfactory.

Cabbage, White and Red.—Continual drought in spring kept the plants backward and some even perished. The further development was satisfactory. The crop in general will be under middling we think.

Savoy, Brussels Sprouts, Borecole.—In general a little better. We expect a good average crop.

Cauliflower.—Has suffered from frost, notwithstanding may give an average crop.

Celeriac.—Did not grow in spring. Shows many open places and promises but a small crop.

Chervil.—A considerable part of the plantations has been lost. The remainder produced a good crop.

Corn salad.—A large acreage was sown, but a good deal got lost on account of the great heat. Little more than half crop.

Cucumber.—There is a good stand until now, and may produce a good crop.

Garlic Bulbs.—Good.

Kohl Rabi.—Only a small area planted. Stand under average.

Mangel Wurtzel, Sugar Beets.—Few planted, which partly developed unsatisfactory and we expect therefore a small crop.

Onions.—But a small area planted. Stand satisfactory.

Parsley, Parsnip, Peas.—Stand satisfactory.

Radish Summer.—There is a good stand until now.

Radish Winter.—Partly satisfactory, mostly bad.

Spinach.—Promise a moderate crop. Scorsonera.—Produced a satisfactory crop.

Swedes, Turnips.—Both suffered much from frost in spring and are promising but a small average crop. Some turnips badly damaged by worms in the pods. Many plantations yield one fourth or less than average crop.

Flower seeds.—Although the weather for flower seeds in general was not equally good, the present standing of the crop gives anticipation for being in every respect satisfactory.

Notes.

Clarence Kennerly, formerly of Kansas City, Mo., has taken an interest in the Alexandra Seed Co. of Augusta, Ga.

H. W. Gordinier of Troy, has had some little difficulty in settling with the insurance companies on his recent loss by fire. We understand Mr. Gordinier and the insurance adjusters could not get together on the value of the salvage in seeds and as a consequence all seeds in the establishment, prior to the fire have been disposed of and he receives the full inventory value of the same.

The Mott Seed Co. have moved from Watervliet to Troy, N. Y., and are now within a block of the city market, in a very excellent location and should do a largely increased business. The aim of this concern is to furnish the highest possible grades of seeds regardless of cost and we believe there will be a sufficient number of buyers who will appreciate this fact to make their business a success.

The aster seed crop in Germany is in bad shape. From February on until middle of July there was almost no rain and the plants were simply dried up. The situation is especially unfortunate as last year the summer weather came too late and seriously affected germination so that there was no stock to carry over. Asters require a slow, cool, moist summer to give the qualities of substance and size in the flower and to produce seed that will give good results. In a warm climate the seed crop may be better as to quantity but the quality is not there.

CELERY PLANTS FOR THE SOUTH

In North Carolina, Virginia, Maryland and other states, celery plants can be put out now and be able to compete with the North for the high price celery will bring this winter. There is a demand now in these states. I have some small plants for \$2.50 per thousand. Also very large plants.

CHICAGO NOTES.

Florists' August Record.

The last of August was hailed with delight by the florists, who were anxious to have the dull season closed. The month seems to have been as much a surprise as July from the sales standpoint. Nearly all broke their previous records for heavy sales in July and naturally expected a good August but instead had one of the dulllest months in their experience. Those who are willing to admit that the basis of the florists' business rests upon the funeral work may see some connection between the show sales of August and the fact that an unusually small number of deaths occurred that month and that July business was caused by the great number of deaths following the excessive heat of June.

Activity at Wittbold's.

At the Geo. Wittbold place at Edgebrook the stir of early fall season is seen everywhere. Cases of *Livistonia rotundifolia* from the Hawaiian Islands and *latania* seed from the South are being unpacked and the French and Dutch bulbs are already in the earth. From the overflowing coal sheds to the drooping gladiolus beds were seen evidences of the close of the summer season which has been a very good one here.

The fourth crop of *rubrum* lilies is now ready for cutting and last week the first *chrysanthemums*, *Golden Glow* and *Smith's Advance*; the latter, a white which so far is not satisfactory—were sent to market. This company grows 12,000 *chrysanthemum* plants, early, medium and late, which will give continuous cut till the holidays.

Annual Luxemburg.

As is usual at this season several of the florists on the "Ridge" are preparing for the fruit and flower festival on Sept. 3 and 4 to be held at Karthausers Grove.

Trade Notes.

The Chicago Carnation Co. cut their first carnations of the season this week—flowers 2½ and 3 inches in diameter, a large bloom for late August.

Otto W. Frese says he is fully satisfied with the way the new business is opening up with the Chicago Flower Growers' Association. They opened at the dulllest month in the year but shipping trade has advanced steadily from the first.

The E. H. Hunt Co. is getting out the cuts for its labor saving device

known as the Fisher Plant Clip, for tying carnations and roses. This firm is always after anything that is really a help to the florist. Full description will appear next week.

Personal.

Lloyd Vaughan returned Sunday from three weeks in Michigan.

Henry Van Gelder left Sunday for a trip to Texas where he hopes to regain his health.

H. Hilmer of the Kenwood Floral Co., 1117 47th St., has been taking a trip east and further resting during the dull season at Cecil Lake, Wis.

Mr. and Mrs. L. Stopp of Rock Island, Ill., were here to attend the auto races in Elgin and were fortunate in not being on the grand stand which collapsed.

E. J. Reynolds and Joe Georgeault of San Francisco, Cal., who are visiting here will remain if they secure satisfactory positions. The former lived here some years ago.

Miss M. Wattman of Amling's has returned from an eastern trip covering Nova Scotia, the St. Lawrence River and New York. Miss Gunderberg who went with her will be home soon.

Peter Olsem, foreman for the Chicago Carnation Co., seems to have snatched all the honors of the Chicago Bowling Club at the convention. His friends all congratulate him on his ability to walk off with three handsome prizes, the \$75 diamond medal for highest man of each team, eight competing; the W. W. Barnard cup which he won last year at Rochester and now this year at Baltimore, making it his, and the F. C. Bauer cup for greatest number of spares.

Visitors.—Wm. A. Réed, with Currie Bros., Milwaukee, Wis.; Otto Benthey, New Castle, Ind.; C. M. Weaver, Paw Paw, Mich.; J. Georgeault and E. J. Reynolds, San Francisco, Cal.; M. Greshen of C. A. Dahl Co., Atlanta, Ga.; Mr. and Mrs. L. Stopp, Rock Island, Ill.; Arthur Newell, Kansas City, Mo.; Geo. A. Lambert & Bro., Xenia, O.; R. A. McPherson, Littlefield, Ill.

WASHINGTON NOTES.

S. Everett of Gude Bros., is spending his vacation at Niagara Fall and Corfu, N. Y.

Miss Carpenter, bookkeeper for the Washington Florists' Company, is spending her vacation at Betterton, Md.

Frederick Miller, for eighteen years a designer for Gude Bros., has entered the employ of Fred H. Kramer in a similar capacity.

Miss Ella Cunningham, with J. H. Small & Sons, is spending her vacation at Ocean Grove, Pa., and H. A. Kloepper also with this firm is at St. George's Island, Md.

The following members of the sales force of the Kramer stores are now on their vacations: Miss M. Atwell, manager of the Ninth street store; Mrs. Cauffman, Mrs. Watby, Thomas Young and Arthur Tudde.

John H. Small, Jr., has leased the stores at the corner of Fifteenth and H streets, N. W., in the new Woodward Building, not yet completed. This new location is in a very fashionable part of the city and the store will be well in keeping with its surroundings.

The Pennock-Meehan Co., it is reported will soon open a new store at

1216 H Street, N. W. W. E. McKisick looks after the Washington end. It is said that in the new location the firm will have improved facilities which will greatly aid them in taking care of their many customers.

Many of the local florists are making extensive preparations for increased business, especially during the coming fall season. O. W. D'Alcorn of Congress Heights, has made numerous improvements to his greenhouses; Fred H. Kramer has completed two houses, 35x100 feet each, in Anacostia, for palms and ferns. The Gude Bros., "American Rose Company" plant in Mt. Olivet is now sending forth its share of goods.

Kallipolis Grotto, Mystic Order of the Veiled Prophets, are planning extensive entertainment for visiting members of the same order on September 26. With this in view large working committees have been appointed of which many florists are members: Fred H. Kramer is chairman of the Ladies' Committee, Mr. W. F. Gude is a member of the finance committee, Adolphus Gude, Wallace W. Kimmell, George H. Cooke, George H. Shaffer and O. A. C. Oehmler, decorations.

J. H. Small of this city, assisted by Mr. Dalgleish, handled the decorations in connection with the dinner given by Mr. and Mrs. McLean at Bar Harbor, Maine, during horse show week. The display was an aquatic one, there being a fountain in the centre of the table containing live goldfish, Egyptian lotus and Farleyense ferns. A bay window was arched over with asparagus from which bunches of Hamburg grapes were suspended which were cut off and served to the guests during the dinner. In the center of this arch was another fountain containing goldfish and night-blooming water lilies. The hostess received her guests in an arbor of American Beauty roses.

Visitors in this city during the past ten days were W. N. Rudd and daughter, Morgan Park, Ill.; E. G. Hill, Richmond, Ind.; Robert Patterson and sons, Montgomery, Ala.; Mr. Lawrence of the Westview Floral Co., Atlanta, Ga.; John G. Esler, Saddle River, N. J.; Mr. and Mrs. Julius Roehrs, Rutherford, N. J.

Flower Market Reports.

BOSTON A week of almost steady rain is August's parting gift. Very grateful we should be, no doubt, but one is disposed to cry "hold, enough." A result, not without some satisfaction, is the enforced return of many people from the raw dreariness of the seashore and mountain in such weather and that should tend to start some little animation in the flower demand, which is something sorely needed. No sign yet of any improvement, however, as the present week has been the duldest of the month, and the wholesale markets are heaped high with asters of all qualities—some excellent but the majority quite the reverse. The latter cannot be sold, especially in colored varieties, except in bulk for scarcely enough to pay for the trouble of picking. Tea roses are still very slow to move and Beauties are not much better, even when quality is all right. A little briskness is noted, however, in the new sorts such as Lady Hillingdon and Radiance. A few carnations are seen here and there.

BUFFALO Little or no improvement was seen in the market last week over the week previous. Asters are improving in quality, though there are still too many of the ordinary, which are hard to move. Gladioli continue to be plentiful, also roses and other stock. There is no shortage of anything. It is hoped that the market will change for the better this week as the ending of the month will bring home a good portion of vacationists.

CHICAGO There is a slight improvement in the condition of the market here this week. The supply of summer flowers, especially gladioli, is shortening up and the miscellaneous collections of out-door stock that cover the counters in August are giving way to the new carnations and the late asters. A much better quality of asters can be had now, the late crop being fully up to the usual standard and so far superior to the earlier ones that sales on them are more nearly satisfactory to the grower than before this season. This does not mean that quantities are not left unsold, and the usual cry of overproduction is frequently heard. The new carnations are beginning to be a feature in the stock and some of the blooms are of excellent size and quality, while stems are rapidly lengthening. The rose situation is much the same,—plenty of stock of all kinds though buds are small. Sweet peas are again to be seen but do not add much to the volume of sales. The opening of schools next week is expected to bring many people back to the city and with this is sure to come an advance in demand for cut flowers and it will be welcomed by all.

ST. LOUIS The weather was not so bad last week and that helped the market greatly in the way of good stock and demand. Our commission men are receiving consignments that are greatly in excess of the demand at the present time, but they say that white

stock sells well owing to the great amount of funeral material that was worked up last week. Good roses are selling well. Carnations are coming

good. Cosmos brings 50 cents per 100 and dahlias \$2 per 100. For other prices see tabulated list.

Flower Market Reports

Oh! Business, thou lethargic, somniferous, intensely aggravating friend; when will you stop being an optical illusion and come back from somewhere to keep us busy even if it is in "love's labor lost?" The condition of affairs here in this great city is too abnormally slow and patience is being closely shaved on the edge of expectancy. Roses are coming in in large quantities and of the poorest quality. There is no such thing as staple prices for anything. Plenty of roses—open, languid ones, of course—sold as low as twelve cents per 100; others went for from 50 cents to \$4.00. Double White and Pink Killarneys with Radiance seemed to have first call. Beauties seem to be about the only class to keep steady, and even they have dropped one-fourth in value from last week. Liliun longiflorum and Harrisii are over-abundant. Asters were supposed to be scarce or battered by recent storms, but they are coming to town in usual way and quantity. Poor varieties went at prices according to bulk, a few long-stemmed queenly ones brought good prices. Carnations are very poor and short. Orchids, especially cattleyas, are taking a brief vacation.

There was a decided decrease in the volume of business here last week as compared with the week before but this is mainly or wholly due to the usual curtailment of business at this season. There was a similar drop at the same time last year. American Beauty roses were the best sellers on the list. Orchids also in demand but that to a large extent was because they are so exceedingly scarce. While Killarney roses are of extra quality for the season, and hold their own very well with the "Summer Queen"—Kaiserin. The new double pink Killarney—which are now arriving in limited quantity—while not very long in the stem as yet, are splendid as to petalage, and are of fine substance. Prince de Bulgarie bids fair for a strong and steady place in the regular market. Carnations have commenced to come in again, and while the flowers are fair they are very short-stemmed. The white varieties are at the bottom of the quality column. Gardenias are arriving in limited quantity. They are fine as to purity and substance, but rather short-stemmed. Selling fairly well. Sweet peas have dropped off

very much both as to quantity and quality. Gladioli are still pretty good but there is so much other outdoor stock for decorative work, that they suffer in demand. To a lesser extent, that is true of the aster also. Asters are at their best now, and any quantity can be had. Too many poor ones. Only the best sell well.

During the past week or two business has been quiet. There has been ample stock coming in to take care of all needs; asters were never better; in fact, all flowers have been very plentiful with the possible exception of carnations and these can be well dispensed with by reason of the quantity and quality of the asters until the latter are gone. American Beauties are coming along fine.

A FLOWER MARKET FOR PROVIDENCE.

The wholesale flower and plant growers of Providence, R. I., have decided to start a flower market and will open a store in the down-town district for that purpose. This was decided at a meeting held last Saturday at which the following officers were elected: President, John A. Macrae; Vice-President, Walter Macrae; Secretary, E. E. King; Treasurer, Olney H. Williams.

The store will be divided into stalls, these stalls to be rented by the wholesalers. There are already 12 in the association. It is expected that others will send in their applications for membership before the next meeting.

A FAILURE.

Yonkers, N. Y.—C. Rovatzos has failed and most of the wholesale dealers in West 28th street, New York, are reported to have been hit hard.

Don't forget the sale of Boston Flower Market stalls Saturday, September 2, 9.30 A. M.

GLEANINGS FROM THE "GREAT WHITE WAY."

There are, of course, here and there and now and then a few moments of briskness when some one departs for unknown gardens, but scarce a ripple is noticeable in the sleepy atmosphere of New York's 26th or 28th streets. Vacation chatter livens up the dreary, tiresome waits. Charles Schenck, Frank Traendly's observant side partner, can tell how and what to see in Europe.—P. Riedel of Badgley, Riedel & Meyer, went to Montreal to see if P. Welch of Boston made statement correct on reciprocity.—Horace E. Froment is back looking elegant and "Lady Hillingdon" with "Radiance" surrounds him.—Geo. Matthews took Mrs. Matthews away from Great Neck to drink a little at Sharon Springs, N. Y.—Arthur Watkins had a jolly good time up the Hudson.—C. W. Scott has been towing Carl Jurgens of Newport among and through the bulb cellars of New York and one may hear the words "hundred thousand" often used as if it were only just a dozen.—Dr. N. L. Britton of the Botanic Gardens sailed for Europe two weeks ago to visit the noted gardens there, and add to those under his care here.—A. H. Langjahr is busy fixing up his new store in 28th street. It is a fine, new, light commodious store and we wish him the best of luck in it.—Arthur Hunt of Langjahr's lost a daughter, seven years old, by death last Sunday.—John I. Raynor is at Watch Hill, R. I., this week.—Capt. Chadwick informs us that the bowling team will assemble at the florist club's first meet of the season, September 11, and present excuses for "The Night Before." "Larry, turn the crank."

Ansonia, Conn.—On account of the results of unfavorable weather conditions, it is doubtful whether the annual exhibition of the Intertown Dahlia Association will be held this year.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one-cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

A SPRING VALLEY PLACE.

So far as we know, A. S. Burns of Spring Valley, N. Y., is the largest forcer of longiflorum lilies in this country. He was certainly one of the first, if not the first, to make a regular business of supplying this flower in quantity every day in the year. Horse Shoe Brand Giganteum are his specialty and house after house in all stages of growth and maturity may be seen any day in this well-conducted place. Mr. Burns is the son of Alexander S. Burns of Woodside, N. Y., one of the most successful of the older generation of florists and whose wise training and advice, no doubt, counts for much in the success achieved by the younger Alex.

There are fifteen houses in the range now—four of them covering an area of 140 x 140 having been erected this season. The capacity of this new addition is 75,000 lily bulbs. At the present time the regular cut per day is 3000 flowers. In addition to the giganteums Mr. Burns forces large quantities of auratum and speciosum. Of the latter rubrum is seen in greatest quantity. Mr. Burns says that he is unable to distinguish between a good brand of rubrum and those sold as magnificum, the former varying so much in type and color that it is not worth while to try to carry the two names. In the field at the present time is a vast stretch of Vick asters, remarkable as to stem and size of flower, when the unfavorable season is taken into consideration. The same cultural skill and diligent care is as apparent here as in the houses. This establishment promises to be eventually one of the foremost in the country.

Do You Know What You Want?

Look in the "Buyers' Directory" of this issue and you will probably find represented there somebody who can supply you. It's a good plan to look it over every week, for the weekly changes and additions are many.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

WANTED — Cemetery Superintendent. Place is open for a good man, married, protestant, not too large a family, in New England town. Greenhouse on place. Wages, \$900 a year and house. Address "J. W." care HORTICULTURE.

WANTED—A foreman at our packing house who has had experience in packing trees and is capable of handling men who will keep sober. Married man preferred. Position ready October 1st. House vacant, near the packing house. Harrison Nurseries, Berlin, Md.

SITUATIONS WANTED

GARDENER would like position as greenhouse foreman on small place. Understands horses and cattle, handy man on place, married, two children. Address A. B., care HORTICULTURE.

POSITION WANTED—By two young, practical florists. Good growers of roses, carnations, pot plants. Also long experience in all branches. Able to take full charge of houses. Best of references. Four years in Am. business. Address, "Practicals," care HORTICULTURE.

FOR SALE

FOR SALE—Fresh from factory, new 10 x 12, 16 x 18, 16 x 24, double thick, A and B qualities. Market dropped. Now is the time to buy and save money. Parshelsky Bros., Inc., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—Two water tube boilers, 100 H. P. each, Heine type; three tubular boilers, 66 inches by 18 feet; perfect condition and cheap. Armstrong Mfg. Co., Springfield, O.

GREENHOUSE 20 x 200 feet; been built about seven years; in good repair. Has been used for forcing cucumbers. Two hot water boilers and piping in perfect condition, with cemented cellar for car-load of coal. Located in center of town of 16,000 people. Will sell cheap if taken soon. A. E., care HORTICULTURE.

FOR SALE—One of the largest and oldest wholesale retail floral businesses in Denver—a money maker. Long term lease on \$100,000 property. Owner retiring on account of age and plenty. If you have \$25,000 your profits will only be limited by your ability. For particulars, address M. H. Learnard, 1226 East 22nd Ave., Denver, Colo.

WANT ADS

Don't have to run long in HORTICULTURE. One insertion often brings the desired results. If you need help or if you are looking for a situation, just try it. Cent a word.

PUBLICATIONS RECEIVED.

Massachusetts Horticultural Society, Transactions for the year 1911, Part 1. This publication comprises the lectures and discussions thereon, as presented at Horticultural Hall in the spring of 1911.

The Schedule of the First Annual Dahlia Exhibition of the New Haven County Horticultural Society, (Conn.), has been received. The show will be held on September 13-14, in Harmonie Hall, New Haven. The prizes are many and liberal, including several specials.

Annual Report of the Public Parks Board of Winnipeg, Man. for 1910. This is a 48 page publication attractively gotten up and lavishly illustrated. It contains the general proceedings of the department, Superintendent Champion's report and recommendations, secretary's financial report, account of boulevard construction, and three excellent maps.

Chrysanthemum Society of America.—Proceedings of the Ninth Annual Meeting. The Ninth Annual Meeting was held at Morristown, N. J., on November 2-4, 1910. This book gives a detailed report of what was done there, a review of the work of the examining committees for the season of 1910, lists of American and foreign varieties disseminated during the year and other valuable information. A portrait of President Elmer D. Smith forms the frontispiece.

Railway Gardening Association—Souvenir Book for 1911. This elegant volume has been prepared and sent out by Secretary J. S. Butterfield as a labor of love and he has conferred a favor of no small degree on the gardening fraternity generally as well as those more intimately interested in railway adornment. The book contains 40 pages on heavy paper giving many full page group views of station gardening and interesting articles on various allied subjects.

The 1911 convention of the Association was held at Chicago on August 15-18, 1911. The officers for the next year are: President, Patrick Foy, Norfolk & Western, Roanoke, Virginia. Vice-President, F. W. Vail, Central R. R. of New Jersey, Dunellen, N. J. Sec.-Treas., J. S. Butterfield, Mo-Pac. Iron Mtn., Lee's Summit, Mo. Executive committee, all officers and Geo. B. Moulder, Illinois Central, Chicago; R. W. Hutchison, Penna. Lines West, Sewickley, Pa.; R. J. Rice, Michigan Central, Niles, Michigan.

The meeting for 1912 will be at Roanoke, Va., August 13-16.

VINCENT DAHLIA SHOW.

The Fifth Annual Dahlia and Flower Show will be held at the Vincent's Dahlia and Canna Farm, Cowenton, Md., B. & O. R. R., in connection with the Harvest Home Festival of Ebenezer M. E. Church, on Sept. 26, 27, 28 and 29, 1911. Special train will leave Camden Station, Baltimore, at 12.40 P. M., stopping at Mt. Royal and Gay Street Stations. Returning, leave Cowenton, 6.00 P. M. Regular trains will leave Camden Station 8.15 A. M., 2.10 and 5.00 P. M. Last train will leave Cowenton for Baltimore 7.17 P. M. Train No. 517, leaving Philadelphia 8.15, Wilmington 8.50, Newark,

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft-bodied insects. An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

FOR SALE BY SEEDSMEN.

Send for name of nearest selling agent. Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country. Aphine and Fungine can be used in house or field.

SEE!!

There are some good offers this week in the "Buyers' Directory" section of this paper. Field grown carnations, decorative plants, ferns, etc., are offered by firms of high standing and you should not overlook this seasonable opportunity to stock up with profit yielding material.

Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

NEWS NOTES.

Owego, N. Y.—A. J. Thomas & Sons succeed A. J. Thomas in the florist business here.

Napoleon, O.—Albert Fahringer has purchased from Mr. Hartman the Hartman greenhouses.

Racine, Wis.—Clarke Adams has established a new plant growing business in this city and is now about ready for business. A Garland iron-frame house, 44 x 80, is completed.

Hartford, Mich.—A new enterprise here is the L. E. Davis place. A new greenhouse, 25 x 100, with two-story office building, 16 x 20, is nearly completed and Mr. Davis will be ready for flower and seed business about November 1. Future extensions are planned.

Bedford, Mass.—Fire on the night of August, 26 destroyed the storehouse and packing department of the New England Nurseries Company and did considerable damage to the gardens near. There was little water available and the flames had things practically their own way. The cause of the fire is not known and the damage is estimated at \$10,000, more than half of which was to growing plants or plants in storage.

Lexington, Ky.—The John A. Keller Estate has added a new house, 18 x 63, with 10 ft. side walls, for plant growing, and a new work shed, 18 x 75. This establishment, twenty years in the business, is now conducted by Mrs. J. A. Keller, with James P. Keller as manager. It is run in connection with a retail store and has been practically rebuilt within the past six years. Altogether, it comprises about 60,000 sq. ft. of glass.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

This is the U-Bar.
The Bar That
Makes U-Bar
Greenhouses The
Famous Green-
houses They Are.

This one we erected in Montreal. See how graceful and attractive it is. How different from the usual run of the "cut and dried" kinds you see hitched on so many houses.

U-Bar conservatories are not only attractive, but they are in every way practical. That's saying a lot. It is the U-Bar that makes them so. We are the only U-Bar conservatory and greenhouse builders. The construction is patented. Send for catalog—it shows a goodly number of examples of each.

CANADIAN OFFICE, 10 PHILLIPS PLACE, MONTREAL

LILIUM HARRISII

(The Bermuda Easter Lily)

LET US supply your wants in Lilies this season

We think we can make it to your advantage to do so, as regards both quality and price.

The stock that we offer is not gathered indiscriminately from all kinds of sources, but is grown for us by a few selected growers, whose stocks have been worked up from the true, original stock. In order to ensure the health of the product, the bulbs are not grown on the same field oftener than one season, other crops being grown on the field the preceding year. The ground is thoroughly manured when the previous crop is grown, leaving it in a high state of cultivation, and when the lily bulbs are planted no fresh manure is used, and this prevents disease and ensures a crop of strong, healthy bulbs.

In addition to this, we do not dig our bulbs as early as they are usually dug, but leave them in the ground until they are thoroughly ripened and matured. When Harrisii is good, it leaves little to be desired. There is very little, if any, stock obtainable as good as the stock that we are offering. We are supplying only this one grade of selected stock, and when this is disposed of, we shall have no more to offer.

While the quality of the stock that we offer is of the highest, our prices are as low as, or lower than, the prices of those who offer the ordinary stock gathered from indiscriminate sources. We are sure buyers will find our stock very satisfactory, and much more so than the Japan-grown Longiflorum, which has badly deteriorated in recent years.

Bear in mind that we were the original introducers of Harrisii in Bermuda, and that we have exceptional facilities for obtaining our present supplies. Also take note that the smallest bulbs that we offer are 6-7 inch bulbs, not 5-7 inch, as usually offered.

6-7 inch bulbs, 335 to the case, \$15.00 per case; full thousand lots, \$40.00 per 1,000.

7-9 inch bulbs, 200 to the case, \$16.00 per case; full thousand lots, \$75.00 per 1,000.

9-11 inch bulbs, 100 to the case, \$18.00 per case; full thousand lots, \$175.00 per 1,000.

FERNS

We have an exceptionally nice lot of ferns in the following varieties,—good, bushy, well-grown plants that will please the most critical buyers. Plants have been grown in pots, and are thoroughly well established and nicely finished.

Nephrolepis Bostoniensis and Piersoni, 6-in. pots.....\$0.50 each

Nephrolepis Elegantissima, Piersoni, Bostoniensis, and Harrisii, heavy 8-in. plants.....\$1.00 to 1.50 each

Nephrolepis Elegantissima, Bostoniensis, and Harrisii, heavy 10-in. plants 2.50 each

 A discredited
 fad

There are many situations where an "Italian" or other formal garden scheme will fit appropriately into its environment but, in the "creations" of this character which we have been privileged to see in this country, very few have thus appealed to us. It is a pity to break up a picturesque landscape into geometrical spaces. Utility, not taste, is the motive for laying out cities in squares and triangles, but even then the custom is not essential as cities laid out otherwise are equally prosperous and infinitely more attractive. The more naturally disposed the more pleasing a garden or park will be, the changing character of the scenery as the season progresses giving a beauty that is ever new. The modern landscape architect is, we think, disposed to give too much attention to "vistas" and too little to outlooks and we cannot but sympathize and agree with the gardeners when they deprecate the tendency which seems to have grown of late, to lavish money on mechanical "gardens," the plan and effect of which is, oftener than otherwise, entirely out of harmony with the American landscape and jarring to the eye of the appreciative lover of nature. Architecture should never be used to debase nature; it should be treated as an auxiliary rather than the main theme.

With the coming in of September, florists' club meetings and local society activities will now be resumed. The wish has often been expressed that a closer affiliation could

be established between these numerous scattered organizations and the "parent society," as the Society of American Florists is sometimes termed, and various plans for bringing this about have been presented from time to time but without developing much that was really practical. The local bodies are, of course, occasionally in evidence in S. A. F. matters, as when they rally around a favored member who may be a candidate for office in the S. A. F., when they send a bowling team to a convention, or when they undertake to organize and entertain special convention parties but otherwise useful co-operation between the national and local associations is conspicuously absent. The time has now arrived, we should think, for some well-directed and broadly useful co-ordination to be planned out so that subjects of immediate general concern might be taken up simultaneously. A special committee of the S. A. F., or, if preferred, the executive board could be entrusted with the choosing of topics for each month and advising as to the lines on which a joint campaign for concerted action should be waged. Such matters as parcels post, reciprocity in horticultural material, plant quarantine and inspection, express abuses, methods of marketing and scores of other topics come at once to mind as suggestions for consideration respectively at the same time in all sections of the country. The salutary influence and effect of such concrete action on such questions must be apparent to everyone.

 Avoid
 the ruts

Nothing is more easy, nothing more natural, than for the man who makes no especial achievement in life, to look at his neighbor, who is succeeding, and to say, "As he does, I will do. If he succeeds in this course, I will succeed." Such reasoning is characteristic of the man who lacks the initiative and keen perception of business

opportunity. The truly successful man is he, who, makes it a point to become master of his calling. Such a man takes a survey of the field in which he labors and thinks. He is naturally too proud to be an imitator and he has confidence that his judgment will lead him aright. Independence of thought and action were never more needed in the horticultural world than today, and there is every opportunity for such independence. Who would have imagined a decade ago, that the florist who specialized in sweet peas, for instance, would have created a most lucrative field, entirely his own? In the business of the commercial florist there is ample field for such diversification. In fact, there are scores of desirable flowers that, in the near future, will unquestionably become market standards. One great fault of commercial floriculture, in this country, is its narrowness. Today there is a demand not only for the flowers which have mingled alike with our sorrow and our mirth, but for those which have not, for new flowers, giving new inspirations. Happy the grower who is wise enough to make a good selection of such material from the vast amount available, that the result of his labor may give new inspiration to his patrons, and to himself the large return his enterprise merits. Perhaps in the near future some enthusiast will double the length of the stems of pansies, as others have already more than doubled those of the sweet peas. No one has yet grown for market purposes *Buddleia amabilis*, although it is unquestionably one of the most promising subjects. There are many choice annuals, like the salpiglossis, that would prove valuable for winter flowering. The innumerable new plants and lilies, collected by Mr. E. H. Wilson and others, to which frequent reference has been made in this paper, will undoubtedly furnish material that in proper hands will enrich their cultivators.

Paeonia Veitchii

The accompanying illustration shows a new hardy species of peony introduced by Mr. E. H. Wilson from the border of Thibet where it was found growing at an altitude of 9,000 to 10,000 feet. The flowers are single, saucer shaped, bright crimson and about three inches in diameter. The plant is free growing, free flowering and perfectly hardy around Boston. The elegance of the foliage is well shown in the picture.

Timber for Profit

It is very hard for the American farmer to look ahead. He does not want to sow anything that he cannot reap the next year. Besides he is on the look-out for a sale. In this state lands were sold by the D. K. Co. for \$5 per acre. When they got up to \$10 per acre a great many sold. Now these same lands are selling for from \$100 to \$200 per acre. Those who sold are living from hand to mouth—those that kept the home are rich. Land proves to be the most faithful friend a family ever had,

In the early days fuel was scarce; there were patches of timber along the creeks. Some progressive farmers ventured to plant the cottonwood on account of its rapid growth. A neighbor planted quite a number of acres and two years ago he sawed the trees and was surprised at the result. The low wet ground proved to be a gold mine and he sold an immense amount of wood and boards—nearly \$400 to the acre.

People are on the lookout for a quick growing tree which will bring in speedy returns. The Norway poplar fills the bill as the most rapid growing tree in the North. The Carolina proves to be short lived and cannot resist the cold of the Northern States.

The Park and Forest Society of Nebraska after urging the people for years to plant, have now prepared a circular giving some facts regarding this remarkable tree. They are spreading it broadcast to awaken a general interest in tree planting. Land is too valuable to be idle. A great timber want is coming down upon us. In 25 years lumber will be worth twice as much as at present. For a year or two lumber may be cheaper on account of the great areas burned over killing millions of trees. After that, prices must soar. We must look to the Amazon and to Africa; but these places are far away.

Take the item of boxes alone. In New England kind Mother Nature sows pine seed on the deserted farm and in 40 years an immense amount of boxing lumber is produced. The Norway poplar brings in speedy results. It is tougher than pine, and much stronger and will bear to be thin. For this reason alone it should be planted in immense quantities and as speedily as possible.

C. S. Hammon

York, Nebraska.

Polypodium Mandaianum

It is no exaggeration to assert that the magnificent new fern depicted on our title page this week has few equals and no superior in the whole line of decorative foliage plants. It is unquestionably the noblest of all greenhouse ferns. It is a unique crested form of the well-known *Polypodium aureum*. Its growth, as seen at the establishment of W. A. Manda, South Orange, N. J., is prodigious. The fronds are produced with astonishing rapidity and harden up quickly, so that for decorative work as cut material they are well adapted. No acanthus can equal their classic beauty of outline and poise. Mr. Manda has close to 50,000 young stock of this novelty.

WORK AT THE EXPERIMENTAL GREENHOUSES.

Read by H. B. Deane before Illinois State Florists' Association, February, 1911.

Work at the Florists' Experimental Greenhouses has been continued during the year under the direction of the Advisory Committee and bids fair to give some interesting results. As a whole the work is progressing nicely and an inspection of the houses will, we think, show the plants in the experimental plots in better condition than ever before. The work as being carried on is quite a large undertaking and keeps those connected with it very busy looking after the many details. Much of the success of the season's work is due to the watchfulness and careful attention to details given by Mr. Nehrling.

The work of the year is divided into three experiments, one on carnations and two on roses. The completion of the new houses last winter made it possible to take up these lines of work on roses.

The Carnation Experiment.

The work in carnations is a continuation or rather a duplication of the work of the past year. At least another year will be necessary before final conclusions can be drawn. The work has given a mass of data which will require several months of hard work to put it into such shape as to give the greatest value. As a result of the past season's work, records were taken on 47,729 carnations representing the cut of six months beginning with November and ending on the 1st of May. During the past three months records have been taken on 17,092 flowers.

The object of the experiment is to determine whether just as good and as many flowers can be grown by using a very small amount of manure supplemented by commercial fertilizers as when large quantities of manure are used. It is also desired to determine in what proportion the three elements, namely nitrogen, phosphorus and potassium should be applied. If, of course, better flowers can be grown with the aid of commercial fertilizers this only proves our point.

It must be kept in mind that all natural manure cannot be dispensed with without injury to the soil and crops. Much of the nutritive substances in the soil are only made available by the bacteria present in the soil. The humus or decaying vegetable matter, and it is for this that natural manure is used in the experiment, furnishes the food and the medium in which these bacteria grow. So to get the best results manure should not be discarded altogether, but the quantity should be much reduced.

During the season of 1909 and 1910 four varieties of carnations, namely, White Perfection, Beacon, Enchantress and Winsor were selected as being representative types upon which to experiment. 678 plants of each were used and each variety represented a complete experiment.

From the first year's work it was decided that the best commercial fertilizers to use are dried blood for nitrogen with ammonium sulphate as a good second, acid phosphate for the phosphorus and potassium sulphate for potassium. The units of application selected are:

Dried blood at 2 lbs. per 100 sq. ft. bench, 5 in. deep.

Am. sulphate at $1\frac{1}{2}$ lbs. per 100 sq. ft.

Acid phosphate at $\frac{1}{2}$ lb. per 100 sq. ft.

Potassium sulphate at $\frac{1}{2}$ lb. per 100 sq. ft.

Manure at 15 lbs. or about $3\frac{1}{2}$ bu. per 100 sq. ft.

The standard then contained amounts of dried blood, acid phosphate and potassium sulphate at the rates above mentioned. The control or check sections contained an equal amount of manure but no commercial fertilizers. These fertilizers in the other sections were doubled and quadrupled singly, in pairs and all together. This then gave combinations of each necessary.

Complete records of the cut from Nov. 1st to May 1st were kept and a study of these is of great interest.

Cut by Months.

	Nov.	Dec.	Jan.	Feb.	Mar.	April.
White Perfection	1276	3086	1736	1120	1108	3183
Beacon	772	1983	2542	3167	2428	3317
Enchantress	402	1809	1937	1873	2080	3172
Winsor	185	1107	1883	2219	2105	3426

Cut for 6 Months.

	Total	OK.	$\frac{1}{2}$ Sp.	Split	Average per plant
White Perfection	11,510	9,584	597	1,330	15.0
Beacon	14,047	11,872	554	1,621	18.3
Enchantress	11,247	10,160	235	852	14.6
Winsor	10,925	10,416	129	380	14.2

Month of most split was: December, White Perfection; February, Beacon; January, Enchantress and Winsor.

By half splits are meant those whose calyx is partly split but not enough to allow the petals to fall down. In regular grading they would be classed among the firsts.

During the present season the following cut has been made:

	Nov.	Dec.	Jan.	Total.	Gain.
White Perfection	940	1,662	1,227	3,829	—2269
Beacon	1,715	1,391	1,240	4,446	854
Enchantress	1,152	1,292	1,493	4,937	+759

It would be noticed from this table that Winsor has been omitted. Owing to the fact that stem-rot developed very badly it was discarded and White Enchantress was used in its place. With this change in the variety it was decided to make a variation in the experiment. Accordingly half of this variety is being grown with commercial fertilizers and the other with natural manures and liquid manures made from it. The amount of dried blood, acid phosphate and potassium sulphate applied was twice that of the unit sections in the other experiment.

The following table shows the cut to date:

	Nov.	Dec.	Jan.	Total
With commercial fertilizers	468	743	420	1631
With natural manures	461	794	439	1694

This shows a slight increase in the natural manure but the present condition of the plants show that there will be more flowers in the former during the next two months.

The experimental work in carnations will, no doubt, show conclusively that equally good carnations can be grown with the use of commercial fertilizers used in conjunction with small quantity of natural manure as with nothing but the natural manure.

The quantity to be used, however, will of necessity have to be varied to suit the soil of each establishment. This quantity will have to be determined by experimentation. It must be borne in mind that commercial fertilizers are more concentrated than natural manures and so must be used with caution. An injudicious use of

these concentrated fertilizers will be followed by greater disaster than in use of natural manures. In taking up such a line of work the following applications may be taken as the basis of the work and be considered safe for the average soil.

Dried blood, 2 to 4 lbs., per 100 sq. ft. bench, 5 in. deep.

Sodium nitrate, 2 to 4 lbs. per 100 sq. ft. bench, 5 in. deep.

Ammonium sulphate, $1\frac{1}{2}$ to 3 lbs. per 100 sq. ft. bench, 5 in. deep.

Acid phosphate, $\frac{1}{2}$ to 1 lb. per 100 sq. ft. bench, 5 in. deep.

Potassium sulphate, $\frac{1}{2}$ to 1 lb. per 100 sq. ft. bench, 5 in. deep.

Manure should be applied at rate of about 3 to 4 bu. per 100 sq. ft.

Any help desired in planting such an experiment will be gladly given to any Illinois florist desiring it.

The Rose Experiments.

In taking up the work on roses it was decided to establish two lines which could be carried on at the same time, namely, fertilizer work such as was being carried on with carnations and a test of grafted versus own-root stock.

Fertilizer Work on Roses.

As roses are considered heavier feeders than carnations it was decided to use as a unit twice the amount used as the unit in the carnations. Otherwise the proportions are the same. For this work were selected the Bride and Killarney as representing two types of roses. Under the treatment given them the Brides have responded well and bid fair to give some splendid results. The Killarneys have not developed quite so well.

Where nitrogen has been applied in large doses the foliage is now taking on a yellowish color and shows over-feeding (see sections 3, 12, 15 and 20). Those sections with smaller amounts have a much better color and growth. See sections 1, 6, 11 and 13 which are some of the best in point of growth and number of flowers.

Grafted and Own Root.

In the study of the grafted and own-root stock it has been found that the grafted plants made a more rapid growth in the beginning which in nearly all cases has been maintained to the present, although the differences are becoming much less marked.

A study of the number of roses cut, not considering the grade, shows:

	Grafted.	Own-root.	Difference.
Bride	3019	2796	423
Killarney	2864	2703	361

While every attempt has been made to have these notes concerning the work accurate, they are at best tentative. It is only when all the notes have been thoroughly studied that complete results can be given.

Again let me repeat that the price of success in use of commercial fertilizers is care in the quantity used.

GLADIOLUS NOTES FROM MASSACHUSETTS.

GLADIOLUS MRS. FRANK PENDLETON, JR.

Editor of HORTICULTURE:

Will you allow me a bit of your valuable space in above line, as I read with much interest the most excellent notes on Gladioli by Mr. Betscher in the September 2 number, and as his productions came along similar lines as I found here, it may be of more than passing interest to some others interested in the same grand spikes.

This year, having occasion to test certain strains, I concluded I would make a general test as our firm are intending planting a considerable quantity another season, as the land intended could not be properly prepared this year on account of shortage in help. I laid off a plot of ground comprised of several different grades of soil and put in 6,000 plump, healthy bulbs of both American grown and European, and a quantity of African seedlings. These were planted April 10, and as the weather came off cold and ground crusted, I said goodbye to the bulbs, but a mulch was immediately put on and the plots show no bad effect from the cold except one small space. Soil a rich, rotten slate loam, north exposure, side hill, planted between peach trees, rows 2 feet apart by 6 inches between bulbs, a rate of about 31,470 bulbs to one acre. Another plot was planted at same time, 3 feet between rows and 1 foot apart for bulbs, counting at the rate of 14,520 bulbs to the acre, and planted in a rich sandy loam where tomatoes were raised last year and between rows of peach trees. On June 18 the first spikes were cut showing two to three flowers in bloom and buds well colored.

As with Mr. Betscher, I find the Lemoines were the first to open, but Pink Beauty was the first to open flower followed by a lot of Childsii and a variety of unnamed seedlings known only by number. Blushing Bride opened July 2 and is a very lovely flower of the Delicatissima type. Among our reds I think Princeps, a brilliant scarlet with white throat will be the earliest, but don't care to state definitely till tried out next year. The Excelsior strains did well, having extra long stems, some being cut 4 feet long. Among the American seedlings, the ones from S. C. Mellinger, Calla, Ohio, were the earliest, and had spikes we can ship 1,500 miles and warrant to arrive O. K. We are now shipping cut from his bulbs 500 miles and cut every day through last week's rain.

This coming season we shall check back all these bulbs and those that prove O. K. will go into our general planting. Mr. Betscher speaks of planting in March! Here in this valley of the Merrimac most years they could be planted April 1 on one tract of ground we have, a good sandy loam, well drained, and probably three days earlier. This would give blooms here about June 10 under ordinary weather conditions, but this year has been hard on bulbs, on account of the long drought.

On June 8 we mulched the plots heavy with sheep manure. Not the sheep manure in bags, but from our sheep pens where the sheep were bedded last fall with leaves and straw. We put this between the rows and be-

This new gladiolus was the winner of the American Gladiolus Society's first certificate of merit at Baltimore, August 16, 1911, having been shown there by L. Merton Gage of Orange, Mass., and a few days later it was given a first class certificate of merit by the Massachusetts Horticultural Society. It is a seedling of Gandavensis X Lemoinei. In color it is one of the

richest flowers ever produced on a gladiolus—a lovely flushed salmon-pink flower with brilliant carmine blotches reminding one of some of the best fancy pelargoniums. The flowers are very large and open out wide, as the picture shows. The variety was raised by A. E. Kunderd of Goshens, Ind., and is named after a prominent society lady of Bar Harbor, Me.

tween the plants to the extent of a good three inches deep and gave it a thorough wetting down with water. The ground had been previously weeded and cultivated. The bloom was not a spike here and there but general all through plantings.

It is a great pity that more notes are not printed in a clear, practical line as Mr. Betscher's, but the tendency is to print a lot of rot. Only yesterday I read an account of a gladiolus grower who planted 200,000 bulbs to the acre and planted 19 acres, and the notes were sent to the paper by a man that knew better. Now there is a chance that the printer made a mistake of 180,000 bulbs but no excuse for 19 acres. What a trade journal is for facts and help to the grower, the wholesaler, and the retail merchant, and not trash.

CHARLES F. NEWELL.
West Newbury, Mass.

H. A. Stevens of Dedham, Mass., is marketing an exceptionally fine grade of asters grown from seed of his own saving, selection having been made for several years.

ROYAL INTERNATIONAL HORTICULTURAL EXHIBITION.

The revised schedule for the International Exhibition, to be held at Chelsea, in May next, is now ready for distribution, and copies may be obtained, post free, from T. Geoffrey W. Henslow, Secretary, Royal International Horticultural Exhibition, 7, Victoria street, Westminster, London, S. W. A preliminary schedule was distributed some months ago for the purpose of affording exhibitors some indication of the general nature of the competitive classes, but it was not possible at that time to enumerate the awards. These latter include presentation cups offered by His Majesty the King, the Duke of Portland (President of the Exhibition), and others, also a large number of gold and silver medals. In some of the more exacting classes money prizes accompany the medals, in order that exhibitors may be compensated for expenses necessarily incurred. The present schedule contains this information, and it is therefore indispensable to those who contemplate making contributions to the show.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF WASHINGTON.

The club held their regular September meeting at their quarters, 1214 F street, N. W. The secretary read a letter from Mrs. John Birnie and family thanking the members for their expression of sympathy in their bereavement and a similar letter from the family of the late Joseph R. Freeman.

The renting agents having in charge the building containing halls at 419 Tenth street, N. W., have made an offer to sublet one of their halls for the use of the Florists' Club on their regular meeting nights. It has long been the desire of the membership to have a permanent and suitable meeting place and this offer has again started this discussion. The present quarters are quite suitable but "a home of our own" is the sentiment prevailing.

Other similar offers were made and a committee was appointed composed of Messrs. Bollinger, Cooke and Schmidt to investigate and to report at a future meeting.

A rising vote of thanks was tendered Mr. and Mrs. W. F. Gude for the hospitality shown the members who attended the August meeting held at the Gude home.

Many of the members have failed to receive photographs taken of the annual outing and of the "Grotto" meeting and this matter was ordered to be investigated.

Due to the inadequacy of suitable floor space available for the purpose at the present time, it was decided that the club hold no flower show this year. It is the belief of all that if a show be held it should be worthy of a National Capital enterprise which, under the present existing circumstances, would not be the case.

CLARENCE L. LINZ.

FLORISTS' CLUB OF PHILADELPHIA.

The September meeting of the above club, held on the 4th inst., was well attended—it being nomination night, and the interesting things of the recent convention being up for discussion. J. Otto Thilow was nominated for president; George Craig, treasurer; David Rust, secretary. It was voted to hold a banquet the first Tuesday in October to commemorate the twenty-fifth anniversary of the founding of the club. Convention matters were gone over by Robert Kift, Adolph Farenwald, John R. Andre, John Westcott, and others. The Leo Niessen Co. exhibited some new dahlias grown by the Peacock Co., includ-

ing Dorothy Peacock, Fringed Century, Eckford Century and Golden Century. William Tricker, Arlington, N. J., exhibited plants of a new variegated form of *Vinca minor* (*Vinca minor aurea*) which he stated was very dwarf and very hardy. In answer to the question as to whether it would stand the rigors of a window box in winter Mr. Tricker said he could not say as yet, not having tried it. The secretary was instructed to convey the thanks of the Club to the Baltimore brethren for many courtesies to our members during convention week. David Rust was appointed essayist for next meeting, his subject being a historical sketch of the club since its foundation.

HORTICULTURAL CLUB OF BOSTON.

On Wednesday evening, August 6, there was instituted at the Parker House, Boston, a new organization to be known as the Horticultural Club of Boston. Its purpose is horticultural development and to work, not in competition with but in co-operation with, existing organizations for the advancement and uplifting of horticulture in all its branches. The officers elected are: President, J. K. M. L. Farquhar; Vice-President, F. R. Pierson; Secretary, E. H. Wilson; Treasurer, E. Allan Peirce.

CLUB AND SOCIETY NOTES.

The Horticultural Society of New York will hold an exhibition of dahlias and other fall flowers at New York Botanical Garden on September 16 and 17.

Expectancy is on tap for the first

meeting for the season of the New York Florists' Club, which is scheduled for next Monday night, Sept. 11, and a big turnout is assured.

The Ninth Annual Fall Exhibition of the New Bedford Horticultural Society will be held in Odd Fellows Hall, New Bedford, Mass., on September 14, 15, 16. The display of dahlias, which are a leading product of that section, will undoubtedly be large.

The Southern Nurserymen's Association convened in Greensboro, N. C., on August 24 and 25. A capital address of welcome was made by Mayor T. J. Murphy and Charles Smith of Concord, Ga., responded. The attendance was good and the discussions interesting.

At the exhibition of the Worcester County (Mass.), Horticultural Society on August 31. H. A. Dreer of Philadelphia made a very fine display of aquatic plants and flowers in two large tanks. Gladioli and asters of high quality were shown in large numbers by many contributors.

The Vegetable Growers' Association of America will hold their fourth annual convention in Boston, Mass., September 19 to 22. The program for the meetings and exhibition, which will be held in Horticultural Hall, has been issued and copies may be secured by writing to S. W. Severance, Secretary, 508 Walker Building, Louisville, Ky.

CHICAGO BOWLERS.

With the first appearance of fall business the subject of bowling comes to the front with the Chicago florists and the preliminary steps will be taken to organize in another week. New alleys have been built and an effort will be made to secure them.

The Chicago Carnation Co. ball team lost to the Northeastern Athletic team of Joliet last Saturday, 11 to 13.

GARDENERS' AND FLORISTS' CLUB OF BOSTON
In Gladioli Fields of R. Hammond Tracy, Wrentham, Mass.

RED BANK, N. J., EXHIBITION.

The members of the Monmouth County Horticultural Society made a very creditable display of plants, flowers and fruits at the County Fair held at Red Bank, N. J., from August 31st to Sept 4th. Their exhibits were arranged in a large new tent and were nicely staged—in fact this tent was more largely patronized than any other part of the fair except perhaps the trotting course. Good prizes were offered by residents of the locality and in the majority of cases were worthily competed for. For group of foliage plants Wm. Turner was first with N. Butterback a close second. These groups were good, clean, well colored and artistically arranged. Mr. Turner also won first with a table of store and greenhouse plants. N. Butterback was first on group of ferns and they were beautiful and well put up. Turner was there again with a group of crotons and dracenas with Butterback second. These were highly colored groups, the dracenas adding gracefully to the effect. Best 6 palms brought out some fine specimens with the above two competitions in the same order. Then Butterback went one better by getting 1st on 6 ferns, 6 varieties, Turner evening up by capturing the prize for 3 specimen palms with immense kentias, Butterback 2nd. It was the same order of things in the class for one specimen palm. In the next two classes calling for five ferns and specimen fern, Butterback won both. Turner second for specimen. For specimen foliage plant Turner 1st and Butterback 2nd. In the class for 12 crotons Geo. Hale stepped in and captured 1st, letting his friend Butterback off with 2nd. For specimen *Adiantum Farleyense*, Butterback won 1st. For Rex begonia Wm. Robinson landed 1st, as he did for 6 begonias. In the 12 fibrous-rooted begonias Butterback 1st, Wm. Dowling 2nd; 12 flowering plants, Turner 1st, Hale 2nd and Metzdorf 3rd; 6 orchids, Turner 1st; geranium in bloom, P. Lichenstein.

It will be seen by the above that William Turner and Nicolas Butterback, both of Oceanic, had it pretty near their own way in the plant division. However, there was more of a scrimmage in the cut flower section. Butterback captured 1st on greenhouse roses; Wm. Dowling 1st on outdoor roses; 12 specimen outdoor flowers, Geo. Hale 1st, P. Lichenstein 2nd; collection of annuals, Wm. Dowling 1st, Hale 2nd; collection of perennials, Peter Murray 1st, Butterback, 2nd; phlox annual, Alfred Griffiths, 1st, Wm. Metzdorf, 2nd; collection of gladiolus, Geo. Hale 1st, T. Shuit 2nd; Hale also won 1st for 25 varieties of gladiolus. Geo. L. Stillman, of Westerly, R. I., captured first in all the dahlia classes with some very fine blooms, Hale coming in second. We noted that these dahlias attracted very much attention from the wealthier classes. Asters were shown in elegance and variety, Wm. Dowling getting 1st, A. Griffiths 2nd. J. T. Lovett arranged effective groups of evergreens and cut flowers and Chas. W. Schneider several groups of palms, etc., both not for competition. A. Griffiths captured 1st for miniature flower garden design and several awards in open classes were won by those mentioned in the above several

lists. The same men showed up well in the classes for fruits and vegetables. The amateur classes were well filled and great enthusiasm was shown in all classes of horticulture. Millionaires were chummy and for the time brothers with the gardener and 'twas good to see the beauty of flower and goodness of fruit level for a day or two the gilded obstacles which rear themselves among humans. Peter Duff, Orange, N. J.; Wm. Duckham, Madison, N. J., and Arthur Herrington, N. Y., were judges. Oh, we must not forget John Daly winning 1st on vase of roses. Cannot afford to leave the Irish out of anything.

J. IVERA DONLAN.

A NEW GROWERS' COMBINATION.

A number of growers for the Boston cut flower market to the number of twenty or more have combined for the cooperative marketing of their product. The new concern will be known as the Flower Growers' Sales Co. They have secured some 25 to 30 stalls at the Boston Flower Exchange

E. ALLAN PEIRCE.

Market and expect to control the product of nearly a million feet of glass.

The officers are as follows: President E. Allan Peirce; Vice-President, Louis J. Reuter; Treasurer, J. Frank Edgar; Directors, Wm. Sim, Thomas Roland, C. Holbrow, B. Hammond Tracy, A. A. Pembroke, Wm. Jurgens, F. Dolansky, F. P. Putnam, F. Lenk. The business office will be at 6 Province Court.

INCORPORATED.

Norfolk, Va.—Suffolk Floral Gardens; general floral business; capital stock from \$10,000 to \$25,000.

Champaign, Ill.—That the Illinois Central greenhouse will be moved from Champaign to Flossmore, was the statement of a Champaign official of the Illinois Central Railway Co. The cause for the removal as given is that the smoke and gas from the roundhouse makes it impossible to grow some kinds of flowers at the Central's greenhouse in Champaign.

SHREWSBURY SHOW.

England's great show has again closed, leaving as it does pleasant memories to thousands and thousands who cast care aside for the nonce and lived in the feast of another year's labor of Britain's best horticulturists, and some of the cleverest performers in their various scents. I mention the latter, as the committee caters for all classes, whether interested in gardening or not. Anyone, no matter of what temperament, can spend an enjoyable day at "The Show," as it is termed locally.

1911 will long be remembered by all connected with the show, either as exhibitor, visitor or committee, as only a few days previous it looked as though there would be no show, owing to the great railway strike which the country has been up against. Happily this was brought to a satisfactory settlement in time for most of the exhibits to be brought in. Some, however, could not get through in time and at intervals the following notice appeared on blank spaces.

"The committee regrets that owing to the railway strike this space cannot be filled by the firm for whom it is reserved."

Considering the excessive drought the country has experienced this summer stuff was very good, the cottagers' classes only showing any falling off.

Messrs Cypher & Sons, Cheltenham, won out on the large group of flowering and foliage plants arranged for effect, followed by Mr. McDonald, gardener to Sir Geo. Kenrick. The same firm was also to the front for fifteen and six stove and greenhouse plants. Messrs. Veitch had a splendid collection, including many hybrid cattleyas, *Miltonia vexillaria* and specimen *nepenthas*—not for competition.

A new class was a group of herbaceous plants to include rock work and lake. This was won by Gunn & Sons, Alton, with a very telling effect. Some very fine nymphaeas were to be seen here. Blackmore & Longden, Bath, had an excellent group of tuberous-rooted begonias. In size and color they were fine. Kelway's gladioli were a feature. Carnations were below our American quality. Sweet peas were only moderate. The King Acre Nurseries staged a large group of pot fruit trees. The champion decorated fruit table was won by P. F. Barnes, gardener for the Duke of Westminster being twenty points ahead of Mr. Goodacre, Elvaston Castle. There were five entries for this class.

Some splendid produce was to be seen in the various collections of vegetables. Mr. Beckett, gardener to Hon. Vicary Gibbs, Aldenham House, had an extensive non-competitive exhibit. Messrs. Webb of Wordsley, Stourbridge filled a large space with superior produce including 100 dishes of vegetables, 10 varieties of melons, 50 varieties sweet peas and various flowering plants.

The floral display at the N. H. State Fair held at Nashua this week was of small extent but the flowers were excellent as to quality, especially the dahlias, of which fine collections were shown in the various classes by the East Manchester Dahlia Gardens of East Manchester, N. H. and C. S. Finnacum.

CARNATIONS OF TODAY.

Extract from a paper read before The Florists' Club of Philadelphia, February 7th, 1911 by W. H. Taplin.

Qualities Demanded in a Seedling.

A new variety at the present time is exposed to keen criticism, for a very high standard has been reached, and it is not enough for a new seedling to simply show good size and fair color, for the trade demands not only that a large flower of good form and pleasing color shall be produced on a good strong stem, but also that the plant shall be of good constitution and free in growth and flower, and, last but not least, the retail man, who after all seems to be the supreme court of the cut flower world, declares that the flower must be a good keeper and of such a shade that he can use it to advantage. With such requirements as these constantly before him the carnation hybridizer has much to work for, and much work to do, and that some of them do appreciate the size of their task is evidenced by the care with which they select the candidates for popular favor from among the hundreds, or even thousands of seedlings from which they may make a choice.

Results of Indoor Culture.

Then we have to take into consideration the fact that varieties are likely to depreciate after having been grown for several years, possibly owing in part to some inherent weakness of the stock from which they sprang, and in part to the artificial conditions under which they are grown, for under the present conditions of commercial cut flower growing, our carnations are grown along under comparatively high pressure, having no season of natural rest such as most plants demand. In fact the seasons are too short to allow of any rest period, so we keep on propagating and growing a variety until its constitution gives out, and then look for something of similar or better color and habit to take the place of the older variety.

Continued indoor culture of carnations seems to bring about the failure of a variety as soon as anything, though in making this assertion I am fully aware that there are differences of opinion on this subject. There are arguments in favor of indoor culture, not the least of which is found in the fact that the bench-grown plant is likely to produce a large flower on a long stem at an earlier period in the season than may be had from a field-grown plant, but the total number of flowers from a field-grown plant is likely to greatly exceed the result from the bench-grown specimen, and taking the season as a whole the net returns will probably be in favor of the field-grown plant, without taking into consideration the greater vitality that is retained in the stock by the outdoor system. Those three months in the open air counts for much in the preparation of a plant that is to endure a long season of forced growth under glass.

The Test of Novelties.

Then in the race to produce a given number of plants, some of the new varieties are over-propagated; every possible shoot, and some that we might term impossible are put in as a cutting with the natural consequence that many deficient plants are put out each

season, and many disgruntled customers are made. It is not necessary at this time to specify instances of this practice, but that such is frequently the case will be readily admitted by anyone having much experience in the trial of novelties in the carnation line, and, while speaking of novelties, it must be admitted that every hybridizer is liable to view his own production with a somewhat lenient judgment, which makes it the more necessary that these novelties should be passed upon by a qualified committee, and served in a somewhat similar manner to that in use by the Rose and Chrysanthemum Societies. The more general adoption of such a plan would possibly lessen the number of varieties that may be introduced, but would also save quite a sum to those growers who find it needful to try out a batch of novelties each season with a view to keeping up with the procession. It is not merely the original outlay for a limited number of plants that counts in these experiments, but there is also the loss of so many feet of bench space that ought to be productive.

Record of Some Recent Varieties.

Dorothy Gordon bears a strong resemblance to Rose Pink Enchantress but seems to be a little more even in color, though in form, size, stem, and general characteristics it is extremely difficult, and as a matter of fact is well nigh impossible, to distinguish the one from the other. Then there is the dark sport from Pink Enchantress that has been named Washington, and if this variety looks anything like a colored cut supposed to represent it that has recently been issued, it is a flower that would not appeal to the writer, but it is more charitable to blame that on the printer rather than the flower, and it would be better to suspend judgment until a later period.

In scarlet there does not yet appear to be a better than Beacon, this variety being so extremely free that most growers are ready to forgive its serious fault of splitting badly in mid-winter. Scarlet Glow is a fine flower, and very bright and cheerful in color, but thus far does not equal Beacon in growth and number of flowers.

Pink Delight is a variety that has received much favorable criticism during the past year, the flower being of fair size and even in color, and the stem unusually good. It is not pink in a strict interpretation of the color, there being rather too much salmon to be called pink, but it is a beautiful carnation just the same.

Admiration is a fine colored variety, and a good sized flower, but unfortunately it has no constitution and thus seems to be out of the race. Princess Charming as shown the past fall is a variety of much promise, but as to whether it will replace Enchantress remains to be proved.

Mrs. C. W. Ward is making many friends among the growers, this variety having a good-sized flower of pleasing color, and produced on a particularly good stem. It is somewhat liable to bleach as the sun grows stronger, but withal is a fine carnation. Alma Ward is a fine exhibition variety, but not free enough for the average grower. Some of the Lawsons are still grown, but most commercial growers require more size and stem than is found in Mrs. Lawson and the nu-

merous varieties that have been derived from that prolific source, and while many are still growing Winsor for color, yet it scarcely reaches up to the standard of the large city markets.

Variegated varieties are not in large demand and Mrs. Patten and Variegated Lawson occupy a considerable proportion of the space that is devoted to those of fancy marking. It can scarcely be said that there is a standard crimson variety at this time, for although there are many that are being tested in various parts of the country there seems to be something lacking, either in constitution, size, stem or color, and there still seems to be room for a good variety of this color.

PHILADELPHIA NOTES.

Messrs. Rice and Eschner had a pleasant outing with their visitors from the south, to the Heacock establishment at Wyncote and the Hatboro place of H. Weiss.

W. Atlee Burpee is home from his European trip looking bronzed, hearty and happy. He is already getting in touch with home affairs—and wondering who is to be our next mayor.

Philip Freud of the Henry F. Michell Co., is the busy man this week. 960 cases of French bulbs came in and had to go out to about 960 different points. That takes some hustling; three men and a boy. What gets Philip is that the High Browns up in the advertising department think they do all the work!

Pennock-Meehan Co., Berger Bros. and the Henry F. Michell Co. were among the prominent stores we heard of as closing at noon on Labor Day. Force of habit, conditions and conservatism are probably among the reasons why all did not fall into line. There is mighty little doing in any department on the afternoon of Labor Day.

Owing to the high price of immortelles this year many florists are going in for cape flowers instead. The Rice experts seem to have struck the right combination for producing a bright scarlet for Christmas work. Nothing quite so dainty and perfect for this purpose has come under our notice. The foreigners have not been able to approach this in brilliancy so far.

M. Rice & Co. have been compelled to institute a new department. Frederick W. Smith entered on his duties as chief of publicity, Sept. 5th. He will look after catalogue and circular work, and other advertising. The heads of the firm have reached the point where they have had to get some relief from exacting work of that kind. We congratulate them on having secured an able and experienced man.

The Dreer catalogue this fall is the most dignified and finished proposition we have ever seen them get out—and that is saying much. The covers are "idealized tulips" with a vim and swerve to them that is exceedingly effective—and the brown duo-tone finish is artistic and in the finest taste. Inside bears the same stamp of the master mind. All the heads of departments contribute; but the head chef in the main achievement is George D. Clark. What's like us!

We do not know where Samuel S. Pennock is. He may be frozen up on some cool seascape in Rhode Island, or he may be down among the Blue

Dreer's Imperial Japanese Iris

Our stock of these beautiful Japanese Iris is not only the most extensive in the country, but is also the largest assortment of home grown varieties offered and can be relied upon to be true to name and color.

September and October are the best months to plant. We supply strong liberal divisions of the most satisfactory planting size.

DOUBLE FLOWERING OR SIX PETELED JAPANESE IRIS

- No. 3 **Kosui-No-Iro.** Light violet with white veins.
 4 **Yomo-No-Umi.** A fine free flowering early double white.
 5 **Koki-No-Iro.** Rich royal-purple with white veinings.
 8 **Talheiraku.** Ten petals, crimson-purple with yellow centre.
 20 **Kuma-Funjin.** Silvery-white, with a broad border of magenta-lilac veined with white.
 22 **Sano-Watashi.** White, with canary-yellow centre.
 24 **Gosetsu-Mai.** White, veined and traced throughout with aniline-blue.
 26 **Uchiu.** Bright purple with crimson sheen.
 44 **Yoshimo.** Very large flower; creamy-white, delicately veined with violet.
 47 **Renjo-No-Toma.** Petals peculiarly fluted, light violet with white halo and light veinings.
 49 **Wakamurasaki.** Crimson purple with dull lilac shadings at base of petals.
 57 **Hodai.** Silvery-gray, suffused and densely veined with violet purple.
 58 **Mana-Dsuru.** A fine, late flowering white.
 65 **Ho-O-Jo.** Rich velvety-purple with crimson sheen.
 68 **Fuji-Mine.** White, veined with deep purple.
 69 **Waku-Hotei.** Pure white, veined throughout with purple; fine late flowering variety.
 74 **Geisho.** Eight to ten petals; bright crimson-purple with white veinings; full double flower.
 72 **Uji-No-Hotaru.** Bright violet-purple, shaded blue.
 91 **Kan-Ran.** White; densely veined with rich violet-purple.
 95 **Raiden.** White ground, densely dotted and blotched violet.
 105 **Nagano.** Rich violet-purple, shaded with blue.
 108 **Shimosa.** White ground, minutely and densely spotted throughout with bright violet-purple.

SINGLE FLOWERING OR THREE-PETALED JAPANESE IRIS

- No. 1 **Iso-No-Nami.** Silvery white, veined with violet.
 2 **Tora-Odori.** White, faintly traced with violet.
 6 **Date-Dogu.** Rich violet-purple with metallic sheen.
 11 **Hano-No-Nishiki.** Bright violet-purple, veined with white.
 12 **Shippo.** Light lilac; densely veined with purple.
 15 **Gekka-No-Nami.** A very early pure white.
 18 **Meiran.** White, densely marbled and veined with light-violet.
 23 **Yedo-Kagami.** Magenta-lilac, veined with white.
 43 **Shi-Un-Ryo.** Greyish-white, deeply and densely veined and suffused with violet.
 62 **Misutmoshito.** Violet-purple, marbled with white.
 67 **Kigau-No-Misao.** A late flowering pure white.
 70 **Kimi-No-Megumi.** White, densely veined with purple; late-flowering variety.

- No. 73 **Shirataki.** Silvery white, border of petals suffused with light Parma-violet.
 76 **Mine-No-Yuki.** White, veined and dotted throughout with violet-purple.
 77 **Yayaura.** White, occasionally marbled with light violet.
 80 **Bunbudo.** Bright violet purple with darker veinings.
 82 **Ari-Ake.** Violet-purple, marbled with white.
 96 **Tebotan.** White ground, with prominent violet-blue veinings.
 97 **Shiro-Fungen.** Light ground, suffused throughout with bluish-violet.
 98 **Osakazuki.** Light violet mauve with lilac shadings.
 99 **Komanyo.** Bright violet, shaded with blue, numerous white veins and markings.
 100 **Yomo-Zakuru.** Light ground color, densely veined and suffused reddish-purple.

Price, any of the above named varieties, \$1.25 doz.; \$8.00 per 100; \$70.00 per 1000.
 Unnamed mixed varieties 85 cts. doz.; \$6.00 per 100; \$50.00 per 1000.

For the most Complete List of Hardy Perennial Plants as well as all other Seasonable Stock
 See our current Wholesale List issued September 1st.

HENRY A. DREER, Inc., 714 Chestnut Street, **Philadelphia, Pa.**

The above prices are intended for the trade only.

Noses in Nova Scotia. At all events, he is not within hailing distance of Delaware Bay. Else he'd be back on the run, hay fever or no hay fever. Senator Penrose has turned reformer! This is dishing the Whigs and stealing their thunder with a vengeance. Lively times ahead!

"When the devil was sick,
 The devil a saint would be;
 When the devil was well,
 The devil a saint was he."

George D. Clark, J. Otto Thilow and George A. Strohle, all of Dreer's and

big chiefs in their respective departments, have mysteriously disappeared. The latest reports are that the former is at Eaglemere, the other in Alaska, and the latter at Baden-Baden. Our special correspondents at these widely separated points have been unable to verify the reports, but from careful investigations of their financial conditions at home we think we may assure our readers that there is no cause for alarm. They will, no doubt, all turn up in due time.

Visitors: Miss M. S. Newman and Miss Armstrong, St. Louis, Mo.; Mrs. John Walker, Youngstown, O.

Visitors reported at M. Rice & Co.'s: J. Van Lindley and Charles Moorby, Greensboro, N. C.; H. B. Jones of Jones-Russell Co., Cleveland, O.; Miss M. S. Newman and Miss Armstrong, St. Louis, Mo.; Max Rudolph, Cincinnati, O., returning from an European trip; J. S. Simmons and family, Toronto, Canada, returning from a month's visit to Cape May, N. J.

Obituary

George M. Haeker.

George M. Haeker was overcome by the heat while working in the greenhouses of Mrs. Joseph F. Lang, 2010 Melrose street, Chicago, Ill., where he was manager. He died on August 20, aged 52 years.

T. J. Gorman.

T. J. Gorman, Outremont, Montreal, Canada, was killed in an automobile accident on August 17. For many years he had conducted a florist establishment on Mount Royal avenue. He was unmarried.

Philip Fisher.

Philip Fisher, florist, of Chambersburg, Va., was found dead in bed on August 29, at his home. Mr. Fisher was 72 years of age, a native of Chambersburg and served in the 21st Pa. cavalry during the war.

Robert Linney.

Robert Linney, died at his home, Akron, O., on August 18. For many years he conducted a florist business on West Market street, retiring about five years ago. Mr. Linney was 85 years of age and had resided in Akron for forty years.

Jacob Ellettson.

Jacob Ellettson, of Auburn, N. Y., passed away on August 17, aged 78 years. He was born in Kinnongham, Yorkshire, England and came to Auburn in the early 50's. He was an expert landscape gardener and grower. His wife survives him.

W. F. Heike.

W. F. Heike, founder and manager of the Huntsville Wholesale Nurseries, Huntsville, Ala., died suddenly in Cleveland, O., on August 25. Mr. Heike came to Huntsville about thirty-seven years ago and founded the nurseries of which he was manager, in 1882. He was president of the Alabama State Horticultural Society, a member of the American Association of Nurserymen and was well known among the trade.

Col. Thomas V. Kessler.

The death is reported at Pensacola, Fla., of Colonel Thomas V. Kessler, the representative of the Goulding Fertilizer Co., of Dublin, Ireland. Col. Kessler, prior to the establishment some twenty years ago of the Pensacola plant, had charge of the Baltimore offices of the company and here as in Pensacola he made many friends. Colonel Kessler for many years has been a member of the staff of the governor of Florida. He is survived by a widow and five grown children.

Francis O. Canning.

At Villa Nova, Pa. Sept. 1st, Francis O. Canning, in his 44th year. This announcement will come as a shock to the many friends of the well known private gardener. Mr. Canning suddenly and without warning left the cause was mysterious. At the time of his death Mr. Canning was in charge of the estate of Samuel T. Bodine of Villa Nova. He had occupied other good positions, among them being gardener and instructor in the

Agricultural College at Amherst, Mass. He was a forcible writer on horticultural subjects for the trade press, and highly esteemed by all who knew him.

William Peck.

William Peck, owner of the Baraboo City Greenhouses, was killed at Grand Marsh, Wisconsin, Saturday, August 26, when he fell from a flat car on a gravel train.

Mr. Peck was born at Ableman, Wisconsin, April 1, forty-four years ago, but has made his home at Baraboo most of his life. He was a conductor on the Chicago and North Western Railway for which company he had worked for nineteen years. Mr. Peck was always a great lover of flowers and about seven years ago he built the first of his greenhouses in the city of Baraboo. Since that time he has added to his greenhouse area as increased trade required and materials already on hand would have increased his glass area to 10,000 feet. These he managed while still retaining his position on the railroad. It had been Mr. Peck's intention to quit the railroad and give his whole attention to the greenhouse business in another year, when his tragic death ended his plans.

The funeral was held from his home in Baraboo, Monday, August 28. Members of the B. of R. T., O. R. C., and K. of P. lodges attended in a body as well as a host of other friends. There were a great many designs and other floral tributes.

He is survived by his wife, to whom he had been married but five months, and three children by a former marriage.

DETROIT NOTES.

E. A. Scribner, our veteran florist and debater, is still down east looking around for pointers to disseminate at the club next winter.

Mrs. Freeman, successor to Geo. A. Heintz of Toledo, passed through the city on her way to New York, where she will spend several weeks with friends.

Sept. 14 and 15 are the days set for school children to display their product of flowers and vegetables grown from seeds distributed by the 20th Century Club. Members of the Florist Club and of the 20th Century Club will act as judges and distribute prizes. The Florist Club will again give a Boston fern to each of the schools participating.

Labor Day did not stop the faithful few from attending the club meeting. They were pleased to hear that the Rose and Carnation Societies have agreed on a date to hold their convention here and both societies may rest assured of a hearty welcome. G. H. Ellis of Leamington, Ont., arrived at the club rooms in his auto and surprised the members with large baskets of grapes and peaches.

FRANK DANZER.

A CARD OF THANKS.

Mrs. J. R. Freeman and family of Washington, D. C., desire to express through this paper their great appreciation of the kind expressions of sympathy extended to them by so many members of the Society of American Florists' Club of Washington and thanks for the beautiful floral offerings.

WASHINGTON NOTES.

Harry Papworth of New Orleans, La., was in town last week visiting his many friends.

Alvah Godding of Anacostia, D. C., a gardener in the employ of the government has gone to Maine for the month of September.

J. H. Small & Sons have secured the contract for the decoration of the new Emerson Hotel in Baltimore on the occasion of its opening as well as for the permanent displays.

E. C. Mayberry, president of the Washington Florists' Club is spending a two-weeks' vacation traveling through Harrisburg, Carlisle and other Pennsylvania cities, accompanied by his wife and son.

Leapley & Meyers, 904 G Street, N. W., have on exhibition in their display window a model of an airship, the propeller of which moves around in a very realistic manner, drawing the attention of a large number of passers-by.

The continuous heavy rains in and around this city last week did considerable damage to outdoor stock, washing out the beds, etc. Prior to this, the drought caused quite a loss and it is a toss-up as to which was the most costly.

Robert Shock of M. Rice & Co., Philadelphia, was a visitor in Washington last week, coming here on his convention trip and opening up with quite a display in the Ebbitt House. Mr. Shock reports the prospects in the south for the coming season as exceptionally bright.

F. H. Kramer has in the window of his 916 F Street store a square glass tank containing goldfish, aquatic plants, etc., around which is a gilt frame inside of another frame of ebony, in imitation of a painting. Due to the size of the frame, none of the glass other than that representing the sheet over a picture, is noticeable.

Harry Gottenkenny, with Gude Bros., is spending his vacation in camp on the Rappahannock River in Virginia, and Hardy Pritchard with the same firm is traveling through the eastern states on his three weeks' of pleasure. O. A. C. Oehmler, secretary of the Florists' Club of Washington, has returned from a long sojourn at Colonial Beach, Va.

George Cooke has enlarged his store at Connecticut avenue and L streets, N. W., pushing back the rear partition and taking in a small store at the side.

J. Henry Small & Sons have been awarded the contract for the decorations at the New Willard Hotel and Gude Bros. for those at the Masonic Temple on the occasion of the visit of the Veiled Prophets to this city.

Visitors: Mr. Goudey, with H. A. Dreer, Philadelphia, Pa.; Arthur Robey, of the Virginia Nurseries Co., Purcellville, Va., and southern representative of W. A. Manda; Harry Papworth, New Orleans, La.

The Boston Co-operative Flower Market, Boston, Mass., held a very successful sale of stalls on September 2. The demand was a little better than last year, only about a dozen stalls being left unsold.

NEW CROP

MOORE'S SUPERB CYCLAMEN

(Williams' Giant Strain)

This famous strain of *Giganteum* varieties have large beautifully marbled leaves and stout flower stalks, throwing the enormous flowers of great substance and delightful fragrance well above the foliage, and cannot be excelled. Very profuse bloomers of striking beauty. Vigorous growers.

	100 Seed.	1000 Seed.
Giant White Swan, pure white.....	\$1.00	\$8.00
" Crimson Queen, very rich color.....	1.25	10.00
" Rosy Morn, Satin White-Crimson Eye.....	1.00	7.00
" Salmon Queen, pale pink.....	1.25	10.00
" Masterpiece, New, extra large flower, pink, red eye.....	1.50	12.00
" Fringed, white and rose.....	1.50	12.00
" Mixed, including the above and other fine sorts.....	1.00	9.00

MOORE SEED CO.

125 Market St., Philadelphia, Pa.

Please mention *Horticulture* when writing

PRIMULA MALACOIDES

"The Glorified Baby Primrose"

Offered for the first time in America. This variety will continue sending up a succession of blooming spikes (color, beautiful lilac), giving the appearance of a shower of blooms.

The individual flowers are much larger than *P. Forbesi* and infinitely more freely branched. It is highly recommended either for cut flowers or for plants, which sell readily on sight. Per trade pkt., \$1.00; ½ pkt., 60c.

Our Fall Bulb Catalogue of Quality Bulbs, etc., now ready.
A post-card will fetch one by return mail.

Arthur T. Boddington, Seedsman, 342 W. 14th St., New York

RECENT PLANT IMMIGRANTS.

Reported by The Bureau of Plant Industry,
Dept. of Agriculture

Asparagus Sp. (*Convallariaceae*.) 30953. Rhizomes from Tchoa, Tekes Valley, Thian Shan, Chinese Turkestan. Altitude 4300 feet. "A wild asparagus, of climbing habits, growing from eight to fifteen feet in length. Found between *Berberis* bushes. The young sprouts are eaten as a spring vegetable. Of value possibly as an ornamental plant in northern regions for several purposes; viz., as a bower plant, as living festoons of small dimensions, as a porch climber and as cut greens for decorative work." (Meyer's introduction.) For distribution later.

Elaeagnus Angustifolia. (*Elaeagnaceae*.) 30940. Cuttings of oleaster from near Yamatu, Thian Shan, Chinese Turkestan, altitude of 2,500 feet "A variety of wild oleaster having a beautiful, shining, chocolate-brown bark. Found on a sandy waste along the Tekes River. Grows into a tall shrub or a small tree, of decided ornamental value for parks and gardens in the cooler sections of the United States." (Meyer's introduction.) For distribution later.

Lonicera Sp. (*Caprifoliaceae*.) 30936. Cuttings of a honeysuckle from the valley of the Chong Djighilan, Thian Shan, Chinese Turkestan. Altitude of 3,700 feet. "A shrubby honeysuckle; found in copses on peaty soil on rocky soil. Growing 4 to 6 feet in height. Young branches are of a pale yellow or white color and are attractive looking in winter. Or us probably as a park and garden shrub in northern United States." (Meyer's introduction.) For distribution later.

Lonicera Sp. (*Caprifoliaceae*.) 30937.

Cuttings of a honeysuckle from near Yengi-Malah, Thian Shan, Chinese Turkestan. Altitude of 8000 feet. "A shrubby honeysuckle, of tall, fastigate growth. A mutation. The only one seen among thousands of normally growing bushes. Of value as a shrub of rigid outlines along pathways, also as a background for flowering plants in cemeteries and in gardens where a certain formal and dignified spirit has to be preserved." (Meyer's introduction.) For distribution later.

PERSONAL.

We are glad to hear of the return of our friend Patrick O'Mara from his vacation across the sea and trust the outing and rest has fully restored his health and spirits.

W. E. Marshall, the New York seedsman, has returned from a three weeks' yacht cruise in Jamaica Bay and neighborhood. Mr. Wheeler of the same house has now taken his turn at a vacation in the same place and reports the fishing good.

Fall list ready in August.

E. S. MILLER
Wading River, N. Y.

When your competitor cuts prices below the living line, you had better raise yours and give value for the money; because it won't be long before you will require a larger capital to supply your competitor's trade.

It's a good deal easier to get a fishhook in than it is to get it out; and so it's easier to reduce prices than it is to raise them in regard to flowers.

You will always find the low-priced man flourishing while the price lasts but when circumstances compel him to raise them, and eventually he must, his trade will find their way to the other fellow, just as sure as the Hollanders come in the spring. Way down deep in the American buyer's heart there is a sneaking dislike for a cut-priced man and a wholesome respect for the man they can't saw down in price. The reason is because a buyer never knows when he touches bottom in dealing with a cut-priced man and he is always afraid his neighbor is getting the same goods for less money. He is willing to pay as much but don't wish to pay more. No argument can down the fact that the man who maintains a decent price and delivers an article accordingly is bound to win out in the long run. Horse-shoe Brand bulbs are marketed at a profit—principally because we are not philanthropists as yet—but the profit is not larger in the aggregate than it should be, and not near as large in proportion to the investment as the grower makes. They are marketed on their merits and not on the price, and they have generally been found to be worth all and more than they cost. If you want real good bulbs—try them.

Seed Trade

The Non-Warranty Clause.

The following communication has been sent to the members of the American Seed Trade Association by Secretary Kendel:

At the last Annual Convention of your Association the undersigned Committee was appointed to investigate and report on the question. Is it necessary for seedsmen to have the usual non-warranty clause printed on their stationery between the date line and signature in order to make such clause an effective condition of the contract of sale made by the correspondence between the seller-seedsman and the buyer?

We beg to submit our report as follows:

From information received, we understand that the question arose from a decision of the Supreme Court of Illinois found in the case of Summers vs. Hibbard, 153 Ill. 102, and we briefly note the facts of that case. Hibbard made Summers an offer to buy certain sheet iron. Summers gave an unqualified acceptance of said offer on their stationery which carried on the top of the sheet above the date line, firm's name, etc., in small printed type the clause, "All sales subject to strikes and accidents." Summers failed to deliver and set up as a defense this clause, claiming it as a term of the contract. The Court held that the written terms of the contract were absolute, definite and conclusive and that the printed clause was antagonistic to the written terms and must therefore be discarded.

In the later Illinois case of *Anaconda Copper Mining Co. vs. Houston*, 107 Ill. App. 183, there was a printed clause at the top of the stationery and above the date line, etc., preceded, however, with shipping directions in typewriting. The Court held such clause a part of the contract, saying: "There being a written designation of the shipping route at the head of the letter sheet in close proximity to the printed condition * * * and there being no inconsistency between the written and printed parts of the contract * * * the acceptance of the order without objection * * * constituted an agreement to ship in accordance with * * * the printed clause."

The Court reviewed the Summers case, explaining the difference in facts of the two cases. It is also suggested that there would be no dispute if in the typewritten part of the letter a direct reference to the printed clause was made; and the Court gives this dictum:

"We are inclined to the opinion that without some such reference a printed condition should not be considered a part of the written contract where an absolute order is given in writing and accepted by the other party."

We have also considered other Illinois cases and there appears no divergence from the law as above stated.

Therefore, answering the query above propounded, so far as the decisions of Illinois are concerned, we are of the opinion that the seedsman can print his disclaimer clause at the top, or at the bottom, or on the reverse side of the letter sheet, upon which he is making his contract of sale, and have same an effective condition of his contract, provided in the

written part of his letter direct reference to such clause as a part of the contract is made, as, for example, "Subject to the above (or below, etc.) printed conditions we offer (or accept), etc."

We suggest that this method of placing the disclaimer clause at the top or bottom of the letter sheet, with direct reference thereto in the body of the typewritten letter, has an advantage over printing the clause between the date line and signature, inasmuch as not all correspondence of seedmen constitute offers or acceptance of prices or terms of sales, and the direct reference above advised distinctly comes within the ruling of the *Anaconda* case, above cited and many other decisions, and will avoid the possibly unfavorable judicial determination that the printed clause is antagonistic to the written terms and so void.

And as to the law in states other than Illinois, our investigations indicate that most Courts sustain, while some Courts do not establish the Illinois doctrine of exclusion of printed clauses outside of the date line and signature, unless referred to in the body of the letter, on the well known theory that a document must be read by its "four" or "eight corners." Yet we maintain our opinion above expressed and for these reasons:

First, the Courts might decide, under the facts of the particular case, (as in the Summers case), that the printed disclaimer clause was not contemplated by the parties as a condition of the contract.

Second, Even if the Courts held that the printed clause was a condition of the contract, yet it may be decided that the printed clause was antagonistic to the written terms and so void under a well established rule of law, because the written words propose to sell certain seeds carrying an implied warranty as true to type, etc., while the printed clause expressly robs the written words of any such force. Of course, all this is obviated by the direct reference in the written agreement to the printed clause.

Therefore we conclude by suggesting that the use of the disclaimer clause as advised provides greater security to the seedsman and it certainly seems more frank and better business for the seedsman to state his conditions in the direct, unambiguous and not at all difficult manner suggested.

Respectfully submitted,

CURTIS NYE SMITH, KIRBY B. WHITE,
SIMEON F. LEONARD.

Foreign Grass Seed Crops.

Advices from Europe bearing date of August 24th indicate that the crops are nearly all saved now and have reached the warehouses for cleaning and grading—with the exception of orchard grass and the rye grasses. Everything seems to be turning out disappointing as to quantity on account of the very hot, dry summer. It is feared that not only for this season (1911-12) but also the next (1912-13) the effects of the extraordinary heat and drought will be felt. As far as can be judged at present the fields sown last spring intended for 1912-13 crop will be lost entirely.

As for the quotations for this sea-

son 1911-12 there is at present great uneasiness and a general feeling that we shall see higher figures than last year on at least a few of the varieties. Those in a position to know say that not one variety thus far threshed and cleaned has given a satisfactory result as to yield. So far, yields are very small, and the seeds are unusually light—hence there is a greater loss than usual in the shape of light matter and immature seeds. But after these losses have been sustained, the resultant samples are of a nice bright color and they must all germinate very strongly—not having suffered in the least by wet weather while curing.

Bozeman, Mont.—The beginning of what is likely to develop into a new industry of considerable importance to this valley was started here this spring when the Jerome B. Rice Seed Company contracted with a number of Galatin valley farmers to devote a certain acreage to the raising of seed peas.

This year about 2000 acres were planted to peas and the result demonstrates that with the proper attention this crop can be made a very profitable one to the farmers of this valley.

From the experience this year the seed company is satisfied that this valley is well adapted to the raising of peas in large quantities and will provide for a larger acreage next year and should thorough trial prove that the climate and soil of the locality is as favorable for the crop as is confidently expected, a big cannery will be located here and the raising of peas will become one of the important industries of the country.—*Bozeman Chronicle*.

Of Interest to Retail Florists

IN NEW YORK.

What's the news from this village? Well, nothing specially, only that everlasting hopes are keeping green, hundreds of thousands have returned from their vacation worlds and paradises to "Home, Sweet Homes" here during the past week, and in the mighty armies of tired out humanity emerging from ferries and railroad depots we can (and we hope not in vain) conjure up a not far distant demand for nice little house plants which the good wife or sister considers essential to the first reception to old friends.

In this returning homewards of the great masses there is more than a suggestiveness of get-readiness which the wise retailer will not fail to understand and it is the one who displays suitable, dependable plants at reasonable prices with intelligent instruc-

idence. It seemed to be all wrong to us that a little suggestive missionary work is not done by florists for these gigantic outpourings of humanity's desires for after all is said and done the future prosperity of floriculture depends on the common people. Those who fly away to Europe leaving unpaid bills behind are but the will o' the wisps which lead ambition into swamps.

CHICAGO NOTES.

Greenhouse Fire.

The third florist to suffer loss by fire very recently was August Jurgens, 2247 Herndon street, whose place was badly injured August 30th. Mr. Jurgens, who has been here 20 years, was aroused at 11 P. M. by his daughter, who had awakened to find the house full of smoke. So dense was the smoke that it was with difficulty that the five small children and their parents made their escape. The five greenhouses were badly damaged, about 25 feet being burned from each, and the adjoining shed containing an automobile, tools, etc., is a complete loss. The horses were saved and fortunately the most of the early bulbs were planted and the Holland bulbs arrived later. There was no insurance and Mr. Jurgens estimates his loss between three and five thousand dollars. Work has already begun on the houses which will be put in shape for winter use and at some future date a new range will be built. The house, which was connected with the greenhouses, is also badly damaged by fire and water.

Wedding Bells.

Saturday, August 26th, Allie Zeck and Emma Pagels were quietly married and slipped away to Milwaukee without announcing the happy event to their many friends. The groom is the son of John Zeck of Zeck & Mann, and has been associated with them in the wholesale commission business for some time. He is an active member of the Chicago Florists' Club and a leader in the bowling games, and has the best wishes of the entire trade. Mr. and Mrs. Zeck have begun house-keeping at 3630 N. Leavitt street.

Saturday, September 2nd, Emily Blewitt, eldest daughter of H. C. Blewitt of Desplaines, Ill., and John Prickett of the Desplaines Floral Co., were married at Desplaines. Both parties are well known and are receiving congratulations on the happy culmination of a long engagement.

At the same time occurred the marriage of Arthur, second son of H. C. Blewitt, and Grace Schaffer. The large house of the Desplaines Floral Co. will be the home of the two couples.

Robert J. Windler of St. Louis, Mo., and Amy Zender of Chicago were married September 5th at the home of the bride's parents at Rogers Park. The groom is a well known retailer at St. Louis and president-elect of the St. Louis Florists' Club, and the bride is daughter of Adam Zender, one of the old time florists on Park Ridge avenue, Chicago. Mr. and Mrs. Windler will reside in St. Louis, where a hearty reception awaits them.

News Items.

Among those who enjoy fall vacations is Charles Zinn, who takes two weeks in Michigan.

All the wholesale florists close their doors Labor Day as near noon as orders would permit.

A Henderson & Co. are now located at Room 429, Atlas Bldg., and business is very encouraging with the new firm.

Charles Ernie, manager of the flower department of the E. H. Hunt Co. will embark in the retail business about the middle of September. Mr. Ernie has not yet fully decided upon

his location, but expects that it will be in the down-town section.

Trade Notes.

The Geo. Wittbold Co. have just received another lot of Holland bulbs, a little later than usual on account of the cholera quarantine, but the stock opens up in fine shape. Lilies, of which they will grow 15,000 this year, are being planted so as to give continuous crop all the year. This year Mr. Wittbold cut his first gladiolus April 18th and will have them till frost comes.

Visitors—J. H. Hill, Richmond, Ind.; Mrs. Lovell, Laurel, Miss.; J. W. Moran, Maplewood Greenhouses, Bloomington, Ill.; Mr. Elliott, Jr., Brighton, Mass.; Henry Dittmann, Newcastle, Ind.; Alfred Pahud, Indianapolis, Ind.

BALTIMORE NOTES.

Mr. and Mrs. Robert Halliday are spending their vacation at Tillman's Island, Md.

Lehr Bros., of Brooklyn, Md., have planted their new rose house which has just been completed to Maryland, Ivory and Killarney.

The "Fernery" on North Charles street, near the Union Station, will be reopened by the C. H. Wagner Company after necessary alterations and repairs have been made to the store. Charles H. Wagner, formerly manager of the North Charles street store of Samuel Feast & Sons, will be in charge.

Richard Vincent, Jr., & Sons will give their annual display of dahlias and cannas in connection with the Harvest Home Festival of the Ebenezer Methodist Episcopal Church on September 26, 27, 28 and 29. A special train for Cowenton will leave Camden Station each day.

The members of the Peninsula Horticultural Society were the guests of J. G. Harrison & Sons at Berlin, Md., on the occasion of their annual summer meeting held last month. Upon the completion of their business, the delegates made a trip to Ocean City, a nearby seaside resort. The Harrison nurseries cover about 2,000 acres and it was from here that the much admired peaches distributed at the convention, were grown.

MOSS

**Extraordinary Offer of
Sphagnum Moss. Your
Opportunity to Buy Cheap.**

Having our own men in Jersey who gather and bale the moss, we are in a position to make the following extraordinary low prices.

Per 7 bbl. bale, \$2.25; 10 bale lots at \$2.00 each.

Per 10 bbl. bale, \$3.50; 10 bale lots at \$3.15 each.

This special offer is good only for a limited time. It is therefore important that orders be placed at once; even if you do anticipate your wants ahead of actual necessity.

Each bale is covered with burlap, thus insuring cleanliness around the store and no waste.

FIELD GROWN CARNATION PLANTS

See our advertisement in last week's Horticulture.

We still have some fine plants of most of the varieties to offer.

Distributing Agents for the great new roses for 1912.

Flower Market Reports.

BOSTON Business keeps a-moving in this market and is apparently gaining although the gain is slow. The present week is a decided improvement over the last in volume of business done and good reports are received from the buying trade throughout New England, but the heavy increase in cut of some staples hinders any general advance in values and the accumulated stock would give the impression that trade has fallen off, which, happily, is not so. Quality in general shows a very gratifying gain. This applies to asters, especially, which are better than at any previous time this year but are hopelessly over-loaded and to roses which in the newer sorts such as Hillingdon, Bulgarie and Radiance are rapidly progressing towards a commanding position in the daily demand. All other staple stock is in normal supply and demand.

The week ending the **BUFFALO** month of August showed a slight improvement in the market. There was plenty of stock and of good quality. Asters were at their best, also gladioli and other stock. The demand has been a little better than heretofore though there are too many of the short ordinary quality of asters which are hard to dispose of at any price. Beauties continue to be good and have sold satisfactorily, also choice Maryland, Kaiserin and Pres. Carnot. Fall weddings are noticeable and lily of the valley has had demand, also white roses

and Perles—the latter being very fine from new crops. Richmonds are coming to the front but the warm weather has a tendency to check the sales to some extent. Golden Glow chrysanthemums are seen more in quantity but too early for the trade. A good supply of greens in adiantum, Asparagus plumosus and Sprengeri is had.

There is nothing strikingly different in the condition of the cut flower market from that of the past four weeks except that the glut is a thing of the past. First class stock moves more slowly some days than is satisfactory to the grower, but on the whole the past week has seen for

good flowers go to waste. There is generally too much stock of a lower grade to be used to advantage and it is here that the loss occurs. There has been a noticeable increase in shipping orders which has helped to use up the best stock. American Beauties are particularly in demand for this as they stand shipping better now than the softer roses and all Beauties were used up promptly this week. Asters are still leading in quantity. Some very fine blooms are in the market and when there is so much to choose from the small ones are sure to be left unsold. Gladioli are not coming in in such overwhelming

Flower Market Reports

(Continued from page 377)

ing quantities as formerly. Carnations are daily gaining in length of stem and size of bloom. The miscellaneous stock this week includes cosmos, the first dahlias, a few sweet peas, celosia, golden rod, etc. Some very good lily of the valley is now offered.

Most everybody is on deck again and we hope the time is not long before we all are hustling again. Considering the many fall weddings in view this wish is quite certain of fulfillment. The quality of flowers, especially roses, is greatly improved over two weeks ago but prices remain about the same. Gladioli are giving out in quality but are heavy in supply. This was a good year for amateurs in asters. They brought the best to the market and therefore found ready sales for them in stores.

NEW YORK The market keeps oh! so sluggish with a gradually increasing amount of stock which becomes more difficult to move. Prices remain in almost every instance the same as those quoted last week, the only difference being a larger variety to choose from. There are numerous pretty things to be had that would surely tend to coax were the customers there to see or the passerby disposed to buy, but the rule is to reef the sail and go close to the wind—and the only wind is expletive hot air. For the matter of five dollars one can get an immense showing of gladioli, hydrangea, lilies and other very showy and useful outdoor flowers and as for roses—well, it just depends on what you want them for.

PHILADELPHIA Storekeepers are beginning to fix up their places now—making the interiors attractive—paying some attention to their window displays, and carrying more stock on hand. For some time back it has been a case of keeping little if anything on hand, and running around to the wholesalers whenever a little order came in. But this is now changed for the better, and trading from now on will be more satisfactory in every way. The present is the first week of the dahlia season, and while they reach us on a “no demand” market their advent is a diversion and gives an air of novelty to the situation. So far, the stock is as a rule short-stemmed. Among the principal varieties seen around are White Swan,
